Investigators and co-investigators who have received Special Research Grant awards in the Animal Health area during the past five years must include a brief summary of progress and a list of publications resulting from such grants.

The overall objective of this research is to develop and/or refine methodologies for suppression of animal losses due to infectious and noninfectious diseases and internal and external parasites of livestock, poultry and major aquaculture species.

Research should be directed toward: (1) Basic studies to clarify high-priority infectious and noninfectious diseases and parasites and their interactive effects on animal health; and (2) development of practical, implementable management systems for the producer to prevent or alleviate these significant causes of animal losses. Interdisciplinary research is encouraged or predisposing factors to animal disease including the effects of production environment. Studies to more clearly define the condition of the well-being of animals used in agricultural research is encouraged. Other studies to define the needs for proper animal care in Animal Health Research and Teaching will receive consideration for funding, especially in the Swine and Poultry areas. Research may include clarification of complex or unknown etiologies including nutritional, physiological, genetic, and environmental interactions; development of improved methods of detecting disease agents or antibodies in animals; animal products, tissues, etc.; clarification of disease pathogenesis; determination of methods of disease transmission including transmission by embryo transfer, artificial insemination and importation of animal products (such studies should mimic as closely as possible the conditions in practice of collection, preparation and use of embryos, semen or such products); development of improved methods of immunization against disease agents that will provide solid and persistent protection without compromising diagnosis; development of alternative disease eradication methods so as to limit the use and dependence on biotoxic substances (such alternatives may include biologic methods, sterile male techniques, artificial pheromones, etc.); development of other disease prevention, control and eradication technology; and epidemiology and the evaluation of the economics of disease and disease prevention or control.

Emphasis on enteric diseases of Beef and Dairy Cattle, Swine, Chickens and Turkeys will receive special consideration, especially proposals which offer solutions to the *Salmonella enteritidis* and other Salmonella problems facing these industries.

The specific commodity areas, and their subcategories (not prioritized), in which projects will be funded are listed below. The commodity areas will be funded in the approximate percentages shown. Utilizing the recommendations of the peer panels, the Administrator of CSRS will make the final determination on specific grants to be awarded.

1.1 Beef Cattle (Approximately 41 Percent of Available Funds)

(1) Respiratory diseases.
(2) Reproductive diseases.
(3) Digestive and enteric dieseases (including Salmonellosis).
(4) Parasitic diseases.
(5) Metabolic diseases.

1.2 Dairy Cattle (Approximately 18 Percent of Available Funds)

(1) Mastitis.
(2) Reproductive diseases.
(3) Respiratory diseases.
(4) Digestive and enteric diseases (including Salmonellosis).
(5) Metabolic diseases.

1.3 Swine (Approximately 18 Percent of Available Funds)

(1) Enteric diseases (including Salmonellosis).
(2) Respiratory diseases.
(3) Reproductive diseases.
(4) Metabolic and musculoskeletal diseases.
(5) Parasitic diseases.

1.4 Poultry (Approximately 13 Percent of Available Funds)

(1) Respiratory diseases.
(2) Metabolic and immunologic diseases.
(3) Enteric diseases (Special emphasis on *Salmonella enteritidis* in Turkeys and Chickens).
(4) Skeletal diseases.

1.5 Sheep and Goats (Approximately 5 Percent of Available Funds)

(1) Musculoskeletal diseases.
(2) Respiratory diseases.
(3) Digestive and enteric diseases.
(4) Internal parasitic diseases.

1.6 Horses (Approximately 3 Percent of Available Funds)

(1) Respiratory diseases.
(2) Digestive and enteric diseases.
(3) Reproductive diseases.
(4) Musculoskeletal diseases.
(5) Parasitic diseases.

1.7 Aquaculture (Approximately 2 Percent of Available Funds)

(1) Infectious diseases.
(2) Parasitic diseases.

Program Area

2.0 Aquaculture Research

CSRS Contacts: Dr. Meryl Broussard; Telephone: (202) 475–5158, Dr. Howard S. Teague; Telephone: (202) 447–3847.

A total of $137,460 is available for this program area for fiscal year 1989. No more than $80,000 will be awarded for support of any one project under this program area. The objective of this research is to provide and improve upon the scientific and technical base needed by the aquaculture industry.

Because of the limited funds for this program area, only proposals focused on commercially important aquaculture species in the following *specific area of inquiry* will be considered:

How to Obtain Application Materials

2.1 Disease and parasite control

Copies of this solicitation, the Grant Application Kit, and the Administrative Provisions governing this program, 7 CFR Part 3400 (50 FR 5498, February 8, 1985), as amended (53 FR 49640, December 8, 1988), may be obtained by writing to the address or calling the telephone number which follows: Proposal Services Unit, Grants Administrative Management, Office of Grants and Program Systems, Cooperative State Research Service, U.S. Department of Agriculture, Suite 303, Aerospace Building, 901 D Street, SW., Washington, DC 20250–2200, Telephone: (202) 475–5048.

What to Submit

An original and nine copies of each proposal submitted are requested. This number of copies is necessary to permit thorough, objective peer evaluation of all proposals received before funding decisions are made.

Each copy of each proposal must include a Form CSRS–661, "Grant Application." Proposers should note that one copy of this form, preferably the original, must contain pen-and-ink signatures of the principal investigator(s) and the authorized organizational representative. (Form CSRS–661 and the other required forms and certifications are contained in the Grant Application Kit.)

Members of review committees and the staff expect each project description to be complete in itself. Grant proposals must be limited to 15 pages (single-spaced) exclusive of required forms, the summary of progress for any prior Animal Health Special Research grants, bibliography, and vitae of the principal investigator(s), senior associate(s) and other professional personnel. Reduction by photocopying or other means for the purpose of meeting the 15-page limit is not permitted. Attachment of appendices is discouraged and should be included only if pertinent to understanding the proposal. Reviewers are not required to read beyond the 15-page maximum to evaluate the proposal.

All copies of a proposal must be mailed in one package. Also, please see that each copy of each proposal is stapled securely in the upper left-hand corner. DO NOT BIND. Information should be typed on one side of the page only. *Every effort should be made to ensure that the proposal contains all pertinent information when initially submitted.* Prior to mailing, compare your proposal with the guidelines contained in the Administrative Provisions which govern the Special Research Grants Program, 7 CFR Part 3400.

Applicants should not submit the same research proposal twice in the same fiscal year to different research program area categories within the Animal Health and Aquaculture Special Research Grants program areas. Duplicate proposals will be returned without review.

Where and When to Submit Grant Applications

Each research grant application must be submitted by the date set forth below to: Proposal Services Unit, Grants Administrative Management, Office of Grants and Program Systems, Cooperative State Research Service, U.S. Department of Agriculture, Suite 303, Aerospace Building, 901 D Street SW., Washington, DC 20250–2200.

To be considered for funding during fiscal year 1989, *proposals must be postmarked by February 27, 1989,* for both the Animal Health Research and the Aquaculture Research Program areas.

One copy of each proposal not selected for funding will be retained for a period of one year. The remaining copies will be destroyed.

Special Instructions

On Form CSRS–661 provided in the Grant Application Kit, the Special Research Grants Program should be indicated in Block 7, and the applicable program area and commodity area should be indicated in Block 8. *Select one program area only.* The number assigned to the commodity area must also be cited in Block 8. Example: (Animal Health, 1.5 Sheep and Goats). The final determination of the program area and commodity area will be made by agency staff members and/or the appropriate peer review panel. The code numbers assigned to commodity areas and specific areas of inquiry are listed below:

1.0 *Animal Health Research (use appropriate commodity area 1.1 through 1.7).*
1.1 *Beef Cattle.*
1.2 *Dairy Cattle.*
1.3 *Swine.*
1.4 *Poultry.*
1.5 *Sheep and Goats.*
1.6 *Horses.*
1.7 *Aquaculture.*
2.0 *Aquaculture Research.*
2.1 *Disease and Parasite Control.*

Supplementary Information

The Special Research Grants Program is listed in the Catalog of Federal Domestic Assistance under No. 10.200. For reasons set forth in the final Rule-

related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524–0022.

Done at Washington, DC, this 12th day of December 1988.

John Patrick Jordan,

Administrator, Cooperative State Research Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Initial List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies

AGENCY: National Institute on Drug Abuse, ADAMHA, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories initially certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (53 FR 11986). A similar notice listing all currently certified laboratories will be published monthly, updated to include laboratories which successfully complete the certification process. If any listed laboratory fails to maintain its certification, it will be omitted from updated lists until such time as it is recertified as meeting the Guidelines' requirements.

FOR FURTHER INFORMATION CONTACT: Office of Workplace Initiatives, National Institute on Drug Abuse, Room 10a–53, 5600 Fishers Lane, Rockville, Maryland 20857

SUPPLEMENTARY INFORMATION: Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100–71. Subpart C of the Guidelines,"Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus on-site inspection. To maintain that certification a laboratory must participate in an every-other-month performance testing program plus periodic, on-site inspections. In accordance with Subpart C of the Guidelines, the following laboratories meet the standards set forth in the Guidelines:

Maryland Medical Laboratories, 1901 Sulpher Spring Road, Baltimore, MD 21227, 301–247–9100

International Clinical Laboratories, 8000 Sovereign Row, Dallas, TX 75247, 214–638–1301

American Medical Laboratories, Inc., 11091 Main Street, P.O. Box 188, Fairfax, VA 22030 703–691–9100

ChemWest Analytical Laboratories, Inc., 600 West North Market Blvd., Sacramento, CA 95834, 916–923–0840

CompuChem Laboratories, Inc., 3308 Chapel Hill/Nelson Hwy., P.O. Box 12652, Research Triangle Park, NC 27709, 919–549–8263, 919–248–6494

Medtox Laboratories, Inc., 402 West County Road D, St. Paul, MN 55112, 612–636–7466

Nichols Institute, 7323 Engineer Road, San Diego, CA 92111, 619–278–5900

Med Arts/South Community Hospital, 1001 Southwest 44th Street, Oklahoma City, OK 73109, 405–636–7041

South Bend Medical Foundation, Inc., 530 North Lafayette Blvd., South Bend, IN 46601, 219–234–4176

International Toxicology Laboratories, 2201 W. Campbell Park Drive, Chicago, IL 60612, 312–633–3360.

Richard A. Millstein,

Deputy Director, National Institute on Drug Abuse.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030)

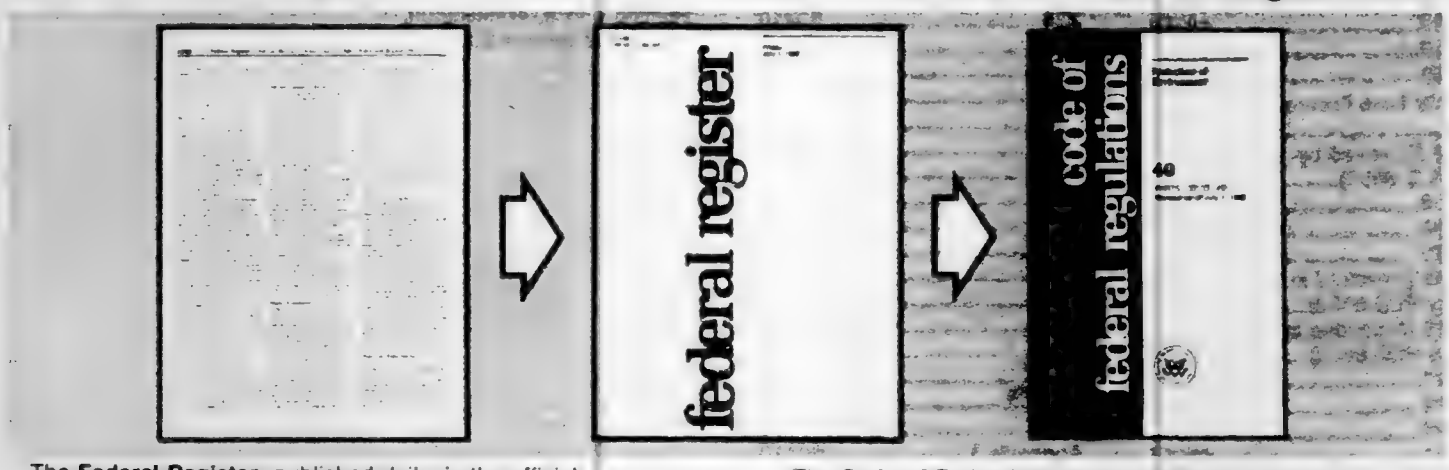
The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 193 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current **CFR** volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of **CFR** Sections Affected). Price inquiries may be made to the **Superintendent** of Documents, or the Office of the Federal Register.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

WHERE:

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202–523–5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
Room 8544,
Federal Building,
300 N. Los Angeles St.,
Los Angeles, CA
RESERVATIONS: Call the Federal Information Center.

Rules and Regulations

Federal Register
Vol. 53, No. 242
Friday, December 16, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 88-137]

Citrus in Buffer Zones in Japan

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the Citrus Fruit regulations by permitting cultivation of nine additional citrus varieties in Japan's Unshu orange buffer zones. After studying recent scientific reports on citrus-canker resistance, we have concluded that the effectiveness of buffer zones planted with citrus varieties at least as canker-resistant as the Unshu orange will remain unchanged; we therefore see no reason to exclude those citrus varieties from Unshu orange buffer zones. This rule will affect the citrus supply and demand in Japan's domestic market. It will not affect the supply of or demand for Unshu oranges grown for export to the United States. We are also amending the regulations to specify certain requirements concerning buffer zones.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: Ed Imai, Senior Staff Officer, Biological Assessment Support Staff, PPQ, APHIS, USDA, Room 632, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8891.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 7 CFR 319.28 (referred to below as the regulations) restrict the importation of fruits and peel capable of introducing certain citrus diseases, including citrus canker, into the United States. Varieties of species of the genus *Citrus* considered likely to spread any of these destructive diseases to U.S. citrus crops are not permitted to be imported into the United States from foreign areas where these diseases occur.

Unshu oranges, known to be resistant to citrus canker, are grown under a system of safeguards in special citrus canker-free areas in Japan, from which they have been imported into designated states since 1967. One measure critical to the success of the export program is the buffer zone isolating each Unshu orange export area from potential sources of citrus canker.

On June 15, 1988, we published in the **Federal Register** (53 FR 22330-22331, Docket Number 87-061), a document proposing to specify certain requirements concerning Japan's buffer zones to ensure that they are free of citrus canker. In the same document, we also proposed to allow cultivation in the buffer zones of nine citrus varieties with canker resistance equal to or greater than the Unshu orange's. Working independently, the authors of the scientific papers on which we base this rule arrived at identical conclusions about the high canker-resistance of the nine varieties of citrus: None of these citrus varieties will increase the exposure to citrus canker of Unshu oranges in the export areas. On the basis of the current scientific literature, including tests studied and approved by Plant Protection and Quarantine (PPQ), the nine citrus varieties will be allowed into the buffer zones that have been limited to Unshu oranges.

Our proposal invited the submission of written comments, which were required to be postmarked or received on or before August 15, 1988. We did not receive any comments. Based on the rationale set forth in the proposal, we are amending the regulations as proposed.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule will allow additional varieties of citrus to be grown in buffer zones surrounding Unshu orange export areas. This will affect citrus supply and demand within Japan, but not within the United States. Because citrus grown in buffer zones cannot be imported into the United States, the volume of oranges imported from Japan will be unaffected by this regulatory change.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

Effective Date

The Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective upon publication. This action is necessary to relieve unnecessary restrictions on the importation of Unshu oranges into the United States. The shipping season for this fruit begins in mid-October, and delays in making this rule effective could cause economic losses for some persons.

List of Subjects in 7 CFR Part 319

Agricultural commodities, Citrus canker, Fruit, Imports, Plant diseases,

Plant pests, Plants (Agriculture), Quarantine, Transportation.

Accordingly, we are amending 7 CFR Part 319 as follows:

PART 319—FOREIGN QUARANTINE NOTICES

1. The authority citation for Part 319 continues to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 319.28, paragraph (b) introductory text and (b)(1) are revised to read as follows:

§ 319.28 Notice of quarantine.

* * * * *

(b) The prohibition does not apply to Unshu oranges (*Citrus reticulata* Blanco var. *unshu,* Swingle [*Citrus unshiu* Marcovitch, Tanaka]), also known as Satsuma, grown in Japan and imported under permit into any area of the United States except for Alabama, American Samoa, Arizona, California, Florida, Georgia, Louisiana, Mississippi, Nevada, New Mexico, North Carolina, the Northern Mariana Islands, Puerto Rico, South Carolina, Texas, and the Virgin Islands of the United States: *Provided,* that each of the following safeguards is fully carried out:

(1) The Unshu oranges must be grown and packed in isolated, canker-free export areas established by the Japanese Plant Protection Service. Only Unshu orange trees may be grown in these areas, which must be kept free of all citrus other than the propagative material of Unshu oranges. The export areas must be inspected and found free of citrus canker and prohibited plant material by qualified plant pathologists of both Japan and the United States. The export areas must be surrounded by 400-meter-wide buffer zones. The buffer zones must be kept free of all citrus other than the following 10 varieties: Buntan Hirado (*Citrus grandis*); Buntan Vietnam (*C. grandis*); Hassaku (*C. hassaku*); Hyuganatsu (*C. tamurana*); Kinkan (*Fortunella* spp. non *Fortunella hindsii*); Kiyomi tangor (hybrid); Orange Hyuga (*C. tamurana*); Ponkan (*C. reticulata*); Unshu (*C.* unshiu Marcovitch, Tanaka [*Citrus reticulata* Blanco var. *unshu,* Swingle]); and Yuzu (*C. junos*). The buffer zones must be inspected and found free of citrus canker and prohibited plant material by qualified plant pathologists of both Japan and the United States.

* * * * *

Done in Washington, DC, this 13th day of December 1988.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

---

7 CFR Part 319

[Docket 88–155]

Importation of Apples, Peaches, and Citrus From Sonora

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: We are affirming without change an interim rule that amended the Fruits and Vegetables regulations by removing Guaymas from the list of definite areas in Sonora, Mexico, determined to be free from certain injurious insect pests and from which apples, grapefruit, oranges, peaches and tangerines may be imported without treatment for these pests. This action is necessary to prevent the introduction into the United States of injurious insects.

EFFECTIVE DATE: January 17, 1989.

FOR FURTHER INFORMATION CONTACT: Frank E. Cooper, Senior Operations Officer, Port Operations, PPQ, APHIS, USDA, Room 677, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8248.

SUPPLEMENTARY INFORMATION:

Background

The Fruits and Vegetables regulations in 7 CFR 319.56 *et seq.* (referred to below as the regulations) impose restrictions on the importation of fruits and vegetables in order to prevent the introduction and dissemination of injurious insects, including fruit and melon flies, that are new to or not widely distributed within and throughout the United States. Section 319.56–2(h) of the regulations allows apples, grapefruit, oranges, peaches and tangerines to be imported from certain municipalities in Sonora, Mexico, without treatment for five fruit flies known to occur in Mexico (*Ceratitis capitata, Anastrepha ludens, A. serpentina, A. obliqua, and A. fraterculus*) if surveys show the municipality to be free of these insect pests.

In an interim rule effective July 20, 1988, and published in the **Federal Register** on July 26, 1988 (53 27955–27956, Docket Number 88–102), we removed Guaymas, Sonora, Mexico, from the list of municipalities in § 319.56–2(h). Comments on the interim rule were required to be postmarked or received on or before September 26, 1988. We did not receive any comments. The facts presented in the interim rule still provide a basis for this rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This action will prevent the importation of apples, grapefruit, oranges, peaches, and tangerines from Guaymas into the United States, unless they are treated for the five listed fruit flies. This change should have no effect on small entities since no commercial shipments of such fruit have been moving from Guaymas to the United States, and there are no planned commercial shipments of such fruit.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The regulations in this subpart contain no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 7 CFR Part 319

Agricultural commodities, Fruit, Imports, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation.

PART 319—FOREIGN QUARANTINE NOTICES

Accordingly, we are adopting as a final rule, without change, the interim rule amending 7 CFR 319.56–2(h) that was published at 53 FR 27955–27956 on July 26, 1988.

Authority: 7 U.S.C. 150dd, 150ee, 150ff; 151–167; 7 CFR 2.17, 2.51, and 371.2(c).

Done at Washington, DC, this 12th day of December 1988.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88–29010 Filed 12–15–88; 8:45 am]

BILLING CODE 3410-34-M

---

7 CFR Part 354

[Docket No. 88–186]

Commuted Traveltime Periods

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations concerning overtime services provided by employees of Plant Protection and Quarantine (PPQ) by adding commuted traveltime allowances in Ohio. Commuted traveltime allowances are the periods of time required for PPQ employees to travel from their dispatch points and return there from the places where they perform Sunday, holiday, or other overtime duty. The Government charges a fee for certain overtime services provided by PPQ employees and, under certain circumstances, the fee may include the cost of commuted traveltime. This action is necessary to inform the public of the commuted traveltime between these locations.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: Paul Eggert, Director, Resource Management Support, PPQ, APHIS, USDA, Room 614, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7250.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 7 CFR Part 354 require inspection, laboratory testing, certification, or quarantine of certain plants, plant products, animals and animal byproducts, or other commodities intended for importation into, or exportation from, the United States. When these services must be provided by an employee of PPQ on a Sunday or holiday, or at any other time outside the PPQ employee's regular duty hours, the Government charges a fee for the services in accordance with 7 CFR Part 354. Under circumstances described in § 354.1(a)(2), this fee may include the cost of commuted traveltime. Section 354.2 contains administrative instructions prescribing commuted traveltime allowances, which reflect, as nearly as is practicable, the periods of time required for PPQ employees to travel from their dispatch points and return there from the places where they perform Sunday, holiday, or other overtime duty.

We are amending § 354.2 of the regulations by adding commuted traveltime allowances between certain locations in Ohio. The amendments are set forth in the rule portion of this document. This action is necessary to inform the public of the commuted traveltime between these locations.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

The number of requests for overtime services of a PPQ employee at the locations affected by our rule represents an insignificant portion of the total number of requests for these services in the United States.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Effective Date

The commuted traveltime allowances appropriate for employees performing services at ports of entry, and the features of the reimbursement plan for recovering the cost of furnishing port of entry services, depend upon facts within the knowledge of the Department of Agriculture. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find upon good cause that prior notice and other public procedure with respect to this rule are impracticable and unnecessary; we also find good cause for making this rule effective less than 30 days after publication of this document in the **Federal Register.**

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 7 CFR Part 354

Agricultural commodities, Exports, Government employees, Imports, Plants (Agriculture), Quarantine, Transportation.

Accordingly, 7 CFR Part 354 is amended as follows:

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

1. The authority citation for Part 354 continues to read as follows:

Authority: 7 U.S.C. 2260, 49 U.S.C. 1741; 7 CFR 2.17, 2.51, and 371.2(c).

2. Section 354.2 is amended by adding, in alphabetical order, the information as shown below:

§ 354.2 Administrative instructions prescribing commuted traveltime.

BILLING CODE 3410-34-M

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 679]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 679 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period December 16 through December 22, 1988. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATES: Regulation 679 (§ 907.979) is effective for the period December 16 through December 22, 1988.

FOR FURTHER INFORMATION CONTACT: Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 125 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1988-89 adopted by the Navel Orange Administration Committee (Committee). The Committee met publicly on December 13, 1988, in Visalia, California, to consider the current and prospective conditions of supply and demand and recommended, by a six to four vote, a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the demand for navel oranges is good for the larger sizes and weaker on the smaller sizes.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate policy of the Act. Interested persons were given an opportunity to submit information and views on the regulations at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Arizona, California, Marketing agreements and orders, Navels, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR Part 907 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 907.979 is added to read as follows:

Note.—This section will not appear in the Code of Federal Regulations.

§ 907.979 Navel Orange Regulation 679.

The quantity of navel oranges grown in California and Arizona which may be handled during the period December 16, 1988 through December 22, 1988, are established as follows:

(a) *District 1:* 1,692,000 cartons;
(b) *District 2:* Unlimited cartons;
(c) *District 3:* 108,000 cartons;
(d) *District 4:* Unlimited cartons.

Dated: December 14, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 88-29093 Filed 12-15-88; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 910

[Lemon Reg. 644]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 644 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 261,192 cartons during the period December 18 through December 24, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 644 (§ 910.944) is effective for the period December 18 through December 24, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601 through 674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy of 1988–89. The Committee met publicly on December 13, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that demand for lemons is beginning a seasonal decline.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available on which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of this Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.944 is added to read as follows:

Note.—This section will not appear in the Code of Federal Regulations.

§ 910.944 Lemon Regulation 644.

The quantity of lemons grown in California and Arizona which may be handled during the period December 18, 1988, through December 24, 1988, is established at 261,192 cartons.

Dated: December 14, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88–NM–101–AD; Amdt. 39–6089]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Boeing Model 727 series airplanes, which requires the inspection and, if necessary, repair and/or modification of certain areas of the main landing gear (MLG) wheel well pressure floor. This amendment is prompted by recent reports of cracking of the MLG wheel well pressure floor, that resulted in the loss of cabin pressure. Cracks in this area, if not detected and corrected, could lead to the loss of cabin pressurization.

EFFECTIVE DATE: January 20, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Airframe Branch, ANM–120S; telephone (206) 431–1924. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Boeing Model 727 series airplanes, which requires the inspection and, if necessary, repair and/or modification of certain areas of the main landing gear (MLG) wheel well pressure floor, was published in the **Federal Register** on August 23, 1988 (53 FR 32080).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The Air Transport Association (ATA) of America, on behalf of its affected member operators, suggested that the

inspection interval be expressed in "flight cycles," "cycles," or "landings," since the term "flights," as specified in the proposal, could be misinterpreted or misunderstood. This commenter also suggested that the phrase "after the effective date of the AD" be included when describing the proposed compliance period. The FAA concurs and the pertinent wording in paragraph A. of the final rule has been changed to specify "* * * 2,500 landings after the effective date of this AD." The FAA has determined that this change merely clarifies the intent of the AD; this change will not increase the economic burden on any operator nor will it increase the scope of the AD.

The ATA also requested that the proposed repetitive inspection interval for the inspections required by paragraph A. be increased from 4,000 to 5,000 cycles if the previous inspection was accomplished using eddy current techniques. This request is based on the assumption that, since a visual inspection every 4,000 cycles is considered safe, then the additional degree of assurance provided by an eddy current inspection (i.e., eddy current inspection should detect smaller cracks) should allow an additional amount of time between inspections.

The FAA concurs with this comment and has revised paragraph A. to extend the reinspection interval to 5,000 landings if the previous inspection was performed using eddy current techniques.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the following rule, with the changes previously noted.

There are approximately 1,753 Model 727 series airplanes of the affected design in the worldwide fleet. It is estimated that 1,000 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 manhours per airplane to accomplish the required inspection, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $80,000.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model 727 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

§ 39.13 [Amended]

Boeing: Applies to all Model 727 series airplanes listed in Boeing Service Bulletin 727-53-149, Revision 2, dated March 20, 1981, certificated in any category. Compliance required as indicated, unless previously accomplished.

To detect cracking of the main landing gear (MGL) wheel well pressure floor adjacent to body stations (BS) 880, 890, 930, and 940, accomplish the following:

A. Prior to the accumulation of 30,000 landings or within the next 2,500 landings after the effective date of this AD, whichever occurs later, perform a detailed visual, high frequency eddy current (HFEC), or dye penetrant inspection for cracks in the pressure floor, in accordance with Boeing Service Bulletin 727-53-149, Revision 2, dated March 20, 1981. Repeat the inspection at intervals not to exceed 4,000 landings if the previous inspection was accomplished using a visual or dye penetrant method; or at intervals not to exceed 5,000 landings, if the previous inspection was accomplished using an HFEC method.

B. If cracks are detected that do not exceed the limits listed in Table II in Section III of Boeing Service Bulletin 727-53-149, Revision 2, dated March 20, 1981, prior to further flight, repair in accordance with the interim repair described in paragraph C. of Section III, or the permanent repair described in paragraph D. of Section III of the service bulletin. The interim repair must be replaced within 600 landings after accomplishment with the permanent repair.

C. If cracks are found that exceed the limits listed in Table II, of Section III of Boeing Service Bulletin 727-53-149, Revision 2, dated March 20, 1981, prior to further flight, accomplish the permanent repair described in paragraph D. of Section III of the service bulletin. A repair accomplished using blind fasteners must be reinspected for loose or missing fasteners within 2,000 landings after installation, and then at intervals not to exceed 2,000 landings until the blind fasteners are replaced with the fasteners specified in paragraph 4. of Section III of the service bulletin.

D. Incorporation of the repairs in accordance with paragraph B. or C., above, terminates the repetitive inspection requirements of paragraph A., above, for that area. Incorporation of the preventive modification in paragraph E. of Section III of Boeing Service Bulletin 727-53-149, Revision 2, dated March 20, 1981, terminates the repetitive inspection requirement of paragraph A., above.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective January 20, 1989.

Issued in Seattle, Washington, on December 1, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 88-28901; Filed 12-15-88; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 25751; Amdt. No. 1389]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by Reference: Approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC on December 9, 1988

Robert L. Goodrich,

Acting Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 g.m.t. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for Part 97 continues to read as follows:

22 CFR Part 510

Service of Process

AGENCY: United States Information Agency.
ACTION: Final rule.

SUMMARY: This rule, which creates procedures for the acceptance of legal process in claims or other lawsuits brought against the U.S. Information Agency, is hereby amended to make the language contained therein gender neutral. The rule provides that either the

General Counsel or other official designated by him/her must be served in order to effect valid process. The rule vests this authority in the General Counsel, since he/she is responsible for legal proceedings involving the agency.

EFFECTIVE DATE: November 1, 1988.

FOR FURTHER INFORMATION CONTACT: R. Wallace Stuart, Acting General Counsel, United States Information Agency, Room 700, 301 Fourth Street SW., Washington, DC 20547, telephone (202) 485–7976.

SUPPLEMENTARY INFORMATION: .

E.O. 12291—Federal Regulations

The United States Information Agency has determined that this is not a major rule for the purpose of E.O. 12291, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, the United States Information Agency has determined that notice and comment are necessary under 5 U.S.C. 553(b)(3)(A) since this final rule pertains to agency organization and procedure.

List of Subjects in 22 CFR Part 510

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: In FR Doc. 77–7834, appearing in the **Federal Register** on April 4, 1977 (42 FR 17972), the Office of the Secretary of Defense published its regulation, DoD 6010.8–R, "Implementation of the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)," as Part 199 of this title. DoD Regulation 6010.8–R was reissued in the **Federal Register** on July 1, 1986 (51 FR 24008).

This final rule revises the comprehensive CHAMPUS regulation 6010.8–R (32 CFR Part 199), pertaining to payment for certain inpatient hospital services. It changes certain parts of the proposed amendment of rule which was published on June 3, 1988 (53 FR 20576), and it sets forth the terms under which children's hospitals and neonatal services will be reimbursed under the CHAMPUS DRG-based payment system.

These changes are necessary to bring children's hospitals and neonatal services under the CHAMPUS DRG-based payment system.

A previous final rule was published in the **Federal Register** on August 31, 1988 (53 FR 33461), but, as we stated in that final rule, these two areas were not included in it.

EFFECTIVE DATE: This final rule is effective on March 1, 1989, and applies to inpatient hospital admissions occurring on or after March 1, 1989.

ADDRESS: Office of the Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Office of Program Development, Aurora, CO 80045–6900.

For copies of the **Federal Register** containing this notice, contact the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

The charge for the **Federal Register** is $1.50 for each issue payable by check or money order to the Superintendent of Documents.

FOR FURTHER INFORMATION CONTACT: Stephen E. Isaacson, Office of Program Development, OCHAMPUS, telephone (303) 361–4005.

To obtain copies of this document, see the "Address" section above. Questions regarding payment of specific claims under the CHAMPUS DRG-based payment system should be addressed to the appropriate CHAMPUS fiscal intermediary.

SUPPLEMENTARY INFORMATION: On June 3, 1988, we published a proposed amendment of rule to modify the CHAMPUS DRG-based payment system. This proposed rule contained a number of changes to the CHAMPUS DRG-based payment system including reimbursing children's hospitals and neonatal services under the DRG system. We received a number of comments and substantial input from interested organizations including the National Association of Children's Hospitals and Related Institutions (NACHRI). We respond to those comments in Sections III and IV below.

I. Background

A. Prior Actions

In 1983, Congress called on DoD to establish a new method to pay hospitals for inpatient care under CHAMPUS, to be modeled after the recently established prospective payment system for the Medicare program. This was followed in 1986 by Congressional action giving CHAMPUS the practical ability to adopt a prospective payment method by linking hospital participation in Medicare with that in CHAMPUS.

On September 1, 1987, we published a final rule (52 FR 32992) to implement the CHAMPUS DRG-based payment system effective October 1, 1987. We deferred coverage of children's hospitals by the DRG system, noting that we intended to review this area "so that children's hospitals can be incorporated into our

DRG system in the future." We included neonatal services in our DRG-based payment system, but Pub. L. 100–202, the 1988 Department of Defense Appropriations Act, subsequently required that they be exempt during FY 1988 to allow further study.

In the proposed rule published on June 3, 1988, we proposed that both children's hospitals and neonatal services be paid under the DRG-based payment system, with several special adjustments. With this final rule, those proposals, with certain modifications, are being finalized.

B. Summary of Proposed Amendment to Rule

Following is a summary of the changes that we proposed to make to reimburse children's hospitals and neonatal services under the CHAMPUS DRG-based payment system.

1. Children's Hospitals

Payment to these hospitals would be made under the CHAMPUS DRG-based payment system, but, in recognition of the higher costs of care in these hospitals, a "children's hospital differential" would be developed which would be used to increase each DRG-based payment to children's hospitals so as to achieve roughly a revenue neutral impact for children's hospitals.

2. Neonatal Services

Payment for these services under the CHAMPUS DRG-based payment system would take into consideration newborns' birthweights and several other special factors as incorporated in the Children's DRGs (now known as Pediatric Modified DRGs or PM–DRGs) developed by NACHRI. This would apply to all neonatal services—whether provided in a children's hospital or a general hospital. We also invited comments regarding the possibility of modifying the outlier policy for these services.

3. Continued Exemption of Certain Pediatric Services

In both our proposed rule and our August 31 final rule we stated that discharges involving pediatric bone marrow transplants, children determined to be HIV seropositive, and pediatric cystic fibrosis will continue to be exempt from the CHAMPUS DRG-based payment system. This final rule does not affect these services, and they will continue to be exempt.

C. Public Comments

In Sections III and IV below we briefly summarize the provisions of the proposed amendment of rule and provide an analysis of the comments we received and our responses. We also provide a reference to each provision's designation in the proposed regulation.

II. Congressional Actions

At the time we published the August 31 final rule on the DRG-based payment system changes, it was unclear what the Congressional intent was with regard to CHAMPUS payment for children's hospitals and neonatal services. The House Appropriations Committee still intended to exempt these services for an additional year, while the Senate Appropriations Committee permitted, subject to certain conditions, the exemption to end. As a result, we postponed implementation of DRG-based reimbursement for these services and advised that we would publish a separate final rule for them. The FY 1989 Department of Defense Appropriations Act (Pub. L. 100–463) now provides clear statutory language which permits inclusion of children's hospitals and neonatal services in our DRG-based payment system, if certain conditions are met. The conditions, and our actions to comply with them, are enumerated below.

Children's Hospital Differential

A children's hospital differential adjustment is required for each discharge of a CHAMPUS patient from a children's hospital. This adjustment will ensure that had DRG-based payments "been in effect for fiscal year 1988 they would have resulted in estimated aggregate CHAMPUS payments to children's hospitals not less than estimated aggregate CHAMPUS payments to such hospitals for discharges occurring during that fiscal year under the regulations in effect during fiscal year 1988."

The procedures for using a "children's hospital differential" which we described in our June 3 proposed rule will accomplish just this result. This final rule provides for use of the differential.

Hospital-Specific Transition

A hospital-specific differential is to be used for any children's hospital with 50 or more CHAMPUS discharges in fiscal year 1988. This hospital-specific differential is to be used for a transitional period of three years. We will calculate these hospital-specific differentials using the same procedures used for calculating the national differential. Prior to the effective date of this rule, we will publish in the **Federal Register** a notice that sets forth the national differentials and identifies the higher volume hospitals that will receive hospital-specific differentials. Each high-volume hospital will be notified by mail of its hospital-specific differential. If a children's hospital believes that there is an error in its hospital-specific differential, or that it qualifies as a high-volume hospital but has not been included as a high-volume hospital, the hospital should contact the Office of Program Development in OCHAMPUS. Administrative corrections can be made based upon supporting documentation provided by the hospital.

Those children's hospitals which are not designated as high-volume hospitals will be reimbursed using the appropriate national children's hospital differential (large urban, other urban and rural). After three years, the hospital-specific differentials will be eliminated, and high volume children's hospitals will be reimbursed using the national children's hospital differentials. At that time the national differential will be recalculated to incorporate the previously-excluded high-volume children's hospitals.

Hold Harmless Provision

A hold harmless provision is required which provides for retrospective and prospective corrections.

The intent of this provision is to ensure that CHAMPUS payments to children's hospitals are not distorted because the initial amounts for neonates (other than normal newborns) uses birth weight information derived from a non-CHAMPUS database. Nevertheless, after we have collected sufficient CHAMPUS birth weight data, on a one-time basis, we will recalculate the national children's hospital differentials and the high-volume hospital-specific differentials using the CHAMPUS data and make necessary adjustments. The recalculation will also take into account the additional data we expect to have at that time dealing with such factors as medical education. The target date for the recalculation is one year after the effective date of this amendment. This timetable may be extended several months if necessary to compile an adequate amount of data. These adjustments will include corrections to the national and the hospital-specific differentials as well as payment adjustments to hospitals for all claims paid using the initial differentials. Depending on the results we find, these adjustments may be either additional payments or recoupments of overpayments.

Outlier Policies

The statute requires that outliers for children's hospitals and for neonatal services provided in all hospital settings

subject to DRG-based payment be reimbursed using "the thresholds in effect under CHAMPUS DRG regulations for fiscal year 1988" and the "higher marginal cost factors proposed at 53 FR 20580 (June 3, 1988)."

We previously published a final rule to implement this requirement, Vol. 53 FR 204, page 41331 (October 21, 1988). As a result, the long-stay outlier threshold will be calculated at the lesser of 1.94 standard deviations or 17 days from the DRG's geometric mean length-of-stay (LOS). The cost outlier threshold will be the greater of two times the DRG-based amount or $13,500. In addition, the marginal cost factor for cost outliers will be 80 percent (rather than 75 percent as used for other cost outliers). As for other outliers, we will give precedence to whichever outlier—day or cost—results in the greater payment.

The overall effect of these outlier changes will be to increase substantially the number of cases which qualify as outliers (compared to the outlier changes in our August 31 final rule which increased the threshold amounts). Based on our analysis, the number of cases qualifying as outliers will triple and the average actual payment amounts for long-stay and cost outliers will double.

Refined Neonatal DRGs

Payment for neonatal services will be based on refined neonatal DRGs "to account at a minimum for birthweight, surgery, and the presence of multiple, major, and other neonatal problems."

Use of the PM–DRGs, which we proposed in our June 3 proposed rule, and have decided to use, meets this requirement. The PM–DRGs which we intend to use were developed by NACHRI and are similar to those currently in use in the state of New York. There DRGs contain the factors required by the legislation and are specific to Major Diagnostic Category (MDC) 15, Newborns and Other Neonates with Conditions Originating in the Perinatal Period. There are thirty-four PM–DRGs which we will use and they will replace existing DRGs 385–390. Normal newborns will continue to be reimbursed under DRG 391.

Annual Update of Neonatal Classifications

If any subsequent changes are made by NACHRI to the classification features included in the neonatal DRGs used by CHAMPUS, the changes are to be incorporated into the CHAMPUS DRG-based payment system.

Interim Payments

The legislation requires that there be "a provision for making interim payments for cases that are especially lengthy or expensive."

Our August 31 final rule contained just such a provision (53 FR 33466), and it will apply equally to children's hospitals and to neonatal services.

Additional Uses of PM–DRGs

The legislation requires the Department to commit "to examine in the future possible further uses of Pediatric Modified DRGs."

We fully intend to continue to examine the expanded use of the PM–DRGs, both with regard to the use of additional classification factors such as mechanical ventilation for neonates as well as the use of PM–DRGs for pediatric cases other than neonatal cases. We welcome, at any time, suggestions and comments in this regard.

III. Children's Hospitals (Section 199.14(a)(1)(iii)(E)(4))

Children's hospitals will be subject to the CHAMPUS DRG-based payment system, but each DRG-based payment will be increased by a "children's hospital differential." This will avoid the revenue reductions experienced by other hospitals when CHAMPUS shifted from a system of paying billed charges to a prospective payment method.

Comment—Children's hospitals should be exempt for at least another year so that further analysis can occur.

Response—We don't think this is necessary. We initially deferred inclusion of children's hospitals for a year to allow OCHAMPUS time to study these changes. We have spent the past year analyzing the pertinent data and considering input from interested organizations. Additionally, the RAND Corporation, under a contract with the Department of Defense, has studied the inclusion of children's hospitals under the CHAMPUS DRG-based payment system. In light of this extensive study and the clear Congressional direction we now have, we believe further delay is not justified.

Comment—The children's hospital differential should be updated annually, with a CHAMPUS-specific factor, to reflect the potential increases in costs, due to inflation and to the adoption of new medical technologies for children under CHAMPUS.

Response—We do not think it is necessary or desirable to update either the national or the transitional hospital-specific differentials. They have been established only to recognize the existing difference between children's hospitals' charges and other hospitals' costs in treating patients grouped into similar DRGs. To a significant extent, increases in costs, due either to inflation or the adoption of new medical technologies, will be accounted for in the annual increase in the ASA's. Especially because we are applying no cost to charge ratio in calculating the differential, payment amounts are likely to stay significantly ahead of costs without the need for increases to the differential.

Comment—A differential should be established for pediatric units of university teaching hospitals, since these units also are involved in the treatment of more complicated pediatric cases, similar to children's hospitals.

Response—Our analysis indicates that this is not necessary. University teaching hospitals, including their pediatric units, have been reimbursed under the CHAMPUS DRG-based payment system since October 1987 and have not fared any worse than other hospitals. This may be due to the inclusion of both direct and indirect medical education payment adjustments.

Comment—CHAMPUS has provided no information concerning the value of the differential and very little detail concerning the methodology used to determine it. Reviewers need an impact analysis.

Response—The differential represents the difference between a specially calculated children's hospital adjusted standardized amount and the fiscal year 1988 CHAMPUS adjusted standardized amount. The distinguishing features of the specially calculated ASA are that it represents a fiscal year 1988 base period, applies no cost to charge ratio, includes direct medical education and captial costs and is not subject to an update factor. The key point is that the differential is calculated to produce a fiscal year 1988 revenue neutral impact.

Comment—CHAMPUS' proposal stops short of creating separate ASA's for individual hospitals. There are persuasive arguments for hospital-specific PPS rates.

Response—As we have stated in section II, we intend to use hospital-specific differentials for high volume children's hospitals during a three-year transition period.

Comment—How can the differential be calculated when the CHAMPUS database does not currently contain birthweight or duration of mechanical ventilation for neonates?

Response—It is correct that the CHAMPUS database does not currently

contain birthweight data. As we stated in the proposed rule and in section II of this preamble, we have used another representative database which was developed in consultation with NACHRI, as a proxy for the CHAMPUS database for this purpose. We believe this database is comparable to the experience of the CHAMPUS beneficiary population. We will also make any necessary "hold harmless" adjustments to ensure that hospitals are not harmed by our use of this database.

Comment—Outlier thresholds for children's hospitals should be lowered to take into account the fact that a major portion of their care involves extraordinarily long stay or high cost case.

Response—As we explained in section II of this preamble, we have modified the outlier policies for both children's hospitals and neonatal services.

Comment—How will children's hospitals be reimbursed for their capital and direct medical education expenses?

Response—Under the existing procedures, hospitals are reimbursed for their capital and direct medical education expenses by submitting a request for such payment once a year. The capital and direct medical education amounts to be included on the request are those reported on the hospital's Medicare cost report. We are aware that not all children's hospitals are Medicare providers, and few of them actually file a complete cost report. Therefore, it could be a very costly and time-consuming process to complete a Medicare cost report only to be reimbursed what will generally be relatively small amounts for CHAMPUS' share of capital and direct medical education costs.

In order to resolve this problem, we have included amounts for capital and direct medical education in the children's hospital differentials. We have done this by not subtracting the estimated value of these factors from the total charges reflected in the CHAMPUS claims database. If a children's hospital initiates a major capital project, it may request pass through payments like those received by other hosptials. Such request must be sent to OCHAMPUS and will have to be supported by a Medicare cost report or comparable documentation. For hospitals that prefer the pass through, we will make appropriate adjustments to their differential.

Comment—Will children's hospitals be paid for their indirect medical education costs as other hospitals are under the CHAMPUS DRG-based payment system?

Response—Yes, but not until the appropriate data are obtained from children's hospitals. The indirect medical education adjustment factor will then be applied to each payment to children's hospitals. The factors for children's hospitals will be calculated using the same formula as for other hospitals. The information needed for this formula on the number of interns and residents and hospital bed size is not currently available. Thus, it will be gathered from each children's hospital and calculated in connection with the "hold harmless" recalculation of the children's hospital differentials.

Comment—Will the special procedures for children's hospitals, i.e., use of the children's hospital differential, apply to a children's hospital which is not exempt from the Medicare PPS and is reimbursed under the CHAMPUS DRG-based payment system? Will such a hospital use the PM–DRGs?

Response—The special procedures will apply only to those hospitals which would otherwise be exempt from the Medicare DRG-based payment system. Thus, a hospital which would not be exempt from the Medicare PPS would continue to be reimbursed under the normal DRG-based payment procedures. For all hospitals, PM–DRGs will be used for payment for neonatal care.

IV. Neonatal Services (Sections 199.14 (a)(1)(i)(A) and 199.14(a)(1)(i)(B)(*1*)

Neonatal services (other than for normal newborns) will be reimbursed under the CHAMPUS DRG-based payment system using the PM–DRGs which distinguish neonate cases by birthweight. In addition, the outlier policy for neonates has previously been revised.

Although not part of our legislative mandate, we have, based on input we received, adopted another special provision for neonatal cases. That is to recognize the special circumstances often presented in neonatal intensive care cases of transfers from community hospitals to neonatal tertiary care facilities and then a transfer back to the community hospital. To recognize the intensity of the care provided by the facility providing neonatal tertiary care, we are amending § 199.14(a)(1)(i)(C)(*6*)(*iv*) to pay that facility 125 percent of the per diem rate usually paid to transferring hospitals in non-neonatal cases, up to the DRG amount. The 125 percent figure was derived based on an analysis by NACHRI of neonatal transfer cases in children's hospitals.

As a result of input we have had since publication of the proposed rule, we have developed certain procedures to ensure accurate processing of neonatal claims. We believe they should be mentioned here to ensure complete understanding of our DRG-based payment system as it applies to neonatal claims.

There are some instances in which the patient is greater than twenty-eight days old upon admission (in a very few cases approaching a year old), but which have a neonatal diagnosis, since the condition causing the admission originated in the perinatal period. Under the Grouper program we intend to use for neonatal services, a few of these cases will group into a PM–DRG, but others will not. In order to ensure that these cases are reimbursed, we have added PM–DRG 636 for those cases which do not group to another PM–DRG. PM–DRG 636 is defined as "Neonatal diagnosis, age 28 days." Any case which groups to this PM–DRG will be reviewed by the fiscal intermediary to ensure that the claim information is correct. If the information is correct, the claim will be paid under PM–DRG 636.

Any neonatal claim which does not have a birthweight or which has multiple, differing birthweights will be grouped to DRG 470 and will be denied. Birthweight information for neonates weighing less than 2500 grams should be added according to the applicable 1CD9–CM prematurity code (7640, 7641, 7642, 7649, 7650, or 7651) including the fifth digit.

Comment—A more refined classification system is needed to include *all* pediatric care.

Response—For the present, we have elected to use the PM–DRGs for neonates only because research indicated that, except for the neonatal PM–DRGs, the very modest improvement in the PM–DRG predictive power did not justify the significant increase and modifications of DRG categories they would require. We are, however, committed to reexamine possible further uses of PM–DRGs in the future.

Comment—These services should remain exempt for at least another year to allow further analysis.

Response—Again, we do not think this is necessary.

Comment—The classification system should recognize mechanical ventilation.

Response—There has been very little practical experience with use of mechanical ventilation as a variable in the PM–DRG system. New York, for example, uses just birthweight as we plan to do. However, we will continue to monitor and study the use of mechanical ventilation to determine if it should be

incorporated into our system at some time in the future.

Comment—Only CHAMPUS data should be used in establishing weights and rates. If substitute databases are used, they should be adequately described and justified.

Response—CHAMPUS data are being used to calculate the relative value of neonatal care overall. The other database we are using is simply to determine the relative contribution of each PM–DRG category within that neonatal group. We are confident that this database is comparable to the CHAMPUS database, but after we have collected sufficient CHAMPUS birthweight data, we will use the CHAMPUS database to verify and adjust the weights, if necessary.

Comment—Ease of access to the PM–DRG grouper program should be afforded to vendors and hospitals. A process similar to that used for the Medicare grouper should be used—i.e., a licensing agreement with Health Systems International, Inc. (HSI, Inc.).

Response—The PM–DRG grouper program we will use will be available to vendors and hospitals through HSI, Inc.

Comment—Do the RAND Corporation findings use CDRGs and PM–DRGs interchangeably? If not, which do they use?

Response—The RAND Corporation findings are based on use of the PM–DRGs grouper which replaced the CDRGs.

Comment—Will there be any special transfer policies for neonates?

Response—Yes, as discussed above, we have adopted a special transfer policy of paying the transferring hospital in neonatal cases 125% of the usually applicable per diem rate, up to the DRG amount.

Comment—Neonate outliers should be paid at 90%.

Response—We do not agree that neonate outliers should be paid at 90%, but we agree that some modification to the outlier policy is justified for neonate cases. Therefore, consistent with statutory requirements, we previously adopted the changes described in Section II.

Comment—Reviewers need a specific set of PM–DRGs.

Response—As noted previously, PM–DRG descriptions and weights will be published well in advance of the March 1 effective date.

Comment—Our understanding is that the documentation for PM–DRGs is available from a single private sofware vendor. Hospitals, other software vendors, and the public have no assurance that the vendor will make the PM–DRG details available on a reasonable or equitable basis.

Response—Just as for the previous grouper programs used by both Medicare and CHAMPUS, the new CHAMPUS grouper program, which incorporates the PM–DRG grouper, will be available through HSI, Inc. on the same basis as before.

V. Regulatory Procedures

A. E.O. 12291 and the Regulatory Flexibility Act

Executive Order 12291 requires that a regulatory impact analysis be performed on any major rule. A "major rule" is defined as one which would result in annual effect on the national economy of $100 million or more or produce other significant economic effects.

The Regulatory Flexibility Act (RFA) requires that each federal agency prepare, and make available for public comment, a regulatory flexibility analysis when the agency issues regulations which would have a significant impact on a substantial number of small entities. For purposes of the Regulatory Flexibility Act, we consider small entities to include many nonprofit and for-profit hospitals.

This final rule is not a major rule under Executive Order 12291. The changes set forth in this final rule, taken as a whole, will have an annual impact on the hospital industry of substantially less than $100 million. Nor will this rule significantly affect a substantial number of small entites. The provisions to include children's hospitals are specifically designed to be revenue neutral compared to CHAMPUS payments in FY 1988. The economic impact of the inclusion of neonatal services under the CHAMPUS DRG-based payment system on almost all individual hospitals is very little in view of the small percentage of hospital revenue provided by CHAMPUS and the small change in CHAMPUS payments represented by this final rule. Therefore, pursuant to the Regulatory Flexibility Act, it is certified that this proposed rule will not have a significant impact on small business.

B. Paperwork Reduction Act

This notice does not impose information collection requirements. Therefore, it does not need to be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 through 3511).

List of Subjects in 32 CFR Part 199

Claims, Handicapped, Health insurance, Military personnel.

Accordingly, 32 CFR Part 199 is amended as follows:

PART 199—[AMENDED]

1. The authority citation for Part 199 continues to read as follows:

Authority: 10 U.S.C. 1079, 1086, 5 U.S.C. 301.

2. Section 199.14 is amended by revising paragraph (a)(1)(i)(B)(*1*); by revising paragraph (a)(1)(i)(C)(*6*)(*iv*); by removing paragraph (a)(1)(ii)(D)(*8*) and redesignating paragraph (a)(1)(ii)(D)(*9*) as paragraph (a)(1)(ii)(D)(*8*); by adding a new paragraph (a)(1)(iii)(E)(*4*); and by revising paragraph (a)(1)(iii)(G)(*3*) introductory text to read as follows:

§ 199.14 Basic program benefits.

* * * * *

(a) * * *

(1) * * *

(i) * * *

(B) * * *

(*1*) The classification of a particular discharge shall be based on the patient's age, sex, principal diagnosis (that is, the diagnosis estasblished, after study, to be chiefly responsible for causing the patient's admission to the hospital), secondary diagnoses, procedures performed and discharge status. In addition, for neonatal cases (other than normal newborns) the classification shall also account for birth weight, surgery and the presence of multiple, major and other neonatal problems, and shall incorporate annual updates to these classification features.

* * * * *

(C) * * *

(*6*) * * *

(*iv*) Payment to a hospital transferring an inpatient to another hospital. If a hospital subject to the CHAMPUS DRG-based payment system transfers an inpatient to another such hospital, the transferring hospital shall be paid a per diem rate (except that in neonatal cases, other than normal newborns, the hospital will be paid at 125 percent of that per diem rate), as determined under instructions issued by OCHAMPUS, for each day of the patient's stay in that hospital, not to exceed the DRG-based payment that would have been paid if the patient had been discharged to another setting. However, if a discharge is classified into DRG No. 456 (Burns, transferred to another acute care facility) or DRG 601 (neonate, transferred less than or equal to 4 days old), the transferring hospital shall be paid in full.

* * * * *

(iii) * * *

(E) * * *

BEST COPY AVAILABLE

(4) *Children's Hospital Differential.* With respect to claims from children's hospitals, the appropriate adjusted standardized amount shall also be adjusted by a children's hospital differential.

(*i*) *Qualifying children's hospitals.* Hospitals qualifying for the children's hospital differential are hospitals that are exempt from the Medicare Prospective Payment System, or, in the case of hospitals that do not participate in Medicare, that meet the same criteria (as determined by the Director, OCHAMPUS, or a designee) as required for exemption from the Medicare Prospective Payment System as contained in 42 CFR 412.23.

(*ii*) *Calculation of differential.* The differential shall be equal to the difference between a specially calculated children's hospital adjusted standardized amount and the adjusted standardized amount for fiscal year 1988. The specially calculated children's hospital adjusted standardized amount shall be calculated in the same manner as set forth in § 199.14(a)(1)(iii)(D), except that:

(*A*) The base period shall be fiscal year 1988 and shall represent total estimated charges for discharges that occured during fiscal year 1988.

(*B*) No cost to charge ratio shall be applied.

(*C*) Capital costs and direct medical education costs will be included in the calculation.

(*D*) The factor used to update the database for inflation to produce the fiscal year 1988 base period amount shall be the applicable Medicare inpatient hospital market base rate.

(*iii*) *Transition rule.* Until March 1, 1992, separate differentials shall be used for each higher volume children's hospital (individually) and for all other children's hospitals (in the aggregate). For this purpose, a higher volume hospital is a hospital that had 50 or more CHAMPUS discharges in fiscal year 1988.

(*iv*) *Hold harmless provision.* At such time as the weights initially assigned to neonatal DRGs are recalibrated based on a sufficient volume of CHAMPUS claims records, children's hospital differentials shall be recalculated and appropriate retrospective and prospective adjustments shall be made. To the extent practicable, the recalculation shall also include reestimated values of other factors (including but not limited to direct education and capital costs and indirect education factors) for which more accurate data became available.

(*v*) *No update for inflation.* The children's hospital differential, calculated (and later recalculated under the hold harmless provision) for the base period of fiscal year 1988, shall not be updated for subsequent fiscal years.

(*vi*) *Administrative corrections.* In connection with determinations pursuant to paragraph (a)(1)(iii)(E)(*4*)(*iii*) of this section, any children's hospital that believes OCHAMPUS erroneously failed to classify the hospital as a volume hospital or incorrectly calculated (in the case of a high volume hospital) the hospital's differential may obtain administrative corrections by submitting appropriate documentation to the Director, OCHAMPUS (or designee).

* * * * *

(G) * * *

(3) Information necessary for payment of capital and direct medical education costs. All hospitals subject to the CHAMPUS DRG-based payment system may be reimbursed for allowed capital and direct medical education costs by submitting a request to the CHAMPUS contractor. Such request shall cover the one-year period corresponding to the hospital's Medicare cost-reporting period. The first such request may cover a period of less than a full year—from the effective date of the CHAMPUS DRG-based payment system to the end of the hospital's Medicare cost-reporting period. All costs reported to the CHAMPUS contractor must correspond to the costs reported on the hospital's Medicare cost report. In the case of children's hospitals that request reimbursement under this clause for capital and/or direct medical education costs, the hospital must submit appropriate base period cost information, as determined by the Director, OCHAMPUS (or designee). (If these costs change as a result of a subsequent audit by Medicare, the revised costs are to be reported to the hospital's CHAMPUS contractor within 30 days of the date the hospital is notified of the change.) The request must be signed by the hospital official responsible for verifying the amounts and shall contain the following information.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 12, 1988.

[FR Doc. 88-28859 Filed 12-15-88; 8:45 am]

BILLING CODE 3810-01-M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans Education; Increase in Rates Payable in the Educational Assistance Test Program

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The law provides that rates of subsistence allowance and educational assistance payable under the Educational Assistance Test Program shall be adjusted annually based upon the average actual cost of attendance at public institutions of higher education in the 12-month period since the rates were last adjusted. After consultation with the Department of Education, the Department of Defense has concluded that these rates should be increased by 6 percent. The regulations dealing with these rates are adjusted accordingly.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: William G. Susling, Jr., Acting Assistant Director for Education Policy and Program Administration (225), Vocational Rehabilitation and Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 233-2668.

SUPPLEMENTARY INFORMATION: On pages 16884 and 16885 of the **Federal Register** of May 12, 1988, there was published a proposal to amend 38 CFR Part 21 to increase by 6 percent the rates of educational assistance provided under the Educational Assistance Test Program. Interested people were given 29 days to submit comments, suggestions or objections.

The Veterans Administration (VA) received one letter from a university official. He was concerned about the possible impact that the retroactive effective date of these amended regulations would have on the veteran-students receiving benefits.

The VA appreciates the official's concern, but has decided to provide a retroactive effective date for these regulations. The VA has made this decision because of its previous experience with the rate increases in this program. Due to the nature of the Federal regulatory process all previous amendments to these regulations which provided an increase in rates payable under this program have had retroactive effective dates. No college or university where eligible veterans were attending has ever reported to the VA that this has had a negative impact on its students.

Similarly, no veterans have ever reported a negative impact. If such reports are received in the future, the VA will consider them in determining whether amended regulations implementing future rate increases should have a retroactive effective date.

Consequently, these increases are effective October 1, 1987. Retroactive effect is warranted because these changes are liberalizing, and because they are interpretive rules which implement and construe the meaning of a law. Moreover, there is good cause for a retroactive effective date of October 1, 1987. Such a date facilitates implementation of 10 U.S.C. 2145 which requires annual adjustments in educational assistance.

The VA has determined that this amended regulation does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulation will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs has certified that these amended regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 through 612. Pursuant to 5 U.S.C. 605(b), the amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the regulations make adjustments required by law, and because they affect only rates payable to individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

There is no Catalog of Federal Domestic Assistance number for the program affected by these regulations.

Approved: October 4, 1988.

Thomas K. Turnage,

Administrator.

Approved: November 16, 1988.

A. Lukeman,

Lieutenant General, USMC, Deputy Assistant Secretary (Military Manpower and Personnel Policy).

38 CFR Part 21, *Vocational Rehabilitation and Education,* is amended as follows:

PART 21—[AMENDED]

1. In § 21.5820, the introductory text of paragraph (b), paragraph (b)(1)(ii) (A), (B), and (C), and paragraphs (b)(2)(ii) (A), (B), and (C) are revised to read as follows:

§ 21.5820 Educational assistance.

* * * * *

(b) *Amount of education assistance.* The amount of educational assistance may not exceed $1,654 per standard academic year, adjusted annually by regulation.

(Authority: 10 U.S.C. 2143)

(1) * * *

(ii) * * *

(A) Multiplying the number of whole months in the enrollment period by $183.78 for a full-time student or by $91.89 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $6.12 for a full-time student or by $3.06 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by $.02 for a full-time student and decreased by $.01 for a part-time student; and

(Authority: 10 U.S.C. 2143)

(2) * * *

(ii) * * *

(A) Multiplying the number of whole months in the enrollment period by $183.78 for a full-time student or by $91.89 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $6.12 for a full-time student or by $3.06 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by $.02 for a full-time student and decreased by $.01 for a part-time student; and

(Authority: 10 U.S.C. 2143)

2. In § 21.5822, paragraphs (b)(1) (i) and (ii) and (b)(2) (i) and (ii) are revised to read as follows:

§ 21.5822 Subsistence allowance.

* * * * *

(b) * * *

(1) * * *

(i) If a person is pursuing a course of instruction on a full-time basis, his or her subsistence allowance is $412 per month, adjusted annually by regulation.

(ii) If a person is pursuing a course of instruction on other than a full-time basis, his or her subsistence allowance is $206 per month.

(Authority: 10 U.S.C. 2144)

* * * * *

(2) * * *

(i) The VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction full-time by dividing $412 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

(ii) The VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction on other than a full-time basis by dividing $206 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3485-1]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: On August 3, 1988 (53 FR 29236 and 53 FR 29239), USEPA proposed to approve revisions to the Indiana State Implementation Plan (SIP) for sulfur dioxide (SO_2) under USEPA's "parallel processing" procedures. The revisions consist of Indiana's SO_2 emission limits and plans for Floyd, Morgan, and Warrick Counties. USEPA's actions were based upon revision requests which were submitted by the State to satisfy the requirements of section 110 of the Clean Air Act (Act). USEPA, today, is approving Indiana's

emission limits and plans for all of these counties.

DATE: This final rulemaking becomes effective January 17, 1989.

ADDRESSES: Copies of the SIP revisions, comments, and support documentation are available at the following addresses for review: (It is recommended that you telephone Kent Wiley, at (312) 886–6034, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Office of Air Management, Indiana Department of Environmental Management, 105 South Meridian Street, P.O. Box 6015, Indianapolis, Indiana 46206–6015.

A copy of today's revisions is available for inspection at: U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Kent Wiley, Air and Radiation Branch (5AR–26), Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6034.

SUPPLEMENTARY INFORMATION: On August 3, 1988, USEPA proposed to approve revisions to the Indiana SO_2 SIP, for Floyd, Morgan, and Warrick Counties. The SIP for these counties currently consists of the general provisions of Indiana's SO_2 rule, 325 IAC 7–1, which USEPA approved on January 19, 1988, 53 FR 1354. The revisions consist of (1) the site-specific SO_2 emission limits and other requirements in 326 IAC 7–1–16 (Floyd County, submitted March 23, 1988), 326 IAC 7–1–18 (Morgan County, submitted July 12, 1988), and 326 IAC 7–1–17 (Warrick County, submitted July 21, 1988);[1] and (2) the 6.0 lbs/MMBTU emission limit in 326 IAC 7–1–2, which is the emission limit applicable to all other sources not specifically listed in the county-specific rules (except for new sources subject to a federally enforceable new source review permits).

Background information for USEPA's rulemaking action is contained in the August 3, 1988, **Federal Register** notices and will not be repeated here. The specific emission limitations and plan requirements for these counties are also discussed in the August 3, 1988, notices.

USEPA today approves the emission limits and other requirements for sources in these counties and the overall SO_2 plans for these counties on the ground that they satisfy the requirements of section 110 of the Clean Air Act.

Response to Public Comments

Specific public comments and the corresponding responses of USEPA follow.

Floyd County

There were no comments submitted concerning Floyd County specifically.

Morgan County and Warrick County—Optional Limits

In the proposals for Morgan County and for Warrick County, USEPA specifically solicited comments concerning the need for additional advance notice, recordkeeping, and reporting requirements for certain sources to switch from one set of emission limits (Base Set) to another set of emission limits (Optional Set). Indianapolis Power and Light Company (IPL) questioned the need for advance notification for the Pritchard Station in Morgan County, given the current requirements in the State rule. The Indiana Department of Environmental Management (IDEM) commented that the time periods provided by its rules for both counties are sufficient for adequate enforcement. The State also pointed out that similar sets of variable emission limits in other counties of Indiana are in force and do not present enforcement problems.[2]

USEPA has reviewed the proposed revisions for Morgan and Warrick Counties, along with the existing SIP provisions, and has determined that they are sufficient for ascertaining the appropriate emission limits at a given time. USEPA is therefore approving the rules.[3]

Warrick County—Other Comments

Additional comments were received from the Amax Coal Company (Amax), the Aluminum Company of America (ALCOA), the Peabody Coal Company (Peabody), Southern Indiana Gas and Electric Company (SIGECO), IPL, and IDEM.

Amax objected to the Optional Set of emission limits for SIGECO. Amax claimed that it can supply coal to meet the 2.79 lbs./MMBTU Base Set of limits, but not the 2.0 lbs/MMBTU Optional limit. Amax, therefore, urged USEPA to delete the Optional Set of limits from the final rulemaking. SIGECO also objected to the Optional Set of emission limits due to the lack of compliance coal from its current suppliers.

Peabody also stated that the proposed limits will adversely affect its ability to supply compliance coal to ALCOA and SIGECO, but nevertheless urged USEPA to approve the limits to minimize these impacts.

USEPA proposed to accept the Base Set and the Optional Set of emission limits based on Indiana's demonstration that both of these sets of limits will provide for attainment and maintenance of the SO_2 National Ambient Air Quality Standards (NAAQS). Any comments on the economic impacts of the emission limitations should be raised at the State level. USEPA does not have the authority in this action to alter the State's submittal as Amax suggested.[4]

Further, the Optional Set of limits is only invoked if SIGECO and ALCOA jointly agree to it. Therefore, SIGECO (not USEPA) determines if and how SIGECO must meet the Optional limits. If SIGECO and ALCOA decide that they wish to invoke the Optional limits, then SIGECO may have to change its source of coal, at least in part, and/or use technology which would lessen emissions from the coal which is locally available.

SIGECO and IPL objected to the provision in the rule which, because of changing emission scenarios, may base compliance with the 30-day averaging provisions on emission scenarios with

---

[1] The Warrick County SO_2 rule was proposed under USEPA's "parallel processing" procedures. The rule was subsequently promulgated by the State as proposed on November 7, 1988, and was submitted as promulgated on November 17, 1988.

[2] In Morgan County, the applicable emission limit is dependent upon whether Pritchard Unit 3 burns coal. 326 IAC 7–1–18(a) requires IPL to maintain a daily summary of the fuel type for Unit 3 in the quarterly reports required by federally approved 325 IAC 7–1–3(a). In addition the rule clarifies which set of limits applies for each day for both the stack test and 30-day average compliance methodologies. It will, therefore, enable State and Federal authorities to review available fuel records for Unit 3 on the day in which a stack test is to be conducted so that the applicable limit can be ascertained.

In Warrick County, the rule permits source discretion to vary emission limits, provided IDEM and USEPA are notified by certified mail at least 14 days in advance of any change. USEPA has concluded that this 14-day period provides sufficient time for notifying the two agencies, which can then determine which limits are in effect for enforcement purposes.

[3] As a general matter, EPA prefers fixed emission limits, rather than optional limits which increase the burden of states and EPA in assuring compliance. EPA has determined that the rules for Morgan and Warrick Counties are enforceable as required by the Act. This approval is based on the factual circumstances here, and should not be interpreted as obliging EPA to approve optional limits submitted by a state in other circumstances.

As always, EPA has the authority, on a case-specific basis, to use section 114 to establish additional monitoring, recordkeeping, and reporting requirements as necessary to assure compliance with these rules for Morgan and Warrick Counties.

[4] See *Bethlehem Steel Corp. v. Gorsuch*, 742 F.2d 1028 (7th Cir. 1984).

less than 30 days of data. See 326 IAC 7–1–17(a)(1)(D).[5]

USEPA recognizes that Indiana's averaging technique may result in less than 30 days worth of data in a given scenario. However, on January 19, 1988, USEPA (1) approved Indiana's compliance methodology on the basis that the stack test methodology protects the short-term SO_2 limits and (2) approved Indiana's 30-day averaging methodology as an additional compliance technique is over and above that which is required, i.e., a stack test, and thus is approvable under Section 116 of the Act.

Similarly, USEPA today is approving Indiana's methodology, as contained in its rule, for enforcing the 30-day averaging methodology for sources in Morgan and Warrick Counties when there is less than 30 days of data. USEPA believes that this approach is a reasonable way to enforce Indiana's fuel averaging provisions. USEPA also notes that the ability to switch between optional sets of emission limits also may be a temporary measure in Warrick County. This option will be eliminated under Indiana's rule if a single set of emission limits is ultimately decided upon by SIGECO (and ALCOA) prior to December 1, 1989.

IDEM also commented on various other issues. First, it pointed out certain typographical errors in the listed emission limits. The limits for ALCOA's Warrick plant should have read "6.0 lbs/Million British Thermal Units" (lbs/MMBTU) prior to December 31, 1989; 5.41 lbs/MMBTU beginning December 31, 1989, and until August 1, 1991; and 5.11 lbs/MMBTU beginning August 1, 1988, and afterward." Similar to the phased reduction required for the SIGECO Culley plant, ALCOA is to meet a 5.41 lbs/MMBTU interim limit in progress toward attainment and maintenance of the standards at 5.11 lbs./MMBTU. USEPA acknowledges these errors and is approving Indiana's rule as submitted.

Second, in the August 3, 1988, notices of proposed rulemaking (NPR), USEPA requested the State to provide formal notification, along with the supporting documentation, that ALCOA has erected fences around the property to restrict public access. IDEM provided a copy of a letter from ALCOA certifying the erection of the necessary fences, along with a map showing the location of the fences. IDEM also committed to continue to comply with USEPA's ambient air policy[6] in future actions for Warrick County, including the placement of receptors over bodies of water, such as the Ohio River. (ALCOA also stated in its comments that the fencing has been completed.)

Based on this information, USEPA considers this issue to be resolved (i.e., IDEM's exclusion of receptors from specific portions of ALCOA's property was proper) and accepts IDEM's commitment to comply with USEPA's ambient air policy in future actions for this county.

Third, USEPA in the NPR that the Optional Emission Limits may result in future changes in actual emissions which may affect the Prevention of Significant Deterioration (PSD) increments under Part C of the Act, and requested that IDEM identify how it will address increment consumption under these conditions. IDEM noted that because the SO_2 baseline date has not been triggered for Warrick County, an increment analysis within the county is not required at this time. An increment analysis in other counties (and if applicable, in the future, within Warrick County) would be performed as part of another interacting source's PSD application. In addition, IDEM claimed that the potential emission increases (based on the difference between the allowable emission levels) would not threaten the increments.

USEPA acknowledges that a definitive response is not possible at this time, given the unknown future status of the baseline date, the amount of available increment, and the change in ALCOA or SIGECO emissions. USEPA acknowledges IDEM's intent to address this issue when it is appropriate. At that time, calculations of increment consumption should be made on the difference between the (actual) source emissions included in the baseline concentration and the (actual) emissions after the source has switched to an Optional Emission Limit scenario. Prior to the switching, the calculations should be based on the actual baseline emissions and the emissions allowed under the Optional Emission Limit scenario. Thus, IDEM's increment estimate based strictly on allowable emissions is not meaningful.[7]

Conclusion

USEPA is approving Indiana's emission limits, other requirements, and overall plans for Floyd, Morgan, and Warrick, Counties, because they meet the requirements of section 110 of the Clean Air Act.

The Office of Management and Budget has exempted these rules from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 14, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, and Sulfur oxides.

Dated: November 28, 1988.

Lee M. Thomas,

Administrator.

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS, INDIANA

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

§ 52.770 [Amended]

2. Section 52.770 is amended by removing and reserving paragraph (c)(67)(i)(H).

3. Section 52.770 is amended by adding new paragraph (c)(71) to read as follows:

§ 52.770 Identification of plan.

* * * * *

(c) * * *

(71) On March 23, 1988, Indiana submitted its SO_2 plan for Morgan County; on July 12, 1988, it submitted its SO_2 plan for Floyd County, and on November 17, 1988, it submitted its SO_2 plan for Warrick County. These plans consist of the provisions and requirements in 325 IAC 7–1 approved or reinstated for these counties at

[5] IPL does not own or operate any sources in Warrick County, but does own and operate plants in Marion County which also have alternate emission limit scenarios. IPL contends in its comments that it is thus affected by the compliance determination method in the Warrick County rule. USEPA disagrees, noting that IPL's Marion County sources are regulated by the requirements in 325 IAC 7–1–9, and by the State's applicable enforcement policy, as expressed in IDEM letters of February 1, 1988, and June 24, 1988. (See 53 FR 33810, September 1, 1988.)

[6] USEPA's ambient air policy is based on the definition of ambient air found at 40 CFR 50.1(e) and described in a December 19, 1978, letter from Douglas Costle, then USEPA Administrator, to Senator Jennings Randolph.

[7] IDEM also noted in its comments that two additional minor revisions to the Warrick County rule were under consideration. However, IDEM has subsequently informed USEPA that these modifications were not adopted by the Indiana Air Pollution Control Board.

Paragraph (c)(66), any SO_2 emission limits in 325 IAC 7–1–2 applicable in these counties (as incorporated by reference at (c)(66)(i))(A), and the site-specific SO_2 emission limits and other requirements in 326 IAC 7–1–16, (Floyd County), 326 IAC 7–1–18, (Morgan County), and 326 IAC 7–1–17 (Warrick County).

(i) *Incorporation by reference.* (A) 326 IAC 7–1–16, Floyd County Sulfur Dioxide Emission Limitations, as published in the March 1, 1988, *Indiana Register* (IR) at 11 IR 1737.

(B) 326 IAC 7–1–18, Morgan County Sulfur Dioxide Emission Limitations, as published on June 1, 1988, at 11 IR 3018.

(C) 326 IAC 7–1–17, Warrick County Sulfur Dioxide Emission Limitations, as promulgated by filing with the Secretary of State on November 7, 1988.

(D) 326 IAC 7–1–1, Applicability, as promulgated by filing with the Secretary of State on November 7, 1988.

40 CFR Parts 60 and 61

[FRL–3492–6]

Standards of Performance for New Stationary Sources and National Emission Standards for Hazardous Air Pollutants; Montana, North Dakota and Wyoming; Delegation of Authority

AGENCY: Environmental Protection Agency (EPA).

ACTION: Delegation of authority.

SUMMARY: EPA is today providing notice that it granted delegation of authority to Montana on June 17, 1988, to enforce and implement the New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPs) promulgated in 40 CFR Parts 60 and 61, respectively, as of July 1, 1987 (excluding 40 CFR Part 61, Subparts B, H, I, K, which pertain to radionuclides). This is a result of a request for delegation from the State of Montana on March 9, 1988.

EPA is today also providing notice that it granted delegation of authority to North Dakota on June 30, 1988, to implement and enforce (1) the NSPS for 40 CFR Part 60, Subparts Ka, LLL, KKK, VV, GGG, XX, OOO, and JJJ, and (2) the NESHAPs for 40 CFR Part 61, Subparts J and V. This is a result of a request for delegation from the State of North Dakota on January 26, 1988.

EPA is also today providing notice that it granted delegation of authority to Wyoming on September 30, 1988, to implement and enforce (1) the NSPS for 40 CFR Part 60, Subparts Na, AAa, LL, RR, VV, WW, XX, FFF, GGG, HHH, JJJ, KKK, LLL, OOO, and PPP, and (2) part of the NESHAP for asbestos (40 CFR Part 61, Subpart M), i.e., asbestos demolition, renovation and spraying operations, and waste disposal for demolition, renovation and spraying operations. This is a result of a request for delegation from the State of Wyoming on September 6, 1988.

EFFECTIVE DATES: June 17, 1988, for Montana.

June 30, 1988, for North Dakota.

September 30, 1988, for Wyoming.

ADDRESS: Copies of the revisions are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following office: Environmental Protection Agency, Region VIII, Air Programs Branch, 999 18th Street, Suite 500, Denver, Colorado 80202–2405.

FOR FURTHER INFORMATION CONTACT: Laurie Ostrand, Environmental Protection Agency, Region VIII, Air Programs Branch, Suite 500, Denver, Colorado 80202–2405, (303) 293–1814, (FTS) 564–1814.

SUPPLEMENTARY INFORMATION: Sections 111(c) and 112(d) of the Clean Air Act permit EPA to delegate to the states the authority to implement and enforce standards set forth in 40 CFR Part 60, NSPS, and 40 CFR Part 61, NESHAP.

Montana

On March 9, 1988, the State of Montana requested the authority to implement and enforce those NSPS and NESHAPs promulgated in 40 CFR Parts 60 and 61, respectively, effective through July 1, 1987. Pursuant to that request, on June 17, 1988, delegation was given with the following letter:

Honorable Ted Schwinden,
Governor of Montana, State Capitol, Helena, Montana 59620

Dear Governor Schwinden: This is in response to your submittal dated March 9, 1988. The submittal was a request for modifications to the Montana State Implementation Plan (SIP). The modifications consisted of revisions to the following Montana rules: Standards of Performance for New Stationary Sources (NSPS); National Emissions Standards for Hazardous Air Pollutants (NESHAPs); Air Quality Models, and Particulate Matter. This letter addresses only those revisions that pertain to the NSPS and NESHAPs. The air quality models and particulate matter regulations will be addressed through separate **Federal Register** actions.

On May 18, 1977, EPA delegated to the State of Montana the authority to implement and enforce those NSPS that had been promulgated by EPA as of January 26, 1976, and those NESHAPs that had been promulgated by EPA as of October 14, 1975. (See 42 FR 44573, September 6, 1977.) Additionally, on September 17, 1984 (49 FR 36368), EPA published in the **Federal Register** two tables updating the delegation status of NSPS and NESHAPs for states in Region VIII. The NSPS table indicated that the State of Montana had delegation for the following: 40 CFR Part 60, Subparts A, D, Da, E, F, G, H, I, J, K, Ka, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, AA, BB, CC, DD, EE, GG, HH, MM, and PP. The NESHAPs table incorrectly showed that the State of Montana did not have delegation for any NESHAPs. (We will be correcting the NESHAPs table that currently appears in the Code of Federal Regulations in the near future.)

With regard to the March 9, 1988, submittal, EPA has reviewed the pertinent laws of the State of Montana and the rules and regulations thereof, and has determined that they provide an adequate and effective procedure for implementing and enforcing the NSPS and NESHAPs in the State of Montana. Therefore, pursuant to Sections 111(c) and 112(d) of the Clean Air Act (CAA), as amended, and 40 CFR Parts 60 and 61, I hereby delegate our authority for the implementation and enforcement of the NSPS and NESHAPs to the State of Montana as follows:

1. Authority for all sources located in or to be located in the State of Montana which are subject to the NSPS and NESHAPs (except 40 CFR Part 61, Subparts B, H, I, K, which pertain to radionuclides) promulgated in 40 CFR Parts 60 and 61, respectively, as of July 1, 1987.

2. Not all authorities of NSPS and NESHAPs can be delegated to states under Sections 111(c) and 112(d) of the CAA. The EPA Administrator retains the authority to implement those sections of NSPS and NESHAPs that require: (1) Approving equivalency determinations and alternative test methods; (2) decision making to ensure national consistency; (3) rulemaking to implement. To the best of our knowledge, the following are the authorities in 40 CFR Parts 60 and 61 that EPA cannot delegate to the State:

NSPS

M	61.151(c)(2), 61.152(b)(3), 61.153(c), 61.154(b)(2), 61.156(d).
N	61.164 (a)(2) and (a)(3).
O	61.172 (b)(2)(ii)(B) and (b)(2)(iii)(C), 61.174 (a)(2) and (a)(3).
V	61 242-1(c)(2), 61.244.

3. Since the State of Montana has emission standards in ARM 16.8.1401 to .1419, for several source types in addition to the NSPS, which are a part of the SIP and federally enforceable, EPA requires that any source subject to the NSPS must also conform to the requirements of all other federally-enforceable air quality rules and meet the most stringent requirement when inconsistencies with other requirements exist. (This comment was made to the Department of Health on January 4, 1988.)

This delegation is based upon and is a continuation of the same conditions as those stated in our letter of May 18, 1977, except condition 6, relating to federal facilities. Condition 6 has been voided by the CAA Amendments of 1977. It is important to note that EPA retains concurrent enforcement authority as stated in condition 3 of our May 18, 1977, letter. (A copy of the May 18, 1977, letter was published in the **Federal Register** of September 6, 1977 (42 FR 44573), and is enclosed for your convenience.) In addition, information received by the State of Montana pursuant to 40 CFR 60.676(b), pertaining to Nonmetallic Mineral Processing Plants, should be copied to the Director of Emission Standards and Engineering Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711. A notice announcing this delegation will be published in the **Federal Register** in the near future.

Since this delegation is effective immediately, there is no need for the State to notify EPA of its acceptance. Unless we receive written notice from you of objections within ten days of the date of this letter, the State of Montana will be deemed to have accepted all of the terms of the delegation.

Sincerely,

James J. Scherer,

Regional Administrator.

North Dakota

On January 26, 1988, the State of North Dakota submitted revisions to its NSPS and NESHAP regulations. Such revisions included the addition of NSPS for the following source categories: Storage vessels for petroleum liquids constructed after May 18, 1978; on-shore natural gas processing plants (SO_2 emissions); on-shore natural gas processing plants (equipment leaks of Volatile Organic Compounds (VOC)); synthetic organic chemicals manufacturing industry (equipment leaks of VOC); petroleum refineries (equipment leaks of VOC); bulk gasoline terminals; nonmetallic mineral processing plants; and petroleum dry cleaners (40 CFR Part 60, Subparts Ka, LLL, KKK, VV, GGG, XX, OOO, and JJJ, respectively). Such revisions also included the addition of the following NESHAPs: Equipment leaks (fugitive emission sources) of benzene and equipment leaks (fugitive emission sources) (40 CFR Part 61, Subparts J and V, respectively). Pursuant to such submittal, on June 30, 1988, delegation was given with the following letter:

Honorable George A. Sinner,
Governor of North Dakota, State of North Dakota, Office of the Governor, Bismarck, North Dakota 58505

Dear Governor Sinner: This letter is in response to your submittal dated January 26, 1988. The submittal was a revision to the Implementation Plan for the Control of Air Pollution for the State of North Dakota and included the addition of and revision to several Air Pollution Control Rules and Regulations. This letter addresses only those additions that pertain to the New Source Performance Standards (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAPs). The remaining regulations are being addressed through separate **Federal Register** actions.

Subsequent to states adopting NSPS and NESHAPs regulations, the Environmental Protection Agency (EPA) delegates the authority for the implementation and enforcement of those NSPS and NESHAPs so long as those regulations are equivalent to, or more stringent than, the federal regulations. EPA, therefore, is acting on the delegation of authority to North Dakota for implementation and enforcement of eight NSPS and two NESHAPs.

EPA has reviewed the pertinent statutes and regulations of the State of North Dakota and has determined that they provide an adequate and effective procedure for the implementation and enforcement of the NSPS and NESHAPs by the State of North Dakota. Therefore, pursuant to Section 111(c) and 112(d) of the Clean Air Act (CAA), as amended, and 40 CFR Parts 60 and 61, EPA hereby delegates its authority for the implementation and enforcement of the NSPS and NESHAPs to the State of North Dakota as follows:

(A) Responsibility for all sources located, or to be located in the State of North Dakota subject to the standards of performance for new stationary sources promulgated in 40 FR Part 60. The categories of new stationary sources covered by this delegation are as follows: storage vessels for petroleum liquids constructed after May 18, 1978; on-shore natural gas processing plants (SO_2 emissions); on-shore natural gas processing plants (equipment leaks of Volatile Organic Compounds (VOC)); synthetic organic chemicals manufacturing industry (equipment leaks of VOC); petroleum refineries (equipment leaks of VOC); bulk gasoline terminals; nonmetallic mineral processing plants; and petroleum dry cleaners.

(B) Responsibility for all sources located, or to be located, in the State of North Dakota subject to the emission standards for hazardous air pollutants promulgated in 40 CFR Part 61. The categories of hazardous air pollutants covered by this delegation are as follows: equipment leaks (fugitive emission sources) of benzene and equipment leaks (fugitive emission sources).

(C) Not all authorities of NSPS and NESHAPs can be delegated to states under Section 111(c) and 112(d) of the CAA. The EPA Administrator retains the authority to implement those sections NSPS and NESHAPs that require: (1) Approving equivalency determinations and alternative test methods; (2) decision-making to ensure national consistency; and (3) EPA rulemaking to implement. The following are the authorities in 40 CFR Parts 60 and 61 that EPA cannot delegate to the State:

(i) 40 CFR 60.114a [33-15-12-04(9)(e) in North Dakota's Regulations] pertains to an equivalency determination and rulemaking to implement in Storage Vessels of Petroleum Liquids constructed after May 18, 1978;

(ii) 40 CFR 60.634 [33-15-12-04(22)(e) in North Dakota's Regulations] pertains to an equivalency determination and rulemaking to implement in Equipment Leaks of VOC from Onshore Natural Gas Processing Plants;

(iii) 40 CFR 60.482-1(c)(2) and 60.484 [33-15-12-04(23)(c) (3) and (23) (o) in North Dakota's Regulations] pertains to equivalency determinations and a rulemaking to implement in Equipment Leaks of VOC in the Synthetic Organic Chemical Manufacturing Industry;

(iv) 40 CFR 60.592(c) [33-15-12-04(24)(c)(3) in North Dakota's Regulations] pertains to an equivalency determination in Equipment Leaks of VOC in Petroleum Refineries; and

(v) 40 CFR 60.623 [33-15-12-04(27)(d) in North Dakota's Regulations] pertains to an equivalency determination and rulemaking to implement in Petroleum Dry Cleaners.

(vi) 40 CFR 60.502(e)(6) [33-15-12-04(25)(c)(5)(f) in North Dakota's Regulations] pertains to an equivalency determination in Bulk Gasoline Terminals.

(vii) 40 CFR 61.112(c) [33-15-13-07(3)(c) in North Dakota's Regulations] pertains to an equivalency determination in Emission Standards for Equipment Leaks (fugitive emissions sources) of Benzene.

(viii) 40 CFR 61.242-1(c)(2) and 244 [33-15-13-08 (3)(a), (3)(b) and (5) in North Dakota's Regulations] pertains to equivalency determinations in Emission Standards for Equipment Leaks (fugitive emissions sources).

(D) As 40 CFR Parts 60 and 61 are updated by EPA, North Dakota must revise its rules and regulations accordingly.

This delegation is based upon and is a continuation of the same conditions as those stated in EPA's original delegation letter of August 30, 1976, except that condition 5, relating to Federal facilities, has been voided by the Clean Air Act Amendments of 1977. It

VOL 53 ISS 242 DE 16 1988 UMI

is also important to note that EPA retains concurrent enforcement authority as stated in condition 2 and if at any time there is a conflict between a State and Federal Regulation (40 CFR Parts 60 and 61), the Federal Regulation must be applied if it is more stringent than that of the State, as stated in condition 7 of our letter dated August 30, 1976. (A copy of the August 30, 1976 letter was published in the notices section of the **Federal Register** of October 13, 1976 (41 FR 44884), along with the associated rulemaking notifying the public that certain reports and applications required from operators of new or modified sources shall be submitted to the State of North Dakota (41 FR 44859). Copies of the **Federal Register** are enclosed for your convenience.) In addition, information received by the State of North Dakota pursuant to 40 CFR 60.676(b), pertaining to Nonmetallic Mineral Processing Plants, should be copied to the Director of Emission Standards and Engineering Division (MD–13), U.S. EPA, Reasearch Triangle Park, North Carolina 27711.

Since this delegation is effective immediately, there is no need for the State to notify the EPA of its acceptance. Unless we receive written notice of objections from you within ten days of the date on which you receive this letter, the State of North Dakota will be deemed to have accepted all the terms of this delegation.

Sincerely,

James J. Scherer,

Regional Administrator.

Wyoming

On September 6, 1988, the State of Wyoming submitted revisions to its NSPS and NESHAPs regulations. Such submittal included the addition of the following NSPS source categories: Secondary emissions from basic oxygen process steelmaking facilities for which construction is commenced after January 20, 1983; steel plants—electric arc furnaces and argon-oxygen decarburization vessels constructed after August 7, 1983; metallic mineral processing plants; pressure sensitive tape and label surface coating operations; equipment leaks of volatile organic chemicals (VOC) in the synthetic organic chemicals manufacturing industry; beverage can surface coating industry; bulk gasoline terminals; flexible vinyl and urethane coating and printing; equipment leaks of VOC in petroleum refineries; synthetic fiber production facilities; petroleum dry cleaners; equipment leaks of VOC from onshore natural gas processing plants; onshore natural gas processing—SO_2 emissions; nonmetallic mineral processing plants; and wool fiberglass insulation manufacturing plants (40 CFR Part 60, Subparts Na, AAa, LL, RR, VV, WW, XX, FFF, GGG, HHH, JJJ, KKK, LLL, OOO, and PPP); and part of the following NESHAP: Asbestos (40 CFR Part 61, Subpart M). Pursuant to such submittal, on September 30, 1988, delegation was given with the following letter:

Charles A. Collins, Administrator,
Air Quality Division, Governor of North Dakota, Wyoming Department of Environmental Quality, Herschler Building, 122 West 25th Street, Cheyenne, Wyoming 82002

Dear Mr. Collins:

On September 6, 1988, you requested approval on several revisions and additions to the Wyoming Air Quality Standards and Regulations (WAQSR) and State Implementation Plan (SIP). This letter addresses only those WAQSR that pertain to the New Source Performance Standards (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAPs), i.e. Section 22, NSPS, and Section 29, Emission Standards of Asbestos for Demolition, Renovation and Spraying Air Pollution Control Rules and Regulations. The remaining WAQSR (stack height, visibility and ambient air) are being addressed through separate **Federal Register** actions.

Subsequent to states adopting NSPS and NESHAPs regulations, the Environmental Protection Agency (EPA) delegates the authority for the implementation and enforcement of those NSPS and NESHAPs so long as those regulations are equivalent to, or more stringent than, the federal regulations. EPA, therefore, is acting on the delegation of authority to Wyoming for implementation and enforcement of fifteen NSPS and one NESHAP.

EPA has reviewed the pertinent statutes and regulations of the State of Wyoming and has determined that they provide an adequate and effective procedure for the implementation and enforcement of the NSPS and NESHAPs by the State of Wyoming. Therefore, pursuant to Section 111(c) and 112(d) of the Clean Air Act (CAA), as amended, and 40 CFR Parts 60 and 61, EPA hereby delegates its authority for the implementation and enforcement of the NSPS and NESHAPs to the State of Wyoming as follows:

(A) Responsibility for all sources located, or to be located in the State of Wyoming subject to the standards of performance for new stationary sources promulgated in 40 FR Part 60. The categories of new stationary sources covered by this delegation are as follows: secondary emissions from basic oxygen process steelmaking facilities for which construction is commenced after January 20, 1983 (Na); steel plants—electric arc furnaces and argon-oxygen decarburization vessels constructed after August 7, 1983 (AAa); metallic mineral processing plants (LL); pressure sensitive tape and label surface coating operations (RR); equipment leaks of volatile organic chemicals (VOC) in the synthetic organic chemicals manufacturing industry (VV); beverage can surface coating industry (WW); bulk gasoline terminals (XX); flexible vinyl and urethane coating and printing (FFF); equipment leaks of VOC in petroleum refineries (GGG); synthetic fiber production facilities (HHH); petroleum dry cleaners (JJJ); equipment leaks of VOC from onshore natural gas processing plants (KKK); onshore natural gas processing—SO_2 emissions (LLL); nonmetallic mineral processing plants (OOO); and wool fiberglass insulation manufacturing plants (PPP).

(B) Responsibility for all sources located, or to be located, in the State of Wyoming subject to the emission standards for hazardous air pollutants promulgated in 40 CFR Part 61. The category of hazardous air pollutant sources covered by this delegation is as follows: Asbestos demolition, renovation and spraying, waste disposal for demolition, renovation and spraying operations. This delegation does *not* include the following category of sources: asbestos mills, roadways, manufacturing, fabricating, and insulating materials, waste disposal for manufacturing and fabricating operations, and inactive waste disposal for asbestos mills, manufacturing and fabricating operations. EPA will retain the authority to implement and enforce those categories of sources not delegated to the State.

It should be noted that WAQSR Section 29(a) only states applicability to (g) when in fact it should include (j) also. The State should correct this oversight with the next regulation update.

(C) Not all authorities of NSPS and NESHAPs can be delegated to states under Section 111(c) and 112(d) of the CAA. The EPA Administrator retains the authority to implement those sections of NSPS and NESHAPSs that require: (1) Approving equivalency determinations and alternative test methods; (2) decision making to ensure national consistency; and (3) EPA rulemaking to implement. The following are the authorities in 40 CFR Parts 60 and 61 that EPA cannot delegate to the State:

(i) 40 CFR Parts 60.482–1(c)(2) and 60.484 pertain to equivalency determinations and a rulemaking to implement in Equipment Leaks of VOC in the Synthetic Organic Chemical Manufacturing Industry;

(ii) 40 CFR Parts 60.493(b)(2)(i)(A) and 496(a)(1) pertain to equivalency determinations in the Beverage Can Surface Coating Industry; and

(iii) 40 CFR Part 60.502(e)(6) pertains to an equivalency determination in Bulk Gasoline Terminals;

(iv) 40 CFR Part 60.592(c) pertains to an equivalency determination in Equipment Leaks of VOC in Petroleum Refineries;

(v) 40 CFR Part 60.623 pertains to an equivalency determination and rulemaking to implement in Petroleum Dry Cleaners;

(vi) 40 CFR Part 60.634 pertains to an equivalency determination and rulemaking to implement in Equipment Leaks of VOC from Onshore Natural Gas Processing Plants;

(vii) 40 CFR Parts 152(b)(3), 154(b)(2), and 156 (d) pertains to equivalency determinations in Asbestos.

(D) As 40 CFR Parts 60 and 61 are updated by EPA, Wyoming must revise its rules and regulations accordingly and in a timely manner or such delegation will be revoked.

In the review of the draft submittal, EPA brought to the State's attention (see April 19, 1988, letter to Charles Collins from Douglas Skie, EPA), amendments, revisions, additions, etc. pertaining to NSPS (i.e., General

Provisions, Testing Methods, Performance Specifications and previously delegated NSPS Subparts) that had been promulgated by EPA but had not yet been incorporated into WAQSR Section 22. The State has committed to consider and/or make the noted revisions and corrections in the "Response to the comments submitted by the EPA in the April 19, 1988, letter" which was included in Addendum 4 of the State's September 6, 1988 submittal. EPA is proceeding with this delegation on the grounds that the State has made such commitment. If the State does not revise and update its regulations in FY89 as it has committed, EPA will re-evaluate this delegation and past delegations.

This delegation is based upon and is a continuation of the same conditions as those stated in EPA's original delegation letter of August 2, 1977, except that condition 6, relating to Federal facilities, has been voided by the Clean Air Act Amendments of 1977. It is also important to note that EPA retains concurrent enforcement authority as stated in condition 3. If at any time there is a conflict between a State and Federal Regulation (40 CFR Parts 60 and 61), the Federal Regulation must be applied if it is more stringent than that of the State, as stated in condition 9 of our letter dated August 2, 1977. This is particularly important with regard to your General Provisions and Testing Methods, Appendix II. Comments EPA provided on these draft regulations indicated that they are not up-to-date. The State, however, has committed to update those regulations in its next regulation review in FY89.

In addition, whereas the original delegation letter pertaining only to NSPS, those conditions in the original delegation letter now apply to NESHAPs, as appropriate. (A copy of the August 2, 1977 letter was published in the notices section of the **Federal Register** of September 15, 1977 (42 FR 46386), along with the associated rulemaking notifying the public that certain reports and applications required from operators of new or modified sources shall be submitted to the State of Wyoming (42 FR 46304). Copies of the **Federal Register** are enclosed for your convenience.)

Since this delegation is effective immediately, there is no need for the State to notify the EPA of its acceptance. Unless we receive written notice of objections from you within ten days of the date on which you receive this letter, the State of Wyoming will be deemed to have accepted all the terms of this delegation. An information notice will be published in the **Federal Register** in the near future informing the public of this delegation. This letter will appear in such notice in its entirety.

Sincerely,

James J. Scherer,

Regional Administrator

List of Subjects

40 CFR Part 60

Air pollution control, Aluminum, Aluminum reduction, Ammonium sulfate plants, Asphalt, Asphalt concrete plants, Asphalt processing and asphalt roofing manufacture, Basic oxygen process steelmaking, Brass, Bronze, Cement industry, Coal preparation plants, Copper, Copper smelters, Electric power plants, Electric utility steam generating units, Ferroalloy, Fossil fuel-fired steam generators, Gasoline, Glass, Glass products, Glass manufacturing, Grain, Grain elevators, Graphic arts, Incenerators, Incorporation by reference, Industrial-commercial-institutional steam generating units, Intergovernmental relations, Iron, Iron and steel plants, Lead, Lead smelters, Lead acid battery, Lime, Lime manufacturing, Magnetic tape industry, Metals, Metallic minerals, Nitric acid plants, Nonmetallic minerals, Paper and paper products industry, Petroleum, Petroleum refineries, Petroleum liquid storage vessels, Phosphate fertilizer industry, Primary copper smelters, Plastic parts for business machines coating, Primary zinc smelters, Primary lead smelters, Primary aluminum reduction, Pulp mills, Phosphate rock, Portland cement, Residential wood heaters, Rubber industry, Secondary lead smelters, Secondary brass and bronze ingot production, Sewage disposal, Sewage treatment, Steel, Sulfuric acid plants, Turbines, Waste treatment and disposal, Zinc, Zinc smelters, Tires, Surface coating, Industrial organic chemicals, Organic solvent cleaners, Fiberglass insulation, Synthetic fibers, Stationary gas turbines, Natural gas processing, Wool fiberglass, Metal furniture surface coaters, Automobile and light duty surface coaters, Metal coal surface coaters, Beverage can surface coaters, and Flexible vinyl and urethane coaters and printers.

40 CFR Part 61

Air pollution control, Asbestos, Benzene, Beryllium, Equipment leaks (fugitive emission sources), Inorganic arsenic, Hazardous materials, Mercury, Vinyl chloride.

Authority: 42 U.S.C. 7411 and 7412.

Date: December 2, 1988.

James J. Scherer,

Regional Administrator.

Florida; Final Authorization of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Final authorization on application of Florida for program revision.

SUMMARY: Florida has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). Environmental Protection Agency (EPA) has reviewed Florida's application and has reached a decision that Florida's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA is granting final authorization to Florida to operate its expanded program, subject to the authority retained by EPA in accordance with the Hazardous and Solid Waste Amendments of 1984.

EFFECTIVE DATE: Final authorization for Florida shall be effective at 1:00 pm on January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Otis Johnson, Jr., Chief, Waste Planning Section, RCRA Branch, Waste Management Division, U.S. Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365, Telephone: (404) 347-3016.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6929(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. In addition, as an interim measure, the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98-616, November 8, 1984, hereinafter "HSWA") allows States to revise their programs to become substantially equivalent instead of equivalent to RCRA requirements promulgated under HSWA authority. States exercising the latter option receive "interim authorization" for the HSWA requirements under section 3006(g) of RCRA, 42 U.S.C. 6926(g), and later apply for final authorization for the HSWA requirements.

Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes in EPA's regulations in 40 CFR Parts 260 through 266 and 124 and 270.

B. Florida

Florida initially received final authorization of its hazardous waste program on February 12, 1985 (50 FR 3908, January 29, 1985). On February 27, 1987, Florida submitted a final revision application for non-HSWA requirements promulgated through June 30, 1985. Florida received final authorization for these revisions on March 1, 1988 (53 FR 127, January 5, 1988). Florida was placed on a schedule of compliance to obtain program modifications for section 3006(f), Availability of Information (AOI) of the HSWA (52 FR 26013, July 10, 1987). Today, Florida is seeking approval of its program revisions for the following authorities through June 30, 1986, in accordance with 40 CFR 271.21(b)(4).

EPA has reviewed Florida's application, and has made a final decision that Florida's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization.

EPA recognizes Florida's lack of a provision for waiver of fees for information in the public interest as specified at 40 CFR 2.120(d). A public hearing was scheduled for October 20, 1988. No requests to hold the hearing, or adverse public comments were received prior to the end of the public comment period on October 13, 1988. Therefore, the public hearing was cancelled by publishing legal notices in six major Florida newspapers prior to the scheduled date of the hearing. Two commenters expressed concern after the public hearing had been cancelled, that the wording of the **Federal Register** notice published September 15, 1988 (53 FR 35836) was not clear regarding the agency's option to cancel the hearing if no public interest was expressed. EPA apologizes to those inconvenienced, and will take steps to improve the wording of future public notices. One commenter expressed concern that Florida's fees for information, though minimal, could still prove to be an obstacle for some citizens or public interest groups; and that the Florida legislature should be aware of this possibility. However, the commenter did not express an objection to EPA's tentative determination to authorize Florida for the modifications in question. (For fuller discussion of Florida's information release provisions and fee structure, see 53 FR 35836 dated September 15, 1988). Consequently, EPA is hereby granting final authorization for the additional program modifications to Florida's Hazardous Waste Management Program.

Florida is not seeking authorization to operate on Indian lands.

VOL 53 ISS 242 DE 16 1988 UMI

C. Decision

I conclude that Florida's application for program revision meets all of the statutory and regulatory requirements established by RCRA. Accordingly, Florida is granted final authorization to operate its hazardous waste program as revised. Florida now has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out other aspects of the RCRA-program, subject to the limitation of its program revision application and previously approved authorities. Florida also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under section 3008, 3013 and 7003 of RCRA.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Florida's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This, rule, therefore, does not require a regulatory flexibility analysis.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

43 CFR Part 426

Acreage Limitation Rules and Regulations

September 12, 1988.

AGENCY: Bureau of Reclamation, Interior.

ACTION: Final rule.

SUMMARY: These rules revise the existing rules for administration of the Reclamation Reform Act of 1982 (RRA). The existing rules have been revised to incorporate several amendments to the RRA that are contained in the Omnibus Budget Reconciliation Act of 1987 (1987 Budget Act), which was enacted on December 22, 1987. The amendments address audits for compliance with Reclamation law, water rates for land owned under extended recordable contracts, underpayments for irrigation water deliveries to landholdings, and treatment of revocable trusts.

EFFECTIVE DATE: January 17, 1989.

FOR FURTHER INFORMATION CONTACT: Alonso Knapp; telephone (303) 236-4042.

SUPPLEMENTARY INFORMATION:

Background

The RRA, Title II, Pub. L. 97-293 (96 Stat. 1263), was signed into law by President Reagan on October 12, 1982. The Act modernized Reclamation law. Final rules and regulations implementing the RRA were published in the **Federal Register** on December 6, 1983. Those rules were revised on April 13, 1987, primarily to add provisions for implementing section 203(b) of the Act. That section mandated that after April 12, 1987, parties remaining subject to prior law must pay the full-cost rate for irrigation water delivered to land leased in a landholding in excess of 160 acres. On October 26, 1987, the rules were again revised. The purpose of this revision was to eliminate "gifted land" as a type of land transaction subject to the involuntary acquisition provisions of the rules.

Reclamation is now revising the rules to incorporate provisions implementing the new RRA amendments contained in the 1987 Budget Act. Proposed rules were published in the **Federal Register** on June 10, 1988. During the week of June 20, 1988, public hearings were held in San Francisco, California; Denver, Colorado; and Washington, DC. Two persons presented testimony at these hearings. In addition to the two parties represented by witnesses at the hearings, we also received written documents from seven other parties during the public comment period, which closed on July 11, 1988. All of the comments were reviewed and taken into consideration in preparing these final rules.

Summary of Revisions

Following is a summary of the RRA amendments in the 1987 Budget Act and changes that have been made to the rules:

Audits

The first amendment, section 224(g), mandates the Secretary of the Interior to conduct a thorough audit of compliance with Reclamation law by individuals and legal entities. The amendment requires the Secretary, at a minimum, to complete audits of landholdings and operations exceeding 960 acres within 3 years. The Secretary is also required to submit a report to Congress summarizing audit findings and actions that have been taken to correct instances of noncompliance.

Reclamation has initiated its audit efforts. However, since this amendment places no new requirements on landholders themselves, we have added no additional audit language to the rules. The existing provision, § 426.10(i), addresses audits and provides landholders with sufficient information regarding this topic. However, this section has been reworded to make it clear that the performance of audits is mandatory rather than discretionary on the part of Reclamation. In addition, in order to ensure that the Secretary has the information necessary to perform the required audits, § 426.10(a) has been revised to clarify that districts, prior law and new law recipients, and persons operating irrigation land under management arrangements or consulting agreements must provide information and records upon request by the Secretary.

Extended Recordable Contracts

The second amendment, section 224(h), clarifies that both prior law and new law recipients are required to pay the full-cost rate for water deliveries to land under an extended recordable contract. We have revised § 426.11(i)(4) of the rules accordingly. In addition, § 426.7(f) of the rules has been revised to reflect the fact that the full-cost interest rate applicable to prior law recipients for land under extended recordable contract is that set forth in section 202(3)(A) of the RRA and § 426.7(f)(1) of the April 13, 1987, rules. Consequently, the full-cost interest rate applying to prior law recipients with land under

extended recordable contract will be different from the interest rate applying to them for leased land.

Underpayments

We have added a new section to the rules to incorporate the third RRA amendment, section 224(i). This amendment provides that when the Secretary finds that any individual or legal entity has not paid the required amount for irrigation water delivered to a landholding, he shall collect the amount of any underpayment with interest accruing from the day the required payment was due until paid. This requirement of law is reflected in § 426.23 of the rules. The "Severability" provision, which is designated as § 426.23 in the April 13, 1987, rules, has been redesignated as § 426.24 in the revised rules.

Revocable Trusts

The last of the RRA amendments revises the trust section of the RRA, section 214, by adding a subsection providing that land in a revocable trust will be attributed to the grantor if (1) the trust is revocable at the discretion of the grantor or the trust revokes or terminates by its terms once a specific time period has expired and (2) revocation or termination results in title to the land reverting either directly or indirectly to the grantor. Reclamation has revised § 426.6(b)(4) and (d)(6) to incorporate this amendment.

Executive Order 12291

The Department of the Interior has determined that the revised rules do not constitute a major rule under Executive Order 12291; therefore, a Regulatory Impact Analysis is not required and has not been prepared.

National Environmental Policy Act

A FONSI (finding of no significant impact) and a supplement to the April 1987 environmental assessment, which address the environmental impacts of the revised rules, have been prepared and are available for public review. Copies of these documents may be obtained upon request from Reclamation offices located in Boise, Idaho; Sacramento, California; Boulder City, Nevada; Salt Lake City, Utah; Billings, Montana; and Washington, DC.

Paperwork Reduction Act

The collections of information contained in this rule have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance numbers 1006–0005 and 1006–0006. Public reporting burden for this information is estimated to average 0.5 hours per response for the individual landholders' forms and 40 hours per response for the Certification and Reporting forms, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Carolyn Hipps, Chief, Publications and Records Management Branch, Bureau of Reclamation, Denver Federal Center, Denver, CO 80225, and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Small Entity Flexibility Analysis

These rules will not have a significant economic effect on a substantial number of small entities. Only a small number of landholders farming land irrigated by Reclamation projects westwide will be affected by any provision of section 5302 of the 1987 Budget Act. Two of these provisions, the audit and underpayment provisions, are expected to result in little or no economic effect on landholders. The other two provisions, which address revocable trusts and extended recordable contracts, may impact a small number of landholders. However, such landholders will be able to mitigate the potential impacts by altering their trust agreements or, in the case of extended recordable contracts, by becoming subject to the discretionary provisions or selling the recordable contract land before the extended contract period actually matures.

Comments About the Proposed Rules

During the public comment period from June 10 to July 11, 1988, we received documents from nine different parties containing comments about the proposed revisions to the existing rules. Two of the parties submitting written comments also gave testimony at the public hearing in San Francisco on June 20, 1988. No witnesses were present to offer testimony during the hearings in Denver and Washington, DC.

Four of the nine documents received were from respondents residing in California, while two were from respondents in Arizona. The remaining three documents were from parties representing national or regional interests. In looking at the interest groups represented by the parties submitting documents, we found that four were submitted by water districts, two by farm operators, two by conservation/environmental groups, and one by a Federal agency.

We received thirty-one different types of comments directed toward the supplement to the EA and specific provisions in the rules. In some cases, more than one respondent made the same comment. Taking this into consideration, we received a total of 43 comments. For the most part, the comments were divided equally among all the provisions of the rules. No one provision received a disproportionate number of comments.

In addition to receiving comments addressing specific provisions in the rules, we also received several comments about the rules in general. One respondent felt that we did not allow enough time for the public to review the proposed rules before the hearings were held. Another respondent warned that farmers in the Central Arizona Project (CAP) will use groundwater instead of irrigation water if Reclamation adopts punitive rules. The respondent further stated that such action would adversely affect the districts' repayment capability and water conservation efforts. Several respondents urged Reclamation to take a strong stand against the ongoing lawsuit challenging the validity of the April 13, 1988, rules. In addition, Reclamation also received commendations from several respondents for (1) preparing rules that are fair and reasonable, (2) only making changes when absolutely required because of the 1987 Budget Act, and (3) making an effort to understand the concerns of the districts and water users.

Following is a summary of the significant comments received during the comment period, along with our response to each of them:

Section 426.6(b)(4)—Trusts

Comment 1: One respondent commented that it was not fair that Reclamation established an April 20, 1988, deadline for revising revocable trusts, since the rules were not out until June 10, 1988.

Response: In Conference Report 100–498, the conferees require the Secretary to provide landholders a grace period in which to restructure existing trusts to avoid payment of full cost as a result of the new trust amendment. However, the conferees also specifically limit this grace period to no more than 120 days from the date the law was enacted. Reclamation gave affected landholders the benefit of the full 120 days by establishing an April 20, 1988, deadline. In addition, districts were made aware

of the deadline in early March so that landholders would have enough time in which to take advantage of the grace period.

Comment 2: One commenter stated that the trust provision should not apply to Central Arizona Project (CAP) contractors because their contracts state that full-cost pricing will not apply to project water delivered on an interruptible basis. CAP deliveries will be considered interruptible until January 1989.

Response: Congress did not include any exemptions from the provisions contained in section 5302. Therefore, we have not addressed this issue in these rules. The issue of whether or not CAP contractors have a grace period before the ownership and full-cost pricing provisions of Reclamation law apply to them is addressed in a January 13, 1988, memorandum. In that memorandum, the Commissioner concluded that the distinction between interruptible and noninterruptible service is immaterial in determining whether the CAP lands served are required to be in conformance with all of the provisions of the RRA. There is no legal basis for suspending the requirements of the RRA on the grounds that the water deliveries are interruptible.

Comment 3: One respondent suggested that in order to be able to monitor any indirect relationships to the grantor, the rules should require identification of any trustors and all principals in any legal entity involved with a trust, not just the grantors and the persons (entities) to whom the trust land will revert upon revocation.

Response: This comment has not been accommodated. The certification and reporting forms are being revised to require landholders to identify revocable trust arrangements. All such arrangements will be thoroughly reviewed to determine the relationships, both direct and indirect, of all involved parties.

Comment 4: One respondent commented that in the case of grantors who maintain control over land as a trustee during the period of a revocable trust, the language of § 426.6(b)(4)(i), which grants fiduciary trustees a blanket exemption from the ownership and pricing limitations, contradicts § 426.6.6(b)(4)(iii), which provides that land held in certain revocable trusts shall be attributed to the grantor. The respondent suggested that Reclamation solve the problem by adding the following to the end of the first sentence in § 426.6(b)(4)(i):

provided further that the trustee is not the grantor of the land in the trust, subject to attribution to the grantor under subsection (b)(4)(iii).

Response: We agree with the respondent's comment and have revised the language as suggested, with a few minor modifications.

Comment 5: One commenter felt that the distinction between "grantor" and "trustor" sets up situations, such as in example 5 of the proposed rules, that appear ripe for potential abuse. The commenter suggested that, as is the case with grantors, trust land should be attributed to trustors who control and can benefit from a revocable trust.

Response: Reclamation has interpreted the revocable trust provision to mean that when an individual or entity (be it grantor or a trustor) places land in a trust but retains the right to regain the title to the land, either directly or indirectly, through trust revocation, such land is to be attributed to that individual or entity. We do not believe the law gives us the authority to attribute the land to a third party (be it a trustor or grantor) that will gain title to the land through trust revocation if that party did not place the land in the trust.

Comment 6: The last sentence of § 426.6(b)(4)(iii) presumes that the exact identity of the person to whom the trust *will* revert upon revocation is always known. However, what happens if title to the land *could* revert to the grantor only under certain circumstances?

Response: The new law specifies two types of circumstances under which land in a revocable trust must be attributed to the grantor. There are many other conceivable situations under which trusted land could revert to the grantor, but Congress did not address them.

In those cases where title to revocable trust land *could* revert to the grantor, but *only* under certain circumstances, the terms of the trust will be carefully reviewed to determine if the arrangement fully meets the conditions set forth in section 5302(b). Particular attention will be given to determining if the title reverts to the grantor at his own discretion. If such is the case, the land would be attributed to the grantor. However, if the title reverts to the grantor depending on circumstances not within his discretion, for example, depending on actions within the beneficiary's discretion, the land would then be attributed to the beneficiary. New language has not been added to the rules to specifically address this comment, because we think the conditions listed in the first sentence of § 426.6(b)(4)(iii) already adequately cover the situation posed by the respondent.

Comment 7: In addition to addressing full-cost situations resulting from proper attribution, one respondent thought that § 426.6(b)(4)(iv) should also address situations where such attribution causes the grantor to exceed his ownership entitlement. The respondent further stated that in such cases, retroactive charges and prospective cut-off in water deliveries are appropriate.

Response: Section 426.6(b)(4)(iv) was added to the rules in response to Congress' specific reference in the Conference Report to the full-cost situations that can result from the amendment requiring attribution to grantors. A similar provision was not added to address situations resulting in the grantor exceeding his ownership entitlement because Congress made no specific reference to such situations. Furthermore, we do not think it is appropriate to address such situations in the trust section of the rules, because many different sets of circumstances unrelated to revocable trusts can result in a landowner exceeding his ownership entitlement. Generally, all excess land is ineligible to receive irrigation water and retroactive charges would be imposed should water be delivered to such land despite its ineligibility.

Comment 8: One respondent stated that the new rules appear to create the potential for the beneficiary of a revocable trust to enjoy all the benefits of a lease without the arrangement being called a lease. The respondent suggested that the rules should make clear that revocable trusts are subject to § 426.7 just like any other situation equivalent to a lease.

Response: We have interpreted this comment to mean that the commenter believes the new rules create the potential for a beneficiary to use revocable trusts as a means to receive irrigation water at the contract rate on land in excess of his basic entitlement. The commenter seems to be suggesting that in revocable trust situations, the trust land should be attributed to the grantor (as the owner) and also to the beneficiary (as a lessee).

We have not accommodated this comment, because we do not believe we have the authority to attribute such trust land to both parties. The law specifically states that such land is to be attributed to one party; namely, the grantor.

Section 426.10(a)—Information Requirements

Forms

Comment 1: One commenter was concerned that the new language in this

section of the rules might mean that Reclamation is contemplating requiring certification from districts as well as from landowners and lessees. The commenter stated that he would be opposed to this move because it is not required by the RRA. He further stated that districts should not have the responsibility to verify the accuracy of data on landholders' forms.

Response: Section 426.10(a) was revised mainly for the purpose of clarifying the term "individuals" as that term was used in this section of the April 13, 1987, rules; it was not revised for the purpose of requiring districts to submit the same certification/reporting forms as do owners and lessees. Such a requirement would clearly be impossible due to the very different roles of these parties. However, pursuant to section 228 of the RRA, § 426.10(h) of the existing rules does require water districts to submit a yearly report summarizing landholders' certification/reporting forms. This requirement has been in effect since the RRA was enacted and is not a provision that is new to the acreage limitation rules.

Regarding districts' responsibility to verify information on landholders' forms, ultimately it is each landholder who is responsible for the information on his/her form. However, under their contracts with the United States, districts are responsible for providing Reclamation with necessary data and reports. We think it is reasonable as part of this requirement to require districts to report known discrepancies on landholder forms. Reclamation has the added responsibility of further investigating such discrepancies.

Comment 2: One respondent suggested that the reference in this paragraph to "§ 426.7(a)(1)" should be changed to "§ 426.7(a)."

Response: During our analysis of this comment, we realized that in contrast to the respondent's suggestion, our reference was not detailed enough. Our intent in the subject sentence was to refer specifically to management arrangements and consulting agreements. These items are discussed in only one place—subparagraph (a)(1)(i) of § 426.7. The intended meaning of the subject sentence would be changed if the citation were to include all of paragraph (a), or for that matter, all of subparagraph (a)(1). Therefore, the reference citation has been revised to be even more specific than it was in the proposed rules.

Comment 3: Two respondents questioned whether Reclamation has the legal authority to impose information requirements on any person or entity other than landowners and lessees. The respondents think that any information the Secretary needs regarding management or consulting agreements should be obtained from the landholders under penalty of perjury.

Response: Section 224(c) of the RRA provides the authority for Reclamation to impose information requirements on individuals and entities who are not landowners or lessees. In that section, the Secretary is directed to collect all data necessary to carry out the provisions of the law. Congress did not limit information collection efforts to owners and lessees.

Comment 4: One respondent supported the clarification made in this section, stating that the clarification assures that the Secretary has access to all the information necessary to conduct the audits required by law.

Response: No response necessary.

Comment 5: One commenter stated that the existing forms do not adequately identify operators—they only ask for the operator's name and address. The commenter also stated that it is inappropriate simply to notify water users that they *may* have to provide information about operators when requested on a case-by-case basis. Such an approach causes delays in the auditing process, places unnecessary burden on the Secretary to determine which documents to request, and risks the loss of information from years prior to the audit which may be needed to determine if underpayments are due.

The commenter also maintained that to be legally sufficient, the rules must make it clear that individuals and entities operating land under an agreement described in § 426.7(a)(1) are required to provide information about their operations on a regular basis. In addition, the commenter suggested that the rules should not limit information collection to just those operators described in § 426.7(a)(1). Rather, Reclamation should get information from all individuals and entities with other interests in the operations.

Response: The Solicitor's Office has determined that it is not legally necessary to require forms from all operators in order to satisfy the requirements of section 224(g) of the RRA. Despite the fact that we are not requiring all operators to submit forms, we have taken measures to ensure that we will have adequate information about all operations. The existing certification/reporting forms already require landowners and lessees to report whether or not they have hired a farm operator. In addition, the forms are being revised to require landholders to provide more detailed information about such operators. For example, under the proposed new forms, all landholders must list the telephone numbers, the services provided, and the acreage associated with each operator. We believe that such information from the forms, in combination with the information we can request directly from operators pursuant to § 426.10(a), will provide Reclamation with all the data needed to satisfy the requirements of section 224(g) of the law.

Comment 6: We received two comments suggesting that the forms need to be revised so that landowners with extended recordable contracts will know that they need to complete the "Application for Selection of Non-Full-Cost Land" form.

Response: The forms are being revised accordingly.

Audits

Comment 7: Several respondents stated that the preamble should be expanded to make it clear that, (1), as required by law, audits of smaller farms and operations (under 960) will also take place and (2) underpayment provisions also apply to these smaller farms.

Response: Reclamation plans to conduct audits of smaller farms and operations as well as of those that exceed 960 acres. The underpayment provision applies, as written in § 426.23 of the rules, to small and large farms alike.

Comment 8: Two respondents stated that Reclamation should set forth in the preamble and other public documents its intent to meet the statutory requirements to complete audits of each set of land managed in a single farming operation of over 960 acres, whether limited to single landholdings or extended over several landholdings operated together under farm management contracts and the like.

Response: As required by section 224(g), Reclamation plans to complete audits of entities and individuals whose landholdings or operations exceed 960 acres. In determining which operations to audit, we will look at the total holding of the operating entity.

Comment 9: One respondent pointed out that § 426.10(i) of the existing rules states that "The Secretary *may* conduct field audits, as necessary * * *," and suggested that "may" should be changed to "will" in order to be consistent with the directive in the 1987 amendments to the RRA.

Response: The final rules have been revised to reflect the respondent's suggestion.

Comment 10: We received comments from two persons suggesting that Reclamation establish audit procedures

wherein landholders would be (1) given notice that they had been selected for an audit and an opportunity to participate in the audit process, (2) given the opportunity to appeal decisions, (3) permitted to rely on prior decisions by Reclamation.

Response: We do not believe it is appropriate to establish specific audit procedures in the rules. Procedures have been and will continue to be developed through policy guidance rather than through the rulemaking process. The procedures will include appropriate opportunities for landholders to be involved in the audit process.

Section 426.11(i)(4)—Water Rates for Land Under Extended Recordable Contract

Comment 1: Two respondents felt that the following language would make clause (i) of the first paragraph in § 426.11(i)(4) easier to read and understand:

"for land under recordable contract owned by qualified and limited recipients, the non-full-cost rate was applicable until October 21, 1985, (January 10, 1986 in Westlands Water District) or until the extended contract period expired, whichever occurred first, and after October 21, 1985, (January 10, 1986 in Westlands Water District) water deliveries have been subject to the full-cost rate through the effective termination date of the extended recordable contract, * * *."

Response: This comment does not suggest a substantive change; therefore, it has not been accommodated.

Comment 2: Two persons stated that since the full-cost rate category status of land under extended recordable contract is not affected by the status of the lessee, the word "owned" should replace the word "held" in clauses (i) and (ii) of this section.

Response: This comment has been accommodated.

Comment 3: One commenter objected to the sentence in the preamble which states that prior to the 1987 amendments, section 205(c) of the RRA applied only to landholders subject to the discretionary provisions. The commenter believes that statement should be revised to make it clear that prior to the 1987 amendment, it was Reclamation's rules, not the law, that applied section 205(c) to only some landowners with extended recordable contracts.

Response: The Department disagrees with the commenter's legal view. It is the Department's legal view that the statute itself, not merely Reclamation's rules, limited the application of section 205(c) to landholders subject to the discretionary provisions.

Comment 4: One person commented that the proposal to charge prior law recipients the full-cost rate for land under extended recordable contracts is (1) unlawful because it interprets section 224(h) in a way that contradicts the expressed intention of Congress and applicable constitutional principles of statutory interpretation and (2) is unwise and unfair because it reverses established policies and principles.

Response: We disagree with the legal statement made in this comment.

Comment 5: Two respondents requested that the rules specifically state that a recordable contract on land designated as nonexcess and non-full cost is deemed terminated immediately upon receipt by Reclamation of an irrevocable election.

Response: While the rules do not specifically state when a recordable contract is deemed terminated, the rules as currently written, permit us to treat recordable contracts as stated by the commenter. Reclamation's policy on this matter can be summarized as follows: If a landowner elects to become subject to the discretionary provisions, the election is considered effective on a conditional basis as of the date Reclamation receives the election form. As of that date, the less than full-cost rate would apply to any land a landowner withdraws from an extended recordable contract and includes as part of his nonexcess land designation, unless the land becomes subject to full-cost pricing through leasing or the election is disapproved. If the election is disapproved, the landowner is held responsible for any full-cost charges that accumulated during the review period.

Comment 6: The following proposal was received from two respondents: Since it takes Reclamation a long time to complete excess land sale price approvals, the buyer and seller of excess land should be permitted to enter into a binding escrow, and Reclamation should treat this action as a disposition of excess land. Thereby, the full-cost rate to extended recordable contract land could be terminated prior to actual transfer of title. If necessary to protect the interests of the United States, this proposal could include a provision for payment of the full-cost differential into a trust fund for the duration of the escrow.

Response: This suggestion has not been accommodated because the law requires, without exception, that section 205(c) of the RRA be applied to all owners of land under extended recordable contract. Therefore, as long as title to such land remains with the seller, we do not have the authority to waive the full-cost requirements.

However, Reclamation has taken steps to satisfy the concerns raised by this commenter. First, we have reduced the time it takes to complete excess land appraisals by adding additional staff to process the appraisals and by instituting a multiple appraisal process. Second, we will permit owners of such land to sell the land before the appraisal process is completed without jeopardizing the land's eligibility to receive water, provided the buyer and seller enter into a reformation agreement. Under such an agreement, the seller and buyer agree to reform the sale price of the land should it exceed Reclamation's approved sale price. The interim water deliveries are made at the rate applicable to the buyer based on his status under the law.

Comment 7: One commenter felt that it is not fair that lessees of extended recordable contract land must pay the full-cost rate even though they are within their entitlements to receive subsidized water. The commenter suggested that the rules provide that if an existing grower is within the acreage limitations, he gets the subsidized water even if the landlord does not qualify.

Response: Reclamation's main responsibility in implementing section 224(h) of the RRA is to make sure that the full-cost rate is paid for water deliveries to land under extended recordable contract. Regarding the question of whether such charges are to be paid by the owner or the lessee, it is our policy that this is a matter among the landowner, lessee, and the district. Therefore, this comment has not been accommodated.

Section 426.23—Interest on Underpayments

Comment 1: We received the following related questions regarding the underpayment provision: What is a district's responsibility for collecting underpayments? For example, suppose a lessee leases land from a qualified recipient, and then without his or the district's knowing, the qualified recipient becomes a limited recipient. Is either the district or the lessee responsible for the underpayments? As another example, would a district be held liable for an underpayment that is discovered after a landowner has moved? Finally, if a district's payments are due semiannually (in June and January), will underpayments be calculated back to June even though the landholder subject to the underpayment did not take water until August?

Response: For the most part, the United States' repayment and water service contracts are with districts, not individuals. Under these contracts, it is

the district's responsibility to collect the proper water rate and comply with Federal law and regulations. Therefore, collection efforts will be directed to the districts. Districts, in turn, have recourse under State law against the party(s) responsible for any underpayments. It must also be remembered that a lessee has the responsibility to protect himself, through the terms of the lease, from situations that have the possibility of affecting him adversely. Regarding the date from which underpayments will be calculated, Reclamation is in the process of developing policy on how this aspect of the underpayment provision will be applied.

Comment 2: One respondent was concerned about the underpayment provision, stating that it has the potential of having catastrophic adverse economic impacts in CAP districts because of the extent of full-cost water service in this area.

Response: Since Congress granted no exemptions from the underpayment provision, it is Reclamation's responsibility to implement it in all districts. It should be remembered that the full-cost rates for CAP landholders were not increased as a result of the underpayment provision. They are the same now as they were before the legislation was enacted. In addition, the underpayment provision will affect only a limited number of landholders, since it applies to only those who did not pay the required rate for water deliveries. In those cases where the full-cost rates are prohibitive, landholders and districts will need to make a special effort to ensure that landholders are fully aware of their status under the RRA.

Comment 3: One respondent was opposed to collection efforts for underpayments associated with delivery of interruptible CAP water to excess land. The respondent stated that the district contracts provide that acreage limitation and full-cost pricing do not apply to interruptible water.

Response: In a January 13, 1988, memorandum, the Commissioner concluded that the distinction between interruptible and noninterruptible service is immaterial in determining whether the CAP lands served are required to be in conformance with all of the provisions of the RRA. There is no legal basis for suspending the requirements of the RRA on the grounds that the water deliveries are interruptible.

Comment 5: Two commenters suggested that Reclamation address the provisions of section 10166 of the 1987 Budget Act—the IRS provision on illegal Federal irrigation subsidies.

Response: The Internal Revenue Service (IRS) has the primary responsibility for implementing the subject provision. Therefore, we have not addressed that provision in these rules. Reclamation, however, has offered its assistance to the Commissioner of the IRS in coordinating implementation of the illegal subsidy provision.

Comment 6: We received one comment suggesting that a policy be established wherein the underpayment provision applies when landholders provide certification/reporting forms with incorrect information for the purpose of circumventing the law; however, it would not apply to landholders whose forms contain errors, provided the landholders are still within their entitlements.

Response: Erroneous completion of certification/reporting forms would fall within the scope of the underpayment provision only if it resulted in land receiving irrigation water at less than the required rate. As a general rule, this provision would not be invoked in those cases where a landholder makes a mistake on his forms but is still within his entitlement limitations after the form has been corrected.

Environmental Assessment, FONSI, Small Entity Flexibility

Comment 1: One respondent felt Reclamation's economic analyses need to address the economic impacts on the CAP. Since the full-cost rate in the CAP is $250 ac/ft, the respondent disagreed with Reclamation's conclusion that the proposed rules have no impact on a substantial number of small entities.

Response: For the most part, the rules do not create *new* full-cost situations for landholders in the CAP. The underpayment provision merely requires that landholders who received irrigation water at a rate less than that actually required by applicable laws and regulations must pay the required amount (plus interest) for that water. The extended recordable contract provision requires payment of the full-cost rate; however, there are no such contracts in the CAP. In addition, landowners were given a grace period in which to restructure any trust agreements so that they could avoid any full-cost charges that might result from implementation of the revocable trust provision.

Comment 2: Two commenters felt that the draft FONSI is based on an inadequate Environmental Assessment (EA) that contains no actual evaluation of the environmental effects of the proposed rules. They believe the new EA does not consider cumulative impacts of the new regulations in conjunction with the 1987 regulations and does not make a full evaluation of whether the regulations will affect natural resources.

Response: We disagree with the commenter. We believe the NEPA documentation is adequate.

List of Subjects in 43 CFR Part 426

Irrigation, Reclamation, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, 43 CFR Part 426 is amended as set forth below.

Dated: October 27, 1988.

C. Dale Duvall,

Commissioner, Bureau of Reclamation

PART 426—RULES AND REGULATIONS FOR PROJECTS GOVERNED BY FEDERAL RECLAMATION LAW

1. The authority citation for Part 426 is revised to read as follows:

Authority: Administrative Procedure Act, 60 Stat. 237, 5 U.S.C. 552; the Reclamation Reform Act of 1982, Pub. L. 97–293, title II, 96 Stat. 1263, as amended by the Omnibus Budget Reconciliation Act of 1987, Pub. L. 100–203; and the Reclamation Act of 1902, as amended and supplemented 32 Stat. 388, (43 U.S.C. 371 et seq.).

2. Section 426.6 is amended by revising paragraphs (b)(4) and (d)(6) to read as follows:

§ 426.6 Ownership entitlement.

* * * * *

(b) * * *

(4) Trusts.

(i) An individual or corporate trustee holding land in a fiduciary capacity is not subject to the ownership or pricing limitations imposed by title II nor the ownership provisions of prior law for land held in this capacity; provided, the trust agreement: is in writing and is approved by the Secretary, identifies the beneficiaries, describes the interests of the beneficiaries and in the case of revocable trusts, the trust agreement also identifies the grantor(s) of all lands held in the trust, identifies the person(s) or entity (entities) who may revoke the trust and to whom title to the lands held in the trust will be conveyed upon the revocation of the trust, and provided further that the trusted land is not attributable to a grantor acting as trustee pursuant to § 426.6(b)(4)(iii). The Secretary shall be notified of any changes in the above conditions.

(ii) In the case of irrevocable trusts and revocable trusts other than those described in (b)(4)(iii) of this section, the lands held in the trust will be attributed to the beneficiary or beneficiaries of the

trust according to the interest held in the trust by each beneficiary. The eligible acreage attributable to each beneficiary in trust land in combination with other land directly or indirectly owned by such beneficiary shall not exceed that beneficiary's ownership entitlement unless the land is either under recordable contract or was acquired and is eligible under the involuntary acquisition provided in § 426.16.

(iii) In the case of revocable trusts which may be revoked at the discretion of the grantor(s) of the lands held in the trust and such revocation results in title to the trust lands reverting to the grantor(s) either directly or indirectly, or if the terms of the trust require that it be revoked or terminated upon the expiration of a specified period of time and such revocation or termination results in the title to the lands held in the trust reverting either directly or indirectly to the grantor(s), the lands held in that trust will be attributed to the grantor(s) of the lands. Therefore, in the case of such revocable trusts, the eligible acreage attributable to each grantor in trust land in combination with other land directly or indirectly owned by such grantor shall not exceed that grantor's ownership entitlement unless the land is either under recordable contract or was acquired and is eligible under the involuntary acquisition process provided in § 426.16. However, a revocable trust in which a grantor retains the power to change the beneficiaries or to modify the terms of the trust, but does not provide that the title to trust property will revert to the grantor upon revocation or termination shall not result in an attribution to the grantor of the trust property.

(iv) If the attribution of trust property described in (b)(4)(iii) of this section results in the grantor of such property becoming subject to the payment of full cost for irrigation water delivered to lands within his landholding, such full cost will not apply to the grantor if the trust agreement was revised before April 20, 1988, to avoid or preclude the attribution of the trust property to the grantor. If such a trust agreement was not so revised by that date, the grantor must pay full cost for irrigation water delivered to that portion of the grantor's landholding that exceeds the non-full-cost entitlement, commencing December 23, 1987, until such trust agreement is so revised. The application of this rule may be illustrated by the following:

Example (1). Bank X is the trustee for five irrevocable trusts, each of which has more than one beneficiary. The irrevocable trusts contain 1,280, 960, 640, 800, and 400 acres, respectively. The land in the irrevocable trusts is in districts which have amended their contracts to conform to the discretionary provisions of Title II. Since the ownership and pricing limitations of title II do not apply to Bank X as trustee for the trusts and all beneficiaries who are qualified recipients are within their respective ownership entitlements, all 4,080 acres in the five irrevocable trusts are eligible to receive irrigation water at the contract rate. However, if a beneficiary owned directly or indirectly other irrigation land which, when combined with his beneficial interest in the subject irrevocable trusts, caused him to exceed the 960-acre ownership limitation, either that beneficiary or the trustee would be required to designate the nonexcess land for which irrigation water could be supplied, depending upon whether the land to be so designated is directly held by the beneficiary or the trust.

Example (2). Farmer X, a qualified recipient, provides in his will for the establishment of a trust and the conveyance of 640 acres of his land receiving irrigation water into that trust for his minor child upon his death. Farmer X designates his brother as trustee of that testamentary (irrevocable) trust. The land is located in a district which has amended its contract to come under the discretionary provisions of Title II. The brother, who is designated as trustee for the trust, owns 800 acres in the same district which receives an irrigation water supply. Farmer X dies, and the testamentary trust he has established is activated. The brother, as trustee, is entitled to receive irrigation water for the land in trust as well as the land he owns.

Note.—The land placed in the testamentary trust by Farmer X is counted against his ownership entitlement during his lifetime as long as the land remained in his ownership.

Example (3). Farmer X, a qualified recipient, owns 960 acres eligible to receive irrigation water in a district subject to the provisions of Title II. He decides to place 160 acres of his land in an irrevocable trust with his daughter as the life tenant. The 160 acres of trust land shall be attributed to the daughter's entitlement if she is independent. If she is dependent, the 160 acres of trust land shall be attributed to Farmer X or to the person upon whom she is dependent.

Example (4). ABC Corporation, a prior law recipient, establishes a revocable trust and places 160 acres of land receiving irrigation water in the trust for the benefit of J. Jones. Under the terms of the revocable trust, the trust will terminate and title to the 160 acres will revert back to ABC Corporation in 10 years. All 160 acres of the land in trust is attributed to the corporation with all stockholders attributed an indirect interest in proportion to their percent of stock held in the Corporation.

Example (5). As in Example (4) above, ABC Corporation establishes a trust for the benefit of J. Jones, which is revocable at the discretion of ABC Corporation, the trustor. But Corporation X, a fully independent legal entity, rather than Corporation ABC, contributes the 160 acres to the trust. In this example, the 160 acres is attributed to the beneficiary of the trust, J. Jones, since the criteria for attribution to the grantor (Corporation X) have not been met; namely, the 160 acres will revert in 10 years to the trustor (Corporation ABC), not the grantor, and the grantor does not have the power to revoke the trust.

Example (6). Farmer X, a qualified recipient, places 960 acres of land receiving irrigation water in a trust for his son. The trust agreement provides that the trust shall expire in 20 years, and ownership of the trust land shall be vested in Corporation Y, of which Farmer X is a part owner with 5 percent interest. Because title to 5 percent of the trust land will revert indirectly to Farmer X upon termination of the trust, 48 acres (960 x 5 percent) of the trust land is attributed to Farmer X. The remaining 912 acres of trust land is attributable to the beneficiaries of the trust. If Farmer X's interest in Corporation Y changes during the term of the trust, the amount of trust land attributed to Farmer X will change accordingly.

* * * * *

(d) * * *

(6) See § 426.6(b)(4).

* * * * *

3. Section 426.7 is amended by revising paragraph (f) to read as follows:

§ 426.7 Leasing and full-cost pricing.

* * * * *

(f) Interest rate calculations for full cost. In determining full cost, the interest rates to be used will be determined by the Secretary of the Treasury as follows:

(1) Interest rates applicable to (i) qualified recipients, (ii) limited recipients receiving water on or before October 1, 1981, and (iii) extended recordable contract land owned by prior law recipients after December 22, 1987.

(A) The interest rates for expenditures made on or before October 12, 1982, shall be the greater of 7½ percent per annum or the weighted average yield of all interest-bearing marketable issues sold by the Treasury during the fiscal year in which the expenditures were made by the United States.

(B) The interest rate for expenditures made after October 12, 1982, shall be the arithmetic average of (*1*) the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for 15 years from the date of issuance at the beginning of the fiscal year in which the expenditures are made and (*2*) the weighted average yield on all interest-bearing marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made.

(2) Interest rates applicable to (i) limited recipients not receiving irrigation water on or before October 1, 1981, and (ii) prior law recipients, except for land owned under extended recordable contract after December 22, 1987. The interest rate shall be determined as of

the fiscal year preceding the fiscal year in which expenditures are made except that the interest rate for expenditures made before October 12, 1982, shall be determined as of October 12, 1982. The interest rate shall be based on the arithmetic average of (A) the computed average interest payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for 15 years from the date of issuance and (B) the weighted average yield on all interest-bearing marketable issues sold by the Treasury.

Note: Prior law recipients who become subject to the discretionary provisions after April 12, 1987, will then become eligible for the full-cost interest rate specified in paragraph (f)(1) of this section, unless they are limited recipients that did not receive irrigation water on or before October 1, 1981.

4. Section 426.10 is amended by revising paragraphs (a) and (i) to read as follows:

§ 426.10 Information requirements.

(a) In general. Districts, qualified recipients, limited recipients, prior law recipients and natural persons or legal entities operating irrigation land under an agreement described in § 426 7(a)(1)(i) shall provide the Secretary upon request in a form suitable to the Secretary such records and information as the Secretary may deem reasonably necessary to implement Pub. L. 97–293 and Federal Reclamation law.

* * * * *

(i) *Auditing.* The Secretary will conduct field audits, as necessary, to ensure compliance with Reclamation law and these regulations.

* * * * *

5. Section 426.11 is amended by revising paragraph (i)(4) to read as follows:

§ 426.11 Excess land.

* * * * *

(i) * * *

(4) Water rates for land under extended recordable contracts. Land under recordable contract may continue to receive irrigation water deliveries at the non-full-cost rate for the original disposition period of the recordable contract. The rate for irrigation water deliveries to land under recordable contract during the extended contract period shall be determined as follows:

(i) For land under recordable contract owned by qualified and limited recipients, the non-full-cost rate shall apply until the date 18 months after the date the Secretary resumes the processing of excess land sales, or until the extended contract period expires, whichever occurs first, and after the date 18 months from the date the Secretary resumes the processing of excess lands sales, water deliveries shall be made at the full-cost rate through the effective termination date of the extended recordable contract.

(ii) For land under extended recordable contract owned by prior law recipients, water deliveries shall be made at the full-cost rate described in § 426.7(f)(1) commencing December 23, 1987, through the effective termination date of the extended recordable contract. The principles of this rule may be illustrated by the following:

Example (1). Landowner X entered into a recordable contract on June 27, 1972. The recordable contract provided for a 10-year disposition period which ended on June 27, 1982. However, Landowner X was prevented from selling the land by the Secretarial moratorium of June 27, 1977. The district in which the land is located amended its contract to conform to the discretionary provisions on January 1, 1983. Since Landowner X had 5 years remaining on the original recordable contract when the moratorium was imposed, the contract will be extended for 5 years from the date the processing of the sale is resumed. The resumption date will be determined by the Secretary. Landowner X must pay the full-cost rate, however, for any irrigation water delivered to the land under extended recordable contract beginning 18 months from the date the moratorium is lifted.

Example (2). Landowner Y entered into a recordable contract with a 10-year disposition period on June 27, 1976. Landowner Y was prevented from selling the land by the Secretarial moratorium of June 27, 1977. At that time, 9 years remained in the disposition period of the recordable contract. The district in which the land is located amended its contract to conform with the discretionary provisions of title II on January 1, 1983. The Secretary resumes the processing of the excess land sale on May 21, 1984. The original disposition period of the recordable contact expires on June 27, 1986, which is more than 18 months after the Secretary resumed the processing of the excess land sale. Therefore, Landowner Y must pay the full-cost rate for water deliveries to that land beginning June 27, 1986, for the duration of the extended contract period. The extended contract period will expire on May 21, 1993, 9 years after the Secretary resumed the processing of the excess land sale.

Example (3). Landholder Z entered into a recordable contract on June 27, 1974. The recordable contract provided for a 10-year disposition period that ended on June 27, 1984. However, Landowner Z was prevented from selling the land by the Secretarial moratorium of June 27, 1977. The Secretary resumed the processing of excess land sales on May 21, 1984. Landholder Z had 7 years remaining on his recordable contract when the moratorium was imposed; therefore, the contract will be extended for 7 years from May 21, 1984, or until May 21, 1991. Landholder Z's land is located in a district that remains subject to prior law, and Landholder Z has not made an irrevocable election to become subject to the discretionary provisions. Since Landholder Z is a prior law recipient and the land was under extended recordable contract prior to December 23, 1987, water deliveries to this land prior to December 23, 1987, were properly made at the contract rate. However, for all water deliveries taking place on or after December 23, 1987, Landholder Z must pay the full-cost rate, as described in § 426.7(f)(1), through the effective termination date of the extended recordable contract.

* * * * *

§ 426.23 [Redesignated as § 426.24]

§ 426.24 [Redesignated from § 426.23]

6. Section 426.23 is redesignated as § 426.24, and new § 426.23 is added to read as follows:

§ 426.23 Interest on underpayments.

When the Bureau finds that any individual or legal entity subject to Federal Reclamation law has not paid the required amount for irrigation water delivered to a landholding pursuant to Reclamation law, the Bureau will collect the amount of any underpayment with interest accruing from the date the required payment was due until paid. The due date is the date the required payment should have been paid by the district to the United States for water delivered to a landholding. The interest rate shall be determined by the Secretary of the Treasury on the basis of the weighted average yield of all interest-bearing marketable issues sold by the Treasury during the period of underpayment.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 86-037]

Temporary Importation of Horses; Horses From Countries Affected With Contagious Equine Metritis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the regulations to allow horses from countries affected with contagious equine metritis (CEM) to be imported into the United States for no more than 60 days to compete in specified events, when specified requirements are met to prevent the horses from introducing CEM into the United States. We believe this action is warranted to allow those horses to be imported into the United States when this can be done without undue risk to livestock in the United States.

DATE: Consideration will be given only to comments postmarked on or before January 17, 1989.

ADDRESSES: Send an original and three copies of written comments to Regulatory Analysis and Development, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 86-037. Comments received may be inspected at USDA, Room 1141 of the South Building, 14th and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Chester A. Gipson, SPMDS, VS, APHIS, USDA, Room 845, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8321.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 92 govern the importation into the United States of specified animals and animal products, to prevent the introduction into the United States of various diseases, including contagious equine metritis (CEM). CEM is a venereal disease of horses that affects fertility and breeding.

Section 92.2(i) of the regulations authorizes the importation of certain horses into the United States from countries affected with CEM, when specific requirements to prevent the horses introducing CEM into the United States are met.

Sections 92.2(i)(2)(i) through (vii) provide criteria for importing certain specified horses from CEM-affected countries if certain recordkeeping, testing, and treatment procedures are met. In addition to the importations already permitted, members of the horse industry have requested that we permit horses to be brought into the United States for a maximum of 60 days, solely for competition, when certain criteria aremet. We believe that, under certain conditions, these horses can be imported from CEM-affected countries with the same degree of protection against the transmission of CEM that is provided by the current regulations.

Safeguards Against CEM Transmission

We are proposing to provide two primary safeguards against the horses' transmitting CEM while in the United States. First, a representative of the Animal and Plant Health Inspection Service (APHIS) would monitor the horses whenever they are not in transit in the United States. Second, we would require stringent measures to ensure that the horses are kept apart from other horses, except when being exercised or actually competing. Because CEM is a venereal disease transmitted by sexual contact, there is virtually no risk that a horse will transmit the disease through casual contact with other horses during exercise or competition.

Application for Import Permit

In addition to meeting the current requirements for an import permit, we are proposing that the owner or importer would have to supply the following information to us along with the application for the permit: (1) That the application is for a horse intended for importation into the United States for no more than 60 days to compete in specified events; (2) the names, dates, and locations of the events in which the horse will compete in the United States; (3) the names and locations of the premises on which the horse will be kept while in the United States, and the dates the horse will be kept on each premises; and (4) the methods and routes by which the horse will be transported while in the United States. This information, which we would include on the import permit, would allow the Administrator to monitor the location of the horse while it is in the United States and to confirm that the required isolation and handling procedures are met to ensure that the horse does not transmit CEM to any other horse while in this country.

We are proposing that while the horse would be at the premises at which it competes, it would have to be monitored by an APHIS representative, and, while in the United States, would not be permitted to have any other form of sexual contact with other horses. Also, in order to guard against manual transmission of CEM by an examiner, we are proposing that the horse would not be permitted to undergo any genital examinations while in the United States.

Additionally, we are proposing that the horse not be kept on any breeding premises and that it be kept in a stall separate from other horses, except when actually competing or being exercised. The stall in which the horse is kept would have to be separated from any other stalls containing horses, either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. It is proposed that the premises and stalls in which the horse would be kept while in the United States would have to be approved orally or in writing by an APHIS representative. If the approval is oral, it would be confirmed in writing, by the Administrator, as promptly as circumstances permit.

Further, we are proposing that while the horse is in transit, it would have to be moved either in an aircraft or a sealed van or trailer, and, except in situations where the horse's life is in danger, only an APHIS representative would be permitted to break the seal on a van or trailer used to move the horse. Additionaly, we are proposing that after transport of the horse anywhere in the

BEST COPY AVAILABLE

United States, any vehicle in which the horse was transported would have to be cleaned and disinfected in the presence of an APHIS representative, according to the procedures for cleaning and disinfection specified in 9 CFR 71.7 through 71.12 of the current regulations. We are proposing that in most instances, the cleaning and disinfection would have to be done before the vehicle is moved from the place where the horse is unloaded. However, in cases where there are inadequate facilities or equipment for cleaning and disinfection at the place where the horse is unloaded, the Administrator would have the discretion of allowing the vehicle to be moved to another location for cleaning and disinfection, when the move would not pose a disease risk to other horses in the United States.

We are proposing that if the provisions of this proposed rule are not met, the Administrator would cancel the import permit that allows the importation of the horse into the United States and that allows the horse to stay in this country 60 days. If the cancellation is oral, the decision and the reason for cancellation of the permit would be confirmed in writing as promptly as circumstances allow. The owner or importer would be able to appeal the cancellation of the permit in writing to the Administrator within 10 days after receiving either oral or written notification of the cancellation, whichever is earlier. if the appeal is sent by mail, it would have to be postmarked within 10 days after the owner or importer receives the notification of cancellation. If there is a conflict as to any material fact, a hearing would be held to resolve the conflict. These provisions would satisfy due process requirements pertaining to the cancellation of an import permit.

We are proposing that except in those cases where an appeal is in process, any person whose import permit is cancelled would have to move his or her horse out of the United States within 10 days after receiving an oral or written notice of cancellation, whichever is earlier. Except when being exercised, the horse would have to be kept in a stall that is separated from other stalls containing horses either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. The horse would not be permitted to enter any competition, from the date the owner or importer receives notice of the cancellation until the horse is removed from the United States, or until an appeal is resolved in favor of the owner or importer. We are proposing that until the horse is removed from the United States or until an appeal is resolved in favor of the owner or importer, the horse would have to be kept, at the expense of the owner or importer, either on the premises at which the horse is located when the notice of cancellation is received, or, if the horse is in transit when the notice of cancellation is received, on the premises at which it is next scheduled to compete according to the import permit. However, in cases where the owners of the premises do not permit the horse to stay on those premises, or when the Administrator determines that keeping the horse at the premises would pose a disease risk to other horses in the United States, the horse would have to be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator.

We believe that all of the above measures combined would ensure that no horse imported under the proposed provisions would pose a significant risk of transmitting CEM to horses in the United States.

Change in Itinerary

We are proposing that if the owner or importer wishes to change the horse's itinerary or the means by which the horse is transported from those specified in the import permit, the owner or importer would have to make the request for change in writing to the Administrator. The change in itinerary or means of transport would not be permitted without the written approval of the Administrator, who would have the discretion to grant the request for change when he or she determines that granting the request will not endanger other horses in the United States, and that sufficient APHIS personnel are available to provide the services requested by the owner or importer.

Trust Fund Agreement

We are also proposing to amend the regulations to require that a horse imported under the provisions of this document be maintained in the United States in accordance with a trust fund agreement executed by the horse's owner or importer. Under the trust fund agreement, the owner or importer would have to deposit with APHIS an amount equal to the estimated cost, including travel, salary, subsistence, administrative expenses, and incidental expenses, as determined by APHIS, for an APHIS representative (1) to inspect the premises at which the horse will compete; (2) to conduct the required monitoring of the horse at the premises at which it competes; and (3) to supervise cleaning and disinfecting the means of conveyance in which the horse travels while in the United States. The amounts to be deposited are explained below. If, while the horse is in the United States, we determine that the amount deposited would not fully cover services we are scheduled to provide during the remainder of the horse's stay, we would issue to the horse's owner or importer a bill for the difference. The horse's owner or importer would have to pay amounts billed within 14 days after receiving the bill. We are proposing that if the bill is not paid within that time, we would cease to perform the services provided for in this proposed rule, until the bill is paid. The Administrator would inform the owner or importer of the cessation of services orally or in writing. If the notice is oral, it would be confirmed in writing as soon as circumstances permit, along with the reasons for it. In such a case, the horse would have to be kept, at the expense of the owner or importer and until the bill is paid, either on the premises at which the horse is located when the notice of cessation of services is received, or, if the horse is in transit when the notice of cessation is received, on the premises at which it is next scheduled to compete according to the import permit. The horse would have to be kept in a stall that is separated from other stalls containing horses by either an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. In cases where the owners of the above premises do not permit the horse to stay on those premises, or when the Administrator determines that keeping the horse at the above premises would pose a disease risk to other horses in the United States, the horse would have to be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator. We are proposing that until the bill is paid, the horse would not be permitted to enter any competition. We believe it is necessary to require a trust fund agreement to help ensure that the government is reimbursed for services it provides. We are proposing that any amount deposited in excess of the cost to APHIS of providing the services required would be refunded to the owner or importer within 30 days after the horse is moved from the United States.

Cost of Government-Provided Services

We are also proposing to amend § 92.2 to include a list of the factors that we would consider when we determine the cost of services we would provide to the owner or importer of a horse that would be imported under the provisions of this proposed rule. If this proposed

amendment is adopted, the owners or importers would know what services they are paying for, and would be able to estimate the cost of those services.

We would consider various factors when determining the fee for government services provided to the owner or importer. One would be the number of hours it would take an APHIS representative to conduct the required inspection and monitoring at the premises where the horse competes. For services provided during regular business hours (8 a.m. to 4:30 p.m., Monday through Saturday, except holidays), the resulting number of hours would then be multiplied by the average salary, per hour, for an APHIS representative. For services provided outside regular business hours, we would apply the applicable rate for overtime, night differential, or Sunday or holiday pay, based on the average salary, per hour, for an APHIS representative.

We would also consider as a factor in determining the applicable fee the cost of travel between the premises at which the horse competes and the APHIS office or facility that is providing the services. In determining the cost of travel, we would consider the number of miles between the premises at which the horse competes and the APHIS office or facility, along with the government rate per mile for official automobile travel, if the APHIS representative would travel to the premises by automobile. If other travel, such as airline or train, would be more appropriate, we would consider the cost of that travel. We would also consider the number of trips that the APHIS representative would have to make between the APHIS office or facility and the premises, and the number of days, if any, that the APHIS representative would be in travel status providing services at the premises at which the horse competes. If the APHIS representative would be required to be in travel status, we would apply the applicable government per diem rate.

Another factor we would consider would be the cost of related administrative support services that we would have to provide to furnish services to the horse's owner or importer. These would also include such items as the calculation and issuance of bills, the processing of required personnel and other paperwork, and the processing of required travel vouchers, etc.

Section 92.17

Section 92.17 requires that horses imported from any part of the world be accompanied by a certificate stating the following: That during the 12 months immediately before their importation into the United States, the horses have not been in any country listed in § 92.2(i)(1) as affected with CEM; that the horses have not been on a CEM-affected premises and have not been bred to a horse from a CEM-affected premises; and that the horses have had no contact with a CEM-affected horse or with a horse imported from CEM-affected countries. Horses that meet certain criteria, however, are exempted from the above requirements. These criteria are set forth in current §§ 92.2(i)(2) (i) through (vii). Because of a typographical error, however, horses meeting the criteria in § 92.2(i)(2)(vii) are not listed in § 92.17 as being exempt from the CEM requirements of that section. We are proposing to correct the typographical error to state that horses that meet the provisions of current § 92.2(i)(2)(vii) *are* exempt from the CEM requirements in § 92.17. Please note, however, that we are proposing to set forth the provisions for the temporary importation of horses from CEM countries in a new § 92.2(i)(2)(vii), and are, therefore, proposing to redesignate current § 92.2(i)(2)(vii) as § 92.2(i)(2)(viii). Therefore, the correction in §92.17 would actually refer to § 92.2(i)(2)(viii).

We are also proposing that horses imported under the provisions of proposed new § 92.2(i)(2)(vii) be exempt from the CEM requirements in § 92.17 that we discussed in the above paragraph. The horses would be exempt from those requirements because they appear to present no risk of introducing CEM into the United States.

Definitions

This proposed rule would add a definition of "Animal and Plant Health Inspection Service" and "APHIS representative."

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this action would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The current regulations allow the importation of thoroughbred horses from specified CEM-affected countries, provided certain testing for CEM is done and provided specific requirements regarding the horses' histories are met. The current regulations also allow the importation of all other horses over 731 days of age from CDE-affected countries, provided specified testing and treatment requirements are met. We exect that the primary effect of this proposed rule would be to shorten the time necessary to prepare a horse for temporary importation by eliminating the testing and treatment requirements. This would enable foreign horses to stay in training longer and to compete in more events in their own country before being imported into the United States. The cost to owners or importers for our required inspection and supervision would be largely offset by expenses saved because the horses would not have to undergo the treatment and testing we currently require.

Further, we believe the impact on United States horse owners from increased foreign competition for prize monies would be insignificant. In most cases, the horses that would be imported under this proposed rule would otherwise have been imported under the current regulations. In those few cases where the increased competition would have some impact, we believe the impact would be largely offset by increased purses due to the participation of the foreign horses.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that his action would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), we have submitted the information collection provisions that are included in this proposed rule for approval to the Office of Management and Budget (OBM). Please send written comments concerning any information collection to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for APHIS, Washington, DC 20503. Submit a duplicate copy of your comments to Regulatory Analysis and Development, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

VOL 53 ISS 242 DE 16 1988 UMI

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, 9 CFR Part 92 would be amended as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for Part 92 wold continue to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

2. Section 92.1 would be amended by adding a definition of "Animal and Plant Health Inspection Service" and "APHIS representative" to read as follows:

§ 92.1 Definitions

* * * * *

Animal and Plant Health Inspection Service. The Animal and Plant Health Inspection Service of the United States Department of Agriculture (APHIS or Service).

* * * * *

APHIS representative. A veteranarian or other individual employed by the Animal and Plant Health Inspection Service, United States Department of Agriculture, who is authorized to perform the services required by this part.

* * * * *

3. In § 92.2, paragraph (i)(2)(vii) would be redesignated as (i)(2)(viii), and a new paragraph (i)(2)(vii) would be added to read as follows:

§ 92. General prohibitions; exceptions.

* * * * *

(i) * * *

(2) * * *

(vii) Horses over 731 days of age imported into the United States for no more than 60 days to compete in specified events if the following conditions are met:

(A) The horse remains in the United States for no more than 60 days following the horse's release from the port of entry and, while in the United States, is moved according to the itinerary and methods of transport specified in the import permit provided for in § 92.4(a) of this part;

(B) While the horse is in the United States, the following conditions are met:

(*1*) Except when in transit, the horse is kept on a premises approved, orally or in writing, by an APHIS representative as being (*i*) not a breeding premises, and (*ii*) one that is or that contains a building in which the horse can be kept in a stall that is separated from other stalls containing horses either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. If approval is oral, it will be confirmed in writing by the Administrator as soon as circumstances permit.

(*2*) While at the premises at which the horse competes, the horse is monitored by an APHIS representative to ensure that the provisions of paragraphs (i)(2)(vii)(B) (*1*), (*4*), and (*5*) of this section are met.

(*3*) While in transit, the horse is moved in either an aircraft or a sealed van or trailer; and, if the horse is moved in a sealed van or trailer, the seal is broken only by an APHIS representative at the horse's destination, except in situations where the horse's life is in danger;

(*4*) Except when actually competing or being exercised, the horse is kept in a stall that is separated from other stalls containing horses either by an empty stall, an open area, or a solid wall that is at least 8 feet high.

(*5*) The horse is not used for breeding purposes (including artificial insemination), does not have any other sexual contact with other horses, and does not undergo any genital examinations;

(*6*) After the horse is transported anywhere in the United States, any vehicle in which the horse is transported is cleaned and disinfected in the presence of an APHIS representative, according to the procedures specified in §§ 71.7 through 71.12 of this chapter, before any other horse is transported in the vehicle;

(*7*) the cleaning and disinfection specified in paragraph (i)(2)(vii)(B)(*6*) of this section is completed before the vehicle is moved from the place where the horse is unloaded (however, in those cases where the facilities or equipment for cleaning and disinfection are inadequate at the place where the horse is unloaded, the Administrator may allow the vehicle to be moved to another location for cleaning and disinfection, when the move will not pose a disease risk to other horses in the United States); and

(*8*) The owner or importer of the horse complies with any other provisions of this part applicable to him or her.

(C) All costs associated with the supervision and maintenace of the horse while in the United States will be borne by the horse's owner or importer in accordance with the provisions of paragraph (i)(2)(vii)(G) of this section.

(D) If the owner of importer wishes to change the horse's itinerary or the methods by which the horse is transported from that which he or she specified in the application for the import permit, the owner of importer must make the request for change in writing to the Administrator. Requests should be sent to the Administrator, c/o Import-Export Animals Staff, VS, APHIS, Room 764, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782. The change in itinerary or method of transport may not be made without the written approval of the Administrator, who may grant the request for change when he or she determines that granting the request will not endanger other horses in the United States and that sufficient APHIS personnel are available to provide the services required by the owner or importer.

(E) The Administrator may cancel, orally or in writing, the import permit provided for under § 92.4 of this part, whenever the Administrator finds that the owner or importer of the horse has not complied with the provisions of paragraphs (i)(2)(vii) (A), (B), (C), or (D) of this section or any conditions imposed under those provisions. If the cancellation is oral, the Administrator will confirm in writing the decision and the reasons for the decision, as soon as circumstances permit. Any person whose import permit is cancelled may appeal the decision in writing to the Administrator within 10 days after receiving oral or written notification of the cancellation, whichever is earlier. If the appeal is sent by mail, it must be postmarked within 10 days after the owner or importer receives oral or written notification of the cancellation, whichever is earlier. The appeal must include all of the facts and reasons upon which the person relies to show that the import permit was wrongfully cancelled. The administrator will grant or deny the appeal in writing as promptly as circumstances permit, stating the reason for his or her decision. If there is a conflict as to any material fact, a hearing will be held to resolve the conflict. Rules of practice concerning the

hearing will be adopted by the Administrator.

(F) Except in those cases where an appeal is in process, any person whose import permit is cancelled must move the horse identifed in the import permit out of the United States within 10 days after receiving oral or written notification of cancellation, whichever is earlier. The horse is not permitted to enter competition, from the date the owner or importer receives the notice of cancellation until removal of the horse from the United States or until resolution of an appeal in favor of the owner or importer. Except when being exercised, the horse must be kept, at the expense of the owner or importer, in a stall either on the premises at which the horse is located when the notice of cancellation is received, or, of the horse is in transit when the notice of cancellation is received, on the premises at which it is next scheduled to compete according to the import permit. The stall in which the horse is kept must be separated form the other stalls containing horses either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. In cases where the owners of the above specified premises do not permit the horse to be kept on those premises, or when the Administrator determines that keeping the horse on the above specified premises will pose a disease risk to horses in the United States, the horse must be kept, at the expense of the owner of importer, on an alternative premises approved by the Administrator.

(G) A horse imported under paragraph (i)(2)(vii) of this section must be maintained in the United States in accordance with a trust fund agreement executed by the horse's owner or importer. In accordance with the trust fund agreement for the importation of a horse under paragraph (i)(2)(vii) of this section, the horse's owner or importer must deposit with APHIS an amount equal to the estimated cost, including gravel, salary, subsistence, administrative expenses, and incidental expenses, as determined by APHIS, for an APHIS representative *(1)* to inspect the premises at which the horse will compete; *(2)* to conduct the monitoring required by paragraph (i)(2)(vii)(B)*(2)* of this section; and (3) to supervise the cleaning and disinfection required by paragarph (i)(2)(vii)(B)*(6)* of this section. The amounts will be determined as explained in paragraph (i)(2)(vii)(H) of this section. If, during the horse's stay in the United States, APHIS determines that the amount deposited will be insufficient to cover services APHIS is scheduled to provide during the remainder of the horse's stay, APHIS will issue to the horse's owner or importer a bill to restore the deposited amount to a level sufficient to cover the estimated cost to APHIS for the remainder of the horse's stay in the United States. The horse's owner or importer must pay the amount billed within 14 days after receiving the bill. If the bill is not paid within 14 days after its receipt, APHIS will cease to perform the services provides for in paragraph (i)(2)(vii)(B) of this section, until the bill is paid. The Administrator will inform the owner or importer of the cessation of services orally or in writing. If the notice of cessation is oral, the Administrator will confirm, in writing, the notice of cessation and the reason for the cessation of services as soon as circumstances permit. In such a case, the horse must be kept, at the expense of the owner or importer and until the bill is paid, in a stall either on the premises at which the horse is located when the notice of cessation of services is received, or, if the horse is in transit when the notice of cessation of services is received, on the premises at which it is next scheduled to compete according to the import permit. The stall in which the horse is kept must be separated from other stalls containing horses either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet high. In cases where the owners of the above specified premises do not permit the horse to be kept on those premises, or when the Administrator determines that keeping the horse on the above specified premises will pose a disease risk to other horses in the United States, the horse must be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator. Until the bill is paid, the horse is not permitted to enter competition. Any amount deposited in excess of the costs to APHIS to provide the required services will be refunded to the horse's owner or importer within 30 days after the horse is moved from the United States.

(H) The cost for APHIS to conduct the inspection and supervision required by paragraph (i)(2)(vii)(B) of this section is based on the following factors:

(1) Number of hourse needed for an APHIS representative to conduct the required inspection and monitoring;

(2) For services provided during regular business hours (8 a.m. to 4:30 p.m., Monday through Saturday, except holidays), the average salary, per hour, for an APHIS representative;

(3) For services provided outside regular business hours, the applicable rate for overtime, night differential, or Sunday or holiday pay, based on the average salary, per hour, for an APHIS representative;

(4) Number of miles from the premises at which the horse competes to the APHIS office or facility that is monitoring the activities;

(5) Government rate per mile for automobile travel or, if appropriate, cost of other means of transportation between the premises at which the horse competes and the APHIS office or facility;

(6) Number of trips between the premises at which the horse competes and the APHIS office or facility that APHIS representatives are required to make in order to conduct the required inspection and monitoring;

(7) Number of days the APHIS representative conducting the inspection and monitoring must be in "travel status;"

(8) Applicable government per diem rate; and

(9) Cost of related administrative support services.

* * * * *

4. In § 92.4, paragraph (a)(1) would be redesignated as paragraph (a)(1)(i), and a new paragraph (a)(1)(ii) would be added to read as follows:

§ 92.4 Import permits for ruminants, swine, horses from countries affected with CEM, poultry, poultry semen, animal semen, birds and for animal specimens for diagnostic purposes;[1] and reservation fees for space at quarantine facilities maintained by Veterinary Services.

(a) * * *

(1) * * *

(ii) Horses intended for importation under § 92.2(i)(2)(vii) of this part must meet the permit requirements of paragraph (a)(1)(i) of this section.

Additionally, for horses intended for importation under § 92.2(i)(2)(vii) of this part, the horse's owner or importer must include the following information with the application for permit that is required by paragraph (a)(1)(i) of this section:

(A) That the application is being made for a horse that will remain in the United States for no more than 60 days;

---

[1] For other permit requirements for birds, the regulations issued by the U.S. Department of the Interior (Part 17, Title 50, Code of Federal Regulations) and the regulations issued by the U.S. Department of Health and Human Services (Subpart J–1 of Part 71, Title 42, Code of Federal Regulations) should be consulted.

(B) The names, dates, and locations of the events in which the horse will compete while in the United States;

(C) The names and locations of the premises on which the horse will be kept while in the United States, and the dates the horse will be kept on each premises; and

(D) The methods and routes by which the horse will be transported while in the United States.

* * * * *

§ 92.17 [Amended]

5. Section 92.17 would be amended by removing the phrase in the first sentence that currently reads "and, except as provided in § 92.2(i)(2) (i), (ii), (iii), (iv), (v), and (vi), the horses have not been in any country listed in § 92.2(i)(1) as affected with CEM during the 12 months immediately prior to their importation into the United States;" and adding in its place a phrase that reads "and, except as provided in § 92.2(i)(2) (i) through (viii), the horses have not been in any country listed in § 92.2(i)(1) as affected with CEM during the 12 months immediately prior to their importation into the United States;".

Done in Washington, DC, this 13th day of December 1988.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-29012 Filed 12-15-88; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-158-AD]

Airworthiness Directives; Boeing Model 727 and 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Model 727 and 737 series airplanes, which would require modifications to include the use of Engine Pressure Ratio (EPR) information in the logic which enables the Takeoff Configuration Warning System (TOCWS). This proposal is prompted by the existence, in unmodified airplanes of these models, of a potential for the occurrence of nuisance takeoff warnings during taxi operations conducted with all engines operating, and with the flaps intentionally retracted. This has resulted in reports that to avoid nuisance warnings, flight crews have occassionally deactivated the TOCWS. This condition, if not corrected, deprives the flight crew of a valuable backup that helps to assure that takeoff is initiated with the airplane in a proper takeoff configuration.

DATES: Comments must be received no later than February 1, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-158-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Victor F. Sokoloski, Systems and Equipment Branch, ANM-130S; telephone (206) 431-1937. Mailing address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-158-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The Takeoff Configuration Warning System (TOCWS) originally installed on many Boeing Model 727 and 737 series airplanes is enabled when a particular throttle lever, or levers, are advanced beyond a specific lever angle. Subsequent changes to the design to ensure that the TOCWS will function under conditions of engine intermix, reduced thrust takeoff, low ambient temperatures, etc., has resulted in establishing the lever angle settings such that the system is subject to nuisance activation when normal taxi operations are performed with all engines operating and with the flaps intentionally retracted. A modification to add the use of Engine Pressure Ratio (EPR) information in the logic which enables the TOCWS was developed by Boeing to decrease this sensitivity.

Taxiing with the flaps retracted is reported to be a common procedure for today's airlines. The potential for nuisance configuration warnings, the resulting crew distraction, the interference with normal cockpit and/or radio communications, and the corresponding lack of credibility accorded by pilots to the TOCWS due to such nuisance aural warnings, is significant. As a means to alleviate nuisance warnings due to taxiing while not in a takeoff configuration, it has been reported that pilots have resorted to deactivating circuit breakers. A recent accident involving a transport category airplane may have been caused by the airplane not being in a proper configuration for takeoff. The TOCWS circuit breaker was found to be unpowered. (The assurance of continued electrical power supply to the TOCWS will be the subject of a separate rulemaking action). Deactivation of the TOCWS deprives the flight crew of a valuable backup that helps to assure that takeoff is initiated with the airplane in a proper takeoff configuration.

The FAA has reviewed and approved Boeing Service Bulletins 727-31-29, 727-31-33, 727-31-35, and 727-31-36 (for Model 727 airplanes); and Boeing Service Bulletin 737-31-1033, Revision 1 (for Model 737 airplanes); which describe modification procedures necessary to add Engine Pressure Ratio (EPR) information to the logic that enables operation of the takeoff configuration warning systems installed

on certain Boeing Model 727 and 737 series airplanes.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require modifications in accordance with the service bulletins previously mentioned. The FAA specifically invites operators and/or air crews to provide comments related to experiences of nuisance/false warnings, and the effect of those warnings.

There are approximately 1,197 Model 727 series airplanes and 479 Model 737 series airplanes of the affected design in the worldwide fleet. It is estimated that 819 Model 727 series airplanes of U.S. registry would be affected by this AD, that it would take approximately 78 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The cost of parts is estimated to be $5,000 per airplane. It is estimated that 189 Model 737 series airplanes of U.S. registry would be affected by this AD, that it would take approximately 48 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The cost of parts is estimated to be $3,400 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $7,655,760.

This Notice is one of several rulemaking actions being taken to improve takeoff warning system reliability and reduced nuisance warnings. Other related actions include an NPRM, Docket 88-NM-142-AD, issued November 23, 1988, which proposes to include a power continuity warning light; and AD 88-22-09, Amendment 39-6054 (53 FR 41313; October 21, 1988), which requires periodic takeoff warning system maintenance checks.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 727 or 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 727 and 737 series airplanes, not equipped with a system incorporating Engine Pressure Ratio logic for activation of the takeoff warning system. Compliance required within the next 18 months following the effective date of this AD, unless previously accomplished.

To prevent the occurrence of takeoff configuration nuisance warnings when taxi operations are conducted with the flaps intentionally retracted, accomplish the following:

A. Modify the logic which enables the Takeoff Configuration Warning Systems (TOCWS) installed on Boeing Model 727 series airplanes, in accordance with Boeing Service Bulletin 727-31-29, dated January 26, 1979; 727-31-33, dated November 26, 1980; 727-31-35, dated January 26, 1979; or 727-31-36 dated January 26, 1979, as appropriate.

B. Modify the logic which enable the TOCWS installed on Boeing Model 737 series airplanes, in accordance with Boeing Service Bulletin 737-31-1033, Revision 1, dated January 14, 1983.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on November 30, 1988.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 88-NM-117-AD]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which currently requires inspection for fatigue cracks in certain forward cargo compartment body frames, and repair, if necessary. The existing AD also includes an optional modification which, if incorporated, would terminate the repetitive inspections. Subsequent reassessment has shown that repetitive inspections of the modified structure are required to maintain safety. Additional service experience also indicates that the area requiring inspections must be expanded, and the applicability of the AD must be increased to include later airplanes on which the original modification was incorporated in production. This action would supersede the existing AD to expand the applicability, expand the areas of inspection, and require continued inspections of modified frames to maintain safety. Failure to detect failed fuselage frames may result in sudden loss of cabin pressure and structural failure.

DATE: Comments must be received no later than February 10, 1989.

VOL 53 ISS 242 DEC 16 1988 UMI

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-117-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara J. Mudrovich, Airframe Branch, ANM-120S; telephone (206) 431-1927. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-117-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On July 1, 1981, FAA issued AD 81-13-08, Amendment 39-4141 (46 FR 32228; June 22, 1981), to require inspection of certain forward cargo compartment frames for fatigue cracks, and repair, if necessary, and to provide instructions for terminating these inspections. That action was prompted by numerous reports of body frame cracks.

Since issuance of that AD, there have been reports of cracking on four airplanes in areas of the frame not currently required to be inspected by the AD. In addition, it has been determined that this area is structurally significant, and ongoing repetitive inspections are required after repair or modification to maintain the capability of the structure to carry limit load. Failure to detect failed fuselage frames could result in sudden loss of cabin pressure and structural failure.

The FAA has reviewed and approved Boeing Alert Service Bulletin 737-53A1027, Revision 3, dated December 2, 1983, which expands the areas of inspection and the effectivity to include airplanes that had the original modification incorporated in production. In addition, the service bulletin recommends ongoing inspections for airplanes modified therein.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would supersede AD 81-13-08 to expand the applicability to include later airplanes on which the original modification was incorporated in production. While maintaining the inspection and repair requirements of the existing AD, the proposed AD would expand the areas of inspection and delete terminating action, in accordance with the service bulletin previously mentioned.

There are approximately 967 Model 737 series airplanes of the affected design in the worldwide fleet. It is estimated that 301 airplanes of U.S. registry would be affected by this AD, that it would take approximately 80 hours per airplane to accomplish the required actions, and that the average labor cost would be $40 per hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $963,200.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulation (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 81-13-08, Amendment 39-4114 (46 FR 32228; June 22, 1981), with the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes, listed in Boeing Alert Service Bulleting 737-53A1027, Revision 3, dated December 2, 1983, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the forward lower cargo compartment frames, accomplish the following:

A. Except as provided by paragraph B., below, accomplish one of the following prior to the accumulation of 29,000 landings or within the next 100 landings after the effective date of this AD, whichever occurs later:

1. a. Unless previously accomplished within the last 200 landings, conduct a close external visual inspection of the fuselage skin for cracks in the region of the frames specified by Boeing Service Bulletin 737-53A1027, Revision 3, dated December 2, 1983. Reinspect at intervals not to exceed 300 landings until the frames are inspected in accordance with paragraph A.1.b., below. If crack are found, prior to further flight, repair fuselage skin in accordance with an FAA-approved method and visually inspect the fuselage frames specified by the aforementioned service bulletin for cracks.

Frames found cracked must be repaired prior to further flight, in accordance with the service bulletin.

b. Within 2,400 landings after the effective date of this AD and thereafter at intervals not to exceed 9,000 landings, conduct a visual inspection for cracks of the fuselage frames specificed in paragraph A.1.a., above. If cracks are found, repair fuselage frames, prior to further flight, in accordance with Boeing Alert Service Bulletin 737–53A1027, Revision 3, dated December 2, 1983.

2. Unless previously accomplished within the last 1,900 landings, conduct an X-ray inspection for cracks of the fuselage frames specified in paragraph A.1.a., above, in accordance with procedures described in the Boeing Model 737 Nondestructive Test Manual D6–37239, Part 2, Subject 53–10–16. Reinspect at intervals not to exceed 2,000 landings. If cracks are found, repair fuselage frames prior to further flight, in accordance with Boeing Alert Service Bulletin 737–53A1027, Revision 3, dated December 2, 1983.

3. Unless previously accomplished within the last 8,900 landings, perform an internal visal inspection for cracks of the fuselage frames specified in paragraph A.1.a., above. Reinspect at intervals not to exceed 9,000 landings. If cracks are found, repair fuselage frames prior to further flight, in accordance with Boeing Alert Service Bulletin 737–53A1027, Revision, 3, dated December 2, 1983.

4. Unless previously accomplished within the last 8,900 landings, conduct a low frequency eddy current inspection for cracks of the fuselage frames specified in paragraph A.1.a., above, in accordance with procedures described in Boeing Model 737 Nondestructive Test Manual D6–37239, Part 6, Subject 53–10–01. Reinspect at intervals not to exceed 9,000 landings. If cracks are found, repair fuselage frames prior to further flight, in accordance with Boeing Alert Service Bulletin 737–53A1027, Revision 3, dated December 2, 1983.

B. For those airplanes that have been modified in accordance with Part III of Boeing Alert Service Bulletin 737–53A1027, Revision 3, dated December 2, 1983, or the terminating modification described in AD 81–13–08: Prior to the accumulation of 15,600 landings after modification or within the next 1,000 landings after the effective date of this AD, whichever occurs later, perform the inspection described in paragraph A.3., above, and repeat thereafter at intervals not to exceed 15,600 landings. As an alternate to this repetitive inspection, the external inspection described in paragraph A.1.a., above, may be performed at intervals not to exceed 6,600 landings. If cracks are found, repair fuselage skins and frames prior to further flight, in accordance with Boeing Alert Service Bulletin 737–53A1027, Revision 3, dated December 2, 1983, or in a manner approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region. These repairs do not constitute terminating action and are subject to the repetitive inspection requirements of this paragraph.

C. For the purposes of complying with this AD, the number of landings may be determined to equal the number of pressurization cycles where the cabin pressure differential was greater than 2.0 PSI.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on December 5, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

VETERANS ADMINISTRATION

38 CFR Part 3

Claims Based on Exposure to Ionizing Radiation and Herbicides Containing Dioxon, Correction

AGENCY: Veterans Administration.

ACTION: Correction to proposed rule.

SUMMARY: On pages 48551 through 48552 of the **Federal Register** of December 1, 1988, the Veterans Administration (VA) published a proposed rule to amend its adjudication regulations concerning diseases considered to be "radiogenic." In § 3.311b(a)(1) an error was inadvertently made which substituted the word "and" for the word "or." This notice corrects the error; the proper language of § 3.311(a)(1) is set forth below.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, (202) 233–3005.

SUPPLEMENTARY INFORMATION:

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pension, Veterans.

Dated: December 12, 1988.

C.G. Verenes,

Acting Chief, Directives Management Division.

PART 3—[AMENDED]

In 38 CFR Part 3, § 3.311b(a)(1) is proposed to be amended by revising the first sentence to read as follows:

§ 3.311b Claims based on exposure to ionizing radiation.

(a) * * *

(1) *Dose assessment.* In all claims in which it is established that a radiogenic disease, listed in paragraph (b)(2) of this section, first became manifest after service and was not manifest to a compensable degree within any applicable presumptive period as specified in § 3.307 or § 3.309, and it is contended the disease is a result of exposure to ionizing radiation in service, an assessment will be made as to the size and nature of the radiation dose or doses. * * *

38 CFR Part 3

Diseases Subject to Presumptive Service Connection, and Payment of the Special Allowance

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration (VA) is proposing to amend two regulations to conform to recently enacted legislation. The chronic diseases subject to presumption of service connection are expanded to include lupus erythematosus, systemic. For certain prisoners of war (POWs), the diseases subject to presumption of service connection are expanded to include certain peripheral neuropathies, irritable bowel syndrome and peptic ulcer disease. For radiation-exposed veterans, presumptions of service connection are being established for certain cancers. In addition, the prohibition against payments under the Restored Entitlement Program for Survivors (REPS) is removed for those beneficiaries who, although lacking social security coverage, qualify for VA's benefit payments in lieu thereof under 38 U.S.C. 412(a). The intended

VOL
53
ISS
2
4
2
DE

1988
UMI

effect of these changes is to expand eligibility for certain claimants in accordance with the law.

DATES: Comments must be received on or before January 17, 1989. Comments will be available for public inspection until January 25, 1989. These changes are proposed to be effective May 20, 1988, the date of enactment of Pub. L. 100–322, except that the provisions of 38 CFR 3.309(d) are proposed to be effective May 1, 1988, in accordance with Pub. L. 100–321.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, Room 132, at the above address and only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until January 25, 1989.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, (202) 233–3005.

SUPPLEMENTARY INFORMATION: The regulation citing diseases subject to presumption of service connection is being expanded to include "lupus erythematosus, systemic" among those listed in 38 CFR 3.309(a). This means that lupus erythematosus, systemic, will be presumed service-connected if it becomes manifest to a degree at least 10 percent disabling within a year following release from military service.

For POWs interned 30 days or more, we are proposing to add peripheral neuropathy (not directly related to infectious causes), irritable bowel syndrome and peptic ulcer disease to the diseases listed in 38 CFR 3.309(c). The newly added diseases will be presumed service connected if manifest to a degree at least 10 percent disabling any time following release from military service.

We are also proposing to add a new paragraph (d) to 38 CFR 3.309 to implement the recently enacted presumptions of service connection for specific diseases arising in veterans who participated in certain activities while on active duty that may have exposed them to some risk from ionizing radiation. Paragraph (d) is essentially a restatement of the provisions of section 2(a) of Pub. L. 100–321 including the definitions in paragraph (d)(4) of the terms "radiation-exposed veteran" and "radiation-risk activity". To further define the groups who participated in radiation-risk activities we are proposing to add definitions of the terms "atmospheric detonation," "onsite participation" and "occupation of Hiroshima or Nagasaki, Japan, by United States forces". Occupation forces are defined as including those military units that were officially assigned to perform the duties of occupation in and around the cities of Hiroshima and Nagasaki. Onsite participation is defined to include individuals such as decontamination personnel who were not actually onsite during the official operational period of a nuclear test, but who may have been otherwise exposed to ionizing radiation resulting from such tests. Atmospheric detonations are defined as including underwater detonations to prevent the inadvertent exclusion of some individuals based on a technicality.

In order to determine which American POWs in Japan had an opportunity for ionizing radiation exposure comparable to the occupation forces, we obtained information from the Defense Nuclear Agency (DNA) on the exposure received by the occupation forces at Hiroshima and Nagasaki. That information indication that calculations based on a "worst case" scenario yielded a dose of less than one rem and that the average dose for the occupation forces in either city was probably very close to zero.

In order to determine which POWs interned in Japan on or after August 6, 1945, may have received comparably low exposure doses, additional information was requested from DNA regarding initial neutron and gamma radiation from the detonations as well as information on fallout/rainout distances and patterns.

The information received indicated that the initial gamma and neutron radiation at the two POW camps closest to Hiroshima and Nagasaki were negligible. Also provided was a map depicting the fallout/rainout pattern from the first bomb as extending for about 75 miles to the northwest of Hiroshima and from the second bomb as extending for about 150 miles to the east of Nagasaki. The information indicated that no POW camps were directly in the fallout/rainout paths and the closest POW camp to the fallout/rainout path, the one at Kumamoto, Kyushu, would have received a dose of only 180 millirem on a worst case basis.

It is clear from the available information that the fallout/rainout path from neither bomb can be delineated with absolute accuracy. Likewise, it is impossible to plot the movement of POWs in and around both cities subsequent to the bombings with any degree of certainty. In order to insure that all POWs who may possibly have had a radiation exposure comparable to the occupation forces are included, we believe that all POWs interned within a 75 mile radius of Hiroshima or within a 150 mile radius of Nagasaki should be considered as having participated in a radiation-risk activity. Similarly, those POWs whose official post-internment duties satisfied the definition of "occupation of Hiroshima or Nagasaki, Japan, by United States forces" and those POWs who were repatriated through the port of Nagasaki will be considered to have participated in a radiation-risk activity.

The special allowance payable under REPS will be available to an additional category of beneficiary. The additional beneficiaries are those eligible for VA's service-connected death benefits based on death on active duty prior to August 13, 1981, or death due to service-connected disability acquired before that date, provided the beneficiary is also entitled under 38 U.S.C. 412(a). VA payments under section 412(a) are in lieu of social security benefits. They are available only to survivors not qualifying for social security solely because the deceased veteran, upon whose death claim was made, was not fully and currently insured for social security purposes at the time of death.

The Administrator hereby certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 through 612. The reason for this certification is that these proposed regulations would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

The VA finds that good cause exists for making the proposed regulations retroactively effective in accordance with the laws they implement. A delayed effective date would be contrary to statutory design; would complicate administration of these provisions of law; and might result in denial of benefits to a veteran who is otherwise entitled to them.

In accordance with Executive Order 12291, Federal Regulation, the Administrator has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.101, 64.109, and 64.110.

Approved: November 25, 1988.

Thomas K. Turnage,

Administrator.

38 CFR Part 3, *Adjudication,* is proposed to be amended as follows:

PART 3—[AMENDED]

§ 3.309 [Amended]

1. In § 3.309(b), in the list of diseases, remove the word "Filiariasis" and add, in its place, the word "Filariasis".

2. In § 3.309, paragraphs (a) and (c) are amended by adding to the list of diseases contained in those paragraphs and paragraph (d) is added, to read as follows:

§ 3.309 Disease subject to presumptive service connection.

(a) * * *

Anemia, primary.
Arteriosclerosis.
Arthritis.
Atrophy, progressive muscular.
Brain hemorrhage.
Brain thrombosis.
Bronchiectasis.
Calculi of the kidney, bladder, or gallbladder.

Cardiovascular-renal disease, including hypertension. (This term applies to combination involvement of the type of arteriosclerosis, nephritis, and organic heart disease, and since hypertension is an early symptom long preceding the development of those diseases in their more obvious forms, a disabling hypertension within the 1-year period will be given the same benefit of service connection as any of the chronic diseases listed.)

Cirrhosis of the liver.
Coccidioidomycosis.
Diabetes mellitus.
Encephalitis lethargica residuals.
Endocartitis. (This term covers all forms of valvular heart disease.)
Endocrinopathies.
Epilepsies.
Hansen's disease.
Hodgkin's disease.
Leukemia.
Lupus erythematosus, systemic. * * *

* * * * * *

(c) * * *

Avitaminosis.
Beriberi (including beriberi heart disease).
Chronic dysentery.
Helminthiasis.
Malnutrition (including optic atrophy associated with malnutrition).
Pellagra.
Any other nutritional deficiency.
Psychosis.
Any of the anxiety states.
Dysthymic disorder (or depressive neurosis).

Organic residuals of frostbite, if it is determined that the veteran was interned in climatic conditions consistent with the occurrence of frostbite.

Post-traumatic osteroarthritis.
Irritable bowel syndrome.
Peptic ulcer disease.
Peripheral neuropathy except where directly related to infectious causes.

(Authority: 38 U.S.C. 312)

(d) *Diseases specific to radiation-exposed veterans.* (1) The diseases listed in paragraph (d)(2) of this section shall be service-connected if they become manifest in a radiation-exposed veteran as defined in paragraph (d)(4) of this section to a degree of 10 percent or more within the presumptive period specified in paragraph (d)(3) of this section, provided the rebuttable presumption provisions of § 3.307 of this part are also satisfied.

(2) The diseases referred to in paragraph (d)(1) of this section are the following:

(i) Leukemia (other than chronic lymphocytic leukemia).
(ii) Cancer of the thyroid.
(iii) Cancer of the breast.
(iv) Cancer of the pharynx.
(v) Cancer of the esophagus.
(vi) Cancer of the stomach.
(vii) Cancer of the small intestine.
(viii) Cancer of the pancreas.
(ix) Multiple myeloma.
(x) Lymphomas (except Hodgkin's disease).
(xi) Cancer of the bile ducts.
(xii) Cancer of the gall bladder.
(xiii) Primary liver cancer (except if cirrhosis or hepatitis B is indicated).

(3) The presumptive period referred to in paragraph (d)(1) of this section is:

(i) In the case of leukemia (other than chronic lymphocytic leukemia), the 30-year period beginning on the last date on which the veteran participated in a radiation-risk activity.

(ii) In the case of any other disease listed in paragraph (d)(2) of this section, the 40-year period beginning on the last date on which the veteran participated in a radiation-risk activity.

(4) For purposes of this section:

(i) The term "radiation-exposed veteran" means a veteran who, while serving on active duty, participated in a radiation-risk activity.

(ii) The term "radiation-risk activity" means:

(A) Onsite participation in a test involving the atmospheric detonation of a nuclear device.

(B) The occupation of Hiroshima or Nagasaki, Japan, by United States forces during the period beginning on August 6, 1945, and ending on July 1, 1946.

(C) Internment as a prisoner of war in Japan (or service on active duty in Japan immediately following such internment) during World War II which resulted in an opportunity for exposure to ionizing radiation comparable to that of the United States occupation forces in Hiroshima or Nagasaki, Japan, during the period beginning on August 6, 1945, and ending on July 1, 1946.

(iii) The term "atmospheric detonation" includes underwater nuclear detonations.

(iv) The term "onsite participation" means:

(A) During the official operational period of an atmospheric nuclear test, presence at the test site, or performance of official military duties in connection with ships, aircraft or other equipment used in direct support of the nuclear test.

(B) During the six month period following the official operational period of an atmospheric nuclear test, presence at the test site or other test staging area to perform official military duties in connection with completion of projects related to the nuclear test including decontamination of equipment used during nuclear test.

(C) Service as a member of the garrison or maintenance forces on Eniwetok during the periods June 21, 1951 through July 1, 1952, August 7, 1956 through August 7, 1957 or November 1, 1958 through April 30, 1959.

(D) Assignment to official military duties at Naval Shipyards involving the decontamination of ships that participated in Operation Crossroads.

(v) The term "operational period" means:

(A) For Operation *Trinity* the period July 16, 1945 through August 6, 1945.

(B) For Operation *Crossroads* the period July 1, 1946 through August 31, 1946.

(C) For Operation *Sandstone* the period April 15, 1948 through May 20, 1948.

(D) For Operation *Ranger* the period January 27, 1951 through February 6, 1951.

(E) For Operation *Greenhouse* the period April 8, 1951 through June 20, 1951.

(F) For Operation *Buster-Jangle* the period October 22, 1951 through December 20, 1951.

(G) For Operation *Tumbler-Snapper* the period April 1, 1952 through June 20, 1952.

(H) For Operation *Ivy* the period November 1, 1952 through December 31, 1952.

(I) For Operation *Upshot-Knothole* the period March 17, 1953 through June 20, 1952.

(J) For Operation *Castle* the period March 1, 1954 through May 31, 1954.

(K) For Operation *Teapot* the period February 18, 1955 through June 10, 1955.

(L) For Operation *Wigwam* the period May 14, 1955 through May 15, 1955.

(M) For Operation *Redwing* the period May 5, 1956 through August 6, 1956.

(N) For Operation *Plumbbob* the period May 28, 1957 through October 22, 1957.

(O) For Operation *Hardtack I* the period April 28, 1958 through October 31, 1958.

(P) For Operation *Argus* the period August 27, 1958 through September 10, 1958.

(Q) For Operation *Hardtack II* the period September 19, 1958 through October 31, 1958.

(R) For Operation *Dominic I* the period April 25, 1962 through December 31, 1962.

(S) For Operation *Dominic II/ Plowshare* the period July 6, 1962 through August 15, 1962.

(vi) The term "occupation of Hiroshima or Nagasaki, Japan, by United States forces" means official military duties within 10 miles of the city limits of either Hiroshima or Nagasaki, Japan, which were required to perform or support military occupation functions such as occupation of territory, control of the population, stabilization of the government, demilitarization of the Japanese military, rehabilitation of the infrastructure or deactivation and conversion of war plants or materials.

(vii) Former prisoners of war who had an opportunity for exposure to ionizing radiation comparable to that of veterans who participated in the occupation of Hiroshima or Nagasaki, Japan, by United States forces shall include those who, at any time during the period August 6, 1945, through July 1, 1946, were interned within 75 miles of the city limits of Hiroshima or within 150 miles of the city limits of Nagasaki, or served immediately following internment in a capacity which satisfies the definition in paragraph (d)(4)(vi) of this section, or were repatriated through the port of Nagasaki.

(Authority: 38 U.S.C. 312)

3. In § 3.812, paragraph (c)(3) is removed and old paragraph (c)(4) is redesignated as new paragraph (c)(3) to read as follows:

§ 3.812 Special allowance payable under section 156 of Pub. L. 97-377.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3493-1]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Denial

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to deny a petition submitted by Fisher Guide, formerly Fisher Body Division of General Motors Corporation, Flint, Michigan, to exclude certain solid wastes generated at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of a fate and transport model and its application in evaluating the waste-specific information provided by the petitioner. This model has been used in evaluating the petition to predict the concentration of hazardous constituents released from the petitioned wastes, once they are disposed.

DATES: EPA is requesting public comments on today's proposed decision and on the applicability of the fate and transport model used to evaluate the petition. Comments will be accepted until January 30, 1989. Comments postmarked after the close of the comment period will be stamped "late".

Any person may request a hearing on this proposed decision and/or the model used in the petition evaluation by filing a request with Joseph Carra, whose address appears below, by January 3, 1989. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Variances Section, Assistance Branch, PSPD/OSW (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F-88-FGDP-FFFFF".

Requests for a hearing should be addressed to Joseph Carra, Director, Permits and States Programs Division, Office of Solid Waste (OS-340), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the U.S. Environmental Protection Agency, 401 M Street, SW. (sub-basement), Washington, DC 20460, and is available for viewing from 9:00 a.m to 4:00 p.m, Monday through Friday, excluding Federal holidays. Call (202) 475-9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical

information concerning this notice, contact Scott Maid, Office of Solid Waste (OS–343), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382–4783.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure (EP) toxicity) or meet the criteria for listing contained in 40 CFR 261.11(a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To have their wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous waste characteristics (*i.e.*, ignitability, reactivity, corrosivity, and EP toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes and mixtures containing hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. See 40 CFR 261.3 (c) and (d)(2). The substantive standard for "delisting" a treatment residue or a mixture is the same as previously described for listed wastes.

B. Approach Used to Evaluate This Petition

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). If the Agency believes that the waste remains hazardous based on the factors for which the waste was originally listed, EPA will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste is non-hazardous with respect to the original listing criteria, EPA then will evaluate the waste with respect to other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considers whether the waste is acutely toxic, and considers the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and any other additional factors which may characterize the petitioned waste.

The Agency is proposing to use such information to identify plausible exposure routes for hazardous constituents present in the waste, and is proposing to use a particular fate and transport model to predict the concentration of hazardous constituents that may be released from the petitioned wastes after disposal and to determine the potential impact of the disposal of Fisher Guide's petitioned wastes on human health and the environment if the wastes are removed from RCRA Subtitle C control. Specifically, the model will be used to predict compliance-point concentrations which will be compared directly to the levels of regulatory concern for particular hazardous constituents.

EPA believes that this fate and transport model represents a reasonable worst-case waste disposal scenario for the petitioned waste, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA Subtitle C. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate to consider extensive site-specific factors. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data to its evaluation of delisting petitions. In this case, the Agency determined that, because Fisher Guide is seeking a delisting for wastes managed on site, ground-water monitoring data collected from the area where the petitioned wastes are contained provide useful additional information in determining whether hazardous constituents have migrated to the underlying ground water. Ground-water monitoring data collected from Fisher Guide's monitoring wells help characterize the potential impact (if any) of the disposal of Fisher Guide's wastes on human health and the environment.

Finally, the Hazardous and Solid Waste Amendments of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made until all public comments (including those at requested hearings, if any) on today's proposal are addressed.

II. Disposition of Delisting Petition

A. General Motors/Fisher Guide, Flint, Michigan

1. Petition for Exclusion

Fisher Guide, formerly Fisher Body Division of General Motors Corporation, located in Flint, Michigan, is engaged in the Fabrication and Production of automotive hardware such as door hinges, seat belts, headliners, catalytic converter covers, and other interior and exterior parts. Fisher Guide petitioned the Agency to exclude its wastewater treatment sludges in its settling lagoon system and drying beds, presently listed as EPA Hazardous Waste No. F006—"Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum." The listed constituents for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed).

Fisher Guide petitioned to exclude its wastes because it does not believe that the wastes meet the criteria of the listing. Fisher Guide claims that its lagoon and drying bed sludges are not hazardous because the constituents of concern are present either in insignificant concentrations or, if present at significant levels, are essentially in immobile form. Fisher Guide also believes that these wastes are not hazardous for any other reason (*i.e.*, there are no additional constituents or factors that could cause the wastes to be hazardous). Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments of 1984. See Section 222 of the Amendments, 42 USC 6921(f), and 40 CFR 260.22(d) (2)-(4). Today's proposal to deny this petition for delisting is the result of the Agency's evaluation of Fisher Guide's petition.

2. Background

On May 18, 1982, Fisher Guide initially petitioned the Agency to exclude its wastes. Fisher Guide than altered its manufacturing process in 1984. Additional information was provided after the facility changed its process. In support of its petition, Fisher Guide submitted (1) detailed descriptions of its manufacturing and treatment processes, including schematic diagrams; (2) results from total constituent and EP analyses of the wastes for the EP toxic metals, cyanide, and nickel; (3) analyses of the total oil and grease content of the wastes; (4) results from characteristics testing for ignitability, corrosivity, and reactivity; (5) a list of raw materials (and Material Safety Data Sheets for all tradename materials) used in the manufacturing processes; and (6) ground-water monitoring data for the petitioned units.

Fisher Guide fabricates and produces automotive hardware. The manufacturing processes currently contributing to Fisher Guide's wastewater treatment plant include zinc electroplating, steam cleaning, battery charging, parts finishing and washing, die casting and washing, heat treatment, powerhouse operations, and catalytic converter press area operations. Until 1984, chrome, copper, and nickle plating, phosphate coating, and painting processes discharged wastes to the wastewater treatment plant for treatment on a batch basis. Wastes presently generated at the facility are mixed and treated with acid and sodium matabisulfite to facilitate reduction of hexavalent chromium. Lime and polymers are added and the treated wastewater is discharged to a lagoon settling system (consisting of three lagoons) to precipitate metal hydroxides. Settled metal hydroxide sludge is removed approximately once a year by gravity flow to one of three sludge drying beds (western, middle, and eastern) for dewatering. The sludges contained in the lagoon system and the three drying beds are the subject of this petition.

For lagoons and drying beds such as Fisher Guide's, petitioners are normally requested to divide each unit into four quadrants and randomly collect five full-depth core samples from each quadrant. The five full-depth core samples are then composited (mixed) by quadrant to produce a total of four composite samples per lagoon or bed. See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA, Office of Solid Waste and Emergency Response, Publication SW-846 (third edition), November 1986, and "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste, (EPA/530-SW-85-003), April 1985.

Fisher Guide's original delisting petition included data on nine samples collected from the drying beds in 1981 and 1982. No information was provided concerning the sampling methodology used in 1981. In 1982, the three drying beds were divided in half and four core samples were collected in each half and composited into one sample, yielding a total of six samples. Fisher Guide considered those samples to be representative of the sludge on the drying beds at that time.

Fisher Guide changed its manufacturing processes in 1984 and submitted data for 44 composite sludge samples collected in August, 1984. Fisher Guide divided each lagoon and drying bed into 7,500 square foot sections. A composite sample of five random core samples was collected from each 7,500 square foot section of the lagoons and drying beds. Ten composite samples were collected from the primary lagoon, six from the secondary lagoon, and twelve from the final lagoon. Eight composite sample were collected from the western drying bed and four each from the middle and eastern beds. Fisher Guide claims that the 44 composite samples taken in August, 1984 are representative of variations in constituent concentrations based on the sample collection methodology which accounted for spatial concentration variation in the lagoons and drying beds. Also, the petitioner claims that the sampling effort accounted for any temporal variation because sludge accumulates in the lagoons for one year and has been accumulating on the drying deds for over 10 years.

The 1981 composite samples of the drying bed sludges were analyzed for extraction procedure (EP) leachate concentrations (*i.e.*, mass of a particular constituent per unit volume of extract) of the EP toxic metals and cyanide. The 1982 composite samples of the drying bed sludges were analyzed for total constituent concentrations (*i.e.*, mass of a particular constituent per mass of waste) of cadmium, chromium, nickel, and cyanide and the extraction procedure (EP) leachate concentrations of the EP toxic metals, nickel, and cyanide. The 1982 composites of the drying bed sludges also were analyzed for the characteristics of ignitability, corrosivity, and reactivity.

The 1984 composite samples of the lagoon sludges and the drying bed sludges were analyzed for total constituent concentrations and the extraction procedure (EP) leachate concentrations of the EP toxic metals, nickel, and cyanide. The 1984 composites also were analyzed for oil and grease content and the characteristics of ignitability, corrosivity, and reactivity.

3. Agency Analysis

Fisher Guide used SW-846 Methods 7060 through 7760 to quantify the total

constituent concentrations of the EP toxic metals and nickel in the samples collected from the lagoons and drying beds. Method 9010 was used to quantify the total cyanide content of the samples. In addition to these methods, Method 1310 was used to determine the leachable concentrations of the inorganic constituents in the sludge samples. Total constituent and EP toxicity analyses of the 1984 lagoon sludges for the hazardous inorganic constituents revealed the maximum concentrations reported in Table 1.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT AND EP LEACHATE CONCENTRATIONS (PPM) LAGOON SLUDGES—1984 SAMPLES

Constituents	Total constituent analyses			EP leachate analyses		
	Prim. lagoon	Sec. lagoon	Final lagoon	Prim. lagoon	Sec. lagoon	Final lagoon
Arsenic	2.0	2.3	1.0	ND	ND	ND
Barium	140	80	120	2.4	2.2	2.4
Cadmium	[1] ND	[1] ND	[1] ND	0.03	0.02	0.02
Chromium	6,700	4,600	3,940	0.41	0.16	0.30
Lead	149	40	34	0.35	0.80	0.27
Mercury	[1] ND	[1] ND	[1] ND	[1] ND	0.002	[1] ND
Nickel	4,320	3,400	3,380	64	40	45
Selenium	[1] ND	5	[1] ND	[1] ND	[1] ND	[1] ND
Silver	[1] ND	[1] ND	[1] ND	0.02	[1] ND	0.01
Cyanide (total)	45	39	38	0.02	0.009	0.01

[1] *ND:* Not Detected. Denotes total concentations below the following detection limits: Cadmium and silver—2.0; mercury and selenium—0.5 ppm. Denotes leachable concentrations below the following detection limits. arsenic and selenium—0.005; mercury—0.001; and silver—0.01 ppm.

The detection limits in Table 1 (and Tables 2 and 3 that follow) represent the lowest concentrations quantifiable by Fisher Guide, when using the appropriate analytical methods to analyze the petitioned wastes. (Detection limits may vary according to the waste and waste matrix being analyzed, *i.e.*, the "cleanliness" of waste matrices varies and "dirty" waste matrices may cause interferences, thus raising the detection limits.)

Total constituent and EP toxicity analyses of the drying bed sludges for the hazardous inorganic constituents, as reported for 1982 and 1982 samples, revealed the maximum concentrations reported in Table 2. (The Agency's basis for evaluating the 1981 and 1982 samples is discussed in Section 4 of this notice.)

TABLE 2.—MAXIMUM TOTAL CONSTITUENT AND EP LEACHATE CONCENTRATIONS (PPM) DRYING BED SLUDGES—1981 AND 1982 SAMPLES

Constituents	Total constituent analyses			EP leachate analyses		
	West	Middle	East	West	Middle	East

Constituents	Total constituent analyses			EP leachate analyses		
	West	Middle	East	West	Middle	East
Cyanide (total)	66	38	38	[1] ND	[1] ND	[1] ND

[1] ND: Not Detected. Denotes total concentrations below the following detection limits: mercury and selenium—0.5 ppm. Denotes leachable concentrations below the following detection limits: arsenic and selenium—0.005; mercury—0.001; and cyanide—0.005 ppm.

Using Method 413.1 from "Methods for Chemical Analysis of Water and Wastes," U.S. EPA, Environmental Monitoring and Support Laboratory, Cincinnati, Ohio (EPA–600/4–79–020), Fisher Guide determined that oil and grease levels ranged between 0.03 and 5.40 percent in the lagoon sludges and 5.16 and 22 percent in the drying bed sludges. Petitioners are normally required to modify the EP procedure in accordance with the Oily Waste EP (OWEP) methodology if the oil and grease content of the waste exceeds one percent. Wastes having more than one percent total oil and grease may either have significant concentrations of the constituents of concern in the oil phase which may not be assessed using the standard EP leachate procedure, or the concentration of oil and grease may be sufficient to coat the solid phase of the sample and interfere with the leaching of metals from the sample. See SW–846 Method 1330. Fisher Guide, however, provided standard EP data. The Agency did not require Fisher Guide to re-analyze its wastes using the OWEP methodology because there was sufficient basis to propose denial of the petition without this information.

Fisher Guide also provided test data indicating that the lagoon and drying bed sludges are neither ignitable, corrosive, nor reactive. See 40 CFR 261.21, 261.22, and 261.23, respectively.

Fisher Guide submitted a signed certification stating that (1) approximately 900 cubic yards of sludge are removed from the lagoons and dewatered on the drying beds per year, and (2) the drying beds presently contain sludges that have accumulated over the past 10 years (approximately 9,000 cubic yards). The Agency reviews a petitioner's estimates and, on occasion, has requested a petitioner to re-evaluate estimated waste volume. EPA accepts Fisher Guide's certified estimates of 900 and 9,000 cubic yards for the lagoon sludges and the drying bed sludges, respectively.

EPA does not generally verify submitted test data before proposing delisting decisions, and has not verified the data upon which it proposes to deny Fisher Guide's exclusion. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency however, conducts a spot-check sampling and analysis program to verify the representative nature of data for some percentage of the submitted petitions, and may select facilities likely to be proposed for exclusion for spot-check sampling.

4. Agency Evaluation

The Agency is currently developing a fate and transport model to evaluate the potential behavior of wastes managed in surface impoundments. However, this model is not ready for evaluating delisting petitions. As a result, the Agency has evaluated the lagoon sludges using its VHS landfill model.[1] See 50 FR 7882 (February 26, 1985), 50 FR 48896 (November 27, 1985), and the RCRA public docket for a detailed description of the VHS model and its parameters. As explained below, the Agency feels that the VHS model, at this time, is adequate for this delisting petition. The Agency requests comments on the use of the VHS model as applied to the evaluation of Fisher Guide's wastes.

The primary difference expected between the VHS model (used for the petitioned waste) and a surface impoundment model is the consideration (in an impoundment model) of hydraulic head, sorption, retardation, and clogging. Hydraulic head is expected to cause higher compliance-point concentrations.[2] Sorption, retardation and clogging, on the other hand, are expected to result in lower concentrations of the contaminants.[3] To some extent, the mechanisms of sorption, retardation, and clogging will counteract hydraulic head. Until the ongoing development of the surface impoundment model is completed, it is difficult to predict what impact, if any, these competing mechanisms will have on the calculation of compliance-point concentrations. EPA feels that to delay petition evaluations until such time as other analytical tools (such as the surface impoundment model discussed above) are developed would result in curtailing delisting petition processing. Delay is particularly unwarranted where, as here, it is not clear that the new analytical tool would predict different constituent concentrations and/or change EPA's conclusion.

Furthermore, EPA believes that the VHS model is currently adequate to assess the reasonable worst-case disposal scenario of the petitioned wastes because the VHS model is conservative in all of its assumptions. Specifically, the VHS landfill model does not account for the likely reduction in the total concentrations of hazardous constituents occurring through volatilization and degradation, thereby providing an additional margin of safety, regardless of whether the waste is disposed of in a landfill or surface impoundment. Consequently, the Agency believes that the application of the VHS model in evaluating Fisher Guide's lagoon sludges adequately protects human health.

Although Fisher Guide should have analyzed its wastes using the OWEP, the Agency believes that the modeling evaluation for Fisher Guide's petitioned wastes using EP data is valid, because OWEP concentrations are typically higher than EP leachate concentrations. A proposed denial decision based on standard EP data is conservative

[1] When the Agency believes that the surface impoundment model is sufficiently developed for delisting decision-making, it intends to describe the model's parameters and assumptions and request comments on the model. Subsequent use of the model in the evaluation of specific delisting petitions would be proposed in the **Federal Register**. Also, the appropriateness of the model's use for each specific petition will be considered.

[2] Hydraulic head tends to force leachate into the aquifer, displacing ground water, and resulting in potentially higher concentrations at the receptor well (*i.e.*, compliance point).

[3] Sorption and retardation of dissolved contaminants with the aquifer solids encountered through migration in the ground water tend to reduce the concentration of the contaminant in the aquifer. Clogging occurs in surface impoundments when either fine material filters out in the impoundment bottom materials, or fine material settles on the bottom of the impoundment. A potential result of clogging is the lowering of the hydraulic conductivity of the impoundment bottom material to that which approaches the hydraulic conductivity of clay, thus reducing the leakage of impoundment liquid into the aquifer.

because OWEP data are a more stringent measure of constituent concentrations that may be mobilized from a waste.

In this case, the Agency used the VHS model to evaluate the mobility of the hazardous inorganic constituents detected in the EP extract of Fisher Guide's lagoon sludges. The Agency's evalution of the lagoon sludges, using the estimate waste volume of 900 cubic yards per year and the maximum reported EP leachate concentrations, generated the compliance-point concentrations shown in Table 4. The Agency did not evaluate the mobility of the remaining inorganic constitutents (*i.e.*, arsenic and selenium) from Fisher Guide's lagoon sludges because they were not detected in the EP extract using the appropriate analytical test methods (see Table 1). The Agency believes that it is inappropriate to evaluate non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method. Specifically, if a constituent cannot be detected (when using the appropriate analytical method), the Agency assumes that the constituent is not present and therefore does not present a threat to either human health or the environment.

TABLE 4—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS (PPM) LAGOON SLUDGES—1984 SAMPLES

Constituents	Compliance-point concentrations	Levels of regulatory concern [1]
Barium	0.14	1.0
Cadmium	0.002	0.01
Chromium	0.023	0.05
Lead	0.046	0.05
Mercury	0.0001	0.002
Nickel	3.66	0.5
Silver	0.001	0.05
Cyanide	0.001	0.7

[1] See "Docket Report on Health-based Regulatory Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.

The Agency did not evaluate the mobility of arsenic, selenium, and cyanide from Fisher Guide's 1984 drying bed sludges because they were not detected in the EP extract using the appropriate analytical test methods (see Table 3). As stated previously, the Agency will not evaluate non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method.

The lagoon sludges (as shown in Table 4) exhibited nickel concentrations at the compliance point above the health-based level used in delisting decision-making. Leachable nickel levels in 26 of 28 lagoon sludge samples failed the VHS model evaluation. The lagoon sludges exhibited barium, cadmium, chromium, lead, mercury, and silver levels at the compliance point below the health-based levels used in delisting decision-making. In addition, cyanide levels at the compliance point do not exceed the health-based level of 0.7 ppm. Because the maximum reported concentration of total cyanide in the waste is 45 mg/kg, the Agency believes that the concentration of reactive cyanide will be below the Agency's interim standard of 250 ppm. See "Interim Agency Thresholds for Toxic Gas Generation," July 12, 1985, Internal Agency Memorandum in the RCRA public docket.

The evaluation of the drying bed sludges, using the estimated waste volume of 900 cubic yards and the maximum reported EP leachate concentrations of the inorganic constituents reported for the 1981 and 1982 samples (except mercury), generated the compliance-point concentrations shown in Table 5. The sample collected in 1981 and 1982 are not representative of the wastes which have been generated since the 1984 process changes occurred. However, the drying bed sludge samples from that period have been evaluated by the Agency because they are represented in the ten years of accumulated sludge on the drying beds at the facility. The Agency did not evaluate the mobility of mercury from Fisher Guide's 1981 and 1982 drying bed sludges because it was not detected in the EP extract using the appropriate analytical test methods (see Table 2).

TABLE 5.—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS (PPM) DRYING BEDS SLUDGES—1981 AND 1982 SAMPLES

Constituents	Compliance-Point Concentrations			Levels of Regulatory Concern [1]
	West	Middle	East	
Arsenic	0.0008	0.005	ND	0.05
Barium	0.24	0.22	0.27	1.0
Cadium	0.0095	0.006	0.008	0.01
Chromium	0.017	0.024	0.027	0.05
Lead	0.082	0.065	0.054	0.05
Nickel	2.57	0.58	1.11	0.5
Selenium	ND	0.0009	ND	0.01
Silver	0.005	0.003	0.003	0.05
Cyanide	ND	0.011	ND	0.7

ND: Not Detected (see Table 2 for detection limits).

[1] See "Docket Report on Health-based Regulatory Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.

The evaluation of the drying bed sludges and the maximum reported EP leachate concentrations of the inorganic constituents reported for the 1984 samples (except arsenic, selenium, and cyanide) generated the compliance-point concentrations shown in Table 6.

TABLE 6.—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS (PPM) DRYING BED SLUDGES—1984 SAMPLES

Constituents	Compliance-point concentrations			Levels of regulatory concern [1]
	West	Middle	East	
Barium	0.14	0.16	0.14	1.0
Cadmium	0.006	0.008	0.006	0.01
Chromium	0.032	0.017	0.030	0.05
Lead	0.065	0.054	0.063	0.05
Mercury	0.0003	ND	ND	0.002
Nickel	4.44	3.64	2.85	0.5
Silver	0.005	0.003	0.003	0.05

ND: Not Detected (see Table 3 for detection limits)

[1] See "Docket Report on Health-based Regulatory Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.

The 1981 and 1982 drying bed samples (as shown in Table 5) exhibited nickel and lead levels at the compliance point above their respective health-based levels. All six of the 1981 and 1982 drying bed sludge samples analyzed for leachable nickel failed the VHS model evaluation. Three of the nine 1981 and 1982 drying bed sludge samples analyzed for leachable lead failed the VHS model evaluation. The 1981 and 1982 drying bed samples exhibited arsenic, barium, cadmium, chromium, selenium, silver, and cyanide levels at the compliance point below their respective health-based levels. Because the maximum reported concentration of total cyanide in the 1981 and 1982 samples is 35 mg/kg, the Agency believes that the concentration of reactive cyanide will be below the Agency's interim standard of 250 ppm.

The 1984 drying bed samples (as shown in Table 6) exhibited nickel levels at the compliance point that exceed the health-based level for nickel. All of the 1984 drying bed samples failed the VHS model evaluation for nickel. Seven of the sixteen 1984 drying bed sludges also exhibited lead levels at the compliance point that exceeded the health-based level for lead. The 1984 drying bed samples exhibited barium, cadmium, chromium, mercury and silver

levels at the compliance point below their respective health-based levels. Because the maximum reported concentration of total cyanide in the 1984 samples is 66 mg/kg the Agency believes that the concentration of reactive cyanide will be below the Agency's interim standard of 250 ppm.

The Agency also reviewed Fisher Guide's raw material list and material safety data sheets. The hazardous constituents (*e.g.*, those listed in 40 CFR Part 261, Appendix VIII) used at the facility include: 1,1,1-trichloroethane, formaldehyde, methylene chloride, epichlorohydrin, toluene, and methyl ethyl ketone. Because Fisher Guide did not indicate how the raw materials containing these constituents are segregated from process wastes, the Agency believes that these constituents could potentially be present in the petitioned wastes. The Agency typically would have required either testing of the wastes or mass balance calculations for these constituents; however, no further information for the above-named compounds is being requested by the Agency because the petition is being proposed for denial for other reasons.

The Agency also reviewed ground-water monitoring information submitted by Fisher Guide and obtained from the Michigan Department of Natural Resources (MDNR). The ground-water monitoring data for the sludge drying beds indicate that the petitioned wastes may have contributed to ground-water contamination. Total and hexavalent chromium concentrations reported for a filtered ground-water sample collected from well B–10 during Fisher Guide's Hydrogeological Investigation (Final Report, June 27, 1980) were 0.12 ppm, exceeding the health-based level for chromium (0.05 ppm). Monitoring well B–10 was installed to monitor Fisher Guide's sludge drying beds. Fisher Guide is currently implementing an "alternate" interim status detection monitoring program under which they are required to analyze ground-water samples for barium, chromium, copper, lead, nickel, and zinc in addition to the detection monitoring parameters required for interim status facilities under 40 CFR 265.92(d).

5. Conclusion

The Agency believes that Fisher Guide has not demonstrated that its petitioned wastes are not hazardous. The Agency believes that the composite samples collected from the lagoons and drying beds in support of Fisher Guide's petition adequately represent any constituent variations that may have occurred in the wastes petitioned for exclusion. The date provided by Fisher Guide indicate that the sludge contained in the lagoons and drying beds exhibits significant concentrations of leachable nickel. The drying beds also exhibit significant concentrations of leachable lead. The Agency proposes to deny Fisher Guide's petition for exclusion of its wastewater treatment sludges described in its petition as EPA Hazardous Waste No. F006 and contained in its settling lagoons and drying beds at its Flint, Michigan facility. These wastes should continue to be subject to regulation under 40 CFR Parts 260 through 268 and the permitting standards of 40 CFR Part 270.

III. Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if promulgated, would not change the existing requirements for persons generating hazardous wastes. This facility has been obligated to manage its wastes as hazardous before and during the Agency's review of its petition. Because a six-month deadline is not necessary to achieve the purpose of Section 3010, EPA believes that this denial should be effective immediately upon promulgation. These reasons also provide a basis for making this rule effective immediately, upon promulgation, under the Administrative Procedures Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The proposed denial of this petition, if promulgated, would not impose an economic burden on this facility because prior to submitting and during review of the petition, this facility should have continued to handle its wastes as hazardous. The denial of the petition, if promulgated, means that the petitioner is to continue managing its wastes as hazardous in the manner in which it has been doing, economically, and otherwise. There is no additional economic impact, therefore, due to today's rule. This proposal is not a major regulation, therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 through 612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities. The facility included in this notice may be considered a small entity, however, this rule only affects one facility in one industrial segment. The overall economic impact, therefore, on small entities is small. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88–540, RM–6546]

Radio Broadcasting Services; Rapid City, SD

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Tom-Tom Communications, Inc. proposing the substitution of Channel 281C1 for Channel 282C at Rapid City, South Dakota, and the modification of its construction permit accordingly. Channel 281C1 can be allotted to Rapid City in compliance with the Commission's minimum distance separation requirements with a site restriction of 6 kilometers (3.7 miles) southwest to accommodate petitioner's desired transmitter site. The coordinates

for this allotment are North Latitude 44–01–50 and West Longitude 103–15–34.

DATES: Comments must be filed on or before January 30, 1989, and reply comments on or before February 14, 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Michael L. Glaser, Esq., Joseph P. Benkert, Esq., Gardner, Carton and Douglas, Republic Plaza, 370–17th Street, Suite 2200, Denver, Colorado 80202–3520 and 1001 Pennsylvania Avenue NW., Suite 750 N, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, 202–634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 88–540, adopted November 10, 1988, and released December 8, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 88-198]

Receipt of a Permit Application for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: By this notice, we are advising the public that one permit application for release into the environment of a genetically engineered organism is being reviewed by the Animal and Plant Health Inspection Service. The application has been submitted in accordance with 7 CFR Part 340, which regulates the introduction of certain genetically engineered organisms and products.

FOR FURTHER INFORMATION CONTACT: Mary Petrie, Document Control Officer, Biotechnology, Biologics, and Environmental Protection, Biotechnology Permit Unit, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room G-185, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR Part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing in the United States (importing, moving interstate, or releasing into the environment), certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, APHIS has received the following permit application for release into the environment, which is being reviewed by the Agency:

Accession No	Date Received	Organism	Field Test Location
88-314-05	11-9-88	Genetically engineered insect-resistant tomato.	Florida.

Done at Washington, DC, this 12th day of December 1988.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-29013 Filed 12-15-88; 8:45 am]

BILLING CODE 3410-34-M

Food and Nutrition Service

National School Lunch Program and School Breakfast Program; Competitive Foods

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: The Food and Nutrition Service (FNS) announces an exemption of an individual food from Appendix B, "Categories of Foods of Minimal Nutritional Value," of Part 210, National School Lunch Program, and Part 220, School Breakfast Program.

This notice serves to notify the public that a food manufacturer has petitioned FNS and it was determined, based on furnished data, that the individual food is not classified as a food of minimal nutritional value as defined in §§ 210.11(a)(2) and 220.2(i-1). The petitioner has been previously notified of this determination in writing and also that the USDA does not prohibit the sale of the individual product in a school food service area during breakfast or lunch period.

DATE: The effective date of this exemption is April 19, 1988, coinciding with the date company was notified.

FOR FURTHER INFORMATION CONTACT: Cynthia Ford, Chief, Technical Assistance Branch, Nutrition and Technical Services Division, Food and Nutrition Service, USDA, Room 602, 3101 Park Center Drive, Alexandria, Virginia 22302, or by telephone at (703) 756-3556.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under Executive Order 12291 and has been classified nonmajor because it will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets.

This notice has also been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 through 612). Pursuant to this notice, Ms. Anna Kondratas, FNS Administrator, has certified that this notice will not have a significant economic impact on a substantial number of small entities.

These programs are listed in the Catalog of Federal Domestic Assistance under Nos. 10.558 and 10.559 and are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, and final rule-related notice published in 48 FR 29114, June 24, 1983).

No new reporting or recordkeeping requirements are included which require Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Background

FNS prohibits the sale of foods of minimal nutritional value in the food service areas during the breakfast and lunch periods as published in 7 CFR 210.11(b) and 220.12(a). "Food of minimal nutritional value" means a food which provides less than five percent of the USRDA for each of eight specified nutrients per 100 calories and per serving. In the case of artificially sweetened foods, only the "per serving" measure applies. The eight nutrients to be assessed for this purpose are:

Protein, vitamin A, vitamin C, niacin, riboflavin, thiamin, calcium, and iron.

Pursuant to Appendix B of Part 210 and Part 220, any person may submit a petition to FNS requesting that an individual food be exempted from a category of foods of minimal nutritional value. A schedule to petitioners regarding submission deadlines is furnished in Part 210, Appendix B(b)(3), and Part 220, Appendix B. The petition must include a statement of the percent of USRDA for the eight nutrients listed in §§ 210.11(a)(2) and 220.2(i–1) that the food provides per serving and per 100 calories and the petitioner's source of this information. The Department will determine whether or not the individual food is a food of minimal nutritional value and will inform the petitioner in writing of such determination, and the public by notice in the **Federal Register**. In determining whether an individual food is a food of minimal nutritional value, discrete nutrients added to the food will not be taken into account.

The Department received an exemption petition dated April 1, 1988, providing all necessary petition components.

Both "per serving" and "per 100 calories" nutrient analysis data show that one of the eight nutrients (niacin) is greater than 5% of the USRDA. Hence, the product "Peanut Honey Butter Popcorn" as produced by "The Popcorn Explosion" is exempt from the "Candy Coated Popcorn Category" of "Foods of Minimal Nutritional Value" (7 CFR Part 210 Appendix B(a)(4)(vii) and Part 220 Appendix B(4)(g)). The USDA does not prohibit the sale of this product in a school food service area during breakfast or lunch period. However, State Agencies and School Food Authorities maintain the final right to restrict such sales.

In compliance with petitioning schedules, the company was notified in writing of this decision and this notice documents public announcement.

Although required by the regulations to publish this notice, the Department emphasizes that such notification is not to be construed as either approval or endorsement of any food product or manufacturer identified in this notice, nor as certification that such food product has significant nutritional value, nor in any way as guidance or encouragement to State Agencies and School Food Authorities concerning their possible purchase of any class or type of food product identified in this notice.

Authority: Secs. 4, 8, and 11 of the National School Lunch Act as amended (42 U.S.C. 1753, 1757, 1759(a)) and secs. 3 and 4(b) of the Child Nutrition Act as amended (42 U.S.C. 1772 and 42 U.S.C. 1773).

Dated: December 13, 1988.

Anna Kondratas,

Administrator.

[FR Doc. 88–28991 Filed 12–15–88; 8:45 am]

BILLING CODE 3410–30–M

Forest Service

Availability of the Record of Decision, Final Supplement to the FEIS, Pacific Northwest Regional Guide, Northern Spotted Owl Habitat Management Standards and Guidelines, Updated and Additional Research, Oregon, Washington

The Record of Decision for the Northern Spotted Owl Habitat Management Standards and Guidelines was signed by the Chief of the Forest Service on December 9, 1988. The Record of Decision documents the decision to select Alternative F, as described and discussed in the Final Supplement to the FEIS referenced above, as planning direction for habitat management to maintain population viability of spotted owls in the National Forests of Oregon and Washington. This decision amends the standards and guidelines in the Pacific Northwest Regional Guide and will be reviewed and revised as necessary within 5 years from the date of this decision. The decision takes effect immediately and will result in the establishment of spotted owl habitat areas ranging from 1,000 to 2,000 acres in size. These areas will serve to protect nesting owls as well as to provide "stepping stones" between larger areas already protected as owl habitats. On the Olympic National Forest, where special concerns about the viability of the owl population have been identified, these habitat areas may be as large as 3,000 acres each.

The establishment of these special areas will reduce the timber harvest on the National Forests in Oregon and Washington by about 180 million board feet per year.

This decision on the guidelines was based on the best information currently available, but changes can be made to reflect new information about the spotted owl. Research on the spotted owl will be continued by the Forest Service in cooperation with state and Federal agencies. This decision is subject to the administrative review process.

The selection of Alternative F was made with full consideration of the comments and concerns received.

A copy of the Record of Decision and FEIS may be obtained from Regional Forester (2600–1), Forest Service USDA, Pacific Northwest Region, P.O. Box 3623, Portland, Oregon 97208.

Dated: December 13, 1988.

Gary H. Elsner,

Assistant Director, Recreation Management.

[FR Doc. 88–28933 Filed 12–15–88; 8:45 am]

BILLING CODE 3410–11–M

Rural Electrification Administration

Western Farmers Electric Cooperative; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Finding of no significant impact relating to the construction of 69 kV transmission line in Beckham and Roger Mills Counties, Oklahoma.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, as amended, the Council on Environmental Quality Regulations (40 CFR Parts 1500 through 1508), and REA Environmental Policies and Procedures (7 CFR Part 1794), has made a Finding of No Significant Impact (FONSI) with respect to the construction of 69 kV transmission line utilizing wood H-frame support structures. Western Farmers Electric Cooperative (Western Farmers), of Anadarko, Oklahoma, has requested REA financing assistance for the project.

FOR FURTHER INFORMATION CONTACT: Alex M. Cockey, Jr., Director, Southeast Area—Electric, Room 0270, South Agriculture Building, Rural Electrification Administration, Washington, DC 20250, telephone (202) 382–8436.

SUPPLEMENTARY INFORMATION: REA, in accordance with its environmental policies and procedures, required that Western Farmers develop a Borrower's Environmental Report (BER) reflecting the potential impacts of the project. The BER, which includes input from certain state and Federal agencies, has been adopted by REA as its Environmental Assessment (EA). REA has concluded that the BER represents an accurate assessment of the environmental impacts of the proposed project. The project will allow Western Farmers to continue to meet its responsibilities to serve its member load at the Erick, Durham, Brantley and Moorewood substations in a reliable and economical manner.

The proposed 45 mile transmission line will connect the existing Durham Substation in Roger Mills County,

BEST COPY AVAILABLE

Oklahoma, to the existing Erick Substation in Beckham County, Oklahoma. The 69 kV transmission line will require a new right-of-way 100 feet in width. To accommodate the new transmission line, the Durham Substation will need to be enlarged to provide space for capacitor banks and to move the deadend structure. The enlargement will require less than one acre of ground disturbance.

REA has concluded that the proposed project will have no significant impact on wetlands, prime framland, floodplains, threatened or endangered species or critical habitat, properties listed or eligible for listing in the National Register of Historic Places, air quality, water quality and the health of humans or animals.

Once the centerline for the line has been determined, Western Farmers will have the right-of-way surveyed for the presence of properties listed or eligible for listing on the National Register of Historic Places. Any such sites identified will be either avoided or have impacts to them mitigated to the satisfaction of REA and the Oklahoma State Historic Preservation Officer. Western Farmers will also consult with the U.S. Fish and Wildlife Service to determine the most effective mitigation measures for reducing the risk of whooping cranes striking the transmission line conductors. In addition, Western Farmers will construct the transmission line in a manner that meets or exceeds the guidelines established by the Raptor Research Foundation as set forth in the publication *Suggested Practices for Raptor Protection on Power Lines, The State of the Art, 1981.*

Floodplains, wetlands and prime farmland are located in the preferred line routing corridor. Where practicable, these areas will be spanned. Nevertheless, some transmission line support structures may be located within these areas. However, REA believes that transmission line structure placement will have no significant impact to these areas. No practical alternative routes that could avoid these areas were identified.

Western Farmers will take care to avoid unnecessary impacts to the environment by ensuring areas disturbed are reseeded to prevent erosion. When the project is in the vicinity of streams and other waterways or wetlands, Western Farmers will see that siltation is minimized by removing timber and brush only when absolutely necessary. The use of heavy equipment near these areas will be discouraged. Hand clearing and clearing by rubber tired machinery will be used to limit impact to soil stability near streams, waterways and wetlands. No dredge or fill operations will take place in these areas nor will herbicides be used.

Certain other impacts resulting from the proposed project are unavoidable such as the cutting of trees and vegatation for the right-of-way clearing and the aesthetic impact on the visual quality of the area.

Because of the rather isolated location of the Erick and Durham substations the only practicable alternative to the proposed tie line is an unacceptable no action alternative.

REA has determined that there is a demonstrated need for the project and constructing it within the preferred corridor will have no significant impact to the environment.

Therefore, REA has concluded that its approval to allow Western Farmers to construct the proposed project does not constitute a major Federal action significantly affecting the quality of the human environment. REA has reached a FONSI with respect to the proposed project.

Copies of the EA and FONSI can be obtained from the offices of REA in the South Agriculture Building, Room 0270, 14th and Independence Avenue SW., Washington, DC 20250 or at the office of Western Farmers Electric Cooperative, P.O. Box 429, Anadarko, Oklahoma 73005.

In accordance with REA Environmental Policies and Procedures, 7 CFR Part 1794, Western Farmers published notices in *The Elk City Daily News* and *The Cheyenne Star* which have a general circulation in both Beckham and Roger Mills Counties, Oklahoma. The notices appeared in the November 5, 1987, issues.

The notices described the project, announced the availability of the BER and gave information where the BER could be obtained for review and where comments could be sent. The public was given at least 30 days to respond to the notice. No responses to the notice were received by Western Farmers or DEA.

Date: December 12, 1988

John H. Arnesen,

Assistant Administrator, Electric.

BILLING CODE 3410-15-M

DEPARTMENT OF COMMERCE

Office of the Secretary

Privacy Act of 1974; New System of Records

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice; request for comments.

SUMMARY: This notice announces the Department's proposal to establish a new system of records under the Privacy Act. The system is entitled "COMMERCE/DEPT-21, Telephone Call Detail Records". This notice is submitted in accordance with the requirements of the Privacy Act, 5 U.S.C. 552a, and OMB Circular A-130, Appendix I, "Federal Agency Responsibilities for Maintaining Records About Individuals".

EFFECTIVE DATE: The system of records will be effective February 14, 1989, unless Commerce receives comments which would result in a contrary determination.

ADDRESS: Please address comments to: Ms. Gerri LeBoo, Office of Management and Organization, Room 6628, Department of Commerce, Washington, DC 20230. Comments received will be available for public inspection at this same address from 8:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Ms. Gerri LeBoo, 202-377-3630.

SUPPLEMENTARY INFORMATION: The Commerce Department is establishing an activity whereby stringent controls will be utilized to manage telephone usage. The activity, which is coordinated by the General Services Administration, involves government-wide participation, and is identified as the Call Detail Program.

It is anticipated that personally-identifiable records may be generated in cases where abuse is suspected or confirmed. Thus, establishing a Privacy Act system of records is necessary in order to properly manage the records within the framework of the Act. The Office of Management and Budget, in its April 20, 1987 guidelines, 52 FR 12990, encouraged all Federal agencies to establish a system of records under the Privacy Act in instances of determining individual accountability for telephone calls. OMB urged that individual agency systems be established, rather than a global system, because of the variation in program operation and resulting records collection.

As instructed in OMB Circular A-130, Appendix I, the Department's Report has been filed with Congress and the Office of Management and Budget.

The new system, "COMMERCE/DEPT-21, Telephone Call Detail Records", will read as set forth below.

COMMERCE/DEPT-21

SYSTEM NAME:

COMMERCE/DEPT-21—Telephone Call Detail Records

SYSTEM LOCATIONS:

a. For employees of the Bureau of the Census: Office of the Associate Director for Management Services, Federal Building 3, Room 2027, Suitland, Maryland 20233.

b. For employees of the Bureau of Economic Analysis: Office of Administration, Room 1026A, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

c. For employees of the Economic Development Administration: Office of the Chief Counsel, Room 7001, U.S. Department of Commerce, Washington, DC 20230

d. For employees of the Bureau of Export Administration: Office of Administration, Room 4886, U.S. Department of Commerce, Washington, DC 20230.

e. For employees of Economic Affairs: Office of Administration, Economic Affairs, Room 4079, U.S. Department of Commerce, Washington, DC 20230.

f. For employees of the International Trade Administration: Director, Office of Organization and Management Support, International Trade Administration, Room 4102, U.S. Department of Commerce, Washington, DC 20230.

g. For employees of the Minority Business Development Agency: Director, Office of Administrative Management, Management Division, Minority Business Development Agency, Room 5087A, U.S. Department of Commerce, Washington, DC 20230.

h. For employees of the National Institute of Standards and Technology: Office of the Associate Director of Administration, Room A1105, National Institute of Standards and Technology, Gaithersburg, Maryland 20234.

i. For employees of the National Oceanic and Atmospheric Administration:

(1) Chief, Facilities and Logistics Division, National Capital Administrative Support Center, National Oceanic and Atmospheric Administration, Rockwall Building, Room 505, Rockville, Maryland 20852.

(2) Chief, Facilities and Logistics Division, Eastern Administrative Support Center, National Oceanic and Atmospheric Administration, Room 301, 253 Monticello Avenue, Norfolk, Virginia 23510.

(3) Chief, Facilities and Logistics Division, Central Administrative Support Center, National Oceanic and Atmospheric Administration, 601 East 12th Street, Kansas City, Missouri 64106.

(4) Chief, Facilities and Logistics Division, Mountain Administrative Support Center, National Oceanic and Atmospheric Administration, 325 Broadway, Room 4532, Boulder, Colorado 80303.

(5) Chief, Facilities and Logistics Division, Western Administrative Support Center, National Oceanic and Atmospheric Administration, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115–0070.

j. For employees of the National Technical Information Service: Office of Administrative Management, Room 209, Forbes Building, National Technical Information Service, Springfield, Virginia 22161.

k. For employees of the National Telecommunications & Information Administration: Office of the Chief Counsel, Room 4717, U.S. Department of Commerce, Washington, DC 20230.

l. For employees of the Office of the Secretary: Office of Federal Property Programs, Procurement and Administrative Services, Room 1032, U.S. Department of Commerce, Washington, DC 20230.

m. For employees of the Patent and Trademark Office: Office of the Solicitor, Room 5C15, Crystal Plaza 2, Patent and Trademark Office, Crystal City, Virginia 20231.

n. For employees of the United States Travel and Tourism Administration,: Office of Management and Administration, Room 1524, U.S. Travel & Tourism Administration, Washington, DC 20230.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Commerce employees and contractor personnel who make long distance calls, and individuals who receive telephone calls placed from or charged to agency telephones.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records relating to use of the agency telephones; records indicating assignment of telephone numbers to employees; records relating to location of telephones; records relating to unauthorized use of telephones and personnel or administrative actions related to telephone abuse.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 5 U.S.C. 301; Pub. L. 97–258; Title 31 U.S.C. 1348; 44 U.S.C. 3101, 5 U.S.C. 552a; 41 CFR Part 201–38.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records and data may be disclosed, as is necessary, (1) to Members of Congress to respond to inquiries made on behalf of individual constituents that are record subjects; (2) to representatives of the General Services Administration or the National Archives and Records Administration who are conducting records management inspections under the authority of 44 U.S.C. 2904 and 2906; (3) in response to a request for discovery or for the appearance of a witness, to the extent that what is disclosed is relevant to the subject matter involved in a pending judicial or administrative proceeding; (4) in a proceeding before a court or adjudicative body to the extent that they are relevant and necessary to the proceeding; (5) in the event that material in this system indicates a violation of law, whether civil or criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be disclosed to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order, issued pursuant thereto; (6) to employees of the agency to determine their individual responsibility for telephone calls; (7) to respond to a Federal agency's request made in connection with the hiring or retention of an employee, the letting of a contract or issuance of a grant, license or other benefit by the requesting agency, but only to the extent that the information disclosed is relevant and necessary to the requesting agency's decision on the matter; (8) to a non-government company providing telecommunications consulting or contracting services to the Government; (9) to managers, supervisors and other personnel responsible for the management of telecommunications activities within the agency, to manage the operations and costs of telecommunications and to identify improper or unauthorized use of telecommunications resources; (10) to an employee of the Federal government, but only to the extent that the information relates specifically and solely to the specific employee.

DISCLOSURES TO CONSUMER REPORTING AGENCIES

Disclosures pursuant to 5 U.S.C. 552a(b)(12)

Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN A SYSTEM

The Department's policy is that only those individuals with a need to know, pursuant to their official duties, shall have access to call detail records. Each individual with such access is responsible for controlling records in their possession in such a way that ensures privacy. Storage of such material is also the responsibility of the individual and must be done in such a way as to prevent unauthorized disclosure. Call detail records shall be maintained by Department personnel for a period of not more than two years. After that period, records on electronic media should be erased and those records on papers, microform or microfiche media destroyed through shredding or burning. Records requiring storage longer than two years (e.g., kept under court order, etc.) shall be maintained until appropriate releases are issued. At that time, such records may be disposed of in the methods described in this document.

STORAGE

Paper records in file folders, computer printouts, magnetic tape, word processor diskettes, microform media or other electronic media.

RETRIEVABILITY

Records may be retrieved by employee name or identification number, by name of recipient of telephone call, by telephone number, or by location.

SAFEGUARDS

Paper records and backup diskettes are located in locked metal file cabinets; data on personal computer is password protected. Other machine readable records are stored on magnetic tape in a safe accessible only to security personnel.

RETENTION AND DISPOSAL

Records are disposed of as provided in National Archives and Records Administration General Records Schedule 12.

SYSTEM MANAGER AND ADDRESS

For Telecommunications Management Information System (TMIS): Chief, Telecommunications Management Division, Office of Information Resources Management, Room H6625, U.S. Department of Commerce, Washington, DC 20230. For records at location a.: Chief, Telecommunications Staff, Office of the Director, Bureau of the Census, Room 1553, FOB #3, Suitland, Maryland 20233.

For records at location b.: Director, Office of Administration, Bureau of Economic Analysis, Room 1026A, Department of Commerce, Washington, DC 20230.

For records at location c.: Deputy Assistant Secretary for Management Support, Economic Development Administration, Room 7019B, Washington, DC 20230.

For records at location d.: Director, Office of Administration, Bureau of Export Administration, Room 4886, Washington, DC 20230.

For records at location e.: Director, Office of Administration, Economic Affairs, Room 4079, Department of Commerce, Washington, DC 20230.

For records at location f.: Director, Office of Organization and Management Support, International Trade Administration, Room 4102, U.S. Department of Commerce, Washington, DC 20230.

For records at location g.: Associate Director, Office of Operations, Minority Business Development Agency, Room 6723, U.S. Department of Commerce, Washington, DC 20230.

For records at location h.: Chief, Computer Systems and Communications Division, National Institute of Standards and Technology, Technology Building, Room A 151(716), Gaithersburg, Maryland 20899.

For records at location i.: Chief, Organization and Directives Division, Office of Administration, National Oceanic and Atmospheric Administration, Room 716 WSC 5, U.S. Department of Commerce, Rockville, Maryland 20230.

For records at location j.: Chief, Facilities Management Division, National Technical Information Service, Room 1016, Forbes Building, Springfield, Virginia 22161.

For records at location k.: Director, Office of Policy Coordination and Management, National Telecommunications and Information Administration, Room 4890, Washington, DC 20230.

For records at location l.: Director, Office of Federal Property Program, U.S. Department of Commerce, Room 1032, Washington, DC 20230.

For records at location m.: Chief, Facilities Management Division, Office of General Services, Patent and Trademark Office, Room 802C, Crystal Park #1, Washington, DC 20231.

For records at location n.: Director, Office of Management and Administration, United States Travel and Tourism Administration, Room 1524, Washington, DC 20230.

NOTIFICATION PROCEDURES

Information may be obtained from the appropriate component as listed under System Manager(s). Requester should provide his or her name pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

RECORDS ACCESS PROCEDURES

Requests from individuals should be addressed to the same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES

The Department's rules for access, for contesting contents, and appealing initial determination by the individual concerned appear in 15 CFR Part 4b. Use above address.

Date: December 8, 1988.

Kay Bulow,

Assistant Secretary for Administration.

[FR Doc. 88-28950; Filed 12-15-88; 8:45 am]

BILLING CODE 3510-CW-M

Bureau of Export Administration

[OEE-3-88]

Export Privileges, Actions Affecting: Sharma, Rajeev, et al.

Order Temporarily Denying Export Privileges

In the matter of: Rajeev Sharma, individually and doing business as Libra Electronics, Inc. with addresses at 720 Plainfield Road, Suite 100, Willowbrook, Illinois 60521, and, 760 Oakwood Drive, Westmont, Illinois 60559, and, Sudershan Kakwani, individually and doing business as Libra Electronics, Inc., and, Libra Electronics Pty. Ltd., with addresses at, 12 Stanton Road, Seven Hills, N.S.W. 2147, Sydney, Australia, and, Unit 3, 15 Factory Street, North Parrammatta, N.S.W., Sydney, Australia, Respondents.

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (Department), pursuant to the provisions of § 788.19 of the Export Administration Regulations (15 CFR Parts 768 through 799) (the Regulations) [1] issued pursuant

[1] Effective October 1, 1988, the Regulations were redesignated as Parts 768 through 799 of Title 15 of

Continued

to the Export Administration Act of 1979 (50 U.S.C. app. 2401–2420 (1982 and Supp. III 1985), and amended by Pub. L. 100–418, 102 Stat. 1107 (August 23, 1988)) (the Act), has asked the Assistant Secretary for Export Enforcement to issue an order temporary denying all United States export privileges to Rajeev Sharma, individually and doing business as Libra Electronics, Inc. (hereinafter collectively referred to as Sharma), and Sudershan Kakwani, individually and doing business as Libra Electronics, Inc. and Libra Electronics Pty. Ltd. (hereinafter collectively referred to as Kakwani).

As a result of OEE's investigation, which is still ongoing, OEE has reason to believe that Sharma and Libra Electronics have purchased, in the United States, U.S.-origin computer components for the purpose of exporting them to an affiliate in Australia (Kakwani), ostensibly for use in a computer board manufacturing or assembly process there.

Checks make at the Australian sites purportedly operated as manufacturing facilities by Kakwani, doing business as Libra, have revealed that at none of the sites in Libra engaged in the assembly or manufacture of computer-related wares. OEE has not yet been able to establish the whereabouts of the U.S.-origin commodities already exported by Sharma to Libra and Kakwani, supposedly for the "manufacturing process" in Australia. Moreover, OEE has been informed that neither Libra's Australian sales volume nor the domestic Australian market is large enough to support the volume of computer components which Libra is seeking approval to export from the United States to Australia in a currently pending export license application.

OEE believes that, viewed as a whole, the above-described events concerning Libra's, Sharma's and Kakwani's activities demonstrate that they are involved in a scheme to obtain controlled U.S.-origin commodities, ostensibly for export to Australia for some kind of assembly or manufacturing process. Inasmuch as the whereabouts of the goods already exported to Australia are unknown, and no active Libra assembly or manufacturing site in Australia has been located, OEE has reason to believe that once Kakwani receives the U.S.-origin computers from Sharma, the goods are reexported from Australia without the request authorizations.

Therefore, based on the showing made by the Department, I find that an order temporarily denying export privileges to Rajeev Sharma, individually and doing business as Libra Electronics, Inc., and Sudershan Kakwani, individually and doing business as Libra Electronics, Inc. and Libra Electronics Pty. Ltd., is necessary in the public interest to prevent an imminent violation of the Act and the Regulations and to give notice to companies in the United States and abroad to cease dealing with Libra, Sharma and Kakwani in goods and technical data subject to the Act and the Regulations in order to reduce the substantial likelihood that respondents will continue to engage in activities which are in violation of the Act and the Regulations. This order is issued on an *ex parte* basis without a hearing based on the Department's showing that expedited action is required.

Accordingly, it is hereby

Ordered

I. All outstanding validated export licenses in which Rajeev Sharma, individually and doing business as Libra Electronics, Inc., or Sudershan Kakwai, individually and doing business as Libra Electronics, Inc. and Libra Electronics Pty. Ltd., appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of export Licensing for cancellation. Further, all of respondents' privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

II. Respondents Rajeev Sharma, individually and doing business as Libra Electronics, Inc., and Sudershan Kakwani, individually and doing business as Libra Electronics, Inc. and Libra Electronics Pty. Ltd., their successor or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity in any transaction involving commodities or technical data exported or to be exported from the United States, in whole or in part, or that are otherwise subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to any export license application submitted to the Department, (b) in preparing or filing with the Department any export license application or reexport authorization, or any document to be submitted therewith, (c) in obtaining or using any validated or general export license or other export control document, (d) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial may be made applicable to any person, firm, corporation, or business organization with which either respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Licensing shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with either respondent or any related party, or whereby either respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for either respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States and subject to the Act and the Regulations.

V. In accordance with the provisions of § 788.19(e) of the Regulations, any of the respondents may, at any time, appeal this temporary denial order by

---

the Code of Federal Regulations. 53 FR 37751 (September 28, 1988). The transfer merely changed the first number of each Part from a "3" to a "7". Until such time as the Code of Federal Regulations is republished, the Regulations can be found at 15 CFR Parts 368–399 (1988).

filing with the Office of Administrative Law Judges, U.S. Department of Commerce, Room H–6716, 14th Street and Constitution Avenue, NW., Washington, DC 20230, a full written statement in support of the appeal.

VI. This order is effective immediately and shall remain in effect for 60 days.

VII. In accordance with the provisions of § 788.19(d) of the regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Either respondent may oppose a request to renew this temporary denial order by filing a written submission with the Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

A copy of this order and of Parts 787 and 788 of the Regulations shall be served on each respondent and this order shall be published in the **Federal Register**.

Date: December 12, 1988.

G. Philip Hughes,

Assistant Secretary for Export Enforcement.

BILLING CODE 3510–DT–M

International Trade Administration

[A–588–808]

Initiation of Antidumping Duty Investigation; Light Duty Integrated Hydrostatic Transmissions and Subassemblies Thereof, With or Without Attached Axles From Japan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping duty investigation to determine whether imports of light duty integrated hyrostatic transmissions (HSTs) and subassemblies thereof, with or without attached axles, from Japan are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of this product materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before January 6, 1989. If that determination is affirmative, we will make a preliminary determination on or before May 1, 1989.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond Busen or Louis Apple, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–3464 or (202) 377–1769.

SUPPLEMENTARY INFORMATION:

The Petition

On November 22, 1988, we received a petition filed in proper form by Eaton Corporation on behalf of the domestic industry engaged in the production of light duty integrated HSTs. In compliance with the filing requirements of 19 CFR 353.36, petitioner alleges that imports of light duty integrated HSTs from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

If any interested party as described under paragraphs (C), (D), (E), or (F) of section 771(9) of the Act wishes to register support of or oppostion to this petition, please file written notification with the Commerce official cited in the "For Further Information Contact" section of this notice.

United States Price and Foreign Market Value

United States price was based on U.S. selling prices to original equipment manufacturers. Petitioner deducted distributor mark-up, Japanese inland freight, Japanese Customs process fee, cargo loading fee, ocean freight, marine insurance, U.S. Customs brokerage fees, U.S. import duties, and U.S. inland transportation.

Petitioner based foreign market value on a manufacturer's price to Japanese original equipment manufacturers. Deductions were made for foreign inland freight and foreign packaging, while U.S. packaging costs were added in.

Based on a comparison of United States price and foreign market value, petitioner alleges dumping margins ranging from 45 to 114 percent.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on light duty integrated HSTs from Japan and found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of light duty integrated HSTs from Japan are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination by May 1, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the approrpiate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs officers have reference copies and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

The products covered by this investigation are light duty integrated hydrostatic transmissions and subassemblies thereof, with or without attached axles, provided for in items 660.85, 660.97, 666.00, and 666.10 of the *Tariff Schedules of the United States* (TSUS), and classifiable in subheadings 8412.29.80, 8412.90.90, 8413.60.00, 8413.81.00, 8432.90.00, 8433.90.10, 8433.90.50, 8484.90.00, and 8436.99.00 of the HTS. The subject articles, which have a maximum horsepower of twenty

or fewer, comprise the following: Parts and subassemblies if non-electric engines and motors not specially provided for (TSUS item 660.85 and HTS subheadings 8412.29.80 and 8412.90.90); pumps for liquids, liquid elevators, and parts thereof, the foregoing not specially provided for (TSUS items 660.97 and HTS subheadings 8413.60.00 and 8413.81.00); other parts, not specially provided for, of machinery for soil preparation and cultivation (TSUS item 660.00 and HTS subheadings 8432.90.00, 8433.90.50, 8434.90.00, and 8436.99.00); and parts of lawn mowers (TSUS item 666.10 and HTS subheading 8433.90.10).

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in our files, provided it confirms in writing that it will not disclose such information either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by January 6, 1989 whether there is a reasonable indication that imports of light duty integrated HSTs from Japan materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will be terminated; otherwise, it will proceed according to the statutory and regulatory procedures.

This notice is published pursuant to section 732(c)(2) of the Act.

December 12, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Short-Supply Review on Certain Stainless Steel Wire Rod; Request for Comments

AGENCY: Import Administration/ International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products and Article 8 of the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products, with respect to various sizes and grades of stainless steel wire rod.

DATE: Comments must be submitted no later than December 27, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products and Article 8 of the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products provide that if the U.S. determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product, (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors) an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for the following types and sizes of annealed and pickled stainless steel wire rod: Type 302 HQ, cold-heading quality, with diameters of 0.0218 and 0.250 inch; Type 312 with a diameter of 0.250 inch; Type 410, cold-heading quality, with a diameter of 0.218 inch; Type 416 with diameters ranging from 0.218 to 0.687 inch; and Type 440A with a diameter of 0.218 inch.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than December 27, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce at the above address.

December 9, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Telecommunications and Information Administration

Comprehensive Report on Telecommunications and Information Industries and Policies

AGENCY: National Telecommunications and Information Administration (NTIA), Commerce.

ACTION: Notice.

SUMMARY: NTIA has released a major study on the current and future state of telecommunications and information industries and policies. *NTIA Telecom 2000: Charting the Course for a New Century* analyzes 17 industry sectors and presents both international and domestic policy recommendations.

FOR FURTHER INFORMATION CONTACT: Teresa A. Lukach, Director, Office of Media Relations, NTIA, Department of Commerce, 14th and Constitution Avenue, NW., Room 4890, Washington, DC 20230; telephone 202/377-1800.

SUPPLEMENTARY INFORMATION: On October 4, 1988, the National Telecommunications and Information Administration (NTIA) released *NTIA Telecom 2000: Charting the Course for a New Century* (NTIA Special Publication No. 88-21), a 672-page report on the current and future state of the Nation's telecommunications industries and policies. It is the first comprehensive review of its kind in 20 years. *NTIA Telecom 2000* addresses key technological, commercial, demographic, and regulatory changes and trends, and recommends improvements in the organization of Government agencies that deal with communications and information policy.

In the two part report, NTIA analyses significant trends and developments in 17 separate industry sectors and presents both domestic and international policy recommendations.

In Part I, NTIA discusses: (1) Twenty years after the Rostow Report; (2) prespectives on the next twenty years; (3) telecommunications infrastructure and "Universal Information Service" in the Year 2000; (4) ensuring telecommunications and information services for rural America; (5) delivery of education, health care, and other critical services through telecommunications; (6) maintaining

America's strength in markets for telecommunications and information services; (7) privacy, information flows, and the protection of intellectual property in the Information Age; (8) television, cable television, and radio broadcasting in the Year 2000; and, (9) international and domestic policymaking in the Year 2000.

In Part II, NTIA examines the following industry sectors: (1) Local networks; (2) long distance networks; (3) fiber optics; (4) space communications and information systems; (5) land mobile radio services; (6) telecommunications network and customer premises equipment; (7) Federal Government use of telecommunications; (8) postal services; (9) information services; (10) electronic banking and financial services; (11) commercial broadcast television; (12) commerical radio broadcasting; (13) cable television; (14) public broadcasting; (15) film and video industries; (16) consumer electronics; and, (17) communications and informaion in rural America.

Copies are available for $20.00 at U.S. Government bookstores, or may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The stock number is 000–006–00658–1.

Dated: December 12, 1988.

Alfred C. Sikes,

Administrator.

BILLING CODE 3510–60–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in Nepal

December 12, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 20, 1988.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: E.O. 11651 of March 3, 1972, as amended: sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 340 is being increased for swing and carryover. The limit for Category 341 is being reduced to account for the swing being applied to Category 340.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the *Correlation:* Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). Also see 52 FR 48855, published on December 28, 1987.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald K. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 12, 1988.

Commissioner of Customs,

Department of Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 21, 1987 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton textile products, produced or manufactured in Nepal and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 20, 1988, the directive of December 21, 1987 is hereby amended to adjust the limits for cotton textile products in the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Nepal:

Category	Adjusted twelve-month limit [1]
340	236,630 dozen.
341	654,074 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

The Committee for the Implementation of the Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553[a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation or Textile Agreements.

BILLING CODE 3510–DR–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERE' HANDICAPPED

Procurement List 1989; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1989 commodities to be produced and a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: January 16, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: On July 15, July 22, September 9, October 7, and October 14, 1988, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (53 FR 26847, 27747, 35104, 39498 and 40252) of proposed additions to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018). No comments were received concerning the proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified workshops to produce the commodities and provide the service at a fair market price and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and service listed.

c. The actions will result in authorizing small entities to produce the commodities and provide the service procured by the Government.

Accordingly, the following commodities and service are hereby added to Procurement List 1989:

Commodities

Candle, Illuminating

6260–00–840–5578

First Aid Kit, Eye Dressing

6545–00–853–6309

Cabinet, Storage

7125–00–693–4352

Service

Grounds Maintenance and Sprinkler System Maintenance

Buildings 1250, 1260, 1633, 2410, 2419, 2453, 2600, 2850, 3535 offsite, 3950, 5601, 6441, 6443, 8251, 8252, 8255, T–38, 1200 Parking Islands, 2500, 2665, 3535, 5600, 5602, 5603, 5604, 5605, 6445, 6447, 420, 6000, 7220, 2421, 5211, Desert Villa Complex
Edwards Air Force Base, California.

Beverly L. Milkman,

Executive Director.

[FR Doc. 88–28984 Filed 12–15–88; 8:45 am]

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Policy Board Advisory Committee; Closed Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Policy Board Advisory Committee will meet in closed session on 5 through 6 January 1989 in the Pentagon, Washington, DC.

The mission of the Defense Policy Board is to provide the Secretary of Defense, Deputy Secretary of Defense and the Under Secretary of Defense for Policy with independent, informed advice and opinion concerning major matters of defense policy. At this meeting the Board will hold classified discussions on national security matters.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this Defense Policy Board meeting concerns matters listed in 5 U.S.C. 552b (c)(1)(1982), and that accordingly this meeting will be closed to the public.

December 13, 1988

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer Department of Defense.

[FR Doc. 88–29006 Filed 12–15–88; 8:45 am]

BILLING CODE 3810–01–M

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–3493–5]

Environmental Impact Statements and Regulations; Availability of EPA Comments Prepared November 20 Through December 2, 1988

Availability of EPA comments prepared November 28, 1988 through December 2, 1988 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5074.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 22, 1988 (53 FR 13318).

Draft EISs

ERP No. DS–AFS–L65102–00, Rating E02, Wallowa Whitman National Forest, Land and Resource Management Plan, Additional Alternative, Implementation, Baker, Union, Wallowa, Grant, Malheur and Umatilla Counties, OR and Adams, Nez Perce and Idaho Counties, ID.

Summary: EPA's comments on the draft EIS remains outstanding. This document evaluates Alternative NC (No Charge) which is essentially a continuation of the Timber Management Plan developed in 1962. Alternative NC does not incorporate all the provisions of the National Forest Management Act of 1976 and would include the specific standards and guidelines for water quality protection. As such, EPA could not support the implementation of this alternative.

ERP No. D–AFS–L65129–AK, Rating EC2, 1989–94 Ketchikan Pulp Long Term Timber Sale Management Plan, Imoplementation, Tongass National Forest, Prince of Wales Island, AK.

Summary: EPA is concerned that pink salmon habitat conditions may be degraded from implementation of any of the action alternatives due to summer stream temperature increases. Additional information is needed concerning achievement of Alaska Water Quality Standards and a water quality/fishery monitoring program and feedback mechanism.

ERP No. D–BLM–K01006–CA, Rating LO, PLES I Geothermal Project, Geothermal Wellfield Development and Construction and Operation of a 10 MWe Powerplant, Approval, Bishop Resource Area, Mono County, CA.

Summary: EPA has no comments to offer on this document.

ERP No. D–BLM–L65127–AK, Rating EC2, Fort Wainwright Maneuver Area, Resource Managment Plan for Nonmilitary Uses, AK.

Summary: EPA is concerned that this document does not describe the cumulative effects of the military and other uses permitted by the various alternatives in the plans. In addition, the final EIS should describe all other plans (e.g., habitat management, forest management) that may affect or be affected by the military withdrawal, and how monitoring will be incorporated into the plans to assure that objectives are met.

ERP No. D–FHW–L40167–AK, Rating EC2, University Avenue Rehabilitation and Widening, College Road to Parks Highway, Funding, Fairbanks, North Star Borough, AK.

Summary: EPA requested that the affected wetland discussion be expanded and that the final EIS include a mitigation plan to offset wetland losses.

ERP No. D–FHW–L40168–AK, Rating LO, South Cushman Street Upgrading, Van Horn Road to Gaffney Road, Funding, Fairbanks, North Star Borough, AK.

Summary: EPA has no objections to the project as described in the draft EIS.

Final EISs

ERP No. F–FHW–C40120–NY, Lockport Expressway/I–990 Extension, North French Road to Millersport Highway/NY–263 To Transit Road, Funding, 404 Permit, Erie County, NY.

Summary: Although EPA strongly disagreed with the wetland delineation methodology used in the EIS, agreement was reached with the general conclusion drawn concerning the project's direct wetlands impacts. In addition, EPA has requested the opportunity to review highway runoff design plans when they become available.

Regulations

ERP No. R–CGD–A52165–00, 33 CFR Parts 151, 155, 158, and 46 CFR Part 25; Regulations Implementing the Pollution Prevention Requirements of Annex V of MARPOL 73/78 (53 FR 43622).

Summary: EPA recommends that the Coast Guard not endorse or in any way encourage discharge of incinerator ash at sea in the current Annex V regulations because of the lack of information on the typical chemical makeup of the ash and because the ash may be subject to the requirements of the Resource Conservation and Recovery Act (RCRA). The regulations should note that port reception facilities for ash will be required to meet those

standards of waste handling specified in RCRA. EPA has also requested that the final rule include a schedule for implementation of planned amendments to the Act.

Dated: December 13, 1988.

BILLING CODE 6560-50-M

[FRL 3486-9]

Availability of Final Federal Facilities Compliance Strategy

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of availability of the final EPA Federal Facilities Compliance Strategy.

SUMMARY: The Environmental Protection Agency (EPA) announces the availability of the final Federal Facilities Compliance Strategy signed by the EPA Administrator on November 8, 1988. This Strategy is the primary EPA policy and guidance document which outlines EPA's approach for undertaking compliance monitoring and enforcement actions at facilities or lands owned or operated by the Federal government. This document serves at the framework for all EPA media program (e.g., air, water, hazardous waste, etc.) to follow to ensure that Federal Facilities are fully integrated into all EPA program activities. The Strategy sets forth the enforcement response and dispute resolution procedures which EPA will follow when environmental violations occur at Federal facilities. It also outlines EPA's ongoing efforts to assist Federal agencies in achieving and maintaining high rates of compliance at their facilities.

EFFECTIVE DATE: November 8, 1988.

ADDRESSES: Single copies of this document are available only upon written request to the following: U.S. Environmental Protection Agency, Office of Federal Activities (A-104), Federal Facilities Compliance Program, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: James R. Edward, Deputy Program Manager, Federal Facilities Compliance Program, Office of Federal Activities, U.S. EPA (A-104), 401 M Street, SW., Washington, DC 20460, Telephone (202) 475-8790.

SUPPLEMENTARY INFORMATION: Federal agencies are generally required to comply with Federal, State and local environmental laws and regulations in the same manner and degree as non-

Federal entities. To help ensure compliance, Presidential Executive Order 12088 was issued mandating Federal agency compliance with all environmental laws and requiring EPA to assist Federal agencies in achieving compliance at their facilities. In addition, each of the environmental statutes provides EPA the authority to take enforcement actions for violations at Federal facilities. This document sets forth EPA's strategy for reconciling its dual responsibilities to provide technical assistance under its Executive Order responsibilities and its statutory authorities to take enforcement actions violations at Federal facilities in appropriate circumstance.

This Strategy clarifies Federal agencies obligations to comply with environmental requirements the same as other regulated facilities and states EPA's commitment to use all its available enforcement mechanisms to ensure for Federal facility compliance. However, due to certain constitutional and statutory constraints, there are some differences in EPA's compliance and enforcement procedures for Federal facilities. This document outlines EPA's strategy for maximinizing use of its available enforcement activities at Federal facilities.

The Federal Facilities Compliance Strategy replaces the previous EPA program document entitled "Resolution of Compliance Problems at Federal Facilities" issued in January 1984 and it will continue to be referred to as the "Yellow Book."

Date: December 6, 1988.

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN(s) and provides a summary of each.

DATES: Close of review periods:

Y 89-36—December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Lawrence Culleen, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-611, 401 M Street, SW., Washington, DC 20460 (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacture on the PMNs received by EPA. The complete nonconfidential document is available in the Public Reading Room NE-G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Toxic and Hazardous Substances; Test Market Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt are discussed in EPA's final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application(s) for exemption, provides a summary, and request comments on the appropriateness of granting this exemption.

DATE: Written comments by:

T 89-6—January 1, 1989.

ADDRESS: Written comments, identified by the document control number "[OPTS-59267]" and the specific TME number should be sent to: TSCA Document Control Office (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M Street, SW., Room 201 East Tower, Washington, DC 20460 (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Lawrence Culleen, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-611, 401 M Street, SW., Washington, DC 20460 (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer of the TME received by EPA. The complete nonconfidential document is available in the Public Reading Room NE-G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

[FRL-3492-4]

State and Local Assistance for Underground Injection Control Program; Underground Water Source Protection

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has determined that $1 million of the total funds available in fiscal year 1989 for grants under section 1443(b) of the Safe Drinking Water Act should be allocated exclusively for

Class I well activity, Class II well activities, and Indian Tribe funding. The purpose of this notice is to inform the public of that decision and of the method used to allocate the $1 million among the States.

FOR FURTHER INFORMATION CONTACT: Francoise Brasier, U.S. Environmental Protection Agency, Office of Drinking Water, State Programs Division, Underground Injection Control Branch, WH–550E, 401 M Street SW., Washington, DC 20460: telephone 202–382–5530, (FTS) 382–5530.

SUPPLEMENTARY INFORMATION: The President's budget requested $9.5 million for the UIC State grants for fiscal year 1989. Congress appropriated $10.5 million. EPA will set aside 5 percent of the original $9.5 million request ($475,000) and 5 percent of the $1 million add-on ($50,000) for a total of $525,000 for programs on Indian lands. The Agency will allocate the remainder of the original budget request ($9,025,000) according to the existing grant formula based on State population, geographic area and injection practices for all classes of wells. The remainder of the add-on ($950,000) will be allocated in a different manner to reflect the need for additional resources to address high priority Class I well and Class II well activities. Specifically, EPA will allocate 25 percent or $237,500 for Class I wells and 75 percent or $712,500 for Class II wells.

The following table illustrates the allotment by State of the $1,000,000 add-on.

FEDERAL COMMUNICATIONS COMMISSION

Comments Invited on North Central and North East Texas Public Safety Plan

December 7, 1988.

The Commission has received the public safety radio communications plan for the North Central and North East Texas area (Region 40).

In accordance with the Commission's Report and Order in General Docket 87–112 implementing the Public Safety National Plan, parties are hereby given thirty days from the date of **Federal Register** publication of this public notice to file comments and fifteen days to reply to any comments filed. (See Report and Order, General Docket 87–112, 3 FCC Rcd 905 (1987), at paragraph 54.)

In accordance with the Commission's Memorandum Opinion and Order in General Docket 87–112, Region 40 consists of the following Texas counties: Cooke, Grayson, Fannin, Lamar, Red River, Bowie, Wise, Denton, Collin, Hunt, Delta, Hopkins, Franklin, Titus, Morris, Cass, Tarrant, Dallas, Palo Pinto, Parker, Rockwall, Kaufman, Rains, VanZandt, Wood, Smith, Camp, Upshur, Gregg, Marion, Harrison, Panola, Rusk, Cherokee, Anderson, Henderson, Navarro, Ellis, Johnson, Hood, Somervell, and Erath. (See Memorandum Opinion and Order, General Docket 87–112, 3 FCC Rcd 2113 (1988).)

Comments should be clearly identified as submissions to General Docket 88–549, North Central and North East Texas Area—Region 40, and commenters should send an original and five copies to the Secretary, Federal Communications Commission, Washington, DC 20554.

Questions regarding this public notice may be directed to Fred Thomas, Office of Engineering and Technology, (202) 653–8112, or Marty Liebman, Private Radio Bureau, (202) 632–6497.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

[MM Docket Nos. 88–514; File Nos. BTCCT–861126KE and BLCT–870316KH]

Applications for Consolidated Hearing Pan Pacific Television, Inc., et al.

1. The Commission has before it the following mutually exclusive applications for a new TV station:

Applicant and City/ State	File No.	MM Docket No.
A. The Stockholders of PAN Pacific Television, Inc. (Transferors) and Silver King Broadcasting of Northern California (Transferee), Vallejo, CA.	BTCCT–861126KE	88–514
B. Pan Pacific Television, Inc., Vallejo, CA.	BLCT–870316KH	88–514

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a

consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to the particular applicant.

Issue Heading and Applicant(s)

1. Alien Control, A, B
2. Misrepresentation, A, B
3. Qualifications, A, B
4. Ultimate, A, B

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street, NW., Washington, DC 20037 (Telephone No. (202) 857-3800).

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712-01-01-M

Applications Are Designed For Hearing; Shafer, Charles B., et al.

1. The Common Carrier Bureau, under delegated authority, has designated for hearing public land mobile service applications. The applications for transfer of control from Charles B. Shafer to Hazel-Tone Communications Inc. and change of facilities were granted in 1981. On appeal from that grant, the United States Court of Appeals for the District of Columbia Circuit affirmed in part and reversed and remanded in part the Commission's decision. In 1986 the Commission released an order on remand finding that neither the assignor nor the assignee had lacked condor with the Commission. On appeal the Commission requested and was granted a voluntary remand on August 28, 1987.

2. Substantial and material questions of fact have been raised against these applications which require resolution in a hearing. The questions concern a possible lack of candor and material misrepresentations to the Commission. For instance, during 1979 to 1980 a yellow pages advertisement for Shafer's paging service appeared in the Wilkes-Barre telephone directory. The order for this advertisement had been signed by John P. Gabriele, president of Hazel-Tone, on August 12, 1979. Gabriele contends that in signing the order he believed that he was only approving the copy and not signing a contract. Copies of the documents signed by Gabriele state, however, that it is a contract. This apparent inconsistency raises a substantial and material question of fact concerning whether Gabriele misrepresened material facts or lacked candor with the Commission. In turn, this raises the question of whether Gabriele is qualified to be or to remain a Commission licensee. Therefore, we are designating these matters for hearing on the issues specified below.

3. By public notice released on November 17, 1988 the Commission rescinded the grants of these applications. The Commission also granted special temporary authority to Hazel-Tone Communications, Inc. to continue to operate the facility until the resolution of this proceeding.

4. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the following applications have been designated for hearing:

Applicant	File No.
Charles B. Shafer, Assignor Hazel-Tone Communications, Inc., Assignee.	22584-CD-AL-79
Charles B. Shafer	20095-CD-P-80

5. Pursuant to section 309(e) of the Communications Act of 1934, these applications have been designated for hearing in a consolidated proceeding upon the folowing issues:

(1) To determine all the facts and circumstances surrounding the placing of the advertisement in the yellow pages directory.

(2) To determine all the facts and circumstances surrounding the use of Gabriele's transmitter by Shafer.

(3) To determine, on the basis of the evidence adduced above, whether Gabriele misrepresented material facts to the Commission or lacked candor.

(4) To determine, on the basis of evidence adduced above, whether Gabriele is qualified to be a Commission licensee.

(5) To determine on the basis of all the above whether a grant of the applications would be in the public interest, convenience and necessity.

6. Mobilefone of Northwestern Pennsylvania was also made a party to this proceeding.

7. A copy of the complete Hearing Designation Order in this proceeding (CC Docket No. 88-534) is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc. 2100 M St., NW., Washington, DC 20037 [Telephone No. (202) 857-3800].

BILLING CODE 6718-21-M

FEDERAL HOME LOAN BANK BOARD

[No. 88-1267]

Federal Savings and Loan Insurance Corporation; Insurance Premium

Date: December 7, 1988.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The Federal Home Loan Bank Board ("Bank Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), has adopted a resolution pursuant to which the Corporation orders the assessment against each insured institution of an additional premium for FSLIC insurance in an amount equal to one quarter of one-eighth of one percent (one thirty-second of one percent) of the total amount of the accounts of the insured members of each insured institution determined as of September 30, 1988.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: Mary A. Creedon, Principal Deputy Executive Director, FSLIC, (202) 254-2029; or Deborah Siegel, Attorney, Office of General Counsel (202) 377-6848, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

Whereas, The Federal Home Loan Bank Board ("Bank Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("Corporation" or "FSLIC"), may authorize the Corporation, pursuant to section 404(c) of the National Housing Act, as amended ("NHA"), 12 U.S.C. 1727(c) (1982), to assess against each institution the accounts of which are insured by the Corporation pursuant to section 403 of the NHA, 12 U.S.C. 1726 (1982) ("insured institution"), additional premiums for such insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, *Provided* that the total amount so assessed in any one year against any insured institution shall not exceed one eighth of one per centum of the total amount of the accounts of the insured members of such institution and *Provided Further* that the amount of the additional premium for the calendar year 1988 may not exceed one-twelfth of

one percentum of the total amount of the accounts of the insured members of such institution unless the Bank Board determines that severe pressures on the Corporation exist which necessitate an infusion of additional funds; and

Whereas, The Bank Board, as operating head of the Corporation, by Resolution No. 85–142, dated February 22, 1985, by Resolution No. 85–437, dated June 5, 1985, by Resolution No. 85–770, dated August 28, 1985, by Resolution No. 85–1142, dated December 9, 1985, by Resolution No. 86–213, dated March 6, 1986, by Resolution No. 86–582, dated June 10, 1986, by Resolution No. 86–941, dated September 2, 1986, by Resolution No. 86–1253, dated December 15, 1986, by Resolution No. 87–281 dated March 16, 1987, by Resolution No. 87–610 dated May 27, 1987, by Resolution No. 87–950 dated September 9, 1987, by Resolution No. 87–1254 dated December 14, 1987, by Resolution No. 88–256 dated April 7, 1988, by Resolution No. 88–537 dated June 29, 1988, and by Resolution No. 88–981 dated September 15, 1988, ordered assessments against each insured institution of an additional premium for insurance in an amount equal to one thirty-second of one per centum of the total amount of the accounts of the insured members of each insured institution determined as of December 31, 1984, for the first assessment, as of March 31, 1985, for the second, as of June 30, 1985, for the third, as of September 30, 1985, for the fourth, as of December 31, 1985, for the fifth, as of March 31, 1986, for the sixth, as of June 30, 1986, for the seventh, as of September 30, 1986, for the eighth, as of December 31, 1986, for the ninth, as of March 31, 1987, for the tenth, as of June 30, 1987, for the eleventh, as of September 30, 1987, for the twelfth, as of December 31, 1987, for the thirteenth, as of March 31, 1988, for the fourteenth, and as of June 30, 1988, for the fifteenth; and

Whereas, The Bank Board has considered memoranda of the Corporate Accounting Branch and the Chief Financial and Administrative Officer, Office of the FSLIC, (a copy of which memoranda are in the Minute Exhibit file), describing the impact of the collection of the additional premiums for insurance assessed pursuant to Resolution No. 85–142, dated February 22, 1985, Resolution No. 85–437, dated June 5, 1985, Resolution No. 85–770, dated August 28, 1985, Resolution No. 85–1142, dated December 9, 1985, Resolution No. 86–213, dated March 6, 1986, Resolution No. 86–582, dated June 10, 1986, Resolution No. 86–941, dated September 2, 1986, Resolution No. 86–1253, dated December 15, 1986, Resolution No. 87–281, dated March 16, 1987, Resolution No. 87–610, dated May 27, 1987, Resolution No. 87–950, dated September 9, 1987, Resolution No. 87–1254, dated December 14, 1987, Resolution No. 88–256, dated April 7, 1988, Resolution No. 88–537, dated June 29, 1988, and Resolution No. 88–981, dated September 15, 1988, upon the Corporation's insurance reserves:

Now, Therefore, It Is Resolved, That on the basis of the administrative record, the Bank Board finds and determines that the Corporation has incurred substantial losses during calendar years 1981 through the third quarter of 1988; and

Resolved Further, That the Bank Board finds and determines that:

1. Losses and expenses incurred by the Corporation, as defined in Resolution No. 85–142, require the assessment of additional insurance premiums pursuant to section 404(c) of the NHA in addition to the additional insurance premiums assessed pursuant to Resolutions No. 85–142, No. 85–437, No. 85–770, No. 85–1142, No. 86–213, No. 86–582, No. 86–941, No. 86–1253, No. 87–281, No. 87–610, No. 87–950, No. 87–1254, No. 88–256, No. 88–537, and No. 88–981 in order to maintain the insurance reserves of the Corporation at a level adequate to meet in part the Corporation's losses and expenses and to protect the insured members of insured institutions;

2. Severe pressures on the Corporation exist which necessitate an infusion of additional funds;

3. Postponement of a reduction in the assessment of an additional premium, as provided in section 404(c)(2) of the NHA, will improve the financing environment for selling obligations of the Financing Corporation organized pursuant to the Federal Savings and Loan Insurance Corporation Recapitalization Act of 1987;

4. It is appropriate, therefore, to provide for the assessment of an additional insurance premium at this time, pursuant to section 404(a)(2) and 404(c)(1) of the NHA, by order of the Corporation; and

Resolved Further, That the Corporation hereby orders the assessment against each insured institution of an additional premium for insurance for the fourth quarter of 1988, in an amount equal to one thirty-second of one per centum of the total amount of the accounts of the insured members of such insured institution determined as of September 30, 1988; and

Resolved Further, That the additional insurance premium assessed pursuant to this Resolution shall be payable on or about December 28, 1988; and

Resolved Further, That the Executive Director or the Principal Deputy Director of the FSLIC, or a designee of either of them, ("Director"), shall determine the amount of the additional premium due, including an offset of one quarter of twenty percent (five percent) of each insured institution's pro rata share of the statutorily prescribed amount as provided in section 404(e)(2) of the NHA, to be paid on or about December 28, 1988, by each insured institution, and shall notify each insured institution of such amount at least fifteen (15) days prior to the date such amount is due; and

Resolved Further, That the Director, on behalf of the Corporation , is hereby authorized to take all other actions necessary or appropriate to determine and collect the additional insurance premium authorized and ordered by this Resolution; and

Resolved Further, That the Secretary shall forward this Resolution for publication in the **Federal Register**.

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

FEDERAL RESERVE SYSTEM

NCNB Corp., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the publication has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such

as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 30, 1988.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *NCNB Corporation,* Charlotte, North Carolina; to engage *de novo* through its subsidiary, NCNB America Bank, Newark, Delaware, in making loans or other extensions of credit by means of credit cards, to any natural person or persons the proceeds of which are to be used primarily for personal, family or household purposes and to take security interests of any kind in property of any type to secure such loans or extensions of credit pursuant to § 225.25(b)(1)(ii) of the Board's Regulation Y.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Shelton Enterprises, Inc.,* Shelton, Nebraska; to engage in community development pursuant to § 225.25(b)(6) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 13, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Princeton Agency, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 6, 1989.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Princeton Agency, Inc.,* Princeton, Iowa; to merge with LeClaire Agency, Inc., LeClaire, Iowa, and thereby indirectly acquire LeClaire State Bank, LeClaire, Iowa.

B. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Magna Group, Inc.,* Belleville, Illinois, and MCB Acquisition Company, Belleville, Illinois; to acquire 100 percent of the voting shares of New Holland Farmers Bank, New Holland, Illinois, and thereby indirectly acquire Magna Bank of Lincoln, N.A., Lincoln, Illinois. In connection with this application, MCB Acquisition Company has applied to become a bank holding company.

2. *West-Ark Bancshares, Inc.,* Clarksville, Arkansas; to become a bank holding company by acquiring at least 80 percent of the voting shares of Arkansas State Bank, Clarksville, Arkansas.

C. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Citizens Investment Co., Inc.,* Glenville, Minnesota; to acquire 100 percent of the voting shares of Frost State Bank, Frost, Minnesota.

2. *Minnesota State Bancshares, Inc.,* St. Paul, Minnesota; to become a bank holding company by acquiring 87.1 percent of Class A common stock and 100 percent of the Class B common stock of Minnesota State Bancorporation, Inc., St. Paul, Minnesota, and Minnesota State Bank, St. Paul, Minnesota. Comments on this application must be received by December 30, 1988.

D. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Lawton Financial Corporation,* Lawton, Oklahoma; to acquire 100 percent of the voting shares of First Chattanooga Corporation, Chattanooga, Oklahoma, and thereby indirectly acquire The First Bank of Chattanooga, Chattanooga, Oklahoma.

Board of Governors of the Federal Reserve System, December 13, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies; Vernon D. Smith

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 30, 1988.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Vernon D. Smith,* Fort Pierce, Florida; to acquire up to 25 percent of the voting shares of Riverside Banking Company, Fort Pierce, Florida, and thereby indirectly acquire Riverside National Bank of Florida, Fort Pierce, Florida.

Board of Governors of the Federal Reserve System, December 13, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Agency Information Collection Activities Under OMB Review

The GSA hereby gives notice under the Paperwork Reduction Act of 1980 that it is requesting the Office of Management and Budget (OMB) to renew expiring information collection 3090–0240, General Services Administration Acquisition Regulation Subpart 525.2 Buy American Act—Construction Materials. The information required to be submitted with the offer is a description of the type, quantity, and cost of the foreign construction material proposed to be used under the contract.

AGENCY: Office of GSA Acquisition Policy Regulations (VP), GSA.

ADDRESSES: Send Comments to Bruce McConnell, GSA Desk Officer, Room 3235, NEOB, Washington, DC, 20503, and to Mary L. Cunningham, GSA Clearance Officer, General Services Administration (CAIR), F Street at 18th, NW., Washington, DC 20405.

Annual Reporting Burden: Firms responding, 120; responses, 1 per year; average hours per response, 1; burden hours, 120.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad 202–566–1224.

Copy of Proposal: A copy of the proposal may be obtained from the Information Collection Management Branch (CAIR), Room 3014, GS Building Washington, DC 20405, or by telephoning 202–535–7691.

Dated: December 12, 1988.

Emily C. Karam,

Director, Information Management Division (CAI).

Food and Drug Administration

[Docket No. 88M–0361]

Wesley-Jessen; Premarket Approval of W–J Sterile Unpreserved Saline Solution

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Wesley-Jessen, Chicago, IL, for premarket approval, under the Medical Device Amendments of 1976, of W–J Sterile Unpreserved Saline Solution. The device is to be manufactured under an agreement with Applied Laboratories, Inc., Columbus, IN, which has authorized Wesley-Jessen to incorporate information contained in its approved premarket approval application for the Applied Laboratories Sterile Saline Solution. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 30, 1988, of the approval of the application.

DATE: Petitions for administrative review by January 17, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, MD 20910, 301–427–7940.

SUPPLEMENTARY INFORMATION: On September 1, 1988, Wesley-Jessen, Chicago, IL 60610, submitted to CDRH an application for premarket approval of W–J Sterile Unpreserved Saline Solution. The device is a sterile physiological saline solution (0.9 percent salt in water) in a pressurized container with a nitrogen propellant and is indicated for use in the rinsing, heat disinfection, and storage of soft (hydrophilic) contact lenses. The application includes authorization from Applied Laboratories, Inc., Columbus, IN 47201, to incorporate information contained in its approved premarket approval application for the Applied Laboratories Sterile Saline Solution.

On September 30, 1988, CDRH approved the application by letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ–460), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any

interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before January 17, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: December 8, 1988.

Walter E. Gundaker,

Director, Office of Compliance, Center for Devices and Radiological Health.

[FR Doc. 88–28937 Filed 12–15–88; 8:45 am]

BILLING CODE 4160–01–M

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meetings

The following advisory committee meetings are announced:

Fertility and Maternal Health Drugs Advisory Committee

Date, Time, and Place

January 5, 1989, 9 a.m., and January 6, 1989, 8:30 a.m., Conference Rms. G and H, Parklawn Building, 5600 Fishers Lane, Rockville, MD.

Type of Meeting and Contact Person

Open public hearing, January 5, 1989, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open public hearing, January 6, 1989, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 5:30 p.m.; Philip A. Corfman, Center for Drug Evaluation and Research (HFD–510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3510.

General Function of the Committee

The committee reviews and evaluates available data on the safety and effectiveness of marketed and investigational human drug products for use in obstetrics, gynecology, and contraception.

Agenda—Open Public Hearing

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before December 22, 1988, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open Committee Discussion

On January 5, 1989, the committee will discuss oral contraceptives and breast cancer, and on January 6, 1989, the bioequivalence of conjugated estrogen tablets.

Obstetrics-Gynecology Devices Panel

Date, Time, and Place

January 19, 1989, 9 a.m., Conference Rm. E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of Meeting and Contact Person

Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; Colin M. Pollard, Center for Devices and Radiological Health (HFZ–470), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7555.

General Function of the Committee

The committee reviews and evaluates available data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open Public Hearing

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 6, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open Committee Discussion

The committee will review, discuss, and make a recommendation on a proposed regulatory mechanism for market release of Doppler ultrasound instrumentation for fetal evaluation. The committee will review a draft guide that outlines the required preclinical and clinical testing for such devices.

Cardiovascular and Renal Drugs Advisory Committee

Date, Time, and Place

January 26 and 27, 1989, 9 a.m., National Institutes of Health, Clinical Center, Building 10, Jack Masur Auditorium, 9000 Rockville Pike, Bethesda, MD.

Type of Meeting and Contact Person

Open public hearing, January 26, 1989, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open committee discussion, January 27, 1989, 9 a.m. to 5 p.m.; Joan C. Standaert, Center for Drug Evaluation and Research (HFD–110), Food and Drug Administration, 5600 Fishers Lane,

Rockville, MD 20857, 301–443–4730 or 419–259–6211.

General Function of the Committee

The committee reviews and evaluates available data on the safety and effectiveness of marketed and investigational human drugs for use in the treatment of cardiovascular disorders and diseases and makes recommendations regarding the appropriate clinical development of such products.

Agenda—Open Public Hearing

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 12, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open Committee Discussion

The committee will discuss organic nitrates in the long-term therapy of angina and the incorporation of nitrate issues into guidelines for testing antianginal agents: Ethmaozine (morizine HC1), new drug application 19–753, Dupont Pharmaceutical, to be indicated for use in arrhythmia.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, Room 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: December 9, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–28938 Filed 12–13–88; 1:03 pm]

BILLING CODE 4160–01–M

Health Care Financing Administration

[OIS–003–N]

General Notice of Quarterly Listing of Program Issuances

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice lists HCFA manual instructions, interpretative rules, and statements of policy that were published during July, August and September 1988 that relate to the Medicare program. Section 1871(c) of the Social Security Act requires that we publish a list of our issuances in the Federal Register every three months. The notice contains information for individuals and organizations to determine the subject matter of publications. It also tells where they may review the documents in their entirety and how subscriptions can be obtained.

FOR FURTHER INFORMATION CONTACT:

Allen Savadkin, (301) 966–5265 (For Issuance Information Only)

Matt Plonski, (301) 966–4662 (For Regulation Information Only)

Warren Calderone, (202) 245–0070 (Office of Prepaid Health Care Memoranda).

SUPPLEMENTARY INFORMATION: The Health Care Financing Administration (HCFA) is responsible for administering the Medicare program, a program which pays for health care and related services for 33 million Medicare beneficiaries. Administration of the program involves effective communications with regional offices, State governments, various providers of health care, fiscal intermediaries and carriers who process claims and pay bills, and others. To effectively communicate interpretations of the various statutes on which the program is based, we issue regulations under authority granted the Secretary under sections 1102 and 1871 and related provisions of the Social Security Act (the Act) and also issue various manuals, memoranda and statements necessary to administer the program efficiently.

Section 4035(c) of OBRA '87 added a new section 1871(c)(1) to the Act that requires that we publish in the **Federal**

Register no less frequently than every three months a list of of all Medicare manual instructions, interpretative rules, statements of policy, and guidelines of general applicability. This is the third listing of issuance. (See 53 FR 21730, June 9, 1988 and 53 FR 36891), September 22, 1988 for our listing of materials issued from December 22, 1987, the effective date of OBRA '87, through June 30, 1988). As in prior notices, although regulations published in accordance with section 1871(a) of the Act are not subject to the publication requirement of section 1871(c), for the sake of completeness of the listing of operational and policy statements we are including regulations (proposed and final) published.

This continuation notice lists the manual instructions, program memoranda, and regulations published during July, August, and September 1988. In this listing of recently published items, we do not specifically identify interpretative and substantive rules. All substantive rules are included in regulations.

A. How to Use the Listing

This notice is organized so that a reader may review the subjects of all additional manual issuances, memoranda, or regulations published during this timeframe to determine whether any are of particular interest. To minimize repetition, we expect it to be read in concert with previously published notices. Most notably, those unfamiliar with the description of our manuals may wish to review Table I of our first and second notices (53 FR 21731 and 21732, and 53 FR 36892), and those seeking information on the location of regional depository libraries may wish to review Table IV of our first notice (53 FR 21736 to 21737). We have divided this current listing into three tables.

Table I of this notice gives a brief description of an additional manual that HCFA publishes. Our manuals and memoranda are organized according to the user of the materials, e.g., Hospital Manual, Skilled Nursing Facility Manual, Intermediary Manual. The summaries in Table I allow the reader to determine whether routine issuances are of interest. As discussed below, it is possible for members of the public or organizations to subscribe to our manuals and routinely receive all issuances. Paragraph B of this Supplementary Information includes information necessary to enter a subscription.

Table II lists, for each of the appropriate manuals, a transmittal number unique to that instruction and a brief statement of its subject matter. The subject matter in a transmittal may consist of a single instruction or many. Often it is necessary to use information in a transmittal in conjunction with information currently in the manuals. This table also includes Program Memoranda and Office of Prepaid Health Care memoranda.

Table III lists all Medicare and Medicaid regulations and general notices published in the **Federal Register** during this period. For each item, we list the date published, the title of the regulation, and the Parts of the Code of Federal Regulations (CFR) which have changes.

B. How to Obtain Listed Material

- *Manuals*

An individual or organization interested in routinely receiving any manual and revisions to it may purchase a subscription to that manual. Those wishing to subscribe should contact either the Government Printing Office (GPO) or the National Technical Information Service (NTIS) at the following address: Superintendent of Documents, Government Printing Office, Washington, DC 20402. Telephone (202) 783–3238; National Technical Information Service, Department of Commerce, 5825 Port Royal Road, Springfield, VA 22161. Telephone (703) 487–4630.

In addition, individual manual transmittals listed in this notice can be purchased from NTIS. Interested parties should identify the transmittal(s) they want. GPO or NTIS will give complete details on how to obtain the publications they sell. Program memoranda are not available for sale. (See subsection C.)

- *Regulations and Notices*

Regulations and notices are published in the daily **Federal Register**. Interested individuals may purchase individual copies or may subscribe to the **Federal Register** by contacting the Government Printing Office at the following address: Superintendent of Documents, Government Printing Office, Washington, DC 20402, Telephone (202) 783–3238. When ordering individual copies, it is necessary to cite either the date of publications or the volume number and page number.

C. How to Review Listed Material

Individuals or organizations that do not wish to purchase subscriptions or individual transmittals or are interested in Program Memoranda may review identified items at a local Federal Depository Library (FDL). Under the Federal Depository Library Program, government publications are sent to approximately 1,400 designated libraries throughout the United States. Interested parties may examine the documents at any one of the Federal Depository Libraries. Some may have arrangements to transfer material to a local library not designated as an FDL. To locate the nearest FDL, individuals should contact any library.

In addition, individuals may contact regional depository libraries, which receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. Individuals may obtain information about the location of the closest regional depository library from any library.

Superintendent of Documents numbers for each HCFA publication are shown in Table II, along with the HCFA publication and transmittal numbers. To help FDL locate the instruction, use the Superintendent of Documents number, plus the HCFA transmittal number. For example, the Program Memorandum on CORF Documentation Requirements use the Superintendent of Documents number HE 22.8/6–5 and the HCFA transmittal number A–88–13.

D. General Information

It is possible that an interested party may have a specific information need and not be able to determine from the listed information whether the issuance or regulation would fulfill that need. We are providing information contact persons to answer general questions concerning these items. Individuals are expected to procure copies noted under section B or arrange to review them as noted in section C.

Questions concerning items in Tables I or II may be addresed to Allen Savadkin, Office of Issuances, Health Care Financing Administration, Room 688 East High Rise, 6325 Security Blvd., Baltimore, MD 21207; Telephone (301) 966–5265. Please do not use this contact to request copies of the listed items.

Questions concerning the regulations in Table III may be addressed to Matt Plonski, Regulations Staff, Health Care Financing Administration, Room 132 East High Rise, 6325 Security Blvd., Baltimore, MD 21207, Telephone (301) 966–4662.

Questions concerning the Office of Prepaid Health Care memoranda may be addressed to Warren Calderone, Policy Planning Liaison Staff, Office of Prepaid Health Care, 423–H Hubert H. Humphrey Building, 200 Independence

Avenue SW., Washington, DC 20210, Telephone (202) 245-0070.

Table I—Description of Manuals and Memoranda

An extensive descriptive listing of manuals and memoranda was previously published at 53 FR 21731 and supplemented at 53 FR 36892. A transmittal was issued during the July-September quarter for the following manual not previously described.

Carrier Quality Assurance Handbook—(HCFA-Pub. 25)

The Carrier Quality Assurance Handbook is designed for use by the Medicare carriers. It contains the processing and systems instructions which govern the evaluation of the quality of their Part B claims adjudication.

TABLE II.—MEDICARE MANUAL INSTRUCTIONS, JULY-SEPTEMBER 1988

Trans. No.	Manual/Subject/Publication Number
	Intermediary Manual, Part 1—Fiscal Administration (HCFA—Pub. 13-1)
117	o Schedule of Appeals. Schedule of Medicare Secondary Payer. Assessment of Documentation. Completing the Final Administrative Cost Proposal Use of Form HCFA-1523
	Intermediary Manual, Part 2—Audits, Reimbursement Program Administration (HCFA-Pub. 13-2) (Superintendent of Documents No. HE 22.8/6-2)
361	o Assessment of Benefit Savings Attributable to Intermediary Medical Review Actitivies.
362	o The Contractor Performance Evaluation Program—FY 88. Process Claims Functional Criterion. Auditing Functional Criterion. Medical Review Functional Criterion. Financial Management Functional Criterion. Beneficiary and Provider Services Functional Criterion. Reporting Functional Criterion. Reimbursement Functional Criterion. Management of Change Functional Criterion.
	Intermediary Manual, Part 3—Claims Process (HCFA-Pub. 13-3) (Superintendent of Documents No. HE 22.8/6)
1390	o Limitation on Payment for Services to Individuals Entitled to Benefits Solely on the Basis of End Stage Renal Disease Who Are Covered by Employer Group Health Plans.
1391	o Comprehensive Outpatient Rehabilitation Facilities (CORFs) Services. Medical Review of Comprehensive Outpatient Rehabilitation Facility Claims.
1392	o Hospital Providers of Extended Care Services.
1393	o Provision of Services.
1394	o Hospital Inpatient Bills.
1395	o Billing Procedures Where Services Are Reimbursable Under Automobile Medical or No-Fault Insurance, or Any Liability Insurance. Billing Procedures for Hospitals on Prospective Payment When Medicare is Secondary Payer.
1396	o Immunosuppressive Drugs Furnished to Transplant Patients.
1397	o Provider Electronic Billing File and Record Formats.
1398	o Medical Review of Part B, Intermediary Outpatient Physical Therpy Bills.
1399	o Claims Processing Timeliness.
1400	o Claims Processing Timeliness.
1401	o PRO Reporting on Medical Review. Edits for PRO Report on Medical Review. Disclosure to Peer Review Organizations.
1402	o Provider Specific Data Record Layout and Description. Intermediary Responsibilities. Provider Specific File.
1403	o Immunosuppressive Drugs Furnished to Transplant Patients. Postpayment Audit.
1404	o Preparing the Reconsideration Determination.
1405	o Explanation of Part B Trailer Codes. Time Limitation for Filing Provider Claims. Notifying Carriers. Completing Form HCFA-1533.
1406	o Claims Processing Timeliness. Home Health Denial, Limitation of Liability and Appeal Paragraphs.
IM-88-5	o Planning for Implementation of HCPCS for Hospital Outpatient Radiology Services.
IM-88-6	o New Part A Provisions Under Catastrophic Insurance.
IM-88-7	o Reuse of Bloodlines in ESRD Facilities.
IM-88-8	o Documenting Part A Reconsideration Requests. Documentation Sources. Development of Reconsiderations. Reopening and Revision of Determinations and Decisions on Claims. Budgetary Allocation and Workload Reporting.
	Intermediary Manual, Part 4—Audit Procedures (HCFA-Pub. 13-4) (Superintendent of Documents No. HE 22.8/6-4)
25	o Provider Reimbursement Profile
	Carriers Manual, Part 1—Fiscal Administration (HCFA-Pub. 14-1) (Superintendent of Documents No. HE 22.8/7-2)
111	o Appeals and Inquiries Data Schedule of Medicare Secondary Payer. Assessement of Development Completing the Final Administrative Cost Proposal Form HCFA-1524
	Carriers Manual, Part 2—Program Administration (HCFA-Pub. 14-2) (Superintendent of Documents No. HE 22.8/7-3)
106	o The Contractor Performance Evaluation Program—FY 88. Process Claims Functional Criterion. Financial Management Functional Criterion. Beneficiary and Provider Services Functional Criterion. Reporting Functional Criterion. Management of Change Functional Criterion.
	Carriers Manual, Part 3—Claims Process (HCFA-Pub. 14-3) (Superintendent of Documents No. HE 22.8/7)
1258	o Payment for Home Dialysis Supplies and Equipment. Notification of Beneficiaries Under Method II. Part B Sample Bill Summary Record.
1259	o Prohibition Against Billing For Unassigned Physician Services Which Are Determined To Be Not Reasonable and Necessary.
1260	o Limitation on Payment for Services to Individuals Entitled to Benefits Solely on the Basis of End Stage Renal Disease Who Are Covered by Employer Group Health Plans.
1261	o Disclosure of Program Materials.
1262	o Claims Where Beneficiary Has Elected Hospice Coverage.
1263	o Dentist. Dental Services. Dental Services and Exclusion. Change of Position Causes.
1264	o Claim Detail 1.
1265	o Disposition Codes, Disposition Code 40. Record Codes and Trailers.
1266	o Drugs and Biologicals. Monitoring Potential Violation of Laboratory Assignment.
1267	o Limitation of Liability. Limitation of Liability—Indemnification Procedures. Processing Initial Assigned Claims Under the Limitation of Liability Provision. Procedures for Applying the Limitation of Liability Provision. Determining Liability for Claims for Physicians and Supplier Services. Application of Deductible and Coinsurance to Limitation of Liability Determinations and Payment Records. Applicability of the Limitation of Liability Provision to Claims for Outpatient Physical Therapy Services Furnished by Clinics. Limitation of Liability Indemnification Procedures for Claims Filed Under Part B.
1268	o Transferring Requests for Medicare Payment.
1269	o PRO Review of Ambulatory Surgical Center Claims. Reports to PRO. Reports from PRO. Review. PRO/Carrier Data Exchange

Dated: December 6, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

[FR Doc. 88-28959 Filed 12-15-88; 8:45 am]

BILLING CODE 4120-01-M

Privacy Act of 1974; Computer Matching Program

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of a Matching Program—Federal Medicare Records (Medicare Physician Identification and Eligibility Records) and American Medical Association (AMA) Extract Data.

SUMMARY: We are issuing public notice of our intent to conduct matches of certain Federal Medicare records maintained by HCFA's carriers and physician Registry, and data maintained by the AMA.

A matching report is set forth below.

DATE: The proposed matches are scheduled to begin on January 1, 1989, and continue indefinitely.

DATES: The public should address comments to Richard A. DeMeo, HCFA Privacy Act Officer, Office of Budget and Administration, Room G-M-1, East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207. Comments will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Phillip Brown, Division of Operational Initiatives, Office of Program Administration, Room 367 Meadows East Building, 6325 Security Boulevard, Baltimore, Maryland 21207, telephone 301-966-7158.

SUPPLEMENTARY INFORMATION: Medicare carriers currently identify physicians using their own systems of assigned numbers. These individualized systems allow for identification numbers (IDNs) ranging from 4 to 16 alphabetic and/or numeric characters. Some carriers assign separate IDNs to the same physician providing medical services in more than one locality, office or practice and lack the capability to cross reference the IDNs and related physician data. Other carriers maintain a single IDN or cross referenced IDNs for each physician practicing within the carrier's geographic area of responsibility. Since physicians can furnish medical services in, as well as bill for these services from, several locations or States which are in different carrier jurisdictions, the independent carrier arrangements enable such physicians who have been found to be ineligible for Medicare payments in one area, location or State to receive inappropriate or illegal payment in one or more other areas, locations or States.

In order to rectify the problems inherent in these individualized identification systems, HCFA, under Congressional mandate (Section 9202 of the Consolidated Omnibus Reconciliation Act of 1985, Pub. L. 99-272), created a uniform record system under national IDNs or Unique Physician Identification Numbers (UPINs). This national system or Registry of Medicare Physician Identification and Eligibility Records (MPIERs) will enable HCFA to more readily identify all physicians deemed ineligible for Medicare payments and maintain more comprehensive data on physician credentials.

To help assure the uniqueness of the majority of the UPIN assignments, HCFA's Registry plans to match carrier data to selected data extracted from the well established American Medical

Association (AMA) master data base. The AMA Data Extract will confirm the identity and credentials of each physician with a doctor of medicine degree. The AMA will provide the AMA Data Extract to the Registry under a subcontracting arrangement. The Registry-AMA subcontracting agreement also calls for the AMA to screen doctor of medicine data that the Registry could not match against the AMA extract data, against its more complete Masterfile for a match. The arrangement will not only provide confidence in the uniqueness of the UPINs assigned to doctors of medicine, it will also save HCFA the time and expense of developing its own data collection network that would provide the same level of confidence. Once a unique identity is confirmed and a UPIN is assigned, HCFA will use the carrier data to establish and maintain the related MPIER.

Set forth below is the information required by paragraph 5.f(1) of the Revised Supplemental Guidance for Conducting Computerized Matching Programs issued by the Office of Management and Budget, 47 FR 21656 (May 19, 1982). A copy of this notice has been provided to the Chairman of the Committee on Government Operations of the House of Representatives, the Chairman of the Committee on Governmental Affairs of the Senate and the Administrator of the Office of Information and Regulatory Affairs in the Office of Management and Budget.

Dated: December 12, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

Report of Computer Matching Program—Medicare Carrier Physician Records/American Medical Association Record Extracts

a. *Authority:* Section 9202(g) of Pub. L. 99–272.

b. *Purpose and Description:* Section 9202(g) mandates that "The Secretary of Health and Human Services shall establish a system,* * *, which provides for a *unique identifier* for each physician who furnishes services for which payment may be made under title XVIII of the Social Security Act." (Emphasis added.) By definition, unique physician identification requires as much assurance as possible that each physician being identified is not assigned more than one identification indicator and, conversely, that each identification indicator is not assigned to more than one physician. The matching of any or all of the potential Medicare physicians (encompassing the seven medical professions referred to in section 1861(r) of title XVIII of the Act) against reputable, reliable, established records of related professional societies or associations would help assure *unique* Medicare identification.

With concerns for the unique qualities of a Medicare identifier in mind, the Health Care Financing Administration (HCFA) entered into discussions with the American Medical Association (AMA) for an agreement to allow HCFA's Registry to use selected data (i.e., an extract) from the AMA's data base of medical doctors or M.D.s (the largest professional group of the seven medical professions referred to under Section 1861(r)). The extract will be used as a matching screen for assigning a Medicare Unique Physician Identification Number (UPIN) to those M.D.s participating in the Medicare program (i.e., only a M.D. with unquestionable matching data will be assigned a UPIN). The AMA will also screen carrier data that HCFA could not match with the AMA extract against its more complete Master File as part of the agreement.

The matching and reconciliation of Medicare carrier and AMA extract data elements will be conducted under subcontract by the HCFA established Registry. The AMA Data Extract File, and the AMA screening of unmatched carrier records against its Master File is contracted for under a subcontracting arrangement between the AMA and the Registry. The AMA Data Extract File will not become a part of the Registry's master Medicare Physician Identification and Eligibility Record (MPIER). Conversely, the Registry's data will not become a part of the AMA Master File. The sole purpose of the extract data and screening of the Master File will be to verify individual M.D. identification prior to issuance of a UPIN and establishment an individual MPIER.

The Registry will match:

(1) Data obtained from Medicare carriers of each M.D. "* * * who furnishes services for which payment may be made under title XVIII * * *" that has not been assigned a UPIN ; and,

(2) Data of bonifide, licensed M.D.s obtained from the extract of the AMA's master records.

The AMA will provide assistance to the Registry by matching:

(1) Carrier M.D. data that could not be matched by the Registry against the AMA Extract Data, obtained from the Registry; and,

(2) Data of bonafide, licensed M.D.s obtained from the AMA's complete Master File against carrier M.D. data.

The Registry will seek further assistance from the carriers to clarify any seemingly discrepant information to ensure the identity of each specific M.D. before assigning a UPIN and establishing a MPIER from the carrier submitted data. The Registry will report its activities, administrative costs, UPINs assigned and MPIERs established to HCFA.

c. *Personal Records to be Matched:* The Registry will match information from the AMA Data Extract with physician identification data submitted by HCFA's carriers in order to establish the MPIERs and issue physician UPINs. The AMA will match information from its Master File with unmatched physician identification data submitted by HCFA's Registry. (System No. 09–70–0525, 53 FR 21920; June 10, 1988.)

d. *Period of the Match:* Initial enrollment matching is expected to start on or about January 1, 1989. The ongoing, update matching will continue as long as the Registry-AMA subcontracting arrangement remains in force.

e. *Safeguards:* The subcontracted AMA extract data will remain the property of the AMA and be maintained separate from all HCFA Registry files and records. Conversely, the HCFA Registry unmatched M.D. data submitted to the AMA under the subcontract will remain the property of HCFA and be maintained separate from all AMA files and records. All records used in this match will be maintained under strict security. Access to the AMA extract will be restricted to only those Registry and HCFA personnel associated with the matching program and access to the HCFA's Registry data will be restricted to only those AMA personnel associated with the matching program on a "need to know" basis. Access to the HCFA Registry computer files and any printed information is restricted to only those HCFA, carrier, OIG, Registry and AMA personnel associated with Medicare physician records. Registry records will be kept in limited access rooms or locked file cabinets under the control of the Registry. All computer tapes will be protected by the use of passwords to prohibit unauthorized access. All computer files will be safeguarded in accordance with the provisions of the DHHS ADP Systems Manual, Part 6, "ADP Systems Security." The terms of the Registry contract and its subcontract with the AMA will preclude the Registry or the AMA from using, disclosing, copying, or retaining records associated with the matching program for the Registry's or the AMA's own use. The

contract and subcontract also will require that Registry and AMA personnel involved in the matching program be made explicitly aware of the obligation under the Privacy Act, Federal guidelines for computer matching programs, and DHHS rules and special safeguards related to each match performed.

f. *Retention and Disposition of Records:* Records used in the match to establish MPIERs will be maintained by the Registry. AMA data or tapes which become outdated or otherwise not necessary for the matching operation will be returned to the AMA for disposition. Registry data or tapes which become outdated or otherwise not necessary for the AMA matching operation will be disposed by the Registry. MPIERs of deceased M.D.s will be retained for ten years from the date of death and then destroyed/erased. All other Registry records will be maintained indefinitely.

[FR Doc. 88-28946 Filed 12-15-88; 8:45 am]
BILLING CODE 4120-03-M

Privacy Act of 1974; System of Records

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of proposed new routine use for an existing system of records.

SUMMARY: The Health Care Financing Administration (HCFA) is proposing to revise the system notice for its Medicare Physician Identification and Eligibility System (MPIES), HHS/HCFA/BPO No. 09-70-0525, to add a new routine use.

EFFECTIVE DATE: The proposed new routine use shall take effect without further notice January 17, 1989, unless comments received on or before that date would warrant changes.

ADDRESS: Please address comments to Mr. Richard A. DeMeo, HCFA Privacy Act Officer, Office of Budget and Administration, Health Care Financing Administration, G-M-1 East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207. We will make comments received available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Phillip Brown, Division of Operational Initiatives, Office of Program Administration, Bureau of Program Operations, Health Care Financing Administration, Room 367 Meadows East Building, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone (301) 966-7158.

SUPPLEMENTARY INFORMATION: The notice for the Medicare Physician Identification and Eligibility System (MPIES), HHS/HCFA/BPO No. 09-70-0525, was most recently published at 53 FR 21920; June 10, 1988. The purpose of this system of records is to maintain unique identification of each physician requesting and/or receiving Medicare reimbursement. This system contains records of all physicians, as defined by section 1861(r) of Title XVIII of the Social Security Act, who request and/or receive Medicare reimbursement for their medical services. The records contain a unique physician identification number (UPIN) for each physician and information concerning a physician's date of birth, residence, medical education, and information on eligibility for Medicare reimbursement. The information contained in the records is obtained from data currently available in HCFA's carriers' systems. HCFA plans to establish a Registry to assign a UPIN to each physician who wishes to provide services under Medicare. The Registry will be responsible for maintaining physician data, as well as assigning the UPIN. To help ensure the identity of each physician with a medical doctor degree, HCFA's Registry will match carrier data to selected data extracted from the American Medical Association (AMA) Physician Masterfile. The AMA will provide the data to the Registry under a subcontracting arrangement.

We are proposing that the AMA be permitted, when requested by the Registry, to attempt to identify medical doctors by matching selected medical doctor information from the Registry's files against its more complete Physician Masterfile.

This attempted match would be necessary when the Registry's effort to identify a medical doctor, by matching carriers' physician records to extracted AMA data within the Registry, was unsuccessful. Data from these unmatched Registry MPIERS records would be communicated to the AMA. The AMA would conduct its matching operation against its Masterfile and, upon completion of its effort, return the MPIERS data to the Registry. The successful match of Registry data to the AMA Physician Masterfile would save HCFA time and money because it would eliminate the requirement of carriers to collect additional physician information for further matching attempts by the Registry. The agreement for a match of AMA Physician Masterfile data to data from the Registry was not consummated at the time the original system notice was published. However, HCFA has now published (see above) a notice of a matching program.

To comply with the technical requirements of the Privacy Act, we are proposing to establish the routine use below, adding to the current system notice.

(8) To the American Medical Association (AMA), for the purpose of attempting to identify medical doctors when the Registry is unable to establish identity after matching carrier-submitted data to the data extract provided by the AMA. The AMA would attempt to establish medical doctor identity by matching the Registry's MPIES data to data in the AMA Physician Masterfile.

The AMA agrees:

a. To use the Registry's MPIES data solely for an attempted match as described above;

b. To make no copies of the MPIES data it receives from the Registry, except for one back-up copy;

c. To return the MPIES data to the Registry upon completion of its matching operation, and erase back-up copies of the MPIES data;

d. To establish appropriate administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the records; and,

e. To sign a written statement attesting to its understanding of and willingness to abide by these provisions.

This new routine use is compatible with the purpose for which the information is collected. Addition of this new routine use can be accomplished with no reduction in physicians' privacy because HCFA will impose requirements on recipients who must agree in writing to protect the data from unauthorized access and form being disclosed in a form that permits identification of individuals.

This action does not require a report of altered system under 5 U.S.C. 552a(o). The complete system notice is printed below for the convenience of the reader.

Dated: December 12, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

09-70-0525

SYSTEM NAME:

Medicare Physician Identification and Eligibility System (MPIES) HHS/HCFA/BPO.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Care Financing Administration (HCFA) (Paper Media), 6325 Security Boulevard, Baltimore, Maryland 21207. (Contact system manager for location of

Magnetic Media computerized records.)
Medicare Carriers (See Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All physicians, as defined by section 1861(r) of Title XVIII of the Social Security Act who request and/or receive Medicare reimbursement for their medical services.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains a unique physician identification number (UPIN) for each physician and information concerning a physician's birth, residence, medical education, and eligibility information for Medicare reimbursement.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 9202(g) of Pub. L. 89–272; 1832(a)(2) (B)(i) and (F); 1833(a)(1) (C) and (G); 1842(a)(1), (b)(3)(B)(ii), (b)(3)(D), (b)(7)(C), (b)(7)(D), (h)(1), (h)(4), (h)(5), and (j); 1861 (q), (r), (s)(1) and (aa)(1)(A); and 1862 of Title XVIII of the Social Security Act.

PURPOSE OF THE SYSTEM:

To maintain unique identification of each physician requesting and/or receiving Medicare reimbursement

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USES AND PURPOSES OF SUCH USES:

Disclosures may be made to:

(1) A contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system or for developing, modifying and/or manipulating ADP software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for an ADP or telecommunications system containing or supporting records in the system.

(2) A congressional office from the record of an individual physician in response to an inquiry from the congressional office at the request of that individual physician.

(3) The Railroad Retirement Board for administering provisions of the Railroad Retirement and Social Security Acts relating to railroad employment.

(4) Professional Review Organizations in connection with their review of claims, or in connection with studies or other review activities, conducted pursuant to Part B of Title XI of the Social Security Act.

(5) To the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when

(a) The Department of Health and Human Services (HHS), or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her official capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components.

Is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

(6) The Department of Justice for investigation and prosecuting violations of the Social Security Act to which criminal penalities attach, or other criminal statutes as they pertain to the Social Security Act programs, for representing the Secretary, and for investigating issues of fraud by agency officers or employees, or violation of civil rights.

(7) State Licensing Boards for review of unethical practices or nonprofessional conduct.

(8) To the American Medical Association (AMA), for the purpose of attempting to identify medical doctors when the Registry is unable to establish identity after matching carrier-submitted data to the data extract provided by the AMA. The AMA would attempt to establish medical doctor identity by matching the Registry's MPIES data to data in the AMA Physician Masterfile.

The AMA agrees:

a. to use the Registry's MPIES data solely for an attempted match as described above;

b. to make no copies of the MPIES data it receives from the Registry, except for one back-up copy;

c. to return the MPIES data to the Registry upon completion of its matching operation, and erase back-up copies of the MPIES data;

d. to establish appropriate administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the records; and,

e. to sign a written statement attesting to its understanding of and willingness to abide by these provisions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and magnetic media.

RETRIEVABILITY:

Records are retrieved alphabetically by the physicians' name or by their UPIN.

SAFEGUARDS:

a. Authorized Users: Only agency employees and contractor personnel whose duties require the use of information in the system. In addition, such agency employees and contractor personnel are advised that the information is confidential and of criminal sanctions for unauthorized disclosure of information.

b. Physical Safeguards: Records are stored in locked files or secured areas. Computer terminals are in secured areas.

c. Procedural Safeguards: Employees who maintain records in the system are instructed to grant regular access only to authorized users. Data stored in computers are accessed through the use of passwords known only to authorized personnel.

Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act. Privacy Act language is included in contracts related to this system.

d. Implementation Guidelines: Safeguards implemented in accordance with all guidelines required by the Department of Health and Human Services. Safeguards for automated records have been established in accordance with HHS *ADP Systems Manual*, Part 6, "ADP Systems Security."

RETENTION AND DISPOSAL:

Records are retained indefinitely, except in the instance of a physician's death, in which case HCFA would retain such records for a 10 year period following the physician's death.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Bureau of Program Operations, Health Care Financing Administration, Room 300 Meadows East Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

NOTIFICATION PROCEDURES:

Inquiries and requests for system records should be addressed to the system manager at the address above. The requestor must specify the

physician's name, date of birth, and medical school.

RECORD ACCESS PROCEDURES:

Same as notification procedure. Requestors should also reasonably specify the record contents being sought. (These procedures are in accordance with Departmental Regulations (45 CFR 5b.5(a)(2).)

CONTESTING RECORD PROCEDURES:

Contact the system manager named above, and reasonably identify the record and specify the information to be contested. State the reason for contesting it; e.g., why it is inaccurate, irrelevant, incomplete or not current. (These procedures are in accordance with Departmental Regulations (45 CFR 5b.7).)

RECORDS SOURCE CATEGORIES:

HCFA obtains the identifying information in this system from carriers. Information in these records concerning physicians' eligibility for Medicare reimbursement is obtained either directly or through Medicare Regional Offices, contractors, and PROs; from the Department of Justice; State or local judicial systems; medical licensing and certification agencies or organizations; and medical societies and associations.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4120–03–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D–88–890; FR–2601]

Delegation of Authority; Associate General Counsel for Litigation

AGENCY: Office of the Secretary, HUD.

ACTION: Delegation of authority to approve production or disclosure of HUD materials or information in 25 CFR Part 15, Subparts H and I.

SUMMARY: This delegation of authority designates the Associate General Counsel for Litigation as an additional official who may exercise the Secretary's authority to approve disclosure of HUD materials in response to subpoenas and other demands under 24 CFR Part 15, Subparts H and I, which became effective on May 20, 1987, 52 FR 12159.

EFFECTIVE DATE: December 7, 1988.

FOR FURTHER INFORMATION CONTACT: Carolyn B. Lieberman, Deputy General Counsel (Operations), Room 10216, (202) 755–7250, Department of Housing and Urban Development, 451 7th Street, SW. Washington, DC 20410. (This is not a toll-free number.)

The Delegations of Authority published on July 24, 1987 at 52 FR 27859 and on October 30, 1987 at 52 FR 41782 are amended by replacing paragraph 1 with the following:

1. The Under Secretary, the General Counsel and the Associate General Counsel for Litigation each is authorized (a) to approve the production or disclosure of HUD materials or information by HUD employees in response to subpoenas or demands of courts or other authorities, pursuant to regulations of the Department set forth in 24 CFR Part 15, Subpart H, and (b) to waive any policy or procedure prescribed by the regulations of the Department set forth in 24 CFR Part 15, Subpart I, concerning testimony of HUD employees in legal proceedings.

Authority: Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Dated: December 7, 1988.

Samuel R. Pierce, Jr.,

Secretary.

BILLING CODE 4210-32-M

Office of Administration

[Docket No. N-88-1905]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management, and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: December 2, 1988.

John T. Murphy,

Director, Information Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Price level adjusted mortgage insurance demonstration.

Office: Policy development and research.

Description of the Need for the Information and Its Proposed Use: This information will be disclosed to homeowners who apply for and receive a HUD-insured price level adjusted mortgage. HUD is authorized to insure up to 10 percent of the FHA mortgage originations under this demonstration. In addition to the lender disclosure requirements the PLAM demonstration will utilize existing FHA forms for insurance application.

Form Number: None.

Respondents: Individuals or households.

Frequency of Submission: Monthly semi-annually, annually, and other.

Reporting Burden:

	Number of respondents	x	Frequency of response	x	Hours per response	=	Burden hours
Initial disclosure	13,333		1		1		13,333
Change in monthy payments	34,668		12, 2, or 1		25		8,667
Status of accounts	6,667		1		25		1,667

Total Estimated Burden Hours: 23,667.

Status: New.

Contact: David Crowe, HUD, (202) 755-5421, John Allison, OMB, (202) 395-6880.

Date: December 2, 1988.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for Permit

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT-702631

Applicant: Regional Director, U.S. Fish & Wildlife Service, Portland, Oregon

The applicant requests an amendment to his permit for take of endangered and threatened species to add the Stephens kangaroo rat, *Dipodomys stephensi*. Activities to be conducted include live trapping and release at the trap site, for purposes of delineating the currently occupied habitat of the species in Riverside County, California, as well as future recovery activities.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 a.m. to 4:15 p.m.) Room 403, 1375 K Street, NW., Washington, DC 20005, or by writing to the Director, U.S. Office of Management Authority , P.O. Box 27329, Washington, DC 20038-7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Date: December 12, 1988

1988
UMI

PRT–733476

Applicant: Natural Science Center of Greensboro, Greensboro, NC

The applicant requests a permit to purchase in interstate commerce one female captive born jaguar (*Panthera onca*) from Henry Doorly Zoo, Omaha, Nebraska, for the purpose of educational display.

PRT–733473

Applicant: San Francisco Zoological Gardens, San Francisco, CA

The applicant requests a permit to reexport one captive-born female lion-tailed macaque (*Macaca silenus*) to the City of Belfast Zoological Gardens, Belfast, Northern Ireland, for the purpose of enhancement of propagation. This female had been originally imported from the Assiniboine Park Zoo, Winnipeg, Canada in 1986.

PRT–733600

Applicant: N. and Linda Fontenot, Houston, TX

The applicant requests a permit to purchase one pair of captive-hatched golden conures (*Aratinga guarouba*) from Ms. Lucretia Kennedy, Hollywood, Florida, for captive breeding purposes.

PRT–733313

Applicant: Tarzan Zerbini International Circus, Webb City, MO

The applicant requests a permit to purchase in interstate commerce and then export and re-import two female Asian elephants (*Elephas maximus*) previously imported from the wild. These elephants are to be exported and re-imported for the purpose of conservation education. In the future, the applicant will export and re-import these animals for the same purpose.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 403, 1375 K Street NW., Washington, DC. 20005, or by writing to the Director, U.S. Office of Management Authority, P.O. Box 27329, Washington, DC 20038–7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Date: December 6, 1988.

[FES 8–55]

Availability of Final Legislative Environmental Impact Statement; National Wildlife Refuges, AK

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of a final legislative Environmental Impact Statement on the proposed acquisition of selected inholdings on National Wildlife Refuges in Alaska.

SUMMARY: The U.S. Fish and Wildlife Service (Service) has prepared a Final Legislative Environmental Impact Statement on the Proposed Acquisition of Selected Inholdings on National Wildlife Refuges in Alaska (Statement) pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. The draft document, which became available to the public on August 31, 1988, described five alternatives for acquiring refuge inholdings and the environmental consequences of implementing each alternative. The final Statement summarizes the draft Statement and includes only those changes necessary in the draft Statement, a discussion of major issues raised in public comments on the draft, and copies of all public comments received on the draft document. In this way, preparation of the final Statement differs from past procedures of reprinting revised versions of entire draft documents, but is in accordance with regulations for implementing the National Environmental Policy Act (40 Code of Federal Regulations 1502.19, 1503.4(c), and 1506.9).

Public hearings on the draft Statement were held in Washington, DC; Anchorage, Kodiak, Fairbanks, Bethel, Arctic Village, Kaktovik, and Galena, Alaska between September 20 and October 5, 1988. All oral testimony received at those hearings and written comments postmarked by October 24, 1988, were considered in preparing the final Statement.

The enclosed document, used with the draft Statement, constitutes the final environmental impact statement.

DATES: A Record of Decision will be issued no sooner than January 17, 1989.

FOR FURTHER INFORMATION CONTACT: William Knauer, Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; telephone (907) 786–3399.

SUPPLEMENTARY INFORMATION: Copies of the final Statement will be sent to all agencies, persons and organizations who commented on the draft Statement and to those Federal and State agencies, regional and village Native corporations, local governments, and other organizations and individuals who were on the original mailing list or later requested a copy of the draft Statement. A limited number of copies are available upon request from Mr. Knauer.

Copies of the final Statement are also available for public review at the office of the Regional Director, at the above address, and at the following locations:

U.S. Fish and Wildlife Service, Division of Refuge Management, U.S. Department of the Interior Building, Room 2343, 18th and C Streets NW., Washington, DC 20240

U.S. Fish and Wildlife Service, Refuges and Wildlife, 500 NE. Multnomah Street, Suite 1692, Portland, OR 97232

U.S. Fish and Wildlife Service, Refuges and Wildlife, 500 Gold Avenue SW., Room 1306, Albuquerque, NM 87103

U.S. Fish and Wildlife Service, Refuges and Wildlife, Federal Building, Fort Snelling, Twin Cities, MN 55111

U.S. Fish and Wildlife Service, Refuges and Wildlife, Richard B. Russell Federal Building, 75 Spring Street NW., Atlanta, GA 30303

U.S. Fish and Wildlife Service, Refuges and Wildlife, One Gateway Center, Suite 700, Newton Corner, MA 02158.

U.S. Fish and Wildlife Service, Refuges and Wildlife, 134 Union Blvd., P.O. Box 25486, Denver Federal Center, Denver, CO 80225.

Date: December 6, 1988.

Bruce Blanchard,

Director, Office of Environmental Project Review.

National Park Service

General Management Plan; Death Valley National Monument; Availability of Final Environmental Impact Statement

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91–190 as amended), the National Park Service, Department of the Interior, has prepared a final environmental impact statement (FEIS) assessing the potential impacts of the proposed General Management Plan for Death Valley National Monument, Inyo and San Bernardino Counties, California and Nye County, Nevada.

The proposed Plan recommends the expansion of visitor opportunities to explore and understand the diverse features of the monument along with the provision of some additional facilities. Major emphasis is placed on improved information/orientation/interpretation services and improved reliability of roads to the monument's diverse natural and cultural features.

DATES: The 30-day no action period following the Environmental Protection Agency's notice of a availability of the final EIS will end on January 23, 1989.

ADDRESSES: Inquiries on the FEIS should be directed to: Superintendent, Death Valley National Monument, Death Valley, California 93328, telephone number (619) 786–2331.

Copies of the Plan and FEIS are available for inspection at the monument headquarters in Death Valley and in libraries located in the monument vicinity. Copies are also available at the following address: Western Regional Office, National Park Service, Attn: Division of Planning, Grants and Environmental Quality, P.O. Box 36063 Golden Gate Avenue, Room 14033, San Francisco, California 94102.

Date: December 2, 1988.

Lewis Albert,

Acting Regional Director, Western Region.

West Point-Pepperell, Inc. and J. P. Stevens and Company, Inc., Control Exemption for Stevens Freight Service, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Interstate Commerce Commission exempts West Point-Pepperell, Inc. (West Point) and J. P. Stevens and Co.,

Inc. (J. P. Stevens) from the requirements of 49 U.S.C. 11343 to acquire control of Stevens Freight Service, Inc. (Stevens Freight), which holds motor contract carrier authority. West Point currently controls the Chattahoochee Valley Railway Company and another motor carrier, West Point-Pepperell Transportation Company. The exemption is subject to employee protective conditions for the benefit of affected railroad employees.

DATE: This exemption is effective on December 23, 1988.

ADDRESSES: Send pleadings referring to Docket No. 31310 to: (1) Office of the Secretary, Case Control Branch Interstate Commerce Commission Washington, DC 20423.

(2) Petitioners' representative: Michael F. Morrone, Keller and Heckman 1150 17th Street, NW, Suite 1000 Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245, [TDD service for the hearing impaired (202) 275–1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 275–1721.]

Decided: December 7, 1988

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

[Ex Parte No. 478]

Railroad Cost of Capital of 1988

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision instituting a proceeding to determine the railroads' 1988 cost of capital.

SUMMARY: The Commission is instituting a proceeding to determine the railroad industry's cost of capital rate for 1988. The decision solicits comments on: (1) The railroads' 1988 (i.e., current) cost of debt capital; (2) the railroads' 1988 (i.e., current) cost of preferred stock equity capital; (3) the railroads' 1988 cost of common stock equity capital; (4) the 1988 capital structure mix of the railroad industry on a market value basis. With respect to the cost of common equity capital, the decision seeks the use of Institutional Brokers Estimate System (IBES) data to estimate the growth rate component of the discounted cash flow methodology.

DATES: Notices of intent to participate are due December 27, 1988. Statements of railroads due February 10, 1989. Statements of other interested parties due March 10, 1989. Rebuttal statements by railroads due March 24, 1989.

ADDRESS: Send an original and 15 copies of statements and an original and 1 copy of the notice of intent to participate to Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275–7489, (TDD for hearing impaired: (202) 275–1721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to the Office of the Secretary, Room 2215, Interstate Commerce Commission Building, Washington, DC 20423; or call (202) 275–7428. (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

This action will not significantly affect either the quality of the human environment or energy conservation. Nor will it have a significant economic impact on a substantial number of small entities.

Authority: 49 U.S.C. 10704(a).

Decided: December 2, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

DEPARTMENT OF JUSTICE

Antitrust Division

Pursuant to the National Cooperative Research Act of 1984; Cable Television Laboratories, Inc.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Cable Television Laboratories, Inc. ("CableLabs") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on November 7, 1988, disclosing changes in its membership within 90 days preceding that date. The additional notification was filed for the purpose of extending the protections of section 4 of the Act, which limit the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On August 8, 1988, CableLabs filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 7, 1988 (53 FR 34593).

The identities of the new members of CableLabs are set forth below:

American Television & Communication Corporation, 300 First Stamford Place, Stamford, CT 06902–6732
Avenue TV Cable Service, Inc., One Armstrong Place, Butler, PA 16001
Bismarck-Mandan Cable TV, 2164 Wisconsin Ave., NW., Washington, DC 20007

BILLING CODE 4410–01–M

Drug Enforcement Administration

[Docket No. 86–52]

Ciba-Geigy Corp. and MD Pharmaceutical, Inc.; 1986 Aggregate Production Quota, 1986 Individual Manufacturing Quotas, and 1986 Disposal Allocations for Methylphenidate

On October 1, 1985, the Drug Enforcement Administration (DEA) published a notice in the **Federal Register** (50 FR 40070 (1985)) proposing 1986 aggregate production quotas to be established by DEA under the Controlled Substances Act (CSA), 21 U.S.C. 801 *et seq.* for Schedule I and Schedule II controlled substances, including methylphenidate. The proposed aggregate figure for methylphenidate was 1,295 kilograms (kg). Opportunity was provided to submit comments or objections.

In a letter dated October 29, 1985, MD Pharmaceutical, Inc. (MD) submitted comments and objections and requested a hearing in the matter of the proposed 1986 aggregate production quota for methylphenidate. In a letter dated October 30, 1985, Ciba-Geigy Corporation (Ciba-Geigy) did the same.

On December 19, 1985, DEA issued a letter to Ciba-Geigy establishing Ciba-Geigy's 1986 individual manufacturing quota at 609 kg and a disposal quota at 566 kg. On this same date, MD's individual manufacturing quota was established at 200 kg and its disposal quota at 133 kg.

In a notice published in the **Federal Register** on December 27, 1985 (50 FR 53025 (1985)), "the final initial" 1986 aggregate production quotas for all Schedule I and Schedule II substances, except for methylphenidate, were established. The **Federal Register** notice acknowledged that MD and Ciba-Geigy had filed comments and requests for a hearing on the 1986 aggregate production quota for methylphenidate. It stated that "* * * during the pendency of the consideration of the matter for hearing, a final initial aggregate production quota will be established for this interim period. This quota will be the amount which was initially proposed, and will be subject to revision upon further consideration and possible hearing." On January 27, 1986, Ciba-Geigy requested a hearing with respect to its individual manufacturing and disposal quotas.

By letter dated March 4, 1986, DEA increased Ciba-Geigy's 1986 individual manufacturing quota from 609 kg to 909 kg and by letter dated May 5, 19 86, Ciba-Geigy's individual manufacturing quota was revised from 909 kg to 1,468 kg and its disposal quota was increased from 566 kg to 1,192 kg. Neither letter referred to Ciba-Geigy's pending request for a hearing on its individual manufacturing and disposal quotas. The May 5 letter to Ciba-Geigy stated that the "increased amounts should not be produced until the revised 1986 aggregate production quota for methylphenidate is finalized." It further noted that "[t]here are no further plans for administrative review of this matter this year in the absence of a demonstrated medical emergency." In another letter dated May 5, 1986, to MD, DEA informed that company that its 1986 methylphenidate manufacturing quota had been revised to 522 kg and that its disposal quota, the amount that MD might actually distribute for the year, was now limited to 374 kg. This letter, like the letter to Ciba-Geigy, also stated that no further revision of 1986 methylphenidate quotas was planned in the absence of a demonstrated medical emergency.

On June 4, 1986, Ciba-Geigy submitted a renewed request for a hearing regarding its 1986 individual manufacturing and disposal quotas for methylphenidate as adjusted by DEA on May 5, 1986. (On June 4, 1986, Ciba-Geigy also filed in the U.S. Court of Appeals for the District of Columbia Circuit a petition for review of the May 5, 1986, decision of the Drug Enforcement Administration setting Ciba-Geigy's 1986 manufacturing quota and disposal quota for methylphenidate).

On July 7, 1986, a notice was published in the **Federal Register** (51 FR 24590 (1986)) setting forth the "proposed revised" 1986 aggregate production quotas for Schedule II substances including methylphenidate. The "proposed revised" figure for methylphenidate was 2,043 kg.

In a July 8, 1986, letter the Acting Deputy Administrator of the Drug Enforcement Administration requested the Administrative Law Judge to commence administrative proceedings on three issues:

(1) the adequacy of the 1986 methylphenidate manufacturing quota; (2) the amount of the quota to be allocated to each manufacturer of methylphenidate; and (3) the propriety of the disposal allocation

On July 28, 1986, MD Pharmaceutical requested a hearing on its 1986 individual manufacturing and disposal quotas for methylphenidate as established by DEA on May 5, 1986.

On August 4, 1986, in order to "ensure that all procedural requirements have been complied with," Ciba-Geigy filed a request for a hearing on the 1986 methylphenidate "proposed revised" aggregate production quota of 2,043 kg published in the **Federal Register** on July 8, 1986. In an August 8, 1986, letter to the judge, Agency counsel acknowledged that the requested hearing related to the adequacy of the 2,043 kg aggregate production quota published in the **Federal Register** on July 8, 1986, and not some earlier quota.

Formal notice of this proceeding was published in the **Federal Register** on August 22, 1986, at 51 FR 30163 (1986). A preliminary hearing session was held on October 1, 1986. The judge directed that the rulemaking, concerned with the

aggregate production quota, and the adjudication, concerned with the individual manufacturing and disposal quotas, would be conducted together. Direct examination testimony of all witnesses was prepared in written, narrative form, under oath, and copies were exchanged among counsel. Hearing sessions were scheduled for the cross-examination of those witnesses whom counsel desired to cross-examine. These sessions were held in Washington, DC, on December 10, 15–19, 22 and 23, 1986. Thereafter the parties submitted proposed findings and conclusions and briefs to the Administrative Law Judge. The last of these post-hearing submissions was filed on April 21, 1987.

In addition to the evidence formally presented by the parties, a number of comments were received from individuals and organizations. They were patients, legitimate users of methylphenidate, or the parents of patients, or organizations of such persons. Generally they all wrote to affirm the legitimate need for methylphenidate and/or to urge DEA to refrain from taking control actions which would hinder the ability of patients to obtain methylphenidate when and as needed for legitimate medical purposes. Some stated they had had problems obtaining methylphenidate in the past. All of these comments were considered both by the Administrative Law Judge and by the Administrator in reaching this decision. They have been made a part of the record in this case.

On December 3 and December 9, 1986, after the parties' final submission of written testimony and documentary evidence had been exchanged and just prior to commencement of the oral cross-examination hearing sessions, DEA increased Ciba-Geigy's and MD's disposal quotas. At the request of the judge, DEA prepared and submitted an exhibit which set forth the various quota allocations for methylphenidate as of December 10, 1986, as well as copies of relevant correspondence leading to these increases.

During the oral hearing sessions Agency counsel elicited from DEA witnesses additional direct examination testimony regarding the December 1986 disposal quota increases, and cross-examination was conducted concerning this additional testimony.

Neither the aggregate nor any individual manufacturing quota was revised in December. As of December 10, 1986, the aggregate production quota for methylphenidate was still 2,043 kg (as it had been since July 1986), and the individual manufacturing quotas for Ciba-Geigy and MD respectively were still 1,468 kg and 522 kg (as set in May). However, Ciba-Geigy's disposal quota was increased by 58 kg on December 3 and by an additional 162 kg on December 9 (to total 1,412 kg). MD's disposal quota was increased by 17 kg on December 3 and by an additional 37.3 kg on December 9 (to total 428.3 kg).

The parties and the Administrative Law Judge agreed that the issues to be decided in this proceeding were to be as follows:

1. Is the quantity 2,043 kg of anhydrous base of methylphenidate sufficient to provide in 1986 for the estimated medical, scientific, research, and industrial needs of the United States, for lawful export requirements and for the establishment and maintenance of reserve stocks?

2. Have appropriate amounts been allocated by DEA to each of the two manufacturers?

3. Is it lawful for DEA to set "disposal" quotas?

4. If lawful, are the disposal quotas set by DEA for each of the two manufacturers of methylphenidate for 1986 appropriate?

On October 28, 1987, the judge issued his opinion and recommendations regarding the 1986 quotas for methylphenidate. The judge recommended that 1986 aggregate production and individual manufacturing quotas for methylphenidate be recalculated so as to arrive at figures which would demonstrably have provided for the 1986 methylphenidate needs specified in 21 U.S.C. 826. The judge also found that the procedures used by DEA for setting quotas were inappropriate and insufficient and that the DEA staff should develop and use new procedures in performing the recalculations called for in his first ruling. In addition, the judge recommended that the DEA staff be ordered to make such adjustments in the presently applicable 1987 quotas for methylphenidate as may be required to bring the stocks of that substance to the levels at which they would have been had the 1986 quotas been computed in accordance with law. Finally the judge recommended that the Administrator rule that the setting of disposal quotas for methylphenidate for 1986 was unlawful and that any presently effective disposal quotas should be vacated. The basis for this recommendation was the judge's holding that the setting of such disposal quotas required a rulemaking proceeding pursuant to the Admninistrative Procedures Act, 5 U.S.C. *et seq.* On January 19 and January 20, 1988, respectively, counsel for DEA and counsel for MD Pharmaceutical, Inc. filed exceptions to the opinion and recommendations of the Administrative Law Judge.

On February 12, 1988, counsel for Ciba-Geigy Corp. filed a response to the exceptions of the DEA staff and MD Pharmaceutical. On April 29, 1988, the Administrative Law Judge certified and transmitted the record to the Administrator of DEA. The record included the opinion and recommendations of the Administrative Law Judge, the findings of fact and conclusions of law proposed by all parties, the exceptions filed by the parties, the response to those exceptions and motions filed by all counsel, all the exhibits and affidavits, and all of the transcripts of the hearing sessions.

The Administrator has carefully reviewed the entire record in this matter and hereby issues this final rule as prescribed by 21 CFR 1316.67, based upon the following findings and conclusions.

1. In 1955 the Food and Drug Administration approved Ciba-Geigy's new drug application (NDA) for Ritalin, Ciba-Geigy's brand name for methylphenidate. Ciba-Geigy has manufactured the produce under that name since that time. In 1982 FDA approved Ciba-Geigy's NDA for production of Ritalin S–R®, a sustained-release form of the drug. MD Pharmaceutical also manufactures methylphenidate, which it markets under the generic name, i.e., "methylphenidate." MD Pharmaceutical did not, at the time of the hearings in this proceeding, manufacture a sustained-release dosage form.

2. Retalin and generic methylphenidate are currently available in 5, 10, and 20 mg tablets. Ritalin S–R is available in 20 mg sustained-release tablets.

3. Methylphenidate is a central nervous system stimulant that is approved by FDA for the treatment of attention deficit disorder (ADD) and narcolepsy. FDA does not, however, "regulate the practice of medicine." Physicians can and do legally and appropriately prescribe a drug for conditions other than those for which it is approved by FDA.

4. Methylphenidate is a Schedule II controlled substance subject to the quota provisions of 21 U.S.C. 826.

5. ADD (officially named attention deficit disorder with hyperactivity (ADD/H) and sometimes simply called "hyperactivity") is a developmental disorder in which children find it difficult to sit still and pursue attentional tasks for many length of

time. ADD, which affects boys more than girls, is characterized in schools by frequent out-of-the-seat behavior in the classroom which is obviously disruptive for the other students. ADD children commonly are unable to complete academic assignments, have attention problems in the classroom, and often are unable to write legibly. Many such children physicially provoke others nearby and most lack appropriate social skills. ADD children are also frequently unmanageable at home, which can easily aggravate or create a variety of domestic problems.

6. ADD in children, while not necessarily a life-threatening disorder, is a very disturbing handicap which, if untreated, will affect the child for his entire live.

7. There are currently a number of major treatment methods for childhood ADD, of which methylphenidate medication has become the overwhelmingly most utilized approach. The others include the Feingold dietary treatment, Cylert® (pemoline) medication, Dexedrine® (dextroamphetamine) medication, and behavior modification/ cognitive therapy. None of these other treatment methods is as widely accepted as methylphenidate.

8. The use of methylphenidate in treating ADD in children usually brings about a rapid diminution of the child's difficulties. The children who derive benefit from methylphenidate have improved ability to sit and pay attention in class, they complete work, their grades go up, handwriting improves, visual motor coordination is better, and short-term memory is increased. In addition, the teacher-student relationship improves as does the relationship between parent and child.

9. While the prevalence of ADD has been fairly constant, the frequency of diagnosis and the use of medication to treat the disorder have increased dramatically as physicians, school nurses, and teachers have become increasingly sensitized to it. The percentage of children and adolescents diagnosed as suffering from ADD is approximately 5 to 6%, and the percentage of children in the United States receiving medication for hyperactivity has risen to approximately 2 to 4%. The most reliable estimates indicate that approximately 600,000 children and adolescents nationwide are currently being treated with methylphenidate for ADD.

10. Narcolepsy is an incapacitating, life-long sleep disorder which typically appears between the ages of 14 and 25, although onset may occur in children less than 10 years old. Narcolepsy virtually always appears before the age of 40. The symptoms of narcolepsy worsen over time. There are at least 250,000 Americans who have narcolepsy at the present time, according to the most reliable estimates.

11. Methylphenidate is approved by FDA as effective in the treatment of narcolepsy. Methylphenidate is more effective than either pemoline or dextroamphetamine for treating the sleepiness associated with narcolepsy. Methylphenidate improves alertness in virtually 100 percent of the cases.

12. Under the Controlled Substances Act and the regulations promulgated thereunder, DEA (under authority delegated to it by the Attorney General, 28 CFR 0.100) is required annually to establish an aggregate production quota for each basic class of controlled substance in Schedules I and II. These quotas limit the amount of the basic class of each substance in these schedules which may lawfully be produced in the Untied States during the year. These aggregate production quotas are required by law to be sufficient to provide for the estimated medical, scientific, research, and industrial needs of the United States. They must also provide for lawful export requirements, if any, and for the establishment and maintenance of reserve stocks. (21 U.S.C. 826(a); 21 CFR 1303.11).

13. An aggregate production quota has been set for methylphenidate since it was placed in Schedule II in 1971.

14. DEA is also required to establish individual manufacturing quotas for each manufacturer of a Schedule I or II controlled substance. The individual manufacturing quota authorizes a particular individual, usually a pharmaceutical company, to manufacture a particular quantity of the drug during the next calendar year. These individual manufacturing quotas are subject to essentially the same considerations as those established by the CSA for determining aggregate quotas. (21 U.S.C. 826(c)). The total of the individual manufacturing quotas for any one basic class or substance cannot exceed the aggregate production quota set for that substance for the year in question.

15. In recent years, DEA has imposed additional restrictions on selected Schedule II drugs whereby a manufacturer of such a drug is allowed to sell or distribute only a specified portion of his individual manufacturing quota during the calendar year. These restrictions, called disposal quotas or disposal allocations, are not mentioned in the CSA or the regulations promulgated thereunder.

16. DEA does not have any written rationale explaining the need for disposal quotas. It has no written instructions or policy specifying the circumstances udner which a controlled substance will be subjected to disposal quotas or as to how disposal quotas are to be calculated.

17. There has never been a rulemaking proceeding conducted in order to provide for the establishment of disposal quotas or the manner in which they would be calculated.

18. The CSA and the regulations enacted thereunder require DEA to consider, when determining aggregate and individual manufacturing quotas for a drug, the estimated medical need for the drug in the United States during the year in question. (21 U.S.C. 826(a), (c); 21 CFR 1303.11(a), (b)). The statute also requires that the aggregate production quota and the individual manufacturing quotas provide for the establishment and maintenance of reserve stocks. The purpose of these requirements is to assure that sufficient quantities of the drug will be available for patients having a legitimate need for it.

19. The CSA requirement for a determination of legitimate medical need is based on the undisputed proposition that patients and pharmacies should be able to obtain sufficient quantities of methylphenidate, or of any Schedule II drug, to fill prescriptions. A therapeutic drug should be available to patients when they need it. To accomplish this a smooth flow of distribution is required.

20. If there were periods during the year where there were shortages and patients were not able, because of the quotas, to obtain sufficient methylphenidate to fill their prescriptions, then the quotas would not be providing for the legitimate medical need in the United States.

21. Reserve stocks at all levels of distribution are essential to ensure that adequate supplies will be continuously available. This is especially true given the multiple dosage forms in which methylphenidate is supplied. It is understandably difficult for manufacturers to predict with 100 percent accuracy exactly how much of each dosage form (5 mg, 10 mg, 20 mg, and 20 mg S–R tablets) will be prescribed by physicians throughout the nation in any given month or year.

22. Each year the FDA prepares an estimate of the following year's legitimate medical need in the Country for methylphenidate and all other Schedule II substances. These estimates are transmitted in a formal letter from the Commissioner of Food and Drugs to

the Administrator of DEA for use in setting quotas for the following year. These projections are required by the provisions of 42 U.S.C. 242(a).

To prepare these estimates FDA obtains data on past legitimate medical use of each of these substances from the National Prescription Audit (NPS), a pharmaceutical marketing research data base purchased by FDA from IMS America, Ltd. (IMS).

23. The IMS data capture only about 80 % of the total legitimate use of Schedule II drugs. This is because the National Prescription Audit does not include drugs sold to the military, used in hospitals, health maintenance organizations that do not contract out their prescription services, clinics affiliated with medical practices, sales by mail, and discount stores and supermarkets that sell prescription drugs. It would not include sales to Sleep Disorder Centers if those centers do not contract out their prescriptions. It also does not include drugs sold directly to local, state, or Federal governments, or drugs sold directly to doctors.

24. IMS data do not reflect the scientific needs for methylphenidate, such as the needs of an organization like the Midwest Research Institute which in the past has ordered sizeable amounts of methylphenidate from Ciba-Geigy for research. Because of these omissions, the NPA data can fairly be characterized as providing a relatively conservative picture of legitimate demand for methylphenidate in the Country.

25. DEA received FDA's estimates of 1986 legitimate medical needs for Schedule II drugs in May 1985. FDA's projection at that time of the legitimate medical need for methylphenidate in 1986 was 2,033 kg, a 17 % increase over its projection for 1985.

26. DEA accepted FDA's projection of a 17 % increase in legitimate medical need for 1986. DEA declined, however, to accept the baseline figure of 2,033 kg, utilized by FDA in arriving at the percentage figure of 17 % as being the total quantity needed.

27. The Drug Control Section in the Office of Diversion Control is responsible for the collection of data necessary for drug control, collection of data to satisfy United States treaty obligations, and the annual initial formulation and administration of quotas for Schedule I and II controlled substances.

28. Ciba-Geigy requested an individual methylphenidate manufacturing quota for 1986 of 1,859 kg. MD requested 600 kg. The 1986 aggregate quota figure for methylphenidate (proposed by DEA on October 1, 1985) was only 1,295 kg. This was approximately half of the manufacturers' combined request of 2,459 kg. It was lower even than the 1985 "established revised" aggregate quota of 1,361 kg, which was published that same day.

29. The "initial" 1986 individual manufacturing and disposal quotas granted Ciba-Geigy were low in comparison to its 1985 quotas. Its "initial" individual manufacturing and disposal quotas for 1986 (established December 19, 1985) were 609 kg and 566 kg respectively. By contrast, Ciba-Geigy's final individual maunfacturing and dispoal quotas for 1985 (established November 26, 1985) were 1,124 kg and 1,132 kg respectively.

30. MD's 1986 "initial" individual manufacturing and disposal quotas (200 kg and 133 kg respectively) also were significantly below both its requested manufacturing quota for that year of 600 kg, and its 1985 final quotas (251 kg manufacturing and 253 kg disposal).

31. Thereafter, Ciba-Geigy's and MD's quotas were increased—often by sizeable amounts—during the year. Ciba-Geigy's 1986 individual manufacturing quota of 609 kg (established December 19, 1985) was increased on March 4, 1986, to 909 kg (an increase of 50 %) and on May 5, 1986, to 1,468 kg (an increase of 141 % over the initial amount). Similarly, Ciba-Geigy's disposal quota, initially set at 566 kg on December 19, 1985, was increased to 1,192 kg on May 5, 1986. In December 1986 it was increased two more times: By 58 kg on December 3 and by 162 kg on December 9 for a total of 1,412 kg (an increase of 149 % over the initial amount). DEA also sharply increased the aggregate production quota in mid-year from its initial level of 1,295 kg (established on October 1, 1985) to 2,043 kg as of July 7, 1986 (a 58 % increase). This July increase was made more than a year after DEA received FDA's projection for 1986, and only a day before Ciba-Geigy's request for a hearing was granted.

32. MD's 200 kg individual manufacturing quota for 1986, set December 19, 1985, had been adjusted to 522 kg by December 9, 1986. Its disposal quota, also set on December 19, 1985, was revised five times; from 133 kg to 138 kg, then to 150 kg, and again to 374 kg. On December 3, 1986, it was increased to 391 kg and finally on December 9, 1986, to 428.3 kg.

33. It is vital for ADD patients and narcoleptics to have a continuous supply of methylphenidate, and not have periods of total unavailability during the year. The "piecemeal" nature of DEA's quota allocations, however, helped to create methylphenidate shortages during 1986, thus preventing a continuous supply of the drug.

34. The harshest impact of actual and threatened shortages falls on the patients who must take methylphenidate, not on the manufacturers to whom the quotas directly apply. Actual drug shortages, or even threatened ones, can seriously interfere with patients' lives and those of their families. Potential shortages encourage stockpiling by patients and their families as well as by wholesalers and retailers.

35. DEA's practice of giving small initial manufacturing quota allocations and then increasing these amounts throughout the year in small increments also contributed to manufacturing inefficiencies.

36. The baseline figures used in calculating the 1986 aggregate production, individual manufacturing, and disposal quotas for methylphenidate were the DEA-established 1985 disposal quota amounts. The first step in calculating the initial aggregate figure for 1986 was to add the two companies' 1985 disposal amounts together and the second step was to multiply this sum by 1.5 to provide for an inventory allowance

37. Disposal quotas are not an accurate measure of the legitimated need for methylphenidate.

38. FDA's projection of medical need for methylphenidate in 1985 was 1,731 kg. For 1986, FDA predicted legitimate medical need of 2,033 kg, an increase of 17% over FDA's 1985 projection. The calculations used by DEA to determine the final 1986 aggregate individual manufacturing and disposal quotas for methylphenidate utilized FDA's projection of a 17% increase in the legitimate medical need for methylphenidate over 1985, but did not use FDA's 1985 baseline projection of medical need of 1,731 kg. Instead of using FDA's projections of medical need as its baseline, DEA used the prior year's disposal quota figures as the baseline.

39. If the rate of increase projected by FDA is going to be used, it is appropriate to apply that rate of increase only to FDA's projection, which is the figure FDA uses in arriving at the rate of increase. Unless the correct base is used, there is no reasonable assurance that the change in the absolute amount has been made correctly.

40. In setting quotas, not only actual sales but also backorders must be taken into account if legitimate medical need is to be ascertained.

41. There were several separate instances of shortages of Ritalin/Ritalin S–R at Ciba-Geigy between 1984 and 1986. These shortages were due to three factors that singly, or in combination, have led to periods in which Ciba-Geigy was unable to fill orders for Ritalin. These factors are: (1) Inadequate, fluctuating individual manufacturing quotas; (2) low year-end reserves resulting from inadequate individual manufacturing quotas; and (3) overly restrictive disposal quotas. These factors have combined to create a cyclical effect; that is, a pattern of periods of adequate supplies followed abruptly by periods of short supply precipitated either by physical shortages due to inadequate manufacturing quotas or artificial shortages created by an inability to ship available supplies due to disposal quotas. The last of these recurrent shortages, which occurred in November–December 1986, resulted in DEA's increasing 1986 disposal quotas for methylphenidate on the eve of the cross-examination hearings in this case.

42. In late 1985, a 13 kg (anhydrous base) order for Ritalin active ingredient from Midwest Research Institute (MRI) was backordered by Ciba-Geigy. This legitimate request for methylphenidate to conduct toxicology tests for the U.S. Department of Health and Human Services had to be refused because Ciba-Geigy had no Ritalin active ingredient available to meet MRI's order. Even after DEA increased the amount of Ciba-Geigy's individual manufacturing quota by 64 kg on November 26, 1985, Ciba-Geigy could not fill this order because it had no active ingredient left and Ciba-Geigy could not manufacture a non-standard batch size of such a small amount.

43. In late 1985 Ciba-Geigy also was unable to fill orders from the Defense Logistics Agency, a division of the Department of Defense. The Defense Logistics Agency had an annual requirements contract with Ciba-Geigy for 1985. Ciba-Geigy could not completely fill the orders of the Agency, however, and the backordered goods were not shipped until 1986.

44. In addition to Ciba-Geigy's record of shortages at the manufacturing level, wholesalers, pharmacies, and patients and their families experiences severe problems. One of Ciba-Geigy's distribution centers kept a log of telephone inquiries about Ritalin shortages received from February 10, 1986, to May 30, 1986. A separate record of telephone calls received by Ciba-Geigy during March 1986 relating solely to Ritalin S-R inquiries by pharmacies was also kept. Ciba-Geigy also recieved numerous letters from individual parents, pharmacists, and doctors concerning the difficulty of obtaining Ritalin. DEA itself received numerous letters of this type. Most of these were written in May and April 1986.

45. There are a number of different dosage forms of methylphenidate, both as Ritalin and in its generic formulations. But not all dosage forms are equally efficacious for all patients. Doctors prescribe different forumations for different patients. So the fact that one or more formulations may have been available, while others were not, does not negate the reality of the problem for ultimate consumers.

46. In a study conducted for Ciba-Geigy by Market Measures, Inc. and reported in March 1986, out of a sample of 400 drug stores that carried either brand name or generic methylphenidate only 103 or 26% stocked generic methylphenidate. Even though only one quarter of the sampled stores stocked generic methylphenidate, they were found to be far more frequently out-of-stock than stores stocking the brand name (Ritalin). Of the stores that normally stocked Ritalin, 12.3% were out-of-stock of at least one strength on the date of the survey (February 27–28, 1986). Of the stores that normally stocked generic methylphenidate, 35.9% were out-of-stock of at least one strength, almost 3 times as many. In the case of Ritalin, the out-of-stock situation was constant among the various strengths: 11.6% in the 5 mg, 11.7% for the 10 mg, 11.4% for the 20 mg, and 13.5% for the "SR" (sustained release). In terms of out-of-stock situations from December 1, 1985, to the date of the survey (February 27–28, 1986), 14.0% of the stores that normally stocked Ritalin had been out-of-stock of at least one strength, compared to 36.9% of those stores normally stocking generic methylphenidate.

47. Inconstant availability of generic methylphenidate in pharmacies creates concern and confusion on the part of patients, who are unexpectedly forced to pay higher prices for the more reliably obtained brand name, and results in pharmacists being wary of carrying generic methylphenidate products, to the continued disadvantage of patients.

48. In October 1986, MD contacted its major customers, all of whom are wholesale distributors, to determine inventories at the end of each month during the year. Most customers queried reported no inventory in various strengths at the end of several monthly periods, and in many cases reported no inventory in consecutive monthly periods.

49. Most generic drug drugstore purchasers deal with regular sources of supply. In the case of a drug in short supply which is not a major product, failure to find the product available quickly will normally result in a "default" to the brand name.

50. In 1976, only five states permitted generic substitution; today all 50 states do. In the mid-1970's, due to the desire of public agencies to reduce the cost of medical care, interest in generic drugs substantially increased. Some states actually mandate the substitution of generic drugs when they are available unless the doctor directs otherwise, and some states are actually making it more difficult for doctors to do that. Data considered reliable throughout the drug industry show average generic market share of drugs where both brand name and generic are available to be between 40–55%.

51. Shortages of generic methylphenidate, which do not include a S–R version but which do include all other forms of Ritalin, were more serious in 1986 than shortages of the brand name product.

52. The use of previous year's sales as the basis of a subsequent year's quota limits DEA's ability to assess the proper generic share of the market and further precludes the generic manufacturer from demonstrating market share as it cannot manufacture and dispose of sufficient product to measure that share.

53. Substantial evidence in the record establishes that the market share of generic methylphenidate has been suppressed by the method used for setting 1986 individual production quotas and that ultimate consumers have thereby been disadvantaged.

54. The evidence in this record clearly shows that shortages did occur for both brand name and generic methylphenidate and that they were contributed to by the low quotas set by DEA. The shortages during the year were attributable more to the piecemeal method of setting quotas than to the size of the final aggregate production quota. Although the final aggregate production quota was much closer to that needed to fill the nation's needs than the original quota had been, it was still insufficient to allow for sufficient reserve stocks for either manufacturer.

55. Diversion of methylphenidate is a serious problem which DEA must take into account in setting quotas. However, the evidence of diversion of methylphenidate in 1986 does not support the need for as "lean a pipeline" as was created by the way the quotas were set in 1986.

Discussion

The evidence produced before the Administrative Law Judge demonstrated that there was an increased medical need for methylphenidate in 1986 due to several factors. The primary factors were better diagnosis of ADD, more children in the relevant age group due to a "baby boom," and greater utilization of methylphenidate as the drug of choice in the treatment of ADD. The evidence also demonstrated serious shortages of methylphenidate at various times in 1986—especially spring and fall—and corresponding problems for persons attempting to fill prescriptions and for retailers attempting to keep it in stock. The shortages were demonstratably more severe for generic methylphenidate and the record shows that consumers often purchased the more expensive Ritalin because of the unavailability of the generic.

The evidence of abuse of methylphenidate, as contained in this record, does not justify keeping an overly "lean pipeline." *See Western Fher Laboratories v. Levi*, 529 F.2d 325 (1st Cir. 1976).

The evidence demonstrates that the setting of initially low quotas by DEA and then adjusting them upward late in the year contributed to the shortage problems experienced in 1986. This practice hampered the efficiency of the manufacturers and was especially unsuited to the relatively long production cycle of Ciba-Geigy.

The use of prior year sales and final inventory data is essential to prevent oversupply. However, the evidence reveals that DEA may have relied too heavily on the previous year's quota in setting the 1986 aggregate production quota. The initial 1986 aggregate production quota (1,295 kg) was substantially lower than the final aggregate production quota for 1985 (1,361 kg). This contributed both to the harmful delay in arriving at a realistic figure and to the final aggregate production quota which was too low. DEA relied upon the FDA's estimate of a 17% increase in medical need for methylphenidate in 1986 but it applied the 17% figure to sales figures which had been held down by the 1985 quota while ignoring the FDA's substantially higher base number. Moreover, the process ignored the fact that FDA's base number is based upon only approximately 80% of the total medical need and that it provides no allowance for inventory.

In the latter part of 1986, each of the manufacturers of methylphenidate faced a critical shortage which threatened to force them to stop shipping any product until the end of the year. That situation was alleviated somewhat by the two increases in the disposal quotas of each manufacturer which were granted by DEA in December of 1986. Those increased disposal quotas allowed the manufacturers to ship product but there was no corresponding increase in the aggregate production quotas. Therefore, the products shipped at the end of 1986 came from inventory. As a result the inventory, or *reserve stocks*, of brand name and generic methylphenidate were below their appropriate levels at the end of 1986 as a direct result of an aggregate production quota which was too low to meet the several needs described in 21 U.S.C. 826.

The necessity for quotas on Schedule II controlled substances causes some unavoidable interference with normal market forces. It is impossible to impose production quotas on manufacturers without having some effect on normal competitive forces. Therefore, recognition of the fact that lower priced generic methylphenidate has been denied to consumers who wish to purchase it, by the quotas, and the taking of remedial action to correct that, is warranted. Such remedial action can avoid disrupting the market and can avoid unfairness to the name brand manufacturer by operating in a marginal way. Therefore, the DEA staff should not attempt to immediately bring generic methylphenidate to a market share level which is equal to the average share of other generic drugs but rather should take definite but gradual steps each year in that direction. Factoring in the consumer frustration in obtaining lower priced generic methylphenidate, when setting individual production quotas, should continue for as long as the unfilled demand for the generic product persists.

Disposal quotas are not a proper exercise of DEA's authority without resort to the notice and comment procedures mandated for "rulemaking" by the Administrative Procedures Act. The reason that the setting of disposal quotas amounts to rulemaking is that it imposes specific constraints upon the manufacturers of methylphenidate. Because of the disposal allocation or "quota" the manufacturers cannot sell or distribute all of the product which they manufacture pursuant to their production quotas during the year. Although such limitations may, from time to time, be advisable in order to fully implement 21 U.S.C. 826, they do impose restrictions on the manufacturers. Therefore, the imposition of such disposal allocations constitutes the exercise of rulemaking authority and is improper unless done in accordance with the Administrative Procedures Act. *See* 5 U.S.C. 551(4), 5 U.S.C. 553; *see also, In re FIC Corporate Patterns Report Litigation*, 432 F. Supp. 291 (D.D.C. 1977). If DEA is to resume the use of disposal quotas it must publish and explain the need for such quotas and the method by which they will be set and provide an opportunity for interested persons to comment.

Order

Therefore, under the authority vested in the Attorney General by section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970, (21 U.S.C. 826) and redelegated to the Administrator of the Drug Enforcement Administration by § 0.100 as amended, Title 28 Code of Federal Regulations, the Administrator hereby orders that the DEA staff redetermine the 1986 aggregate production quota for methylphenidate so as to provide for the medical, scientific, research, and industrial needs of the United States, for lawful export requirements, and for the establishment and maintenance of reserve stocks. It is further directed that pursuant to the agreement entered into by DEA with the parties to the 1986 hearing conducted before the Administrative Law Judge, any increase in the 1986 aggregate production quota or to any individual quota shall not be offset by a lowering of any relevant quota for the year in which the adjustment is made. Each manufacturer shall be permitted to manufacture the amount added to its respective individual production quota for 1986, during the 12 month period following the adjustment without regard to any other quota level. It is further ordered that the DEA staff redetermine the individual production quotas of the two manufacturers of methylphenidate for the year 1986. Such individual quotas shall be adjusted to a level which adds a sufficient quantity to eliminate the deficiency in reserve stocks which existed in each manufacturers' inventory at the close of 1986. Further, it is ordered that in recomputing the 1986 individual manufacturing quota and in setting future individual manufacturing quotas for methylphenidate, that the DEA staff consider the inability of consumers to obtain lower priced generic methylphenidate and the relatively low market share which generic methylphenidate has achieved compared to other generic drugs. It shall begin a remedial action to correct that situation by appropriate increases in the relative size of the quota consigned to generic methylphenidate. It is further ordered that the DEA staff desist from the use of disposal allocations or quotas

unless and until the need for such allocations and the method of computing them has been subjected to the rulemaking procedures of 5 U.S.C. 553(b).

Finally, the DEA staff is directed that in setting future aggregate and individual production quotas for methylphenidate before the start of each calendar year, if shall set levels which represent its best estimate of the nation's needs for the full upcoming year, utilizing the best and most reliable data and information available to it at the time.

Date: December 9, 1988.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

Importation of Controlled Substances; Application; Norac Co., Inc.

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on October 28, 1988, Norac Company, Inc., 405 South Motor Avenue, P.O. Box F, Azusa, California 91702, made application to the Drug Enforcement Administration to be registered as an importer of Ibogaine (7260), a basic class of controlled substance in Schedule I.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than January 17, 1989.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42 (b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745-43746 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42 (a), (b), (c), (d), (e), and (f) are satisfied.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 88-28941 Filed 12-15-88; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application; Upjohn Co.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on October 17, 1988, Upjohn Company, 7171 Portage Road, Kalamazoo, Michigan 49001, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
2,5-dimethoxyamphetamine (7396)	I
Methamphetamine, its salts, isomers, and salts of its isomers (1105).	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than January 17, 1989.

Dated: December 9, 1988.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Labor Research Advisory Council; Renewal

In accordance with the provisions of the Federal Advisory Committee Act, and after consultation with General Services Administration (GSA), I have determined that renewal of the Labor Research Advisory Council is in the public interest in connection with the performance of duties imposed on the Department of Labor.

The Council will advise the Commissioner of Labor Statistics regarding the statistical and analytical work of the Bureau of Labor Statistics, providing perspectives on these programs in relation to the needs of the labor unions and their members.

Council membership and participation in the Council and its committees are broadly representative of the union organizations of all sizes of membership, with national coverage which reflects the geographical, industrial, and occupational sectors of the economy.

The Council will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act. The Charter has been filed with GSA and the appropriate congressional committees.

Further information may be obtained from: Henry Lowenstern, Bureau of Labor Statistics, Department of Labor, GAO Building, 441 G Street NW., Washington, DC 20212, telephone: 202-523-1327.

Signed at Washington, DC, this 13th day of December 1988.

Ann McLaughlin,

Secretary of Labor.

[FR Doc. 88-28966 Filed 12-15-88; 8:45 am]

BILLING CODE 4510-24-M

All Items Consumer Price Index for All Urban Consumers; United States City Average

Pursuant to the requirements of Pub. L. 95-602, I hereby certify that the Consumer Price Index for All Urban Consumers rose 4.2 percent between October 1987 and October 1988 from a level of 115.3 (1982-84=100) in October 1987 to a level of 120.2 (1982-84=100) in October 1988. Signed at Washington, DC, on the 8th day of December 1988.

Ann McLaughlin,

Secretary of Labor.

BILLING CODE 4510-24-M

VOL 53 ISS 242 DE 16 1988 UMI

Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463 as amended), notice is hereby given of a meeting of the Steering Subcommittee for the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: January 10, 1989, 9:30 a.m., Room S4215 A&B Frances Perkins, Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC 20210.

Purpose

To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. section 552(b)(1). The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

FOR FURTHER INFORMATION CONTACT: Fernand Lavalle, Executive Secretary, Labor Advisory Committee, Phone: (202) 523–6565. Signed at Washington, DC this 9th day of December 1988.

Eugene K. Lawson,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510–28–M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 27, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than (December 27, 1988).

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 21st day of November 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Ashland Oil Co., Beattyville, KY; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated in response to a petition received on October 11, 1988 and filed on behalf of workers at Ashland Oil Company, Beattyville, Kentucky. The workers produced crude oil.

All workers were separated from the subject firm more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC, this 5th day of December, 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Comet Drilling Co., Eunice, LA; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on October 17, 1988 in response to a worker petition which was filed on behalf of workers at Comet Drilling Company, Eunice, Louisiana.

The retroactive provisions of section 1421(a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988, do not apply to workers who are engaged in the production of crude oil or refined petroleum products if such workers were eligible to be certified for benefits under the Trade Act prior to the implementation of the retroactive provisions.

An active certification covering the petitioning group of workers is currently in effect (TA–W–21,169). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington DC this 5th day of December 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Meridian Oil, Inc., Billings, MT; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974 (19 U.S.C. 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100–418), an investigation was initiated on October 24, 1988 in response to a worker petition dated September 30, 1988 and filed on behalf of workers and former workers at Meridian Oil, Incorporated, Billings, Montana. The workers produce crude oil and natural gas.

The retroactive provisions of section 1421(a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988 (OTCA) do not apply to workers who were eligible to be certified for benefits under the Trade Act prior to the implementation of the retroactive provisions.

No layoffs occurred at the Meridian Oil, Incorporated, Billings, Montana since September 30, 1987, one year prior to the date of the petition and the earliest possible impact date. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC this 7th day of December 1988.

L. 100–418), an investigation was initiated on October 24, 1988 in response to a worker petition dated September 17, 1988 and filed on behalf of workers and former workers at Mobil Producing Texas and New Mexico, Houston, Texas. The workers produced crude oil and natural gas.

The retroactive provisions of section 1421(a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988 (OTCA) do not apply to workers who were eligible to be certified for benefits under the Trade Act prior to the implementation of the retroactive provisions.

No layoffs occurred at the Mobil Producing Texas and New Mexico, Houston, Texas since September 17, 1987, one year prior to the date of the petition and the earliest possible impact date. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC this 7th day of December 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Panther Drilling, Inc., Dickinson, ND; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on September 19, 1988 in response to a worker petition which was filed on behalf of workers at Panther Drilling, Incorporated, Dickinson, North Dakota.

All workers of Panther Drilling, Incorporated, Dickinson, North Dakota were separated from the subject firm prior to the earliest impact date. In accordance with section 223(b) of the Omnibus Trade and Competitiveness Act of 1988, as amended by Pub. L. 100–418, no certification may apply to any worker whose last total or partial separation from the subject firm occurred before October 1, 1985. All workers of Panther Drilling, Incorporated, Dickinson, North Dakota were terminated in May 1985. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 5th day of December, 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Petro Lewis Corp., Catarina, TX; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on October 11, 1988 in response to a worker petition which was filed on October 11, 1988 on behalf of workers at Petro Lewis Corporation, Catarina, Texas. Workers were engaged in employment related to the production of crude oil and natural gas.

The retroactive provisions of section 1421 (a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988 do not apply to workers who are engaged in the production of crude oil or refined petroleum products if such workers were eligible to be certified for benefits under the Trade Act prior to the implementation of the retroactive provisions.

All workers were separated from Petro Lewis Corporation more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC, this 8th day of December 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Rocky Mountain Geophysics, Inc., Denver, CO; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on October 13, 1988 in response to a worker petition which was filed on behalf of workers at Rocky Mountain Geophysics, Incorporated, Denver, Colorado.

All workers of Rocky Mountain Geophysics, Incorporated, Denver, Colorado were separated from the subject firm prior to the earliest impact date. In accordance with section 223(b) of the Omnibus Trade and Competitiveness Act of 1988, as amended by Pub. L. 100-418, no certification may apply to any worker whose last total or partial separation from the subject firm occurred before October 1, 1985. All workers of Rocky Mountain Geophysics, Incorporated, Denver, Colorado were terminated at the end of February 1985. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 5th day of December 1988.

BILLING CODE 4510-30-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest

in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

Volume I

New Jersey:
NJ88-2 (JAN. 8, 1988)—p. 615
Pennsylvania:
PA88-8 (JAN. 8, 1988)—p. 913
PA88-10 (JAN. 8, 1988)—p. 930
PA88-18 (JAN. 8, 1988)—pp. 966-968
PA88-19 (JAN. 8, 1988)—p. 975
PA88-23 (JAN. 8, 1988)—p. 1001
Rhode Island:
RI88-1 (JAN. 8, 1988)—p. 1018

Volume II

Illinois:
IL88-1 (JAN. 8, 1988)—p. 67
Kansas:
KS88-6 (JAN. 8, 1988)—p. 346

Volume III

California:
CA88-2 (JAN. 8, 1988)—p. 43
Utah:
UT88-3 (JAN. 8, 1988)—p. 348
Washington:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC This 9th Day of December 1988.

Robert V. Setera,

Acting Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Mine Safety and Health Administration

[Docket No. M-88-234-C]

Christian Energies, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Christian Energies, Inc., Route 1, Box 16, Williamsburg, Kentucky 40769 has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 2 (I.D. No. 15-16448) located in Whitley County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane montior be installed on electric tractors used to load coal at the face. The monitor is required to be kept operative and properly maintained and frequently tested.

2. No methane has been detected in the mine.

3. The three-wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

4. As an alternate method, petitioner proposes to use hand-held continuous oxygen and methane monitors instead of methane monitors on three-wheel tractors. In further support of this request, petitioner states that:

(a) Each three-wheel tractor would be equipped with a hand-held continuous monitoring methane and oxygen detector and all persons would be trained in the use of the detector;

(b) Prior to allowing the coal loading tractor in the face area, a gas test would be performed to determine the methane concentration in the atmosphere. When the elapsed time between trips does not exceed 20 minutes, the air quality would be monitored continuously after each trip. This would provide continuous monitoring of the mine atmosphere for methane to assure the detection of any methane buildup between trips;

(c) Each monitor would be removed from the mine at the end of the shift, and would be inspected and charged by a qualified person. The monitor would also be calibrated monthly.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 17, 1989. Copies of the petition are available for inspection at that address.

Date: December 12, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-88-209-C]

Peabody Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Peabody Coal Company, 301 North Memorial Drive, P.O. Box 373, St. Louis, Missouri 63166 has filed a petition to modify the application of 30 CFR 75.207 (pillar recovery) to its Baldwin Mine (I.D. No. 11-01008) located in Randolph County, Illinois. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirements that before mining is started in a pillar split or lift, at least two rows of breaker posts or equivalent support be installed as close to the initial intended breakline as practicable and across each opening leading into an area where full or partial pillar extraction has been completed.

2. As an alternate method, petitioner proposes to second mine as follows:

(a) Side cuts would be conducted in a perimeter pillar of rooms only;

(b) All room development would be done under a full roof bolting plan;

(c) When operating remote controlled equipment, the operator would remain out by the end of the boom under supported roof;

(d) Maximum width of side cuts would be twenty feet;

(e) A minimum five-foot fender would be left for support between each lift;

(f) Chain pillars would not be mined out;

(g) Only one method of second mining would be conducted in a set of rooms;

(h) Temporary supports would be installed before repair work commences, in the event of a machine breakdown in face;

(i) Each haulage crosscut would be curtained off and would be dangered out to prevent accidental approach to a second mined area, as soon as it is no longer needed for haulage;

(j) The mouth of the return room (cuts 1 through 16) would be physically barricaded and "KEEP OUT" signs would be posted; and

(k) A miner operator would be on the solid pillar side of the lift at all times.

3. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 17, 1989. Copies of the petition are available for inspection at that address.

Date: December 8, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

Occupational Safety and Health Administration

[Docket No. NRTL-2-88]

Dash, Straus and Goodhue, Inc.; Application and Preliminary Finding for Recognition as Nationally Recognized Testing Laboratory

AGENCY: Occupational Safety and Health Administration, Labor.

ACTIONS: Notice of application for recognition as a Nationally Recognized Testing Laboratory, and preliminary finding.

SUMMARY: This notice announces the application of Dash, Straus and Goodhue, Inc., for recognition as a Nationally Recognized Testing Laboratory (NRTL) under 29 CFR 1910.7, and presents the Agency's preliminary finding.

DATES: The last date for interested parties to submit comments is February 14, 1989.

ADDRESS: Send comments to: NRTL Recognition Program, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, NW., Room N3653, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: James J. Concannon, Director, Office of Variance Determination, NRTL Recognition Program at the above address, Telephone: (202) 523-7193.

SUPPLEMENTARY INFORMATION:

Notice of Application

Notice is hereby given that Dash, Straus and Goodhue, Inc., has made application pursuant to section 6(b) of the Occupational Safety and Health Act of 1970, (84 Stat. 1593, 29 U.S.C. 655), Secretary of Labor's Order No. 9-83 (48 FR 35763), and 29 CFR 1910.7 for recognition as a Nationally Recognized Testing Laboratory.

The address of the place of employment that will be affected by the application is as follows: Dash, Straus and Goodhue, Inc., Product Safety Division, 593 Massachusetts Avenue, Boxborough, Massachusetts 01719.

Regarding the merits of the application, the applicant contends that it meets the requirements of 29 CFR 1910.7 for recognition in the areas of testing which it has specified.

Dash, Straus and Goodhue, Inc., (DS&G), states further that its staff includes degreed engineers well experienced in the field of electrical product safety including previous employment with Underwriters' Laboratories, Inc. (UL), private industry experience, and tenure as consultants to industry.

DS&G claims that it maintains a fully equipped laboratory to handle the testing requirements defined in the standards for the products which it seeks recognition to test, and that all of the test equipment is calibrated by an outside testing facility every six months.

The applicant also stresses that it has established formal documented testing procedures pertinent to the various standards to which testing is performed, and that these procedures have been reviewed and approved by various outside international product safety agencies for validity and thoroughness as a basis for their acceptance of the test data produced by the applicant's staff.

Additionally, according to Dash, Straus and Goodhue, Inc., it maintains a modern and secure facility for its testing and administrative requirements.

With respect to records and reports, the applicant asserts that it maintains discreet physical files containing business records, product documentation, test records, and results. DS&G claims that it also conducts a follow-up service including a means for implementation of control procedures for identifying the listed or labeled equipment, and on-site reviews of the submitter/client's manufacturing facilities and spot checking and verification of compliance of the "approved" products with the appropriate standards.

In addition, the applicant claims that it has a formalized complaint procedure for handling complaints and disputes of all interested parties, fairly and reasonably.

Background

Dash, Straus and Goodhue, Inc. was formed in 1980 initially for the purpose of undertaking tests to determine equipment compliance with Federal Communications Commission (FCC) regulations. In this effort, the Company succeeded business activities begun by Dash, Straus Associates in 1977.

The firm currently occupies over 7000 feet of facility and office space located in Boxborough, in North Central Massachusetts. The Company is listed by the Federal Communications Commission and accredited by the U.S. Department of Commerce, and the National Institute of Standards and Technology (NTIS), formerly the National Bureau of Standards, under the National Voluntary Accreditation Program (NVLAP).

The Product Safety Division of Dash, Straus and Goodhue, Inc. was formed in January 1986 for purposes of providing its client base with services designed to support its client's requirements for Underwriters' Laboratories, Inc. (UL), Canadian Standards Association (CSA), and Technicher Uberwachungs-Verein (TUV) electrical safety listing certification and licensing.

The applicant states that, particularly for products intended for use in the U.S. market, it employs the same specific test

methods and procedures established by each of the Regulatory Agencies as the basis for its work.

The applicant further states that it is an active member of the American National Standards Institute (ANSI), the Electronic Industries Association (EIA), and the National Fire Protection Association (NFPA).

The Product Safety Division, which is located at the Boxborough, Massachusetts address of the applicant, consists of 20 employees, as follows:

1—President
1—Vice President of Sales/Marketing
1—Vice President for Legal/Administrative
1—Vice President for Engineering
8—Clerical/Administrative
6—Engineers
2—Technicians

D&G has submitted copies of the job responsibilities and qualifications for all of the above noted positions.

The applicant has asserted that, as a NRTL, it will use only ANSI/UL standards (the nationally recognized standards) as the basis for its testing activity.

The scope of products that will be covered under the applicant's recognition will include electrical/electronic devices such as EDP equipment, office and business machines, communication systems and devices, non-invasive biomedical equipment, and power supplies.

The specific standards that Dash, Straus and Goodhue, Inc. states it will utilize in the course of its review, testing, and approval procedures are:

ANSI/UL #478—Information-Processing and Business Equipment
ANSI/UL #1459—Telephone Equipment
ANSI/UL #544—Electric Medical and Dental Equipment
ANSI/UL #1012—Power Supplies

All of the above standards are appropriate test standards within the meaning of 29 CFR 1910.7(c).

The applicant states that it is a privately held company jointly owned in equal shares by its three officers. Further, it operates an an independent testing laboratory and has no fiduciary relationship or association with its vendors, suppliers or clients except as a facility engaged to perform regulatory and compliance testing.

Preliminary Finding

Based upon all of the foregoing, and on the results of an on-site review of the applicant's testing facilities and administrative and technical practices, the Assistant Secretary has made a preliminary finding that Dash, Straus and Goodhue, Inc., can meet the requirements for recognition as required by 29 CFR 1910.7.

All interested members of the public are invited to supply detailed reasons and evidence supporting or challenging the sufficiency of the applicant's having met the requirements of a Nationally Recognized Testing Laboratory, listed in 29 CFR 1910.7. Submission of pertinent written documents and exhibits shall be made no later than Fedruary 14, 1989, and must be addressed to the NRTL Recognition Program, Office of Variance Determination, Room N3653, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, DC 20210. Copies of the DS&G application, the written staff recommendation and accompanying laboratory survey report, and all submitted comments, as received, (Docket No. NRTL–2–88), are available for inspection and duplication at the Docket Office, Room N2634, Occupational Safety and Health Adminstration, U.S. Department of Labor, at the above address.

Signed at Washington, DC, this 12th day of December, 1988.

John A. Pendergrass,

Assistant Secretary.

BILLING CODE 4510–26–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment on the Arts Meeting; Media Arts Advisory Panel

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (Pre-Screening I Film/Video Production) to the National Council on the Arts will be held on January 10–12, 1989, from 9:00 a.m.–5:30 p.m. in Room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–499]

Houston Lighting and Power Co., et al.; South Texas Project, Unit 2; Environmental Assessment and Finding of No Significant Impact Concerning Exemption

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.33(k) and 10 CFR 50.75 to Houston Lighting and Power Company, et al., (the licensee) for the South Texas Project, Unit 2, located at the licensee's site in Matagorda County, Texas.

Environmental Assessment

Identification of Proposed Action

10 CFR 50.33(k)(1) states, "Each application shall state: For an application for an operating license for a production or utilization facility, information in the form of a report, as described in § 50.75 of this part, indicating how reasonable assurance will be provided that funds will be available to decommission the facility." 10 CFR 50.75 establishes requirements for indicating how reasonable assurance will be provided that funds will be available for decommissioning. By letter dated December 2, 1988, the licensee requested a temporary exemption from the requirements of 10 CFR 50.33(k) and 10 CFR 50.75 for South Texas Project, Unit 2. Each holder of an operating license is required to submit a decommissioning plan on or before July 26, 1990. The licensee proposes to submit the decommissioning plan for Unit 2 at the time it submits the decommissioning plan for Unit 1 for which it holds an operating license, that is by July 26, 1990.

Need for Proposed Action

The proposed exemption is needed because there has been insufficient time for the licensee to complete all of the actions necessary to submit its decommissioning plan as an operating license application document. The

licensee has performed a study of the cost of decommissioning and negotiations have been initiated with potential trustees of an external sinking fund. However, these negotiations have not yet been concluded.

Environmental Impact of the Proposed Action

The proposed exemption from 10 CFR 50.33(k)(1) and 50.75 will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant cumulative radiation exposure. Accordingly, the Commission concludes that the proposed exemption would result in no significant radiological environmental impact. Additionally, it does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the exemption.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts of plant operation.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement (NUREG–1171) for the South Texas Project, Units 1 and 2.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepared an environmental impact statement for the proposed exemption.

Based upon the foregoing evironmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated December 2, 1988. This document is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, at the Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488, and at the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701. The staff's evaluation of the request will be published in the Safety Evaluation Report, Supplement No. 6, and will be available for inspection at the locations listed above.

Dated at Rockville, Maryland, this 7th day of December, 1988.

For The Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate-IV Division of Reactor Projects-III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88–29085 Filed 12–15–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–499]

Houston Lighting and Power Co., et al., South Texas Project, Unit No. 2; Environmental Assessment and Findings of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an Exemption from a portion of the requirements of Appendix J of 10 CFR Part 50 to the Houston Lighting and Power Company, acting for itself and for the City of San Antonio [acting by and through the City Public Service board of San Antonio), Central Power and Light Company, and the City of Austin, Texas (the applicants). The Exemption would apply to the South Texas Project (STP) Unit 2 located in Matagorda County, Texas.

Environmental Assessment

Identification of the Proposed Action

Section III.D.2(b)(ii) of Appendix J, 10 CFR Part 50, states that "Air locks open during periods when containment integrity is not required by the plant Technical Specifications shall be tested at the end of such periods at not less than P_a." By letter dated January 15, 1986, the licensee requested that the South Texas Project Unit 2 Technical Specifications be written to instead require an overall air lock leak rate test at P_a (37.5 psig) to be performed only "Upon completion of maintenance which has been performed on the air lock that could affect the air lock sealing capability." Otherwise, if an air lock is opened during periods when containment integrity is not required and no such maintenance has been performed, a door seal leak rate test (a less time-consuming test) must be performed. This requested exemption is consistent with the staff's position on the acceptable testing frequency necessary to demonstrate air lock sealing capability intended in Appendix J. The staff's current position is shown in the Standard Technical Specifications for Westinghouse Pressurized Water Reactors (NUREG–0452, Rev. 4). Until Commission Rulemaking changes the current requirement in Appendix J, an exemption to the present regulation must be granted before the licensee can adopt the requested Technical Specification.

Need for Proposed Action

The proposed exemption is needed because, based on experience at various plants, the staff found that literal compliance with Section III.D.2(b)(ii) of Appendix J is not necessary to assure containment leaktightness. The requested exemption is consistent with the staff's technical position and has been granted to many plants. Literal compliance with the regulation would lead to increased costs and occupational exposure.

Environmental Impacts of the Proposed Action

The proposed exemption to 10 CFR Part 50, Appendix J, Section III.D.2(D)(ii) will assure air lock sealing capability and containment integrity; therefore, this exemption will not increase the probability of accidents and post-accident radiological releases, nor otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves features located entirely within the restricted area as defined in 10 CFR Part 20. They would not affect non-radiological plant effluents and would have no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemption.

Alternatives to the Proposed Actions

The principal alternative to the proposed actions would be to deny the requested exemptions. This would result in increased costs and occupational exposure.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement (NUREG–1171) for STP, Units 1 and 2.

Agencies and Persons Contacted

The NRC staff reviewed the applicants' request and applicable documents referenced therein that support this Exemption for STP, Unit 2. The NRC did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for this action. Based on the environmental assessment, we conclude that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated January 15, 1986. This document, utilized in the NRC staff's technical evaluation of the exemption request, is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488, and at the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701.

Dated at Rockville, Maryland, this 7th day of December, 1988.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-29086 Filed 12-15-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-390 and 50-391]

Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The Nuclear Regulatory Commission (the Commission) is considering issuance of an extension of the latest construction completion dates specified in Construction Permit Nos. CPPR-91 and CPPR-92 issued to Tennessee Valley Authority (applicant) for the Watts Bar Nuclear Plant, Units 1 and 2. The facility is located at the applicant's site on the west branch of the Tennessee River approximately 50 miles northeast of Chattanooga, Tennessee.

Environmental assessment

Identification of Proposed Action

The proposed action would extend the latest construction completion date of Construction Permit No. CPPR-91 to July 1, 1991 and the latest construction completion date of Construction Permit No. CPPR-92 to December 31, 1992. The proposed action is in response to the applicant's request dated June 29, 1988.

The Need for the Proposed Action

The proposed action is needed because the construction of the facility is not yet fully completed. The applicant states that completion of Unit 1 will continue to be delayed pending review and implementation of several key issues/programs, such as the Vertical Slice Program and the Watts Bar Program Plan. These corrective action programs (CAPs) address the outstanding issues and the proposed plan for resolution. The implementation of these CAPs would confirm the design and construction adequacy of the Watts Bar plant. Resolution of these issues may require reinspection, analysis, and possible modifications to the facility prior to fuel load.

In addition, certain engineering and construction resources originally allocated for completion of work at Watts Bar have been diverted to the restart programs for Sequoyah and Browns Ferry Nuclear Power Plants.

Environmental Impacts of the Proposed Action

The environmental impacts associated with the construction of the facility have been previously discussed and evaluated in TVA's Final Environmental Statement (FES) issued on November 9, 1972 for the construction permit stage which covered construction of both units. The FES issued in December 1978 for the operating license stage addressed the environmental impacts of construction activities not addressed previously. These activities included: (1) Construction of the new transmission route for the Watts Bar—Volunteer 500 kV line, (2) construction of the settling pond for siltation control for construction runoff at a different location from that originally proposed in the Final Environmental Statement—Construction Permit (FES-CP), and (3) the relocation of the blowdown diffuser from the originally proposed site indicated in the FES-CP. The staff addressed the terrestrial and aquatic environmental impacts in the Final Environmental Statement—Operating Licenses (FES-OL) and concluded that the assessment presented in the FES-CP remains valid.

The construction of Unit 1 is essentially 100% complete and Unit 2 is approximately 75% complete, therefore, most of the construction impacts discussed in the FES have already occurred. Since this action would only extend the period of contruction as described in the FES, it does not involve any different impacts as described and analyzed in the original environmental impact statement. The proposed extension will not allow any work to be performed that is not already allowed by the existing construction permit. The extension will merely grant the applicant more time to complete construction in accordance with the previously approved construction permit. The activities related to the various CAPs will result in additional workforce, being primarily engineering and technical personnel rather than construction workforce. At the present time, this workforce is basically dedicated to the completion of Unit 1. This increase will be temporary and decline as the CAPs are completed and Unit 1 approches fuel loading (currently planned for December 1990). A large percentage of the additional workforce are contractors and consultants who do not live in the area and use only temporary quarters. While the current workforce level has caused a temporary, increased demand for services in the community and increased traffic on local roads, there are no major impacts due to the arrival of worker's families and due to demands for services necessary to support permanent residents (for example, housing and schools).

Based on the foregoing, the NRC Staff has concluded that the proposed action would have no significant environmental impact. Since this action would only extend the period of construction activities described in the FES, it does not involve any different impacts or a significant change to those impacts described and analyzed in the original environmental impact statement. Consequently, an environmental impact statement addressing the proposed action is not required.

Alternatives Considered

A possible alternative to the proposed action would be to deny the request. Under this alternative, the applicant would not be able to complete construction to the facility. This would result in denial of the benefit of power production. This option would not eliminate the environmental impacts of construction already incurred.

If construction were halted and not completed, site redress activities would restore some small areas to their natural states. This would be a slight environmental benefit, but much outweighed by the economic losses from denial of use of a facility that is nearly completed. Therefore, this alternative is rejected.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the FES for Watts Bar.

Agencies and Persons Contacted

The NRC staff reviewed the applicant's request and applicable documents referenced therein that support this extension. The NRC did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for this action. Based upon the environmental assessment, we conclude that this action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the request for extension dated June 29, 1988 which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC and at the Local Public Document Room, Chattanooga-Hamilton County Bicentennial Library, 10001 Broad Street, Chattanooga, Tennessee 37402.

Dated at Rockville, Maryland, this 5 day of December, 1988.

For the Nuclear Regulatory Commission.

Suzanne C. Black,

Assistant Director for Projects, TVA Projects Division, Office of Special Projects.

[FR Doc. 88-28985 Filed 12-15-88; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Improved Light Water Reactors; Meeting

The ACRS Subcommittee on Improved Light Water Reactors will hold a meeting on January 10, 1989, Room P-114, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, January 10, 1989—8:30 a.m. Until the Conclusion of Business

The Subcommittee will review: (1) The proposed final version of 10 CFR Part 52, Early Site Permits, Standard Design Certification, and Combined Licenses for Nuclear Power Reactors, and (2) the progress of the Requirements Document for the EPRI ALWR.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the intial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its conultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 301/492-7750) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: December 8, 1988.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

[FR Doc. 88-28986 Filed 12-15-88; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Regional Programs; Meeting

The ACRS Subcommittee on Regional Programs will hold a meeting on January 5 and 6, 1989, at the NRC Region IV Office, 611 Ryan Plaza Drive, Arlington, TX.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Thursday, January 5, 1989—8:30 a.m. Until the Conclusion of Business and

Friday, January 6, 1989—8:30 a.m. Until the Conclusion of Business.

The Subcommittee will review the activities under the control of the NRC Region IV Office.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee may exchange preliminary views regarding matters to be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and other interested persons regarding this view.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Paul Boehnert (telephone 301/492-8558) between 7:15 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: December 12, 1988.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

[FR Doc. 88-28987 Filed 12-15-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-424]

Georgia Power Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-68, issued to Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia (the licensee), for operation of the Vogtle

Electric Generating Plant, Unit I, located in Burke County, Georgia.

The licensee proposes to delete the Vogtle, Unit I Technical Specifications (TS) Section 3/4.3.3.7, Chlorine Detection Systems, and amend Section 3/4.3.2, Control Room Emergency Filtration System, and the relevant portions of Section 3/4.3.2, Engineered Safety Features Actuation System Instrumentation, and Bases 3/4.3, Instrumentation, to reflect the control room configuration for two-unit operation. This amendment request is necessitated by differences between the current Unit 1 limiting conditions for operation, action statements, and surveillance requirements, and those proposed for the combined Unit 1 and Unit 2.

The combined control room envelope will be served by four Control Room Emergency Filtration System (CREFS) trains. Two trains will be powered from Unit 1 and two powered from Unit 2. Each train has sufficient capacity to remove the combined control room heat load and pressurize the combined control room to 1/8 inch water gauge relative to adjacent areas. The bases of the combined Unit 1 and Unit 2 TS meet the same criteria as the current Unit 1 TS. That is, the system has been designed with sufficient head removal capability so that equipment qualification temperatures will not be exceeded and the control room will remain habitable during and following all credible accident conditions, as well as meet single failure criteria.

During normal plant operation the combined control room is to be served by a non-safety related HVAC system which draws in outside air makeup via either of two outside air (OSA) intakes. There is one intake associated with each unit. Each air intake is provided with two redundant radiation monitors that are powered by the associated unit. Upon detection of radiation in one OSA intake at or above the radiation monitor setpoint, each monitor will automatically initiate both of the associated unit's Control Room Isolation signals (CRI–A and CRI–B). Each CRI signal functions to start its associated CREFS and isolate the normal HVAC system. The lead/lag logic employed will permit only one DREFS to start. If high radiation is detected in both OSA intakes, all four CRI signals will be generated and two CREFSs will start. Upon receipt of a Safety Injection (SI) signal in a unit, the associated train's CRI signal will be generated. Just as for high radiation initiated CRI signals, if an SI–A and an SI–B initiate CRI signals, the lead/lag logic will permit only one CREFS to start.

The radiological consequences of the limiting LOCA have been analyzed by the licensee for the two-unit control room configuration. These analyses showed slight increases in control room doses; however, the total doses remained within the limits of 10 CFR Part 50, Appendix A, General Design Criterion 19. The NRC staff approved the revised control room doses in the safety evaluation for Amendment 11 to the Vogtle Unit 1 TS. The bases for the operability of the CREFS actuation instrumentation also remain applicable. These instruments provide redundant and diverse means for initiation of a CRI in response to credible accidents in either unit, as well as meet single failure criteria.

The licensee has elected to limit on-site chlorine gas storage to 20 lbs or less on a permanent basis, eliminating the need to consider an on-site chlorine release as a credible accident and permitting the deletion of TS Section 3/4.3.3.7 and the disabling of the circuitry for Control Room Isolation on a chlorine signal.

The limiting condition for operation and mode applicability for TS 3/4.3.2 have been revised to reflect that four CREFSs are required and that the specification is applicable when either unit is in Mode 1, 2, 3 or 4 or in Mode 5 or 6 during movement of irradiated fuel or movement of loads over irradiated fuel. That is, the specification is applicable at all times unless both units are shut down and no movement of irradiated fuel or movement of loads over irradiated fuel is occuring. This change was requested in the licensee's letter dated December 6, 1988.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes in the plant TS in accordance with the standards of 10 CFR 50.92(c) and has determined that operation of Vogtle, Unit 1 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The changes would revise the limiting conditions for operation, action statements, and surveillance requirements for the Control Room Emergency Filtration System and associated instrumentation to reflect the two-unit control room configuration. The changes would include administrative modifications which delete obsolete footnotes and maintain consistent nomenclature. These changes would not affect equipment involved in the initiation of previously analyzed accidents, hence, the probability of such accidents would not be increased. The changes would, however, affect equipment involved in accident mitigation. The heat removal capability of the two-unit control room configuration is such that equipment qualification temperatures would not be exceeded and the control room would be habitable during and following a credible accident.

Since chlorine gas will no longer be stored on-site in quantities exceeding 20 lbs, the consequences of an on-site chlorine release need no longer be considered, permitting the deletion of the corresponding TS.

For the above reasons, the consequences of previously evaluated accidents would not be significantly increased.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated. The changes would not introduce any new equipment into the plant or require existing equipment to operate in a different manner from which it was designed to operate. The operating configurations which would be allowed by the proposed changes have been reviewed against postulated accident conditions, including single failures. This review demonstrated that control room habitability would be maintained consistent with the current TS requirements and that an unanalyzed failure mode would not be made possible by the changes. A new or different kind of accident would, therefore, not result.

(3) Involve a significant reduction in a margin of safety. The changes would not affect safety limits or limiting safety system settings. The bases of the current Unit 1 TS would be maintained for the two-unit control room configuration. The

current Unit 1 criteria for control room heat removal, pressurization, radiation protection, and safety injection actuation would be met, including single failure capability. The proposed surveillance requirements and allowed outage times would also be consistent with current Unit 1 requirements. Since the proposed changes would maintain the same level of protection as the current Unit 1 TS margins of safety would not be reduced.

The NRC staff believes that the proposed changes to the TS meet the criteria specified in 10 CFR 50.92(c) and, hence, proposes to determine that they involve no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P–216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene are discussed below.

By January 17, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intevene shall be filed in accordance with the Commission's "Rule of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designate by the Commisson or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter, and the basis for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commisson may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1–800–342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to David B. Matthews: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Chandler Building, Suite 1400, 127 Peachtree Street NE., Atlanta, Georgia 30043, attorney for the licensee.

Nontimely filings of petitions for leave to intevene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request

VOL 53 ISS 242 DE 16 1988 UMI

should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1) (i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Dated at Rockville, Maryland, this 9th day of December 1988.

For the Nuclear Regulatory Commission.

Jon B. Hopkins,

Project Manager, Project Directorate II–3, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28988 Filed 12–15–88; 8:45am]

BILLING CODE 7590–01–M

[Docket Nos. 50–445 and 50–446]

Texas Utilities Electric Co. et al.; [1] Issuance of Amendments to Construction Permits

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 10 to Construction Permit No. CPPR–126 and Amendment No. 9 to Construction Permit No. CPPR–127 for the Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, to show a change in ownership interest.

By letter dated July 22, 1988, Texas Utilities Electric Company (TU Electric) requested amendment of Construction Permit Nos. CPPR–126 and CPPR–127 for the CPSES, Units 1 and 2, to reflect a transfer of 3.8% interest in CPSES ownership from Brazos Electric Power Cooperative, Inc. to TU Electric. These amendments will become effective as of the date of completion of the transfer of the ownership interest.

The issuance of these amendments to Construction Permit Nos. CPPR–126 and CPPR–127 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in Amendments No. 10 and No. 9. Prior public notice of Amendments No. 10 and No. 9 was not required, since the amendments do not involve a significant hazards consideration.

For further details with respect to this action see (1) the application for amendment, dated July 22, 1988, (2) Amendments No. 10 and No. 9 to Construction Permit Nos. CPPR–126 and CPPR–127, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room at the Somervell County Public Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043.

In addition, a copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Comanche Peak Project Division, Office of Special Projects.

Dated at Rockville, Maryland, this 8th day of December, 1988.

For the Nuclear Regulatory Commission.

Christopher I. Grimes,

Director, Comanche Peak Project Division, Office of Special Projects.

[FR Doc. 88–28989 Filed 12–15–88; 8:45 am]

BILLING CODE 7590–01–M

[1] The current Construction Permit holders for the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company, Texas Municipal Power Agency, and Tex-La Electric Cooperative of Texas, Inc. Transfer of ownership from Texas Municipal Power Agency to Texas Utilities Electric Company was previously authorized by Amendments No. 9 and No. 8 to Construction Permits CPPR–126 and CPPR–127, respectively, on August 25, 1988 to take place in 10 installments as set forth in the Agreement attached to the application for Amendment dated March 4, 1988. At the completion thereof, Texas Municipal Power Agency is no longer an applicant or construction permit holder.

PENSION BENEFIT GUARANTY CORPORATION

Multiemployer Pension Plans; Study of the Need for Special Rules in Cases of Union-Mandated Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of study.

SUMMARY: The Pension Benefit Guaranty Corporation is conducting a study of the need for special rules in cases of union-mandated withdrawal from multiemployer pension plans, as required by section 412(a)(1)(B) of the Multiemployer Pension Plan Amendments Act of 1980. The effect of this notice is to advise multiemployer pension plan sponsors, employers, unions, and other interested persons of the pendency of the study and to solicit information and comment regarding union-mandataed withdrawals and the need for special rules in cases involving such withdrawals.

DATE: Comments must be received on or before February 14, 1989.

ADDRESSES: All written comments should be addressed to: Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006. Comments received will be available for public inspection at the PBGC Communications and Public Affairs Department, Suite 7100 at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202–778–8820 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Section 4201(a) of the Employee Retirement Income Security Act of 1974 ("ERISA") imposes withdrawal liability on an employer that withdraws from a multiemployer pension plan in a complete or partial withdrawal. Under the general rule in section 4203(a) of ERISA, a complete withdrawal occurs when an employer permanently ceases to have an obligation to contribute under the plan or permanently ceases all covered operations under the plan. Under section 4203(b), however, a construction employer incurs a complete withdrawal from a construction industry plan only if the employer ceases to have an obligation to contribute under the plan, and either continues to perform work in the jurisdiction of the collective bargaining agreement of the type for which contributions were previously required, or resumes such work within five years after the contribution obligation ceases and does not renew the obligation at the time of the resumption. This special definition of complete withdrawal also applies in the entertainment industry under section 4203(c), except that the pertinent area is the jurisdiction of the plan rather than the jurisidiction of the collective bargaining agreement.

Under section 4205 of ERISA, there is a partial withdrawal if there is a 70 percent contribution decline in each of three consecutive plan years; or if the employer permanently ceases to have an obligation to contribute under one or more but fewer than all collective bargaining agreements, but continues to perform work in the jurisdiction of the collective bargaining agreement of the type for which contributions were previously required, or transfers such work; or if the employer permanently ceases to have an obligation to

contribute with respect to work performed at one or more but fewer than all of its facilities, while continuing to perform work at the facility of the type for which the obligation to contribute ceased. However, under section 4208(d)(1), a construction employer is liable for a partial withdrawal from a construction industry plan—

only if the employer's obligation to contribute under the plan is continued for no more than an insubstantial portion of its work in the craft and area jurisdiction of the collective bargaining agreement of the type for which contributions are required.

And under section 4208(d)(2), partial withdrawals in the entertainment industry do not give rise to withdrawal liability "except under the conditions and to the extent prescribed by the [Pension Benefit Guarantee Corporation ("PBGC")] by regulation." (No such regulations have been issued.)

Under ERISA section 4201(b), an employer's withdrawal liability to a plan is the employer's allocable share of the plan's unfunded vested benefits as calculated under section 4211, with certain adjustments. Section 4209 provides for reducing or eliminating *de minimis* assessments. For partial withdrawals, an adjustment is then made under section 4206. The liability is next reduced under section 4219(c)(1)(B), if necessary to keep the payment schedule from exceeding twenty years. And, finally, section 4225 may limit the liability where a withdrawal is attributable to the bona fide sale of all or substantially all of an employer's assets in an arm's-length transaction to an unrelated party, or to the liquidation or dissolution of an insolvent employer.

Additional special rules and exceptions are found in other provisions of ERISA. For example, a cessation of an employer's contribution obligation arising solely as the result of a sale of assets that meets the requirements of section 4204 of ERISA does not give rise to a withdrawal. Also, under section 4218, no withdrawal occurs solely because an employer ceases to exist by reason of certain changes in structure, if the change causes no interruption in employer contributions or obligations to contribute under the plan; or solely because the employer suspends contributions under a plan during a labor dispute involving its employees. And where a withdrawal results from the transfer of employees to a new multiemployer plan due to a certified change in collective bargaining representative, section 4235 requires the old plan to transfer liabilities and assets to the new plan and grants the employer a credit against its withdrawal liability based on the unfunded vested benefits transferred.

The Study

Section 412(a)(1)(B) of the Multiemployer Pension Plan Amendments Act of 1980 ("MPPAA") (which added the withdrawal provisions to ERISA), directs the PBGC to conduct a study with respect to "the necessity of adopting special rules in cases of union-mandated withdrawal from multiemployer pension plan." In MPPAA section 412(a)(2), the PBGC is directed to report to Congress the results of the study and the PBGC's recommendations with respect thereto.

The PBGC is studying the need for special rules in cases of union-mandated withdrawal from multiemployer pension plans, as required by section 412(a)(1)(B) of MPPAA, and requests information and comment from the public that will be useful in the study. Specially, the PBGC requests information and comment on the following:

1. What kinds of union actions, if any, may mandate an employer's withdrawal from a multiemployer pension plan (that is, what does "union-mandated withdrawal" mean)?
2. Do union-mandated withdrawals occur? If so, how often and in what circumstances?
3. What are the effects of union-mandated withdrawals, and of the threat or possibility of such withdrawals? Do they, for example, deter employer participation in multiemployer pension plans?
4. What kinds of relief provisions or other special rules, if any, would be appropriate in cases involving union-mandated withdrawals?
5. What effect would relief provisions or other special rules have in cases involving union-mandated withdrawals, especially on plan participants and other (non-withdrawing) contributing employers?

Comments

All interested persons are invited to submit written information and comment on the issues listed above in this notice or on any other matters relating to the PBGC's study regarding union-mandated withdrawals and the need for special rules in cases involving such withdrawals. Comments should be submitted to the above address on or before February 14, 1989. All comments will be made a part of the record. Comments received will be available for public inspection at the address set forth above.

Issued at Washington, DC, on this 5th day of December 1988.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-16687; (812-6971)]

First Mutual Fund, Inc., et al., Application December 9, 1988

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: First Mutual Fund, Incorporated (the "Fund"), and BIL, Trainer Wortham Inc. ("BIL" or the "Investment Adviser").

Relevant Sections of the 1940 Act: Applicants request exemption under section 6(c) from the provisions of section 15(a).

Summary of Application: Applicants seek an order to permit the Fund to compensate the Investment Adviser the lesser of its fees or the costs of providing advisory services under an investment advisory agreement ("Interim Agreement") approved by the Fund's Board of Directors (the "Board of Directors"), between the Fund and BIL from January 25, 1988, the date on which Trainer, Wortham & Company, Inc. ("Trainer Wortham") was merged into BIL Management, Incorporated ("BIL Mgt") (the "Assignment"), until June 28, 1988, the date the new investment advisory agreement was approved by shareholders of the Fund (the "Interim Period").

Filing Date: The application was filed on January 26, 1988, and amendments thereto on June 23, November 1, and December 7, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 6, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary: SEC, 450 5th Street, NW., Washington, DC 20549; the Fund and BIL: Martin E. Lybecker, Esquire, Ropes and Gray, 1001 Pennsylvania Avenue, NW., Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Special Counsel Richard Pfordte at (202) 272–2811 or Branch Chief Karen Skidmore at (202) 272–3023, Office of Investment Company Regulation.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 253–4300).

Applicants' Representations

1. The Fund is registered under the 1940 Act as an open-end management investment company and through January 25, 1988, and prior to the Merger had Trainer Wortham as its investment adviser and distributor. Under the previous advisory agreement ("Old Advisory Agreement") between Trainer Wortham and the Fund, the advisory fees were 0.75% per annum of average daily net assets up to $20,000,000, and 0.50% per annum of average daily net assets if the daily net assets were in excess of $20,000,000. BIL, the successor company to Trainer Wortham after the Merger, is registered as an investment adviser under the Investment Advisers Act of 1940 and is a wholly-owned subsidiary of BIL Holding (International) AG, which, in turn, is a wholly-owned subsidiary controlled by the Bank in Liechtenstein, AG ("Bank").

2. The Bank, BIL, Trainer Wortham, and shareholders of Trainer Wortham entered into a merger agreement (the "Merger Agreement") on December 9, 1987. The Merger Agreement provided that Trainer Wortham would be merged with and into BIL Mgt, which would then change its name to BIL and be the surviving corporation. The merger ("Merger") was consummated on January 25, 1988.

3. The Merger was deemed to result in an assignment of the existing investment advisory agreement ("Old Advisory Agreement") of the Fund within the meaning of section 2(a)(4) of the 1940 Act, thus terminating the Old Advisory Agreement pursuant to its terms.

4. At a meeting held in person on January 19, 1988, the Board of Directors, including the members who are not "interested persons" of the Fund, as that term is defined in section 2(a)(19) of the 1940 Act, with the advice and assistance of independent counsel, unanimously (with one director absent) approved a new investment advisory agreement ("New Advisory Agreement") to be entered into between the Fund and BIL, and determined that it was in the best interests of the Fund and its shareholders to file the application as a necessary step in implementing the New Advisory Agreement during the Interim Period in a manner that would minimize the disruption of advisory services to the Fund.

5. At a meeting held on June 28, 1988, the Fund's shareholders approved the New Advisory Agreement.

6. Applicants believe that based on the cost allocation methodology described below, the Investment Adviser's cost of providing services during the Interim Period aggregated $35,216, and did not exceed the amounts payable to the Fund under the previous advisory agreement.

7. In determining the cost of providing advisory services to the Fund during the Interim Period, BIL multiplied its total advisory costs, including direct and indirect expenses, by the ratio that the Fund's assets bore to the total assets managed by BIL. Then the Investment Adviser calculated the amounts paid or placed in escrow by the Fund, and the costs allocable to the Fund, in order to derive an historical yearly ratio of allocable costs to advisory fees paid by the Fund. The costs-to-fees ratio for the six months ended June 30, 1988, and the ratio of the Interim Period were consistent with the historical relationship between the costs and the advisory fees earned under the Old Advisory Agreement.

8. BIL and the Fund may not rely on the requested order of the Commission prior to its issuance as authority for BIL to have served as investment adviser to the Fund.

Applicants' Legal Conclusions

1. Applicants believe that the requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act for the following reasons:

(i) The Merger was deemed to cause an assignment, and hence the termination, of the Old Advisory Agreement; the Board of Directors was required by the circumstances to consider appropriate actions in the best interests of the Fund and its shareholders. The Board determined that continuation of the Old Advisory Agreement, distribution and operational arrangements was in the best interests of the Fund and its shareholders.

(ii) It was not possible for the Fund to obtain shareholder approval of a new advisory agreement in accordance with Section 15(a) of the 1940 Act prior to the Assignment. The Fund did not have sufficient advance notice of the proposed transaction. It was not possible for the Board to meet in person to consider the implications of the Merger to the Fund and to schedule and hold a meeting of shareholders prior to the Assignment. Holding a meeting of shareholders, which requires the preparation and clearance of proxy materials, as well as a sufficient solicitation period to obtain the requisite quorum was, under these circumstances, impossible to effect before the Assignment.

(iii) There was no diminution in the scope and quality of services provided to the Fund. Applicants state that the new advisory agreement has the same terms and conditions as the Old Advisory Agreement. Accordingly, the Fund received during the Interim Period the same investment advisory services, provided in the same manner and at the same fee levels, by essentially the same personnel as it received prior to the Assignment.

(iv) Applicants believe that the granting of the requested exemption would be within the spirit of Rule 15a-4 under the 1940 Act. The Commission's release proposing Rule 15a-4 suggests that where an assignment is foreseeable, the policy of the 1940 Act that shareholder approval be obtained prior to entering into an investment advisory relationship should not be thwarted by providing an exemption from section 15(a) of the 1940 Act because, in such a case, it would be reasonably practicable to obtain shareholder approval. Applicants submit that their situation is similar to other types of assignments that are unforeseeable. The rapid culmination of the Merger did not present an opportunity to secure prior approval of the New Advisory Agreement by shareholders of the Fund.

(v) Applicants submit that to deprive BIL, as successor to the business of Trainer Wortham, of its costs of providing investment advisory services for the Interim Period, for no reason other than the fact that the Merger resulted in an assignment of the Fund's Old Advisory Agreement, would be a harsh result and an unreasonable penalty to attach to the transaction.

Applicants' Conditions

Applicants agree as conditions to the issuance of the exemptive order requested by the application that:

1. The New Advisory Agreement implemented during the Interim Period, and approved by the shareholders of the Fund, had the same terms and conditions as the Old Advisory Agreement.

2. Investment advisory fees payable by the Fund during the Interim Period in accordance with the terms of the New

Advisory Agreement have been maintained in the account will be paid to BII only upon the Commission's issuance of the order requested by this application.

3. BIL will pay the costs of preparing and filing the application and the costs of holding the special meeting of the Fund shareholders necessitated by the Assignment, including the cost of proxy solicitations.

4. BIL will take all appropriate steps so that the scope and quality of advisory and other services provided to the Fund during the Interim Period will be at least equivalent, in the judgment of the Boards of Directors, including a majority of the Directors who are not "interested" persons, to the scope and quality of services previously provided.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16690; 811-2112]

IDS Investment Program; Application

December 12, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for an order under the Investment Company Act of 1940 ("1940 Act").

Applicant: IDS Investment Program ("Applicant").

Relevant 1940 Act Sections: Order requested under section 8(f) of the 1940 Act.

Summary of Application: Applicant has requested an order declaring that it has ceased to be an investment company.

Filing Date: The application was filed on September 12, 1988 and amended on November 3, 1988.

Hearing of Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 3, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, c/o IDS Financial Services, Inc., 80 South Eighth Street, Minneapolis, Minnesota 55440.

FOR FURTHER INFORMATION CONTACT: Jeremy N. Rubenstein, Staff Attorney, at (202) 272-2847, or H.R. Hallock, Jr., Special Counsel, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is a Minnesota business trust which registered as an investment company under the 1940 Act on or about September 11, 1970. Applicant's registration statement under the Securities Act of 1933 became effective on or about February 17, 1972.

2. Applicant is a unit investment trust which offered a variety of monthly investment programs designed for investors who desired to accumulate shares of IDS Growth Fund, Inc. All programs consisted of 150 equal monthly payments over twelve and one-half years (assuming all payments were made as scheduled).

3. On May 13, 1988, Applicant's unitholders were mailed a notice of Applicant's termination. On July 19, 1988, the Board of Directors of Investors Accumulation Plan, Inc., Applicant's sponsor, voted to approve the liquidation of Applicant.

4. At the close of business on July 13, 1988, Applicant had outstanding a total of 8,783,706.185 units, with a value of $17.923 per unit, and a total net asset value of $157,430,365.95. Only one class of securities was issued and outstanding, and all units were invested in shares of IDS Growth Fund, Inc. On July 14, 1988, a proportionate share of Applicant's assets in IDS Growth Fund, Inc. was distributed to each of Applicant's unitholders.

5. All expenses incurred in connection with the liquidation of Applicant will be borne by Investors Accumulation Plan, Inc, and no unitholder incurred or will incur any expense, directly or indirectly, as a result of the liquidation of Applicant and termination of the accumulation programs. Certain unitholders who were investing $300 or more per month and who had made less than 40 payments would have paid a lower average sales charge on the total units acquired if Applicant had not liquidated and those unitholders had continued to purchase units in accordance with the terms of the program. However, the calculation of an average sales charge ignores the time value of money. If the time value of money is considered, all unitholders are better off after the liquidation of the program than they would have been if Applicant had not terminated and the unitholders had continued to purchase units in accordance with the terms of the program because IDS Growth Fund, Inc. has offered to waive any sales charge for certain periods of time for investments made by former unitholders of Applicant.

6. Within the last 18 months, Applicant has not transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant.

7. Applicant has no assets, debts or liabilities which remain outstanding, is not a party to any litigation or administrative proceeding, has no remaining securityholders, and is not engaged in or proposing to engage in any business activities other than those necessary for the winding up of its affairs.

8. Applicant has filed a Form N-SAR for each period for which such form was required, and will continue to file a Form N-SAR for each period or portion thereof through and including the period in which Applicant is deregistered.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is a Minnesota business trust which registered as an investment company under the 1940 Act on or about December 27, 1963. Applicant's registration statement under the Securities Act of 1933 became effective on or about September 15, 1965.

2. Applicant is a unit investment trust which offered a variety of monthly investment programs designed for investors who desire to accumulate shares of IDS Stock Fund, Inc. All programs consisted of 150 equal monthly payments over twelve and one-half years (assuming all payments were made as scheduled).

3. On May 13, 1988, Applicant's unitholders were mailed a notice of Applicant's termination. On July 19, 1988, the Board of Directors of Investors Accumulation Plan, Inc., Applicant's sponsor, voted to approve the liquidation of Applicant.

4. At the close of business on July 13, 1988, Applicant had outstanding a total of 3,655,743.81 units, with a value of $17.79 per unit, and a total net asset value of $65,035,671.19. Only one class of securities was issued and outstanding, and all units were invested in shares of IDS Stock Fund, Inc. On July 14, 1988, a proportionate share of Applicant's assets in IDS Stock Fund, Inc. was distributed to each of Applicant's unitholders.

5. All expenses incurred in connection with the liquidation of Applicant will be borne by Investors Accumulation Plan, Inc., and no unitholder incurred or will incur any expense, directly or indirectly, as a result of the liquidation of Applicant and termination of the accumulation programs. Because IDS Stock Fund, Inc. has offered to waive any sales charge for certain periods of time for investments made by former unitholders of Applicant, no unitholder would have paid a lower average sales charge on the total units acquired if the Applicant had not liquidated and such unitholder had continued to purchase units in accordance with the terms of the program.

6. Within the last 18 months, Applicant has not transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant.

7. Applicant has no assets, debts or liabilities which remain outstanding, is not a party to any litigation or administrative proceeding, has no remaining securityholders, and is not engaged in or proposing to engage in any business activities other than those necessary for the winding up of its affairs.

8. Applicant has filed a Form N–SAR for each period for which such form was required, and will continue to file a Form N–SAR for each period or portion thereof through and including the period in which Applicant is deregistered.

For the SEC, by the Division of Investment Management, under delegated authority.

BILLING CODE 8010–01–M

[Release No. IC–16691; 812–6770]

Prudential-Bache Global Fund, Inc.; Application

December 12, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act")..

Applicants: Prudential-Bache Global Fund, Inc. (the "Global Fund") and Prudential-Bache Research Fund, Inc. (the "Research Fund").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of section 12(d)(3) of the Act.

SUMMARY: Applicants seek a conditional order permitting them to acquire equity and convertible debt securities issued by foreign issuers who derived more than 15% of their gross revenue from their activities as a broker, dealer, underwriter or investment adviser in their most recent fiscal year ("foreign securities companies").

DATE: The application was filed on June 24, 1987, and amended on August 1, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 6, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, c/o John E. Baumgardner, Jr., Sullivan and Cromwell, 125 Broad Street, New York, New York 10004.

FOR FURTHER INFORMATION CONTACT: Barbara Chretien-Dar, Staff Attorney, (202) 272–3022 or H.R. Hallock, Jr., Special Counsel, (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the applicaiton; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. Each Applicant is registered under the 1940 Act as a diversified, open-end management investment company.

2. The Global Fund's investment objective is to seek long-term growth of capital through investment in a diversified portfolio of securities

consisting primarily of equity and debt securities of non-U.S. issuers. The Manager of the Global Fund is Prudential Mutual Fund Management, Inc. The Research Fund's investment objective is to seek high total return consistent with reasonable risk by structuring its portfolio according to guidelines of Prudential-Bache Investment Management and by selecting specific securities based on the opinions of the Prudential-Bache Research Group and some outside sources. Portfolio securities may include common stock, securities convertible into common stock, and convertible preferred stock and debt securities. The Manager of the Research Fund is Prudential-Bache Securities Inc.

3. Applicants wish to make portfolio investments in equity and convertible debt securities of foreign securities companies (i) that are listed on certain major foreign stock exchanges, and (ii) that meet the other conditions of quality and liquidity set forth in the application and summarized below.

4. Applicants' proposed acquisitions of securities issued by foreign securities companies will satisfy each of the requirements of Rule 12d3–1 under the 1940 Act except subparagraph (b)(4) thereof, which provides that—* * * any equity security of the issuer * * * [must be] a 'margin security' as defined in Regulation T promulgated by the Board of Governors of the Federal Reserve System.

Applicants' Legal Analysis and Conditions

1. Applicants will acquire only those equity securities issued by foreign securities companies (or that underlie the convertible debt of such companies) that are listed on certain major foreign stock exchanges which meet certain standards for depth and liquidity ("Qualified Foreign Exchanges"). An exchange would be deemed a Qualified Foreign Exchange (1) if it is listed in the application,[1] and (2) if, at the end of its most recent calendar year (or at an earlier date if information is not yet publicly available with respect to the end of the most recent calendar year), it meets the following minimum criteria:

(1) The exchange has listed equity shares of companies with a market value of at least 25 billion dollars;

(2) The exchange has a minimum of 150 companies with equity shares listed on the exchange;

(3) The exchange has had an average daily trading volume over the preceding six-month period of at least 25 million dollars;

(4) The exchange has had, in the previous year, a minimum turnover ratio of at least 20% of its total market capitalization.

Listing on a Qualified Foreign Exchange is the functional equivalent of listing on a U.S. national securities exchange and, accordingly, the securities so listed are fully comparable to "margin securities" for purposes of Rule 12d3–1 under the 1940 Act.

2. As a further condition to the relief requested and to assure the quality and liquidity of Applicants' investments, Applicants will acquire only those equity securities (or in the case of convertible debt, debt convertible into equity securities) of foreign securities companies which meet certain additional quality standards. These additional standards are collectively equal or superior to the standards applicable to an OTC margin stock. By limiting investments to equity securities listed on certain major foreign stock exchanges that in terms of quality and liquidity are comparable to the largest of the U.S. national securities exchanges, and by imposing certain additional quality standards on the securities themselves, the proposed conditions exceed the quality standards applicable to a "margin security".

3. Applicants will purchase only those equity securities of foreign securities companies (or debt convertible into such securities) that meet the quality standards outlined below:

(1) Daily quotations for both bid and asked prices for the stock are continuously available to the general public;

(2) The stock has been publicly traded for at least six months;

(3) The issuer or a predecessor in interest has been in existence for at least three years;

(4) The issuer has at least $10 million of capital, surplus, and undivided profits;

(5) The issuer is required by exchange or governmental regulation publicly to file (i) reports of any important financial or structural corporate changes, (ii) semi-annual profit and loss statements, and (iii) annual reports of independently audited assets and liabilities, profits and losses, and changes in financial position;

(6) The issuer must have a minimum market capitalization of $20 million; and

(7) The equity securities must have (i) an average daily trading volume of at least 500 shares and (ii) an average daily trading volume equal in value to at least $25,000.

Applicants' Conclusions of Law

1. Rule 12d3–1 under the 1940 Act in effect limits an investment company's ability to invest in securities of foreign securities companies. This limitation results from the requirement in Rule 12d3–1 that an eligible security of a securities company be a "margin security". Applicants will comply with all requirements of Rule 12d3–1 except with respect to the "margin security" requirement. The conditions proposed in this application are as rigorous, and in certain respects more rigorous, than the standards applicable to a "margin security".

2. The primary concerns addressed by section 12(d)(3)—entrepreneurial risk of investing in securities-related businesses structured as partnerships and potential conflicts of interests between an investment company's shareholders and its investment adviser, underwriters or other brokers—are not relevant in Applicants' context. Applicants do not intend to purchase any general partnership interest in securities-related businesses. Since Applicants' own shares are sold by its investment advisors or affiliates, the concern that Applicants might purchase shares in a broker-dealer for selling the investment company's shares is not relevant.

3. The proposed conditions will assure that, in terms of breadth of market, availability of investment information, and character and permanence of the issuer, the securities in which Applicants propose to invest will be fully comparable, and in many respects superior in quality, to securities that fall within the definition of "margin securities". Further, the relief requested would allow them to invest in securities of foreign issuers that derive more than 15% of their revenue from securities-related activities. Many foreign issuers are integrated companies, engaged in both financial and non-financial services, or provide both securities-related and other financial services. Rule 12d3–1 was designed to give investment companies greater flexibility with respect to investments in securities-related businesses, that, absent exemptive relief, are prohibited under section 12(d)(3) of the Act. Since securities of foreign securities companies are generally not traded in the United States, they are not within the technical definition of a "margin security". Investment companies with international securities portfolios, therefore, are prevented from investing in securities issued by foreign companies engaged in securities-related activities. In many instances, these types of companies comprise a substantial portion of a country's financial sector because many foreign countries permit banks and other

[1] The following foreign exchanges are so listed: Australia, Association of Exchanges; Belgium, Brussels; Brazil, Rio de Janeiro and Sao Paulo; Canada, Toronto; France, Paris; Germany, Federation of Exchanges (limited to the Frankfurt and Duesseldorff Exchanges); Hong Kong; Italy, Milan; Japan Tokyo; Netherlands, Amsterdam; Spain; Sweden, Stockholm; Switzerland, Basel, Geneva, and Zurich; United Kingdom, London.

financial institutions to engage in securities-related activities.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16688; (811-5292)]

Strong Precious Metals Fund, Inc.; Application

December 12, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Strong Precious Metals Fund, Inc.

Relevant 1940 Act Section: Section 8(f) and Rule 8f-1 thereunder.

SUMMARY: Applicant seeks an order declaring that it has ceased to be an investment company.

DATE: The application was filed on December 7, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 3, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicant, 100 Heritage Reserve, Menomonee Falls, WI 53051.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272-3420, or Brion R. Thompson, Branch Chief (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. On August 19, 1987, Applicant filed Form N-8A to register under the 1940 Act as an open-end, diversified management investment company. On August 19, 1987, Applicant also filed Form N-1A under the Securities Act of 1933, but such registration statement did not become effective and Applicant never made a public offering of its securities. Applicant is a corporation incorporated under the law of the State of Wisconsin. Applicant does not have any assets or liabilities. Applicant is not a party to any litigation or administrative proceedings. Applicant has no shareholders and is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF STATE

Advisory Committee on International Intellectual Property; Copyright Panel; Meeting

The International Copyright Panel of the Department of State's Advisory Committee on International Intellectual Property will meet in open session on Wednesday, January 11, 1989, in Room 1105 in the Department of State. The meeting will begin at 10:00 a.m. and will conclude by 1:00 p.m.

The meeting will be open to the general public. The following topics will be discussed:

1. Intellectual Property Accomplishments in the 100th Congress.
2. Discussion concerning the WIPO Committee of Experts for Legislation in the Field of Copyright, February 20-March 3, 1988.
3. Report on the Meeting of the WIPO Committee of Experts on Intellectual Property in Respect of Integrated Circuits, Fourth Session, November 7-22, 1988.
4. Report on the meeting of the WIPO Committee of Experts for the Preparation of the Diplomatic Conference for the Conclusion of a Treaty on the International Registration of Audiovisual Works, November 28 through December 2, 1988.
5. Final Report on United States Accession to the Berne Convention for the Protection of Literary and Artistic Works.

The public attending may, as time permits and subject to the instructions of the Chairperson, participate in the discussions or may submit their views in writing to the chairperson prior to, or at the meeting, for later consideration by the Committee.

Members of the public who plan to attend the meeting will be admitted up to the limits of the conference room's capacity. As access to the State Department is controlled, members of the general public who plan to attend the meeting must provide their name, affiliation, address and phone number to Ms. Bobbi Tinsley, Office of Business Practices, Department of State, telephone (202) 647-1825, prior to January 11, 1989. All attendees should use the *Main Entrance* (2201 C Street NW.) of the Department of State Building.

Date: December 6, 1988.

Harvey J. Winter,

Executive Secretary.

BILLING CODE 4710-07-M

CM-8/1243

The U.S. Organization For The International Telegraph And Telephone Consultative Committee (CCITT) National Committee and Study Group A; Meeting

The Department of State announces that the National Committee and Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT), will meet on January 18, 1989 in Room 1205, Department of State, 2201 C Street, NW., Washington, DC. The meeting will begin at 9:30 a.m.

The National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities; provides advice on matters of policy and positions in the preparation for CCITT Plenary Assemblies and meetings of the International Study Groups; provides advice and recommendations in regard to the work of the U.S. CCITT Study Groups; and recommends the disposition of proposed U.S. contributions to the international CCITT which are submitted to the Committee for consideration. Study Group A deals with Telecommunication, Policy and Services.

The purpose of the meeting is to:

Report on and review the results of the IXth Plenary Assembly of CCITT held in Melbourne, Australia, November 14-25, 1988; report and review the results of the World Administrative

Telegraph and Telephone Conference, held in Melbourne, Australia, November 28 to December 8, 1988; review preparatory activities for the Plenipotentiary Conference of the CCITT, and to consider appropriate organization for the U.S. study group subcommittees for the 1989–1992 plenary period.

The purpose of the Study Group A meeting is to review the results of the Joint meeting of CCITT study groups I and XVIII to be held January 9 through 13, 1989 in Geneva, and to consider delayed Contributions for the first meeting of CCITT study group II, scheduled to be held February 21 to March 1, 1989 Geneva. Other business relevant to the activities of the National Committee of U.S. Study Group a may be considered as well.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available.

In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC; telephone (202) 647 5220. All attendees must use the C entrance to the building.

Date: December 15, 1988.

Earl S. Barbely,

Director, Office of Telecommunications and Information Standards; Chairman, U.S. CCITT National Committee.

BILLING CODE 4710–07–M

[CM–8/1244]

Shipping Coordinating Committee; Subcommittee on Safety of Navigation; Meeting

The Working Group on Safety of Navigation of the Subcommittee on Safety of Life at Sea (SOLAS) will hold an open meeting at 9:30 a.m. on Wednesday, January 4, 1989, in room 6103 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of the meeting is to prepare U.S. positions for the 35th session of the Subcommittee on Safety of Navigation of the International Maritime Organization, scheduled for January 23 through 27, 1989. Items of principal interest on the agenda are:

—Decisions of other IMO bodies.
—Routing of ships.
—Reconsideration of Rule 10(d) of the Collision Regulations.
—Infringement of safety zones around offshore structures.
—World-wide navigation system.
—Electronic chart display systems.
—Navigational aids and related equipment including:

1. Guidelines on the use of radar transponders on ships for safety purposes;
2. Coding scheme for radar beacons and transponders;
3. Unification of ARPA symbols; and
4. Revision of resolution A.223(VII)—Performance standards for radio direction-finding systems:

—Revision of resolution A.530(13).
—Officer of the navigational watch acting as the sole look-out.
—Ship reporting systems and reporting requirements.
—Work programme.
—Any other business.

Members of the general public may attend up to the seating capacity of the room.

FOR FURTHER INFORMATION CONTACT: Mr. Edward J. LaRue, Jr., U.S. Coast Guard (G–NSR–3), Washington, DC 20593–0001, Telephone: (202) 267–0416.

Dated: November 23, 1988.

Peter R. Keller,

Executive Secretary, Shipping Coordinating Committee.

BILLING CODE 4910–13–M

Federal Railroad Administration

[FRA Waiver Petition Docket No. PB–88–7]

Train Air Brake Test Program; Burlington Northern Railroad Co.

In accordance with 49 CFR 211.9 and 211.41, notice is given that the Burlington Northern Railroad Company (BN) has requested a permanent waiver of certain provisions of the Federal Railroad Administration's (FRA's) Railroad Power Brake Regulations (49 CFR Part 232) in order to use trains with air

repeater units. Air repeater units (repeaters) are freight cars that have been equipped with a power source (usually a diesel engine), an air compressor, reservoir, and a special valve rack. The valve rack is designed for two purposes: (i) To provide control of the air supply to charge the rear brake pipe and (ii) to relay pneumatic signals from the engineer's brake equipment to the rear portion of the train to apply and release the train air brakes. On a conventional train, the brake pipe is charged from the hauling locomotive. When a repeater is placed in a train, only the brake pipe forward of the repeater is charged by the hauling locomotive; the brake pipe to the rear of the repeater is charged by the compressor in the repeater unit.

BN's specific request is for relief from the obligation to conduct a leakage test on the portion of the train to the rear of the repeater. See 49 CFR 232.12(b)(1), (d)(3), (e), (i)(2), (i)(3); 232.13(d)(1), (d)(2). Trains would operate on various subdivisions of the BN's Chicago, Twin Cities, Billings, Seattle, and Denver Regions.

In support of its application for relief, BN states that it is not possible to make a standard leakage test with a repeater in operation. In the past, in order to assure full compliance with the regulations, FRA has required that repeaters be isolated during train air brake tests by manually repositioning three valves at the valve rack, and then restoring them to their original position after the test is completed. BN regards this activity as too time consuming and as unnecessary.

In further support of its request, BN states that it has been experimenting with repeaters for several years and that safety and train operations are enhanced by their use, especially during very cold weather. BN contends that the improvement in brake pipe gradient provides for better train handling, and the benefits in time saved in charging trains for initial testing far exceed the benefits derived from a leakage test on the rear portion of the trains. For example, on June 3, 4, and 5, 1985, BN conducted tests of a 120-car train that included a repeater. These tests showed definite improvements in gradient, recharge times, release times, and application times as a result of employing a repeater.

FRA conducted a public hearing in Minneapolis, Minnesota, on Tuesday, August 5, 1986, concerning the use of repeater air equipment. Testimony was given by officers from the Burlington Northern Railroad, United Transportation Union, and the Brotherhood of Locomotive Engineers. The purpose of this hearing was to gather information that would assist FRA in making decisions relative to the extension or termination of the repeater air car conditional test waiver. On October 11, 1986, BN was granted a temporary conditional test waiver to operate trains containing repeaters. This test waiver was approved after reviewing data obtained through FRA field investigations, BN test data, and information provided by the air brake equipment manufacturers. It was determined that granting this test waiver would be consistent with railroad safety and should provide invaluable data concerning the feasibility of using repeaters on a more permanent basis.

The conditions of this waiver were as follows:

A. At least 50 percent of the test trains shall receive a separate leakage and gradient test on the portion of the train forward of the repeater must be isolated and a leakage and gradient test be performed on these trains for comparison purposes.

B. All mechanical and operating personnel involved with repeater equipment must be given training and be provided with a copy of BN instructions concerning repeater operations and maintenance, train brake test procedures, and procedures to be followed when a repeater unit fails;

C. All test trains must be provided with an end-of-train monitoring system (telemetry device); and

D. For each month of the test period, a written report shall be submitted to FRA providing detailed test results:

1. A list of repeater locomotives and cars by identification number;

2. A list of test trains operated each day during the month, including the number, symbol, initial terminal, and final destination of each train;

3. The results of the tests described in paragraph A of this Notice;

4. Any air brake problems found during train air brake testing of test trains;

5. Any air brake problems experienced en route;

6. Any train handling problem; and

7. All failures of repeaters including:

a. Identification number.

b. Reason for failure.

c. Action taken at time of failure.

In accordance with the provisions set forth in General Docket Number H–85–4, BN has provided data relative to repeater operations during the winter months of 1986, 1987 and 1988. From December 2, 1986, through February 13, 1987, BN operated repeaters in 143 test trains. During this period, the railroad experienced three train-handling problems whereby they were unable to release the air brakes on the rear portion of the train. This condition occurred because of the inability of the repeater's air compressor to provide adequate supply of air. This failure did not affect the ability to apply brakes. This situation has been corrected by regular testing of the air compressor capability by orifice and by adjustment of diesel engine revolutions per minute (RPM) as required.

During the same period, BN experienced one problem en route because the repeater was inadvertently placed in test mode. To alleviate this problem, BN equipped the repeaters with motion sensors which will electronically lock out the test equipment while the train is in motion. During this test period, BN also encountered transmission problems with 10 rebuilt repeaters. These were manufacturer's design problems and have been corrected. In addition, there were 10 instances of mechanical failures, which consisted of two frozen batteries, four inoperative alternators, one failed water cooling radiator, one broken water temperature switch and one failed air compressor.

The second test period ran from November 20, 1987 through February 15, 1988. During this period, BN conducted 44 in-service tests. There were no train handling problems and no equipment failures en route. The only problems experienced during the train air brake testing was an occasional single car that failed to apply or release its air brakes.

FRA field personnel monitored BN's test procedures for compliance with the conditions of the test waiver. They observed 32 train air brake tests and took exception in three instances. They observed two trains being tested whereby end-of-train telemetry devices were not provided as required by condition "C" of the test waiver; communication was by means of employee hand-held radios. On another occasion, a train was permitted to depart a terminal with excessive brake pipe leakage in the portion of the train ahead of the repeater.

BN has stated that, if it is granted a waiver, the repeaters would be operated in the following manner:

1. Repeaters would be used during cold weather operations only;

2. Trains will be tested for and will have 5 pounds per square inch (psi) or less brake pipe leakage and 15 psi or less brake pipe gradient in the portion ahead of the repeater;

3. Train will be tested for and will have 10 psi or less brake pipe gradient on the portion behind the repeater;

4. All trains utilizing a repeater will be provided with an operative telemetry display unit (RDU) in the cab of the lead hauling locomotive and an end-of-train device (EOT) on the rear of the last car in the portion ahead of the repeater and on the rear of the last car in the train.

FRA is now seeking information and comments of all interested parties on this waiver request. All interested parties are invited to participate in this proceeding through written submissions. FRA does not anticipate scheduling an opportunity for oral comment because the facts do not appear to warrant it. An opportunity to present oral comments will be provided, however, if by February 1, 1989 the party submits a written request for hearing that demonstrates that his or her position cannot be properly presented by written statements.

All written communications concerning this petition should reference "FRA Waiver Petition Docket No. PB–88–7" and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, FRA, 400 7th Street, SW., Washington, DC 20590.

Comments received by February 1, 1989 will be considered before final action is taken in this proceeding. All comments received will be available for examination by interested persons at any time during regular working hours in Room 8201, Nassif Building, 400 7th Street, SW., Washington, DC, 20590.

Issued in Washington, DC December 8, 1988.

J.W. Walsh,

Associate Administrator for Safety.

BILLING CODE 4910–06–M

UNITED STATES INFORMATION AGENCY

Exchange Visitor Program; Skills List

AGENCY: United States Information Agency.

ACTION: Amendment to Exchange Visitor Skills List.

SUMMARY: The Exchange Visitor Skills List is amended to reflect changes in the country skills list for the People's Republic of China to include additional fields.

DATES: This amendment shall become effective January 17, 1989.

ADDRESS: Comments and requests for further information should be addressed to: Mary D. Hitt, Director, Office of Exchange Visitor Facilities Services Staff, USIA, Suite 714, 301 Fourth Street SW., Washington, DC 20547, telephone (202) 485–7964.

SUPPLEMENTARY INFORMATION: Pursuant to the provisions of section 212(e) of the Immigration and Nationality Act, as amended (8 U.S.C. 1182(e)), the Secretary of State designated on April 25, 1972, a list of fields of specialized knowledge or skill (referred to as the Exchange Visitor Skills List) and those countries which clearly required the services of persons engaged in one or more of such fields. Any alien who was a national or resident of one of those countries and obtained an exchange visitor visa and/or became a participant in an Exchange Visitor Program involving a designated field of specialized knowledge or skill after the effective date of that notice was subject to the 2-year home country physical residence requirement of section 212(e) of the Immigration and Nationality Act as provided in section 212(e) and 22 CFR 41.65(b).

Pursuant to the provisions of Reorganization Plan No. 2 of 1977, section 217 of United States Information Agency Authorization Act of August 24, 1982 (Pub. L. 97–241) and Executive Orders Nos. 12048 (March 27, 1978) and 12388 (October 14, 1982) the Director, United States Information Agency, on June 12, 1984 further amended the 1972 Exchange Visitor Skills List, as revised in 1978, to increase the designated fields of specialized knowledge of skills. The 1984 amendment gave notice of the addition of China and the deletion of Cambodia, Iran and Viet-Nam from the skills list as well as the indefinite suspension of Afghanistan. The Exchange Visitor Skills List, as amended in 1984, is used in conjunction with the two prior existing lists.

This Notice amends Public Notice No. 356–37, 37 FR 8099 April 25, 1972; Public Notice No. 591, 43 FR 5910, February 10, 1978; and Public Notice No. 49 FR 24194, June 12, 1984, 51 FR 34701, September 30, 1986, and 52 FR 8700, March 19, 1987.

Accordingly, the Exchange Visitor Skills List is further amended by modifying the Exchange Visitor Skills List for the People's Republic of China to read as follows:

Group (1) All fields listed in Part I.
Group (2) All fields listed in Part I.
Group (3) All fields listed in Part I.
Group (4) All fields listed in Part I.
Group (5) All fields listed in Part I.
Group (6) All fields listed in Part I.
Group (7) All fields listed in Part I.
Group (8) All fields listed in Part I.
Group (9) All fields listed in Part I.
Group (10) All fields listed in Part I.

Dated: December 7, 1988.

R. Wallace Stuart,

Acting General Counsel, United States Information Agency.

[FR Doc. 88–28999 Filed 12–15–88; 8:45 am]

BILLING CODE 8230–01–M

VETERANS ADMINISTRATION

Agency Information Collection Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists the following information: (1) the responsible department or staff office; (2) the title of the collection(s); (3) the agency form number(s), if applicable; (4) a description of the need and its use; (5) how often the information collection must be completed, if applicable; (6) who will be required or asked to report; (7) an estimate of the number of responses; (8) an estimate of the total number of hours needed to respond; and (9) an indication of whether section 3504(h) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from Patti Viers, VA Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420 (202) 233–3172.

Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer on or before January 17, 1989.

Dated: December 1, 1988.

By direction of the Administrator.

David N. Stone,

Executive Assistant, Office of Information Management and Statistics.

Per Diem Rates for Eligible Veterans in State Homes

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Administration (VA) is publishing the actual per diem rates for eligible veterans residing in State Veterans Homes as required by 38 CFR 17.166c. The Veterans' Benefits and Services Act of 1988 established new rates; the effect of the change will be to increase the rates.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Carolyn Babich (182B), Chief, State Home Per Diem Program, Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233–3679.

SUPPLEMENTARY INFORMATION: At 38 CFR 17.166c it states that the VA will publish any change of actual per diem rates for eligible veterans residing in State Veterans Homes in the **Federal Register**. On May 20, 1988, the President signed Pub. L. 100–322, Veterans' Benefits and Services Act of 1988, which increased the per diem rates, effective January 1, 1988. The new per diem rates are set forth below.

Per Diem Rates for Eligible Veterans in State Veterans Homes

Domiciliary Care, $8.80.
Nursing Home Care, $20.35.
Hospital Care, $20.35.

Dated: November 30, 1988.

Thomas K. Turnage,
Administrator.

Friday, December 16, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Tuesday, December 20, 1988.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS:

MATTERS TO BE CONSIDERED:

Open to the Public

1. Delegations of Authority

The Commission will consider issues related to Commission Delegations of Authority.

2. Voluntary Standards Policy: Final Amendments

The Commission will consider amendments to the Commission's regulations (16 CFR Parts 1031 and 1032) concerning staff participation in voluntary standard activities.

3. Petition PP 88-1, Medroxyprogesterone Acetate Tablets

The staff will brief the Commission on petition PP 88-1 from the Upjohn Co. requesting an exemption of medroxyprogesterone acetate tablets from the child-resistant packaging requirements for oral prescription drugs.

Closed to the Public

4. Compliance Status Report

The staff will brief the Commission on the status of various compliance matters.

5. Enforcement Matter OS #3038

The staff will brief the Commission on enforcement matter OS #3038.

FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL: 301-492-5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Avenue, Bethesda, Md. 20207 302-492-6800.

December 14, 1988.

Sheldon D. Butts,

Deputy Secretary.

BILLING CODE 6735-01-M

SECURITIES AND EXCHANGE COMMISSION

Agency Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of December 19, 1988.

An open meeting will be held on Monday, December 19, 1988, at 10:00 a.m. A closed meeting will be held on Tuesday, December 20, 1988, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open metting scheduled for Monday, December 19, 1988, at 10:00 a.m., will be:

1. Consideration of a petition to modify certain interpretations published in the codification of financial Reporting Policies regarding accountants' independence when there are certain business relationships between accountants and their audit clients. For further information, please contact John Riley at (202) 272-2130.
2. Consideration of an application of Delta Government Options Corp. for registration as a clearing agency under Section 17A of the Securities Exchange Act of 1934. For further information, please contact Richard Konrath at (202) 272-2775.
3. Consideration of whether to issue for comment a release proposing Rule 15c2-10 under the Securities Exchange Act of 1934 to govern the operation of proprietary trading systems that are operated as facilities of national securities exchanges or associations and a conforming amendment to Rule 3a12-7 under the Securities Exchange Act of 1934. For further information, please contact Gordon K. Fuller at (202) 272-2414 or Eugene Lopez at (202) 727-2828.
4. Consideration of the recommendation with respect to the request of RMJ Securities Corporation ("RMJ Securities") and its subsidiary RMJ Options Trading Corporation, that the staff issue a no-action letter with respect to the non-registration of RMJ Securities' option trading system as a national securities exchange under Sections 3(a)(1) and 6 of the Securities Exchange Act

of 1934. For further information, please contact Gordon K. Fuller at (202) 272–2414

5. Consideration of whether to propose for comment amendments to its net capital rule. Under the proposal, Rule 15c3–1 under the Securities Exchange Act of 1934 will be amended to make the rule applicable to all specialists, except certain market makers, on national securities exchanges and to allow specialists one day in which to meet the haircuts required by the rule. For further information, please contact Michael A. Macchiaroli at (202) 272–2904 or Jerry W. Carpenter at (202) 272–3128.

6. Consideration of whether to publish two releases relating to Regulation D, the limited offering exemptions from the registration requirements of the Securities Act of 1933. The first release would add certain government sponsored employee benefit plans to the definition of "accredited investor". The second release would request public comment on a number of proposals designed to provide for a substantial and good faith compliance standard with the terms, conditions and requirements of Regulation D. For further information, contact Richard K. Wulff or William E. Toomey at (202) 272–2644.

The subject matter of the closed meeting scheduled for Tuesday, December 20 1988, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.

Settlement of administrative proceedings of an enforcement nature.

Institution of injunctive actions.

Settlement of injunctive actions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kevin Fogarty at (202) 272–2300.

Shirley E. Hollis,

Assistant Secretary.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Coastal Barrier Resources Act; Availability of the Supplemental Legislative Environmental Impact Statement and Report and Recommendations to Congress on the Coastal Barrier Resources System

AGENCY: Department of the Interiors.

ACTION: Notice of availability.

SUMMARY: Under the provisions of section 10 of the Coastal Barrier Resources Act of 1982 (Act) (16 U.S.C. 3509), the Secretary of the Interior is required to prepare and submit to the appropriate Committees of the House of Representatives and the Senate a report regarding the Coastal Barrier Resources System (System). The report must include: Recommendations for the conservation of fish, wildlife, and other natural resources of the System; recommendations for additions to or deletions from the System; and recommendations for modifications to the boundaries of System units established by the Act.

In 1983 the Secretary of the Interior established a Coastal Barriers Study Group and instructed it to develop an inventory of undeveloped coastal barriers and to review management alternatives that foster conservation of the System's natural resources. The draft inventory maps were made available for public comment on March 4, 1985 (50 FR 8689), and the draft conservation alternatives on May 1, 1985 (50 FR 18576). The public comment period closed on September 30, 1985. Based on the comments received, the Assistant Secretary for Fish and Wildlife and Parks developed draft recommendations for conservation alternatives and additions to and deletions from the system which were made available for public comment on March 25, 1987 (52 FR 9618). The comment period closed on June 23, 1987. In addition, a draft Supplemental Legislative Environmental Impact Statement (LEIS) on the proposed recommendations was made available for public comment on February 1, 1988 (53 FR 2792). The comment period on the LEIS closed on March 17, 1988. All comments received on the various documents have been considered in the final supplemental LEIS.

This notice announces the availability of the final supplemental LEIS and the report containing the recommendations of the Assistant Secretary for Fish and Wildlife and Parks. The report will become final upon formal transmittal to Congress.

FOR FURTHER INFORMATION CONTACT: Mr. Frank McGilvrey, Coastal Barriers Coordinator, Room 403, Hamilton Building, Department of the Interior, Washington, DC 20240, (202) 343–1095.

SUPPLEMENTARY INFORMATION: On October 18, 1982, President Reagan signed the Coastal Barrier Resources Act (Act) into law (16 U.S.C. 3509). The Act establishes the Coastal Barrier Resources System (System) as referred to and adopted by Congress and prohibits all new Federal expenditures and financial assistance within the System except as provided under the Act. The provisions of the Act became effective immediately except the statutory ban on new Federal flood insurance within units of the System, which went into effect on October 1, 1983.

Section 10 of the Act requires the Secretary of the Interior to submit a report on the System to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works in the Senate. The report is required to contain two essential elements: (1) Recommendations for conservation of the fish, wildlife, and other natural resources of the System through an evaluation and comparison of management alternatives available to Federal, State, and local governments and the private sector; and (2) recommendations for additions to or deletions from the System, and for modifications to the boundaries of existing units in the System. In addition, the report must contain a summary of the public comments received and an analysis of the impact of general revenue sharing grants on undeveloped coastal barriers. The Secretary was required to consult with the Governors of the affected States regarding the proposed recommendations, and to include the Governors' comments in the report.

Over 2,300 comments concerning the inventory and draft management alternatives were received during the 1985 public comment period. After careful consideration of the comments from the public, affected Governors, Federal, State and local agencies, and Congress, and review of the requirements and objectives of the Act, the Assistant Secretary for Fish and Wildlife and Parks submitted his proposed recommendations for public comment. Over 6,150 comments were received during the 1987 comment period. The Assistant Secretary for Fish and Wildlife and Parks has made the following recommendations, which will become final upon formal transmittal of the report, recommendations, and LEIS to Congress:

- Add undeveloped, unprotected coastal barriers along the Atlantic and Gulf coastlines which have not been previously considered and rejected by Congress, including the Florida Keys, Puerto Rico, and the Virgin Islands to the System; but exempt U.S. Highway 1 in the Florida Keys for safety reasons.
- Add all associated aquatic habitat to existing and recommended new units of the System.
- Exclude all existing Federal navigation channels by reference.
- Add secondary barriers within large embayments to the System.
- Exclude "otherwise protected" areas, but add all privately owned property within these areas to the System.
- Add "otherwise protected" areas to the System if they are made available for development that is inconsistent with the Act's purposes.
- Delete military and Coast Guard lands, but add these and other Federal lands to the System if they are declared excess properties and are made available for development inconsistent with the purposes of the Act.
- Adjust boundaries of existing units to delete areas fully developed in 1982 with more than one insurable structure per 5 acres; and add those coastal barrier areas which are undeveloped and not previously considered by Congress.
- Continue the Federal policy to employ the user fee concept in the acquisition of undeveloped coastal barriers, as appropriate.
- Require each Federal agency to self-certify that they have complied with the provisions of the Act and submit notice of that certification to Congress annually.
- Require a Federal study in consultation with the States to develop additional options to address Federal subsidies on all coastal barrier areas, both developed and undeveloped, for consideration by Congress.

It is important to note that the Department of the Interior is required to make recommendations to Congress, but there will be no modifications to the System or the Act unless Congress takes action. The Congress will decide whether to accept, reject, or modify the recommendations.

The report and recommendations to Congress have been prepared in 28 separate volumes as follows:

Executive Summary—A summary of the report and general recommendations.

Volume 1—A detailed report and general recommendations on conservation alternatives.
Appendix A—An analysis of the shoreline change and wetland loss in the System.
Appendix B—A summary report of coastal barriers of the Great Lakes.
Appendix C—A summary report of coastal barriers of Hawaii and American Samoa.
Appendix D—A summary report of coastal barriers of the Pacific Coast.

The report and recommendations for each Atlantic and Gulf Coast State are as follows:

Volume 2—Maine
Volume 3—Massachusetts
Volume 4—Rhode Island
Volume 5—Connecticut
Volume 6—New York
Volume 7—New Jersey
Volume 8—Delaware
Volume 9—Maryland
Volume 10—Virginia
Volume 11—North Carolina
Volume 12—South Carolina
Volume 13—Georgia
Volume 14—Florida (East Coast)
Volume 15—Florida (West Coast)
Volume 16—Alabama
Volume 17—Mississippi
Volume 18—Louisiana
Volume 19—Texas (North Coast)
Volume 20—Texas (South Coast)
Volume 21—Puerto Rico
Volume 22—Virgin Islands

Individual volumes are available upon request. The original maps may be inspected at 1375 "K" Street, NW., Room 414, Washington, DC Call (202) 343–1095 to arrange an appointment.

Date: December 9, 1988.

Becky Norton Dunlop,

Assistant Secretary for Fish and Wildlife and Parks.

[AIDAR Notice 89–1]

Miscellaneous Amendments to Acquisition Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The A.I.D. Acquisition Regulation (AIDAR) is being amended to correct various typographical errors, update cross-references, improve the presentation and clarity of some material, and comply with new legislative requirements. All of the changes are considered administrative and editorial.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: M/SER/PPE, Mr. James M. Kelly, Room 1600I, SA–14, Agency for International Development, Washington, DC 20523. Telephone (703) 875–1534.

SUPPLEMENTARY INFORMATION: The changes being made by this Notice are not considered significant rules subject to FAR 1.301 or Subpart 1.5. This Notice is exempted from the requirements of Executive Order 12291 by OMB Circular 85–7. This Notice will not have an impact on a substantial number of small entities, nor does it establish any information collection as contemplated by the Regulatory Flexibility Act and Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 701, 702, 728, 731, 733, 736, 742, 752, 753, and Appendices to Chapter 7

Government procurement.

For the reasons set out in the Preamble, Chapter 7 of Title 48 of the Code of Federal Regulations is amended as follows:

1. The authority citations in Parts 701, 702, 728, 731, 733, 736, 742, 752, 753, and Appendices to Chapter 7 continue to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673, 3 CFR 1979 Comp., p. 435.

PART 701—FEDERAL ACQUISITION REGULATION SYSTEM

Subpart 701.1—Purpose, Authority, Issuance

2. Section 701.105 is revised to read as follows:

701.105 OMB approval under the Paperwork Reduction Act.

(a) The following information collection and recordkeeping requirements established by A.I.D. have been approved by OMB, and assigned an OMB control number and approval/expiration dates as specified below:

AIDAR segment	OMB Control Number	Expiration date	Burden hours per report
733.7003(c)	0412–0520	12/31/88	40
737.270(e)	0412–0520	04/30/90	.5

752.7027(a)	0412–0520	04/30/90	2.5
752.7027(b)	0412–0520	04/30/90	2.5

(b) Public reporting burden for these collections of information is estimated as shown in paragraph (a) above, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspects of these collections of information, including suggestions for reducing the burden, to the Agency for International Development, Washington, DC 20523, Attention: M/SER/PPE, Room 1600I, SA–14, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20523.

PART 702—DEFINITIONS OF WORDS AND TERMS

Subpart 702.170—Definitions

702.170–13 [Amended]

3. Paragraph (c)(4) of section 702.170–13, *Procurement Executive,* is amended by removing the reference to "30.201–2", replacing it with "30.201–5".

PART 728—BONDS AND INSURANCE

Subpart 728.3—Insurance

728.302 [Removed]

4. Section 728.302, *Notice of cancellation or change,* is removed.

5. Section 728.305, *Overseas worker's compensation and war-hazard insurance,* is redesignated as section 728.305–70 and the heading is revised to read as follows:

728.305–70 Overseas worker's compensation and war-hazard insurance—waivers and A.I.D. insurance coverage.

6. Section 728.307–2 is revised to read as follows:

728.307–2 Liability.

(c) *Automobile liability.* In order to ensure that private automobiles used by contractor employees stationed overseas under an A.I.D. contract are properly insured, A.I.D. has established minimum required coverages as a supplement to the FAR clause at 52.228–7. This supplemental coverage is specified in AIDAR 752.228–7, and is to be used in all A.I.D.-direct contracts involving performance overseas.

7. A new section 728.309 is added to read as follows:

728.309 Contract clause for worker's compensation insurance.

(a) Because of the volume of projects performed overseas resulting in contracts which require worker's compensation insurance, A.I.D. has contracted with an insurance carrier to provide the required insurance for all A.I.D. contractors. It is therefore necessary to supplement the FAR clause at 52.228–3 with the additional coverage specified in AIDAR 752.228–3. The coverage specified in AIDAR 752.228–3 shall be used in addition to the coverage specified in FAR 52.228–3 in all A.I.D.-direct contracts involving performance overseas.

8. A new section 728.313 is added to read as follows:

728.313 Contract clauses for insurance of transportation or transportation-related services.

(a) A.I.D. is required by law to include language in all its direct contracts and subcontracts ensuring that all U.S. marine insurance companies have a fair opportunity to bid for marine insurance when such insurance is necessary or appropriate under the contract. A.I.D. has therefore established a supplementary preface to the clause at FAR 52.228–9. This supplementary preface is set forth in AIDAR 752.228–9, and is required for use in any A.I.D.-

direct contract where marine insurance is necessary or appropriate.

728.370 [Removed]

9. Section 728.370, Contract clause, is removed.

PART 731—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 731.2—Contracts With Commercial Organizations

10. Section 731.205–6 is amended by revising paragraphs (a)(2) and (a)(3)(i) to read as follows:

731.205–6 Compensation for personal services.

(a) * * *

(2) Direct compensation of personnel is reimbursable in accordance with FAR 31.205–6, AIDAR 731.205–6, and the contractor's established policies and procedures. The contractor's policies, procedures and practices shall be the same as used in its other contracts with the U.S. Government, and shall have been accepted by the U.S. Government agency assigned primary audit responsibility for the contractor. Such policies, procedures and practices shall be preserved and made available as part of the contractor's records which are required to be preserved and made available by the "Examination of Records by the Comptroller General" and "Audit" clauses of this contract.

(3) * * * (i) Contractor employees serving overseas under a contract, who do not qualify for a U.S. tax exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), are eligible to receive a salary supplement (overseas recruitment incentive). The overseas recruitment incentive (ORI) shall not exceed a maximum of ten percent of the base salary per individual for the period of eligible services. This supplement, if offered by the contractor, shall be paid at the end of an employee's tour of duty overseas. The contractor shall take all reasonable and prudent steps to ensure that any employee who is paid an ORI has not claimed or received the section 911 exemption.

* * * * *

Subpart 731.3—Contracts With Educational Institutions

11. Section 731.371 is amended by revising paragraph (c)(1) to read as follows:

731.371 Compensation for personal services.

* * * * *

(c) * * * (1) Contractor employees serving overseas under a contract, who do not qualify for a U.S. tax exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), are eligible to receive a salary supplement (overseas recruitment incentive). The overseas recruitment incentive (ORI) shall not exceed a maximum of ten percent of the base salary per individual for the period of eligible services. This supplement, if offered by the contractor, shall be paid at the end of an employee's tour of duty overseas. The contractor shall take all reasonable and prudent steps to ensure that any employee who is paid an ORI has not claimed or received the section 911 exemption.

* * * * *

Subpart 731.7—Contracts With Nonprofit Organizations

12. Section 731.772 is amended by revising paragraph (c)(1) to read as follows:

731.772 Compensation for personal services.

* * * * *

(c) * * * (1) Contractor employees serving overseas under a contract, who do not qualify for a U.S. tax exemption for overseas income provided under section 911 of the U.S. Internal Revenue Code (26 U.S.C. 911), are eligible to receive a salary supplement (overseas recruitment incentive). The overseas recruitment incentive (ORI) shall not exceed a maximum of ten percent of the base salary per individual for the period of eligible services. This supplement, if offered by the contractor, shall be paid at the end of an employee's tour of duty overseas. The contractor shall take all reasonable and prudent steps to ensure that any employee who is paid an ORI has not claimed or received the section 911 exemption.

PART 733—PROTESTS, DISPUTES AND APPEALS

Subpart 733.70—A.I.D. Procedures

733.7002 [Amended]

13. Section 733.7002, Definitions, is amended by:

(a) Removing paragraph (b), the definition of *Head of the Contracting Activity;*

(b) Redesignating paragraphs (c) and (d) as (b) and (c) respectively; and

(c) In the redesignated paragraphs (b) and (c), removing the references to "HCA", replacing them with "Contracting Officer".

14. Paragraph (d) of section 733.7003, *Filing of protest;* paragraph (b) of section 733.7004, *Time for filing;* paragraphs (a) and (b) of section 733.7005, *Notice of protest;* paragraphs (a) introductory text and (b) of section 733.7007, *Withholding of award and suspension of contract performance;* and paragraphs (a) and (b) of section 733.7008, *Time for and notification of the decision on the protest* are all amended by removing the references to "HCA", replacing them with "Contracting Officer".

PART 736—CONSTRUCTION AND ARCHITECT—ENGINEER CONTRACTS

Subpart 736.6—Architect—Engineer Services

736.603 [Amended]

15. Section 736.603, *Collecting data on and appraising firms' qualifications,* is amended by removing the reference to "subpart 705.001", replacing it with "section 705.002".

PART 742—CONTRACT ADMINISTRATION

Subpart 742.7—Indirect Cost Rates

16. Section 742.770, *Negotiated Indirect Cost Rate Agreement,* is amended by removing the parenthetical phrase "(From AID 1420–47, as set forth in subsection 753.270–1)," from the first sentence of the section.

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 752.2—Texts of Provisions and Clauses

752.228–70 [Removed]

17. Section 752.228–70, *Insurance—Worker's Compensation, Private Automobiles, Marine and Air Cargo,* is removed.

18. A new section 752.228–3 is added as follows:

752.228–3 Worker's Compensation Insurance (Defense Base Act).

As prescribed in 728.309, the following supplemental coverage is to be added to the clause specified in FAR 52.228–3 by the A.I.D. contracting officer.

The Contractor agrees to procure Defense Base Act (DBA) insurance coverage requirements pursuant to a contract between A.I.D. and its insurance carrier unless: The Contractor has a DBA self insurance program approved by the Department of Labor; has an approved retrospective rating agreement for DBA; or has entered into a long term agreement for DBA coverage with an

underwriter or agent prior to November 14, 1977. However, if it would be economical to cancel the long-term coverage and pay short-term rates, the Contractor is required to do so.

If the Contractor secures a waiver of DBA coverage for its employees who are not citizens of the United States, residents of, or hired in the United States, or if A.I.D. has secured such a waiver, the Contractor agrees to comply with the conditions of such waiver.

The Contractor further agrees to insert in all subcontracts hereunder to which the DBA is applicable, a clause similar to this clause, including this sentence, imposing on all subcontractors a like requirement to provide overseas workmen's compensation insurance coverage and obtain DBA coverage under the A.I.D. requirements contract.

19. A new section 752.228–7 is added as follows:

752.228–7 Insurance—Liability to Third Persons.

As prescribed in 728.307–2(b), the following paragraph is to be added to the clause specified in FAR 52.228–7 as either paragraph (h) (if FAR 52.228–7 *Alternate I* is not used) or (i) (if FAR 52.228–7 Alternate I is used):

( ) *Insurance on private automobiles.* If the Contractor or any of its employees or their dependents transport or cause to be transported (whether or not at contract expense) privately owned automobiles to the Cooperating Country, or they or any of them purchase an automobile within the Cooperating Country, the Contractor agrees to make certain that all such automobiles during such ownership within the Cooperating Country will be covered by a paid-up insurance policy issued by a reliable company providing the following minimum coverages or such other minimum coverages as may be set by the Mission Director, payable in United States dollars or its equivalent in the currency of the Cooperating Country: injury to persons, $10,000/$20,000; property damage, $5,000. The premium costs for such insurance shall not be a reimbursable cost under this contract. Copies of such insurance policies shall be preserved and made available as part of the Contractor's records which are required to be preserved and made available by the "Examination of Records by the Comptroller General" and "Audit" clauses of this contract.

20. A new 752.228–9 is added as follows:

752.228–9 Cargo Insurance.

As prescribed in 728.313(a), the following preface is to be used preceding the text of the clause at FAR 52.228–9:

Preface: To the extent that marine insurance is necessary or appropriate under this contract, the contractor shall ensure that U.S. marine insurance companies are offered a fair opportunity to bid for such insurance. This requirement shall be included in all subcontracts under this contract.

Subpart 752.70—Texts of A.I.D. Contract Clauses

21. The contract clause in section 752.7001, *Biographical Data*, is amended by changing the clause date and by revising paragraph (a) of the clause to read as follows:

752.7001 Biographical data.

* * * * *

Biographical Data (Dec. 1988)

(a) The Contractor agrees to furnish to the Contracting Officer on AID Form 1420–17, "Contractor Employee Biographical Data Sheet", biographical information on the following individuals to be employed in the performance of the contract: (1) All individuals to be sent outside of the United States, (2) any employees designated as "key personnel". Biographical data in the form usually maintained by the Contractor on the other individuals employed under the contract shall be available for review by A.I.D. at the Contractor's headquarters. A supply of AID Form 1420–17 will be provided with this contract. The Contractor may reproduce additional copies as necessary.

* * * * *

22. Section 752.7014 is revised as follows:

752.7014 Notice of Changes in Travel Regulations.

The following clause is for use in cost-reimbursement contracts involving work overseas.

Notice of Changes in Travel Regulations (Dec. 1988)

(a) Changes in travel, differential, and allowance regulations shall be effective on the beginning of the contractor's next pay period following the effective date of the change as published in the Standardized Regulations (Government Civilians, Foreign Areas).

(b) The Standardized Regulations (Government Civilians Foreign Areas) is available by subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

23. The contract clause in section 752.7028, *Differentials and Allowances*, is amended by changing the clause date and revising the parenthical introduction to the clause to read as follows:

752.7028 Differential and Allowances.

* * * * *

Differentials and Allowances (Dec. 1988)

(This clause does not apply to TCN or CCN employees. TCN and CCN employees are not eligible for differentials and allowances, unless specifically authorized by the cognizant Assistant Administrator or Mission Director. A copy of such authorization shall be retained and made available as part of the contractor's records which are required to be preserved and made available by the "Examination of Records by the Comptroller General" and "Audit" clauses of this contract).

24. The contract clause in paragraph (b), *Alternate 71*, of section 752.7031, *Leave and Holidays*, is amended by revising the clause date and paragraph (d) of the contract clause to read as follows:

752.7031 Leave and Holidays.

* * * * *

(b) * * *

Leave and Holidays (Dec. 1988)

* * * * *

(d) *Leave Records.* The contractor's leave records shall be preserved and made available as part of the contractor's records which are required to be preserved and made available by the "Examination of Records by the Comptroller General" and "Audit" clauses of this contract.

* * * * *

752.7031 [Amended]

25. The contract clause in paragraph (c), *Alternate 72*, of section 752.7031, *Leave and Holidays*, is amended by changing the clause date from "(APR 1984)" to "(DEC 1988)", and by removing the reference to "paragraphs (a) (1) and (2) of this section" appearing in paragraph (b)(3) of the contract clause, replacing it with "paragraphs (b) (1) and (2) of this clause".

26. Part 753 is revised to read as follows:

PART 753—FORMS

Subpart 753.1—General

753.107 Obtaining forms.

Subpart 753.2—Prescription of Forms

753.270 Prescription of AID Forms.

Subpart 753.3—Illustrations of Forms

753.300 Scope of Subpart.

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979 44 FR 56673, 3 CFR 1979 Comp., p. 435.

Subpart 753.1—General

753.107 Obtaining forms.

Copies of any AID Form referenced in the AIDAIR may be obtained from the Agency for International Development, Washington, DC 20523, Attention: SER/MO/CPM/M, Distribution, Room B–929 N.S., or from the congnizant Contracting Officer.

Subpart 753.2—Prescription of Forms

752.270 Prescription of AID forms.

The requirements for use of AID forms are contained in Parts 701 through 752

Competitive Research Grants Program for Fiscal Year 1989; Revisions to the Solicitation of Applications for the Competitive Research Grants Program

Notice is hereby given that the submission date for proposals under the Depletion of Stratospheric Ozone as Related to Crop Productivity program area, that is included in the Notice of the Competitive Research Grants Program for Fiscal Year 1989; Solicitation of Applications for the Competitive Research Grants Program, found at 53 FR 40194–40199 (October 13, 1988) is extended. *Proposals submitted under the Depletion of Stratospheric Ozone as Related to Crop Productivity program area now must be postmarked by April 10, 1989,* and received in time to permit adequate peer panel review. The submission date is being extended to allow USDA and the scientific community time to further examine this area of research which has been included in the Competitive Research Grants Program for the first time. It is possible that this program area may be revised to further specifically identify subareas, but the overall scope of the program area will remain unchanged. If such revisions are made, they will be announced in a subsequent notice in time for proper consideration by potential applicants. All other submission dates remain the same as announced on October 13, 1988.

In addition, to assure consistency in the evaluation process, proposals submitted under this program area will now be reviewed by a single peer panel instead of by panels which will review proposals submitted under other plant science areas of the Competitive Research Grants Program as originally announced. If necessary, further information may be obtained by contacting Machi Dilworth, Associate Program Manager, at (202) 475–5042.

Done at Washington, DC, this 12th day of December 1988.

John Patrick Jordan,

Administrator, Cooperative State Research Service.

The President

Proclamation 5923—To Implement the United States-Canada Free-Trade Agreement

Federal Register
Vol 53, No. 242
Friday, December 16, 1988

Presidential Documents

Title 3—

The President

Proclamation 5923 of December 14, 1988

To Implement the United States-Canada Free-Trade Agreement

By the President of the United States of America

A Proclamation

1. On January 2, 1988, I entered into the United States-Canada Free-Trade Agreement (the Agreement). The Agreement and certain letters exchanged between the Governments of Canada and the United States were approved by the Congress, in section 101(a) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (the Implementation Act) (Pub. L. 100–449, 102 Stat. 1851).

2. Section 201(a) of the Implementation Act authorizes the President to proclaim such modifications or continuance of existing duties, such continuance of existing duty-free or excise treatment, and such additional duties, as the President determines are necessary or appropriate to carry out Article 401 of the Agreement (including the schedule of duty reductions with respect to goods originating in the territory of Canada set forth in Annexes 401.2 and 401.7).

3. Section 202 of the Implementation Act provides for certain rules of origin. I have determined that it is necessary to include in the Harmonized Tariff Schedule of the United States (HTS) the rules of origin set forth in section 202 (including the "Annex Rules," as that term is defined in section 202(d)). Further, pursuant to section 202(e) of the Implementation Act, in order to conform the definition of Canadian articles of original motor-vehicle equipment for purposes of the Automotive Products Trade Act of 1965 (19 U.S.C. 2001 *et seq.*) with the rules set forth in Annex 301.2 of the Agreement, I have determined that it is necessary to modify the pertinent definition set forth in general note 3(c)(iii) of the HTS.

4. Pursuant to sections 503 and 504(c) of the Trade Act of 1974, as amended (the Trade Act) (19 U.S.C. 2463 and 2464(c)), I have determined that certain preferential tariff treatment previously afforded for purposes of the Generalized System of Preferences (GSP) should be continued in the HTS subheadings established by Annex II to this Proclamation.

5. Pursuant to section 466 of the Tariff Act of 1930, as amended (19 U.S.C. 1466), the rate of duty imposed on equipments, or any part thereof, including boats, purchased for, or the repair parts or the materials to be used, or the expenses of repairs made in a foreign country upon a U.S.-documented vessel at its first arrival in any port of the United States is 50 percent ad valorem. Such duty does not apply to the cost of repair parts, materials, or expenses of repairs in a foreign country upon a U.S. civil aircraft, as defined in general note 3(c)(iv) to the HTS. I have determined that it is necessary or appropriate to provide for the staged reductions in the rate of duty on such equipments, or any part thereof, originating in the territory of Canada and the expenses of repairs made in the territory of Canada upon U.S.-documented vessels (except such civil aircraft), as set forth in Annex 401.2 of the Agreement.

6. Section 1204(b) of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) (19 U.S.C. 3004(b)) confers authority upon the President to proclaim such modifications to the HTS as are necessary or appropriate to implement the applicable provisions of Executive actions taken after January 1, 1988 and before January 1, 1989.

VOL 53 ISS 242 DE 16 1988 UMI

7. Section 604 of the Trade Act (19 U.S.C. 2483) confers authority upon the President to embody in the HTS the substance of relevant provisions of that Act, of other Acts affecting import treatment, and of actions taken thereunder.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and statutes of the United States, including but not limited to sections 201 and 202 of the Implementation Act, section 1204 of the 1988 Act, and section 604 of the Trade Act, do proclaim that:

(1) In order to specify the symbol pertaining to preferential duty treatment for goods originating in the territory of Canada, general note 3(c)(i)(A) to the HTS is modified by inserting, immediately after the line reading "Agreement on Trade in Civil Aircraft . . . . C", a new line reading "United States-Canada Free-Trade Agreement . . . . . CA".

(2) In order to implement the duty treatment provided by the Agreement and to set forth rules for determining the country of origin of goods imported into the customs territory of the United States for purposes of the Agreement and of the Automotive Products Trade Act, general note 3 to the HTS is modified as set forth in Annex I to this Proclamation.

(3) In order to provide preferential duty treatment to particular goods originating in the territory of Canada, the HTS is modified as set forth in Annex II to this Proclamation.

(4) In order to provide duty-free entry to particular goods originating in the territory of Canada, the column entitled "Rates of Duty 1-Special" for each of the HTS subheadings enumerated in Annex III to this Proclamation is modified as set forth in such Annex.

(5) In order to provide staged reductions in duties for particular goods originating in the territory of Canada the rate column entitled "Rates of Duty 1-Special" for each of the HTS subheadings enumerated in Annex IV to this Proclamation is modified—

(a) by inserting in such column for each such subheading the rate of duty specified for such subheading in the first dated Annex column under the heading "Rates of Duty, effective with respect to goods originating in the territory of Canada and entered on or after—", followed by the symbol "CA" in parentheses, and

(b) effective on the date specified for the second dated Annex column under such heading and on each of the subsequent dated Annex columns, by deleting from each such subheading the "Canada" rates of duty in the HTS column entitled "Rates of Duty 1-Special" in effect on the date before the respective dates provided therein, and by inserting in lieu thereof the rates of duty specified in the next Annex column as effective on or after the respective date indicated for such column.

(6) In order to implement staged reductions in the rate of duty otherwise applicable under section 466 of the Tariff Act of 1930 to the equipments, or any part thereof, including boats, originating in the territory of Canada and the expenses of repairs made in the territory of Canada upon U.S.-documented vessels (other than civil aircraft, as defined in general note 3(c)(iv) of the HTS), such equipments, parts (including boats), and expenses of repairs shall be subject to duty at a rate of 45 percent ad valorem, effective with respect to any U.S.-documented vessel arriving in any port of the United States on or after January 1, 1989. Effective with respect to any U.S.-documented vessel (other than civil aircraft) arriving in any port of the United States on or after January 1 in each of the following years, the rate of duty set forth opposite the appropriate year shall be assessed on such equipments, parts, and repairs:

1990—40% ad valorem
1991—35% ad valorem
1992—30% ad valorem

BEST COPY AVAILABLE

1993—25% ad valorem
1994—20% ad valorem
1995—15% ad valorem
1996—10% ad valorem
1997—5% ad valorem
1998 and thereafter—Free

(7) All previously issued Proclamations and Executive orders are superseded to the extent inconsistent with this Proclamation.

(8)(a) The amendments made by paragraph (5)(b) of this Proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the dates indicated for the respective Annex columns.

(b) Except as provided in paragraph (a), this Proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 1, 1989, or, if the Agreement does not enter into force on January 1, 1989, on or after such later date as the Agreement enters into force.

(c) If the date of entry into force is later than January 1, 1989, the United States Trade Representative shall publish notice of that later date in the **Federal Register**. All other references to January 1, 1989 in this Proclamation and its annexes shall then be deemed to be that later date of entry into force.

IN WITNESS WHEREOF, I have hereunto set my hand this 14th day of December, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and thirteenth.

ANNEX I

MODIFICATIONS TO GENERAL NOTE 3(C) TO THE HARMONIZED TARIFF SCHEDULE OF THE UNITED STATES

General note 3(c) to the Harmonized Tariff Schedule of the United States is modified as set forth below:

1. Subdivision (iii)(A)(1) is modified by striking out everything after "article which" and by inserting in lieu thereof "originates in Canada, as defined in subdivision (c)(vii) of this note."; and subdivision (iii)(A)(2) is modified by inserting after "component" the phrase "originating in Canada, as defined in subdivision (c)(vii) of this note, and".

2. The following new subdivision (vii) is inserted in appropriate sequence:

"(vii) United States-Canada Free-Trade Agreement Implementation Act of 1988.

(A) Goods originating in the territory of Canada that are described in Annex 401.2(B) of the United States-Canada Free-Trade Agreement, entered into on January 2, 1988, are subject to duty as provided herein. Goods originating in the territory of Canada, as defined in subdivision (c)(vii)(B) of this note, that are imported into the customs territory of the United States and that are entered under a subheading for which a rate of duty appears in the "Special" subcolumn followed by the symbol "CA" in parentheses are eligible for the tariff treatment set forth in the "Special" subcolumn, in accordance with section 201 of the United States-Canada Free-Trade Agreement Implementation Act of 1988.

(B) For the purposes of subdivision (c)(vii) of this note, goods imported into the customs territory of the United States are eligible for treatment as "goods originating in the territory of Canada" only if--

(1) they are goods wholly obtained or produced in the territory of Canada and/or the United States, or

(2) they have been transformed in the territory of Canada and/or the United States, so as to be subject--

(I) to a change in tariff classification in Canada as described in the rules of subdivision (c)(vii)(R) of this note, or

VOL 53 ISS 242 DE 16 1988 UMI

I-2

(II) to such other requirements subdivision (c)(vii)(R) of this note may provide when no change in tariff classification occurs, and they meet the other conditions set out in subdivisions (c)(vii)(F), (G), (H), (I), (J) and (R) of this note.

(C Goods shall not be considered to originate in the territory of Canada pursuant to subdivision (c)(vii)(B)(2) merely by virtue of having undergone--

(1) simple packaging or, except as expressly provided by the rules of subdivision (c)(vii)(R) of this note, combining operations,

(2) mere dilution with water or another substance that does not materially alter the characteristics of the goods, or

(3) any process or work in respect of which it is established, or in respect of which the facts as ascertained clearly justify the presumption, that the sole object was to circumvent the provisions of subdivision (c)(vii) of this note.

(D) Accessories, spare parts, or tools delivered with any piece of equipment, machinery, apparatus, or vehicle that form part of its standard equipment shall be treated as having the same origin as that equipment, machinery, apparatus, or vehicle if the quantities and values of such accessories, spare parts, or tools are customary for the equipment, machinery, apparatus, or vehicle.

(E) Goods exported from the territory of Canada originate in the territory of Canada only if the goods meet the applicable requirements of subdivisions (c)(vii)(B), (C) and (D) of this note and are shipped to the territory of the United States without having entered the commerce of any third country and the goods, if shipped through the territory of a third country, do not undergo any operations other than unloading, reloading, or any operation necessary to transport them to the territory of the United States or to preserve them in good condition, and the documents related to the exportation and shipment of the goods from the territory of Canada show the territory of the United States as their final destination.

(F) Whenever the processing or assembly of goods in the territory of Canada and/or the United States results in one of the changes in tariff classification in Canada described by the rules set forth in subdivision (c)(vii)(R) of this note, such goods shall be considered to have been transformed in the territory of Canada and shall be treated as goods originating in the territory of Canada, provided that such processing or assembly occurs entirely within the territory of Canada and/or the United States and that such goods have not subsequently undergone any processing or assembly outside of Canada or the United States that improves the goods in condition or advances them in value.

(G) Whenever the assembly of goods in the territory of Canada fails to result in a change of tariff classification because--

(1) the goods were imported into the territory of Canada in an unassembled or a disassembled form and were classified as unassembled or disassembled goods pursuant to General Rule of Interpretation 2(a), or

(2) the tariff subheading for the goods provides for both the goods themselves and their parts,

such goods shall not be treated as goods originating in the territory of Canada.

(H) Notwithstanding subdivision (c)(vii)(G), goods described in that paragraph shall be considered to have been transformed in the territory of Canada and be treated as goods originating in the territory of Canada if--

(1) the value of materials originating in the territory of Canada and/or the United States that are used or consumed in the production of the goods plus the direct cost of assembling the goods in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States, and

(2) the goods have not subsequent to assembly undergone processing or further assembly in a third country and they meet the requirements of subdivision (c)(vii)(E) of this note.

(I) The provisions of subdivision (c)(vii)(H) of this note shall not apply to goods of chapters 61 through 63.

VOL 53 ISS 242 DE 16 1988 UMI

(J) In making the determination required by subdivision (c)(vii)(H)(1) of this note and in making the same or a similar determination when required by the rules of subdivision (c)(vii)(R) of this note, where materials originating in the territory of Canada and/or the United States and materials obtained or produced in a third country are used or consumed together in the production of goods in the territory of Canada, the value of materials originating in the territory of Canada and/or the United States shall be treated as such only to the extent that it is directly attributable to the goods under consideration.

(K) In applying the rules set forth in subdivision (c)(vii) of this note, a specific rule shall take precedence over a more general rule.

(L) As used in subdivision (c)(vii)(B) of this note, the phrase "goods wholly obtained or produced in the territory Canada and/or the United States" means--

(1) mineral goods extracted in the territory of Canada and/or the United States,

(2) goods harvested in the territory of Canada and/or the United States,

(3) live animals born and raised in the territory of Canada and/or the United States,

(4) fish, shellfish and other marine life taken from the sea by vessels registered or recorded with Canada and flying its flag,

(5) goods produced on board factory ships from the marine life referred to in subparagraph (4) provided such factory ships are registered or recorded with Canada and fly its flag,

(6) goods taken by Canada or a Canadian national or enterprise from the seabed or beneath the seabed outside territorial waters, provided that Canada has rights to exploit such seabed,

(7) goods taken from space provided they are obtained by Canada or a Canadian national or enterprise and not processed in a third country,

(8) waste and scrap derived from manufacturing operations and used goods, provided they were collected in the territory of Canada and/or the United States, and are fit only for the recovery of raw materials, and

(9)

(M) As
th
or
th

(1)

(2)

(N) As
th
ex
St

(1

(9) goods produced in the territory of Canada and/or the United States exclusively from goods referred to in subparagraphs (1) to (8), inclusive, or from their derivatives, at any stage of production.

(M) As used in subdivisions (c)(vii)(H) and (R) of this note, the phrase "value of materials originating in the territory of Canada and/or the United States" means the aggregate of:

(1) the price paid by the producer of exported goods for materials originating in the territory of Canada and/or the United States or for materials imported from a third country used or consumed in the production of such originating materials, and

(2) when not included in that price, the following costs related thereto--

(I) freight, insurance, packing and all other costs incurred in transporting any of the materials referred to in subparagraph (1) to the location of the producer,

(II) duties, taxes and brokerage fees on such materials paid in the territory of Canada and/or the United States,

(III) the cost of waste or spoilage resulting from the use or consumption of such materials, less the value of renewable scrap or byproduct, and

(IV) the value of goods and services relating to such materials determined in accordance with subparagraph 1(b) of article 8 of the Agreement on Implementation of article VII of the General Agreement on Tariffs and Trade.

(N) As used in subdivision (c)(vii)(H) and (R) of this note, the phrase "value of the goods when exported to the territory of the United States" means the aggregate of--

(1) the price paid by the producer for all materials, whether or not the materials originate in Canada and/or the United States, and, when not included in the price paid for the materials, the following costs related thereto--

(I) freight, insurance, packing and all other costs incurred in transporting all materials to the location of the producer,

(II) duties, taxes and brokerage fees on all materials paid in the territory of Canada and/or the United States,

(III) the cost of waste or spoilage resulting from the use or consumption of such materials, less the value of renewable scrap or byproduct, and

(IV) the value of goods and services relating to all materials determined in accordance with subparagraph 1(b) of article 8 of the Agreement on Implementation of article VII of the General Agreement on Tariffs and Trade, and

(2) the direct cost of processing or the direct cost of assembling the goods.

(O) As used in subdivisions (c)(vii)(H), (N) and (R) of this note, the phrase "direct cost of processing or direct cost of assembling" means the costs directly incurred in, or that can reasonably be allocated to, the production of goods, including--

(1) the cost of all labor, including benefits and on-the-job training, labor provided in connection with supervision, quality control, shipping, receiving, storage, packaging, management at the location of the process or assembly, and other like labor, whether provided by employees or independent contractors,

(2) the cost of inspecting and testing the goods,

(3) the cost of energy, fuel, dies, molds, tooling, and the depreciation and maintenance of machinery and equipment, without regard to whether they originate within the territory of Canada and/or the United States,

(4) development, design, and engineering costs,

(P) F
t
c
d
c

(Q) F
t

(

(5) rent, mortgage interest, depreciation on buildings, property insurance premiums, maintenance, taxes and the cost of utilities for real property used in the production of the goods, and

(6) royalty, licensing, or other like payments for the right to the goods, but not including--

(I) costs relating to the general expense of doing business, such as the cost of providing executive, financial, sales, advertising, marketing, accounting and legal services and insurance,

(II) brokerage charges relating to the importation and exportation of goods,

(III) costs for telephone, mail and other means of communication,

(IV) packing costs for exporting the goods,

(V) royalty payments related to a licensing agreement to distribute or sell the goods,

(VI) rent, mortgage interest, depreciation on buildings, property insurance premiums, maintenance, taxes and the cost of utilities for real property used by personnel charged with administrative functions, or

(VII) profit on the goods.

(P) For the purposes of subdivision (c)(vii) of this note, the term "materials" means goods, other than those included as part of the direct cost of processing or assembling, used or consumed in the production of other goods.

(Q) For the purposes of subdivision (c)(vii) of this note, the term "territory" means--

(1) with respect to Canada, the territory to which its customs laws apply, including any areas beyond the territorial seas of Canada within which, in accordance with international law and its domestic laws, Canada may exercise rights with respect to the seabed and subsoil and their natural resources, and

(2) with respect to the United States,

(I) the customs territory of the United States,

(II) the foreign trade zones located in the United States and the Commonwealth of Puerto Rico, and

(III) any area beyond the territorial seas of the United States within which, in accordance with international law and its domestic laws, the United States may exercise rights with respect to the seabed and subsoil and their natural resources.

(R) Change in Tariff Classification Rules.

(1) Section I: Chapters 1 through 5.

A change from one chapter to another; no changes within chapters.

(2) Section II: Chapters 6 through 14.

(aa) A change from one chapter to another; no changes within chapters except that agricultural and horticultural goods grown in the territory of Canada shall be treated as originating in the territory of Canada even if grown from seed or bulbs imported from a third country.

(bb) A change to subheadings 0901.12 through 0901.40 from any other subheadings, including another subheading within that group.

(3) Section III: Chapter 15.

(aa) A change to chapter 15 from any other chapter.

(bb) A change to any of the following subheadings from any other subheading: 1507.90, 1508.90, 1511.90, 1512.19, 1512.29, 1513.19, 1513.29, 1514.90, 1515.19, 1515.29.

(cc) A change to heading 1516 from any other heading.

(dd) A change to heading 1517 from any other heading.

(ee) A change to headings 1519 through 1520 from any other heading outside that group.

VOL 53 ISS 242 DE 16 1988 UMI

I-9

(ff) A change to subheading 1519.19 from any other subheading.

(gg) A change to subheading 1519.20 from any other subheading.

(hh) A change to subheading 1520.90 from any other subheading.

(4) Section IV: Chapters 16 through 24.

(aa) A change from one chapter to another, except for goods of chapter 20 subject to rule (ee).

(bb) A change to heading 1704 from any other heading.

(cc) A change to heading 1806 from any other heading.

(dd) A change to subheading 1806.31 or 1806.90 from any other subheading.

(ee) Fruit, nut, and vegetable preparations of chapter 20 that have been prepared or preserved merely by freezing, by packing (including canning) in water, brine, or in natural juices, or by roasting, either dry or in oil (including processing incidental to freezing, packing, or roasting), shall be treated as a good of the country in which the fresh good was produced.

(ff) A change to subheading 2009.90 from any other subheading; provided, that neither a single juice ingredient, nor juice ingredients from a single third country, constitutes in single-strength form more than 60 percent by volume of the product.

(gg) A change to headings 2203 through 2209 from any other heading outside that group.

(hh) A change to heading 2309 from any other heading.

(ii) A change to headings 2402 through 2403 (except subheading 2403.91) from any other heading outside that group.

(5) Section V: Chapters 25 through 27.

(aa) A change from one chapter to another.

VOL 53 ISS 242 DE 16 1988 UMI

I-10

(bb) A change to headings 2710 through 2715 from any other heading outside that group.

(cc) A change to heading 2716 from any other heading.

(6) Section VI: Chapters 28 through 38.

(aa) A change to chapters 28 through 38 from any chapter outside that group.

(bb) A change to any subheading of chapters 28 through 38 from any other subheading within those chapters; provided, except for the other rules in this section, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(cc) A change to a heading of chapter 30 from any other heading, including other headings within that chapter, except a change to heading 3004 from heading 3003.

(dd) A change to chapter 31 from any other chapter.

(ee) A change to headings 3208 through 3215 from any other heading outside that group.

(ff) A change to chapter 33 from any other chapter.

(gg) A change to heading 3304 through 3307 from any heading outside that group.

(hh) A change to a heading of chapter 34 from any other heading, including another heading within that chapter.

(ii) A change to subheadings 3402.20 through 3402.90 from any other subheading outside that group.

(jj) A change to a heading of chapter 35 from any other heading, including another heading within that chapter.

(kk) A change to a heading of chapter 36 from any other heading, including another heading within that chapter.

(7) S

I-11

(11) A change to chapter 37 from any other chapter.

(mm) A change to heading 3704 from any other heading.

(nn) A change to headings 3705 through 3706 from any other heading outside that group.

(oo) A change to heading 3808 from any other heading; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States, or, in the case of goods which contain more than one active ingredient, not less than 70 percent of the value of the goods when exported to the territory of the United States. Any materials that are eligible for duty-free treatment in both Canada and the United States on a most-favored-nation basis, or any materials imported into the territory of either Canada or the United States which, if imported into the territory of the United States, would be free of duty under a trade agreement that is not subject to a competitive need limitation, shall be treated as materials originating in the territory of Canada and/or the United States.

(7) Section VII: Chapters 39 through 40.

(aa) A change to any heading of chapter 39 from any other heading, including another heading within that chapter; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(bb) A change to chapter 40 from any other chapter.

VOL 53 ISS 242 DE 16 1988 UMI

(cc) A change to any heading of chapter 40 from any other heading within that chapter; provided, except for the rules listed below in this section, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(dd) A change to headings 4007 through 4008 from any other heading outside that group.

(ee) A change to headings 4009 through 4017 from any other heading outside that group.

(ff) A change to subheading 4012.10 from any other subheading.

(8) Section VIII: Chapters 41 through 43.

(aa) A change from one chapter to another.

(bb) A change to headings 4104 through 4111 from any other heading outside that group.

(cc) A change to heading 4302 from any other heading.

(dd) A change to headings 4303 through 4304 from any other heading outside that group.

(9) Section IX: Chapters 44 through 46.

(aa) A change from one chapter to another.

(bb) A change between headings in chapter 44.

(cc) A change to any of the following subheadings from any other subheading: 4412.11.50, 4412.12.50, 4412.19.50, 4412.29.50, or 4412.99.90.

(dd) A change to headings 4503 through 4504 from any other heading outside that group.

(ee) A change to heading 4602 from any other heading.

I-13

(10) Section X: Chapters 47 through 49.

(aa) A change from one chapter to another.

(bb) A change to heading 4808 through 4809 from any other heading outside that group.

(cc) A change to headings 4814 through 4823 from any other heading outside that group except a change from heading 4809 to heading 4816.

(11) Section XI: Chapters 50 through 63.

(aa) A change to headings 5004 through 5006 from any heading outside that group.

(bb) A change to heading 5007 from any other heading.

(cc) A change to headings 5106 through 5113 from any heading outside that group.

(dd) A change to headings 5204 through 5212 from any heading outside that group.

(ee) A change to headings 5306 through 5311 from any heading outside that group.

(ff) A change to any heading of chapter 54 from any other chapter.

(gg) A change to headings 5501 through 5507 from any other chapter.

(hh) A change to headings 5508 through 5516 from any heading outside that group.

(ii) A change to any heading of chapter 56 from any heading outside that chapter other than headings 5106 through 5113, 5204 through 5212, 5306 through 5311, or headings of chapters 54 and 55.

(jj) A change to any heading of chapter 57 from any heading outside that chapter other than headings 5106 through 5113, 5204 through 5212, 5306 through 5309, 5311, any heading of chapter 54, or 5508 through 5516.

(kk) A change to any heading of chapter 58 from any heading outside that chapter other than headings 5106 through 5113, 5204 through 5212, 5306 through 5311, or headings of chapters 54 and 55.

(ll) A change to any heading of chapter 59 from any heading outside that chapter other than headings 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407, 5408, or 5512 through 5516.

(mm) A change to any heading of chapter 60 from any heading outside that chapter other than headings 5106 through 5113, 5204 through 5212, 5309 through 5311, or headings of chapters 54 and 55.

(nn) A change to any heading of chapter 61 from any heading outside that chapter other than headings 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407, 5408, 5512 through 5516, or 6001 through 6002; provided, that goods are both cut (or knit to shape) and sewn or otherwise assembled in the territory of Canada and/or the United States.

(oo) A change to any heading of chapter 62 from any heading outside that chapter other than headings 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407, 5408, 5512 through 5516, or 6001 through 6002; provided, that goods are both cut and sewn in the territory of Canada and/or the United States.

(pp) A change to any heading of chapter 63 from any heading outside that chapter other than headings 5106 through 5113, 5204 through 5212, 5306 through 5311, or headings of Chapters 54 and 55; provided, that goods are both cut and sewn in the territory of Canada and/or the United States.

(12)

VOL 53 ISS 242 DE 16 1988 UMI

I-15

(qq) Notwithstanding rules (nn) and (oo), apparel goods provided for in chapters 61 and 62 that are both cut and sewn in the territory of Canada and/or the United States from fabric produced or obtained in a third country, and that meet other applicable conditions for preferred tariff treatment under subdivision (c)(vii) of this note, shall be subject to the rate of duty provided in the "Special" subcolumn for goods that originate in Canada, in the annual quantities set forth below, and shall, above those quantities for the remainder of the annual period, be subject to duty at the rates provided for in the "General" subcolumn of column 1:

Non-wool apparel	41,805,000 square meters
Wool apparel	5,016,600 square meters

(rr) Notwithstanding rules (dd), (ee), (ff), (hh), (kk), (mm) and (pp), non-wool fabric and non-wool made-up textile articles provided for in chapters 52 through 55, 58, 60 and 63 that are woven or knitted in Canada from yarn produced or obtained in a third country, and that meet other applicable conditions for preferred tariff treatment under subdivision (c)(vii) of this note, shall be subject to the rate of duty provided in the "Special" subcolumn for goods that originate in Canada, in the annual quantity of 25,083,000 square meters for the period commencing on January 1, 1989, and ending on December 31, 1992, and shall, above this quantity for the remainder of the annual period, be subject to duty at the rates provided for in the "General" subcolumn of column 1.

(12) Section XII: Chapters 64 through 67.

(aa) A change from one chapter to another.

VOL 53 ISS 242 DE 16 1988 UMI

I-16

(bb) A change to subheadings 6401.10 through 6406.10 from any other subheading outside that group; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(cc) A change to headings 6503 through 6507 from any other heading outside that group.

(dd) A change to headings 6601 through 6602 from any other heading outside that group; provided that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(ee) Within heading 6701, goods fabricated from feathers (such as fans, feather dusters, and feather apparel) in which feathers are the material or component that gives the fabricated goods their essential character shall be treated as good of the country in which fabrication occurred.

(ff) A change to heading 6702 from any other heading.

(gg) A change to heading 6704 from any other heading.

(13) Section XIII: Chapters 68 through 70.

(aa) A change from one chapter to another.

(bb) A change to subheading 6812.20 from any other subheading.

(cc) A change to subheading 6812.30 through 6812.40 from any other subheading outside that group.

(gg) A change to headings 7224 through 7228 from any other heading outside that group.

(hh) A change to heading 7229 from any other heading except headings 7227 and 7228.

(ii) A change to heading 7308 from any other heading, except for changes resulting from the following processes performed on angles, shapes, or sections of heading 7216--

drilling, punching, notching, cutting, cambering, or sweeping, whether performed individually or in combination,

adding attachments or weldments for composite construction,

adding of attachments for handling purposes,

adding weldments, connectors, or attachments to H-sections or I-sections; provided, that the maximum cross-sectional dimension of the weldments, connectors, or attachments is not greater than the dimension between the inner surfaces of the flanges of the H-section or I-sections,

painting, galvanizing, or otherwise coating, or

adding a simple base plate without stiffening elements, individually or in combination with drilling, punching, notching, or cutting, to create an article suitable as a column.

(jj) A change to headings 7309 through 7326 from any other heading outside that group.

(18) Section XVIII: Chapters 90 through 92.

(aa) A change from one chapter to another.

(bb) A change to any heading of this section from a parts heading, or to any subheading from a parts subheading; provided, with the exception of a change to heading 9009, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(cc) A change to any heading within the group 9005 through 9032 from any other heading (including another heading within that group), except that a change from a parts heading shall be subject to rule (bb) of this section.

(dd) Notwithstanding rule (bb), goods subject to classification within headings 9101 through 9107 shall be treated as goods of the country in which the movement subject to classification under headings 9108 through 9110 was produced.

(ee) A change to headings 9108 through 9113 from any other heading, including another heading within that group; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(19) Section XIX: Chapter 93.

(aa) A change to this chapter from any other chapter.

(bb) A change to any heading of this section from a parts heading, or to any subheading from a parts subheading; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(20) Section XX: Chapters 94 through 96.

(aa) A change from one chapter to another, except a change to subheading 9404.90 from headings 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, and 5512 through 5516.

(bb) A change to any heading of this section from a parts heading, or to any subheading from a parts subheading; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(cc) A change to a subheading within the group 9608.10 through 9608.39 from a subheading within the group 9608.91 through 9608.99; provided, that the value of materials originating in the territory of Canada and/or the United States plus the direct cost of processing performed in the territory of Canada and/or the United States constitute not less than 50 percent of the value of the goods when exported to the territory of the United States.

(dd) A change to subheading 9614.20 from subheading 9614.10.

(21) Section XXI: Chapter 97.

A change to this chapter from any other chapter."

ANNEX II

MODIFICATIONS TO THE NOMENCLATURE OF
THE HARMONIZED TARIFF SCHEDULE OF THE UNITED STATES

Notes:

1. Bracketed matter is included to assist in the understanding of the proclaimed modifications.

2. The following supersedes matter now in the Harmonized Tariff Schedule of the United States (HTS). The subheadings and superior descriptions are set forth in columnar format, and material in such columns is inserted in the columns of the HTS designated "Heading/Subheading", "Article Description", "Rates of Duty 1-General", "Rates of Duty 1-Special", and "Rates of Duty 2", respectively.

1. Subheading 0210.90.00 is superseded by:

[0210	:Meat . . .:]	:	:	:
"0210.90	: Other, including edible flours and meals of meat or meat offal:	:	:	:
0210 90.20	: Meat of poultry of heading 0105.....	: 5%	: Free (A,E*, IL) 4.5% (CA)	:20%
0210.90.40	: Other.....	: 5%	: Free (A,CA, E*,IL)	:20%"

2. The following new subheading is inserted in numerical order in chapter 7:

[0710	:Vegetables . . .:]	:	:	:
[0710.80	: Other . . .:]	:	:	:
	: [Other:]	:	:	:
	: [Not reduced in size:]	:	:	:
"0710.80.65	: Brussels sprouts.....	: 25%	: Free (A*, E,IL) 11.2% (CA)	:50%"

Conforming change: General note 3(c)(ii)(D) is modified by inserting in numerical order "0710.80.65 Mexico"

3. Subheading 0710.80.80 is superseded by:

[0710	:Vegetables . . .:]	:	:	:
[0710.80	: Other . . .:]	:	:	:
	: [Other:]	:	:	:
	: "Reduced in size:	:	:	:
0710.80.85	: Brussels sprouts.....	: 17.5%	: Free (E,IL) 6.3% (CA)	: 35%
0710.80.95	: Other.....	: 17.5%	: Free (E,IL) 15.7% (CA)	: 35%"

4. Additional U.S. note 4 to chapter 9 is modified by deleting the final period and inserting in lieu thereof ", except that such goods originating in the territory of Canada shall enter free of duty."

5. Additional U.S. note 1 to chapter 11 is modified by deleting the final parenthesis and period and adding in lieu thereof the following:

"; in the case of goods originating in the territory of Canada, 18%).".

On or after January 1 of the following years, the rate of duty in such note applicable to goods originating in the territory of Canada shall be modified as follows:

1990	1991	1992	1993	1994	1995	1996	1997	1998
16%	14%	12%	10%	8%	6%	4%	2%	Free

6. Subheading 2309.90.90 is superseded by:

[2309	:Preparations . . .:]				
[2309.90	: Other:]				
	: [Other:]				
	: "Other:				
2309.90.60	: Animal feeds containing egg.....	3%	Free (E,IL) 2.7% (CA)	20%	
2309.90.90	: Other.....	3%	Free (CA,E, IL)	20%"	

7. Subheading 4104.29.60 is superseded by:

[4104	:Leather . . .:]				
	: [Other . . .:]				
[4104.29	: Other:]				
	: "Other:				
4104.29.50	: Upper leather; sole leather.....	5%	Free (A*, E,IL) 4% (CA)	25%	
4104.29.90	: Other.....	5%	Free (A*, CA,E,IL)	25%"	

Conforming change: General note 3(c)(ii)(D) is modified by deleting "4104.29.60 Argentina" and by inserting in lieu thereof "4104.29.50 Argentina" and "4104.29.90 Argentina"

8. The following new subheading is inserted in numerical order in chapter 41:

[4104	:Leather . . .:]				
	: [Other . . .:]				
[4104.31	: Full . . .:]				
	: [Other:]				
"4104.31.50	: Upper leather; sole leather.....	5%	Free (A*, E,IL) 4% (CA)	25%"	

Conforming change: General note 3(c)(ii)(D) is modified by inserting in numerical order "4104.31.50 Argentina"

II-3

9. The following new subheading is inserted in numerical order in chapter 41:

[4104	:Leather . . .:]				
	: [Other . . .:]				
[4104.39	: Other:] :				
	: [Other:]				
"4104.39.50	: Upper leather; sole leather.....	5%	Free (A*, E,IL) 4% (CA)	25%"	

Conforming change: General note 3(c)(ii)(D) is modified by inserting in numerical order "4104.39.50 Argentina"

10. Additional U.S. note 1 to chapter 58 is modified to read as follows:

"1. The rates of duty applicable to subheadings 5810.91, 5810.92 and 5810.99 are: column 1 (General), 8.4%, but in the case of embroidery in the piece not less than the rate which would apply to such product if not embroidered; column 1 (Special), for goods originating in the territory of Canada, 7.5%, but in the case of embroidery in the piece not less than the rate which would apply to such product if not embroidered; and column 2, 90%, but in the case of embroidery in the piece not less than the rate which would apply to such product if not embroidered."

On or after January 1 of the following years, the rate in such note applicable to goods originating in the territory of Canada shall be modified as follows:

1990	1991	1992	1993	1994	1995	1996	1997	1998
6.7%	5.8%	5%	4.2%	3.3%	2.5%	1.6%	0.8%	Free

11. Subheading 7321.11.50 is superseded by:

[7321	:Stoves . . .:]				
	: [Cooking . . .:]				
[7321.11	: For gas . . .:]				
	: "Other:				
"7321.11.30	: Stoves or ranges.....	4.2%	Free (A,CA, E,IL)	45%	
7321.11.60	: Other.....	4.2%	Free (A,E, IL) 3.7% (CA)	45%"	

II-4

12. Subheading 7321.90.00 is superseded by:

[7321	:Stoves . . .:]			
"7321.90	: Parts:			
7321.90.30	: Of articles in subheading 7321.11.30.....	4.2%	Free (A, CA,E,IL)	45%
7321.90.60	: Other.....	4.2%	Free (A, E,IL) 3.7% (CA)	45%"

13. The following new subheading is inserted in numerical order in chapter 84:

[8422	:Dishwashing . . .:]			
[8422.90	: Parts:]			
"8422.90.05	: Of dishwashing machines.....	3.6%	Free (A,E, IL) 3.2% (CA)	35%"

14. The following new subheading is inserted in numerical order in chapter 84:

[8424	:Mechanical . . .:]			
[8424.90	: Parts:]			
"8424.90.05	: Of fire extinguishers.....	3.7%	Free (A,B, E,IL) 3.3% (CA)	35%"

15. The following new subheading is inserted in numerical order in chapter 84:

[8472	:Other . . .:]			
[8472.90	: Other:]			
"8472.90.20	: Automatic banknote dispensers and other coin or currency handling machines.....	3.7%	Free (A,CA, E,IL)	35%"

16. Subheading 8473.40.00 is superseded by:

[8473	:Parts...:]			
"8473.40	: Parts and accessories of the machines of heading 8472:			
8473.40.20	: Of the automatic banknote dispensers and other coin or currency handling machines of subheading 8472.90.20.....	3.9%	Free (A*, CA,E,IL)	35%
8473.40.40	: Other.....	3.9%	Free (A*, E,IL) 3.1% (CA)	35%"

Conforming change: General note 3(c)(ii)(D) is modified by striking out "8473.40.00 Mexico" and by inserting in lieu thereof "8473.40.20 Mexico" and "8473.40.40 Mexico"

II-5

17. Subheadings 8479.89.30 through 8479.89.90, inclusive, are superseded by:

[8479	:Machines . . .:]			
	: [Other . . .:]			
[8479.89	: Other:]			
	: [Electromechanical . . .:]			
"8479.89.10	: Air humidifiers or dehumidifiers.....	4.2%	Free (A, C,E,IL) 3.7% (CA)	40%
8479.89.20	: Floor polishers.....	3.4%	Free (A,E, IL) 2.7% (CA)	35%
8479.89.30	: Vacuum cleaners.....	3.4%	Free (A,E, IL) 3% (CA)	35%
8479.89.60	: Other.....	4.2%	Free (A, C,E,IL) 3.3% (CA)	40%
8479.89.70	: Carpet sweepers.....	3.7%	Free (A*, E,IL) 3.3% (CA)	35%
8479.89.90	: Other.....	3.7%	Free (A*, B,C,E,IL) 2.9% (CA)	35%"

Conforming changes:
General note 3(c)(ii)(D) is modified by inserting in numerical order--

"8479.89.70 Brazil;
Mexico"

Additional U.S. Note 1 to chapter 84 is modified by deleting "8479.89.40, 8479.89.80 and 8479.90.00" and by inserting in lieu thereof "8479.89.10, 8479.89.60, 8479.89.90, 8479.90.40 and 8479.90.80"

18. Subheading 8479.90.00 is superseded by:

[8479	:Machines . . .:]			
"8479.90	: Parts:			
8479.90.40	: Of articles of subheading 8479.89.10, 8479.89.30 or 8479.89.70.....	3.7%	Free (A*, C,E,IL) 3.3% (CA)	35%
8479.90.80	: Other.....	3.7%	Free (A*, B,C,E,IL) 2.9% (CA)	35%"

Conforming changes: General note 3(c)(ii)(D) is modified by striking out "8479.90.00 Brazil" and by inserting "8479.90.40 Brazil" and "8479.90.80 Brazil" in lieu thereof

19. Subheading 8509.90.20 is superseded by:

[8509	Electromechanical . . .:			
[8509.90	Parts:]			
"8509.90.20	Parts of vacuum cleaners.....	3.4%	Free (A*,E, IL)	35%
			3% (CA)	
8509.90.30	Parts of floor polishers.....	3.4%	Free (A*,E, IL)	35%"
			2.7% (CA)	

Conforming changes: General note 3(c)(ii)(D) is modified by inserting "8509.90.30 Mexico".

20. Subheading 8517.30.10 is superseded by:

[8517	Electrical . . .:]			
[8517.30	Telephonic . . .:]			
	"Telephonic switching apparatus (including private branch exchange and key system switching apparatus):			
8517.30.15	Central office switching apparatus.....	8.5%	Free (A,E, IL)	35%
			5.6% (CA)	
8517.30.20	Private branch exchange switching apparatus.....	8.5%	Free (A,CA, E,IL)	35%
8517.30.25	Electronic key telephone systems.....	8.5%	Free (A,E, IL)	35%
			6.8% (CA)	
8517.30.30	Other.....	8.5%	Free (A,E, IL)	35%"
			6.8% (CA)	

21. Subheadings 8517.40.40 and 8517.40.80 are superseded by:

[8517	Electrical . . .:]			
[8517.40	Other . . .:]			
"8517.40.10	Modems, of a kind used with data processing machines of heading 8471.....	4.7%	Free (A,CA, E,IL)	35%
	Other:			
8517.40.50	Telephonic.....	8.5%	Free (A,B, E,IL)	35%
			6.8% (CA)	
8517.40.70	Telegraphic.....	4.7%	Free (A,E, IL)	35%"
			3.7% (CA)	

II-7

22. Subheadings 8517.90.20 and 8517.90.30 are superseded by:

[8517	:Electrical . . .:]			
[8517.90	: Parts:]			
	: [Of telephonic apparatus:]			
	: "Of telephonic switching apparatus:			
8517.90.05	: Of the switching apparatus of subheading 8517.30.15..	8.5%	Free (A,E, IL) 5.6% (CA)	35%
8517.90.10	: Of the switching apparatus of subheading 8517.30.20..	8.5%	Free (A,CA, E,IL)	35%
8517.90.15	: Other.....	8.5%	Free (A,E, IL) 6.8% (CA)	35%
8517.90.30	: Of telephone sets.....	8.5%	Free (A,B, CA,E,IL)	35%
8517.90.35	: Of other terminal apparatus..	8.5%	Free (A, E,IL) 6.8% (CA)	35%"

23. The following new subheading is inserted in numerical order in chapter 85:

[8517	:Electrical...:]			
[8517.90	: Parts:]			
	: [Of telegraphic apparatus:]			
"8517.90.55	: Of articles of subheading 8517.40.10.....	4.7%	Free (A,CA, E,IL)	35%

24. Subheading 8706.00.20 is superseded by:

[8706.00	:Chassis . . .:]			
"8706.00.15	: For the vehicles of heading 8703...	2.5%	Free (CA, E,IL)	10%
8706.00.25	: For the vehicles of heading 8705...	2.5%	Free (E, IL) 2.2% (CA)	10%"

25. Additional U.S. note 2 to chapter 97 is modified to read as follows:

"2. Whenever an article is entered for sale under heading 9706, and thereafter determined to be not over 100 years of age, a duty of 6.6 percent ad valorem for articles subject to column 1-general treatment, a duty of 5.2 percent ad valorem for goods originating in the territory of Canada, or a duty of 25 percent ad valorem for articles subject to column 2 treatment shall be assessed thereon in addition to any other duty or penalty imposed on such article under the tariff schedule."

On or after January 1 of the following years, the rate specified in this note for goods originating in the territory of Canada shall be modified as follows:

1990	1991	1992	1993
3.9%	2.6%	1.3%	Free

II-8

26 (a). Subheading 9802.00.40 is superseded by:

	[Articles . . .]			
	"Articles exported for repairs or alterations:			
9802.00.40	Repairs or alterations made pursuant to a warranty.....	A duty upon the value of the repairs or alterations (see U.S. note 3 of this subchapter)	Free (B,C, CA)	A duty upon the value of the repairs or alterations (see U.S. note 3 of this subchapter)
9802.00.50	Other.....	A duty upon the value of the repairs or alterations (see U.S. note 3 of this subchapter)	A duty upon the value of the repairs or alterations (see U.S. note 3 of this subchapter) (B,C,CA)	A duty upon the value of the repairs or alterations (see U.S. note 3 of this subchapter)"

Conforming change: U.S. note 3 to subchapter II of chapter 98 is modified by deleting "9802.00.40 and 9802.00.60" and substituting in lieu thereof "9802.00.40 through 9802.00.60, inclusive"

(b). The rates of duty in the "Special" subcolumn of rates of duty column 1 for subheadings 9802.00.60 and 9802.00.80, as inserted by Annex IV of this proclamation, are modified by inserting at the end thereof the special tariff treatment designators "B" and "C" in alphabetical sequence.

II-9

27. Subchapter II to chapter 99 is modified by inserting at the end of the U.S. notes the following new note:

"8. Notwithstanding the effective period specified in the last column for each of the subheadings of this subchapter enumerated herein, in the case of goods originating in the territory of Canada and eligible for duty-free entry under any such subheading, the rate of duty of "free" shall continue to apply until the rate of duty applicable to goods originating in the territory of Canada in the referenced subheading or subheadings has been reduced to "free":

9902.26.22	9902.29.94
9902.29.05	9902.29.95
9902.29.08	9902.29.96
9902.29.09	9902.29.98
9902.29.20	9902.29.99
9902.29.27	9902.30.00
9902.29.34	9902.30.01
9902.29.56	9902.30.03
9902.29.70	9902.30.04
9902.29.78	9902.30.05
9902.29.81	9902.30.06
9902.29.82	9902.38.10
9902.29.83	9902.40.08
9902.29.85	9902.71.04
9902.29.89	9902.84.42
9902.29.90	9902.84.48
9902.29.91	9902.84.49
9902.29.92	9902.84.50
9902.29.93	

On and after December 31, 1998, this note shall be deleted from the tariff schedule and shall cease to apply to any article entered after that date."

28. Chapter 99 is further modified by inserting the following new provisions in numerical sequence:

"9902.29.12	2-Methyl-4-chlorophenol (provided for in subheading 2908.10.50).....	No change	No change (E,IL) Free (CA)	No change	On or before 12/31/93
9902.29.50	Doxorubicin hydrochloride (provided for subheading 2941.90.50, 3003.20 or 3004.20).....	No change	No change (A,E,IL) Free (CA)	No change	On or before 12/31/98
9902.38.12	Mixtures of potassium 1-(p-chlorophenyl-1,4-dihydro-6-methyl-4-oxopyridazine-3-carboxylate ("fenridazon-potassium") and formulation adjuvants (provided for in subheading 3808.30.10)...	No change	No change (A,E,IL) Free (CA)	No change	On or before 12/31/93

II-10

9902.81.05 Unwrought alloys of cobalt containing, by weight, 76 percent or more but less than 99 percent cobalt (provided for in subheading 8105.10.30).....	No change	No change (E,IL) Free (CA)	No change	On or before 12/31/93"

29. Subheading 9902.62.10 is modified by adding "(E*,IL)" after "No change" in the "Special" subcolumn of column 1 and modifying the effective period column to read:

"On or before 12/31/90, except that in the case of goods originating in the territory of Canada the effective period is on or before 12/31/98"

30. Chapter 99 is further modified by adding a new subchapter at the end thereof, as follows:

"SUBCHAPTER V

TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO THE UNITED STATES-CANADA FREE TRADE AGREEMENT

U.S. Notes

1. On or after January 1 of the following years, the percentage set forth in the "Special" subcolumn of rate of duty column 1 for subheading 9905.00.00 which is applicable to goods originating in the territory of Canada shall be modified as follows:

1990	1991	1992
60 percent	40 percent	20 percent

2. On and after January 1, 1993, the then-existing rate of duty set forth in the "Special" subcolumn of rate of duty column 1 for subheading 9905.00.00 which is applicable to goods originating in the territory of Canada shall be deleted and "Free" inserted in lieu thereof.

3. On and after December 31, 1998, this subchapter shall be deleted from the tariff schedule and shall cease to apply to any article entered after that date.

9905.00.00	Equipment provided for in the following subheadings intended for use in the repair or maintenance of motor vehicles of heading 8702, 8703, or 8704 (excluding electric trolley buses and three-wheeled vehicles) or of automobile truck tractors principally designed for the transportation of persons or goods:				
	3917.21	7415.32	8536.41

ANNEX III

GOODS ORIGINATING IN THE TERRITORY OF CANADA
ELIGIBLE FOR DUTY-FREE ENTRY UNDER
THE UNITED STATES-CANADA FREE TRADE AGREEMENT
EFFECTIVE AS OF JANUARY 1, 1989

(a) For each of the HTS subheadings enumerated below, the rate of duty of "Free" followed by the symbol "CA" in parentheses is inserted in the column entitled "Rates of Duty 1-Special" for such a subheading:

9801.00.70	9813.00.05	9813.00.30	9813.00.50	9813.00.70	9902.29.50
9801.00.80	9813.00.10	9813.00.35	9813.00.55	9813.00.75	9902.38.12
9804.00.60	9813.00.15	9813.00.40	9813.00.60	9814.00.50	9902.81.05
9812.00.20	9813.00.20	9813.00.45	9813.00.65	9902.29.12	9903.87.00
9812.00.40	9813.00.25				

(b) For each of the HTS subheadings enumerated below, the symbol "CA" is inserted in the parentheses appearing immediately after the rate of duty of "Free" in the column entitled "Rates of Duty 1-Special":

0101.20.20	0813.10.00	2102.10.00	2530.20.20	4108.00.00	7202.11.50

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

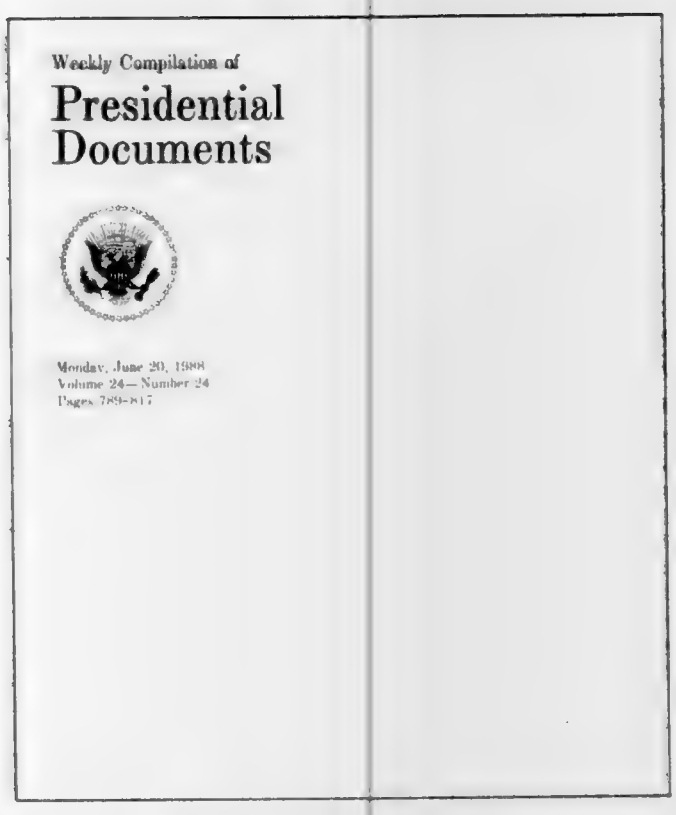
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of Ronald Reagan



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

WHERE:

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202–523–5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
Room 8544,
Federal Building,
300 N. Los Angeles St.,
Los Angeles, CA
RESERVATIONS: Call the Federal Information Center.
Los Angeles 213–894–3800

Title 3—

The President

Executive Order 12659 of December 15, 1988

Delegation of Authority Regarding the Naval Petroleum and Oil Shale Reserves

By virtue of the authority vested in me as President by the Constitution and laws of the United States of America, including section 301 of title 3 and sections 7427 and 7428 of title 10 of the United States Code, and in order to meet the goals and requirements of the Naval Petroleum and Oil Shale Reserves, it is hereby ordered as follows:

Section 1. The functions vested in the President by sections 7427 and 7428 of title 10 of the United States Code are delegated to the Secretary of Energy.

Sec. 2. On or before June 30, 1991, the Secretary of Energy shall prepare and submit to the President a comprehensive report of the agreements and programs executed under the authority granted under this Order. The authority delegated herein expires after October 1, 1991.

Rules and Regulations

Federal Register
Vol. 53, No. 243
Monday, December 19, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

GENERAL ACCOUNTING OFFICE

4 CFR Part 81

Freedom of Information; Records

AGENCY: General Accounting Office.
ACTION: Final rule.

SUMMARY: This rule revises GAO's regulations regarding the public disclosure of GAO records. Fees have been raised to reflect current costs. Minor editorial changes clarify and correct. Hours of the public reading room, Office of the General Counsel, have been updated to reflect current practice. The exemption pertaining to law enforcement records and the fee waiver standard have been revised to bring these sections into accord with the spirit of the Freedom of Information Reform Act of 1986, Pub. L. 99–570.

EFFECTIVE DATE: December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Ms. Nola Casieri, Office of Policy, United States General Accounting Office, 441 G Street NW., Room 6800, Washington, DC 20548, 202/275–1970.

SUPPLEMENTARY INFORMATION: GAO is revising Part 81 to bring the law enforcement and fee waiver standard into accord with the spirit of the Freedom of Information Reform Act of 1986, Pub. L. 99–570. Fees have been raised to reflect current costs. Minor editorial changes clarify and correct.

The following is a section-by-section description of the revisions to the regulations.

Section 81.6(g) is revised to change the description of the records included within the exemption from "investigatory files" to "records and information."

Section 81.7(b)(3) (i) and (ii) are revised to increase the fees charged for both clerical and professional personnel.

Section 81.7(e) is revised to incorporate the requirement that a waiver or reduction of fees is to be granted only if the release of the requested records is in the public interest and not primarily in the commercial interest of the requester.

Sections 81.6(j) and 81.7(c) are reprinted to correct spelling errors.

Section 81.8 is revised to change the hours of operation to 8:30 a.m. to 5:00 p.m. Due to organizational and title changes, the reference to the Chief, Legal Information and References Services, is deleted.

List of Subjects in 4 CFR Part 81

Administrative practice and procedure, Freedom of Information, Records.

For the reasons set out in the preamble Title 4, Part 81 of the Code of Federal Regulations is amended as follows:

PART 81—PUBLIC AVAILABLILITY OF GENERAL ACCOUNTING OFFICE RECORDS

1. The authority citation for Part 81 continues to read as follows:

Authority: 31 U.S.C. 711.

2. Section 81.6 is amended by revising paragraphs (c), (g), and (j) to read as follows:

§ 81.6 Records which may be exempt from disclosure.

* * * * *

(c) Records related solely to the internal personnel rules and practices of an agency. This category includes, in addition to internal matters of personnel administration, internal rules and practices which cannot be disclosed without prejudice to the effective performance of an agency function. Examples within the purview of this exemption are guidelines, and procedures for auditors, investigators, or examiners.

* * * * *

(g) Records and information compiled for law enforcement purposes.

* * * * *

(j) Inter-agency or intra-agency memoranda, letters or other materials that are part of the deliberative process. For example, this exemption includes internal communications such as GAO or other agency draft reports, and those portions of internal drafts, memoranda and workpapers containing opinions, recommendations, advice or evaluative remarks of GAO employees. This exemption seeks to avoid the inhibiting of internal communications, and the premature disclosure of documents which would be detrimental to an agency function.

* * * * *

3. Section 81.7 is amended by revising paragraphs (b)(3) and (e) to read as follows:

§ 81.7 Fees and charges.

* * * * *

(b) * * *

(3) Search for records by Office personnel.

(i) Clerical personnel—$10 an hour.

(ii) Professional personnel—$20 an hour.

* * * * *

(e) Fees established by this section may be waived or reduced upon a determination by the Director, OP, that disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commerical interest of the requester. Persons seeking such waiver or reduction of fees may be required to submit a statement setting forth the intended purpose for which the records are requested or otherwise indicate how disclosure will primarily benefit the public and, in appropriate cases, explain why the volume of records requested is necessary. Determinations pursuant to this subsection are solely within the discretion of GAO.

4. Section 81.8 is revised as follows:

§ 81.8 Public reading facility.

A public reading facility shall be maintained by the General Accounting Office at 441 G Street NW., Washington, DC. The facility, under the control of the Office of the General Counsel, shall be open to the public from 8:30 a.m. to 5:00 pm. except Saturdays, Sundays, and holidays.

Charles A. Bowsher,
Comptroller General of the United States.

BILLING CODE 1610–01–M

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 68

United States Standards for Whole Dry Peas

AGENCY: Federal Grain Inspection Service, USDA.[1]

ACTION: Final Rule.

SUMMARY: The Federal Grain Inspection Service (FGIS or Service) is revising the United States Standards for Whole Dry Peas to make the current rounding procedures for percentages consistent with rounding performed by calculators, computer applications and other FGIS standards.

EFFECTIVE DATE: January 14, 1989.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., Resources Management Division, USDA, FGIS, Room 0628 South Building, P.O. Box 96454, Washington, DC, 20090–6454; telephone (202) 475–3428.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

W. Kirk Miller, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities because those persons that apply the standards and most users of the inspection service do not meet the requirements for small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Further, the standards are applied equally to all entities.

Final Action

On August 15, 1988 (53 FR 30685), FGIS proposed to revise Subpart F—United States Standards for Whole Dry Peas, of the Part 68 regulations (7 CFR Part 68) to change the current rounding procedures for percentages. The current rounding procedures for percentages provides that when a figure to be rounded is followed by a figure greater than 5, the figure is rounded up to the next higher figure, e.g. 0.46 is reported as 0.5; when a figure to be rounded is followed by a figure less than 5, the figure is to be retained, e.g., 0.54 is reported as 0.5; when figures that are even are followed by the figure 5, the even figure is retained; and when a figure is odd and followed by the figure 5 the figure is rounded to the next higher even figure, e.g., 0.45 is reported as 0.4, 0.35 is reported as 0.4.

The proposed rounding rules simply stated provided that a figure to be rounded followed by a 5 or a figure greater than 5 be rounded up to the next higher figure, e.g., report 0.35 as 0.4, 6.46 as 6.5. If the figure is followed by a number less than 5, the figure is retained, e.g., report 8.34 as 8.3. This procedure is consistent with rounding performed by calculators and in computer applications. It is also a more generally accepted mathematical rounding procedure and would facilitate the understanding and usage of the standards.

This final rule also revises the heading of Part 68 (7 CFR Part 68) for clarity, as proposed.

Interested parties were invited to participate in the rulemaking process by submitting written comments on the proposed rule. During the comment period one supporting comment from an academe was the only comment received.

List of Subjects in 7 CFR Part 68

Administrative practice and procedure, Agricultural commodities, Whole dry peas.

For reasons set forth in the preamble, 7 CFR Part 68 is amended as follows:

Subpart F—United States Standards for Whole Dry Peas

1. The authority citation for part 68 continues to read as follows:

Authority: Secs. 202–208, 60 Stat. 1087, as amended (7 U.S.C. 1621 *et seq.*).

2. The heading for Part 68 is revised to read as follows:

PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURAL COMMODITIES AND THEIR PRODUCTS

3. Section 68.405 Percentages, is revised to read as follows:

§ 68.405 Percentages.

(a) *Rounding.* Percentages are determined on the basis of weight and are rounded as follows:

(1) When the figure to be rounded is followed by a figure greater than or equal to 5, round to the next higher figure; e.g. report 6.36 as 6.4, 0.35 as 0.4, and 2.45 as 2.5.

(2) When the figure to be rounded is followed by a figure less than 5, retain the figure; e.g., report 8.34 as 8.3, and 1.22 as 1.2.

(b) *Recording.* All percentages shall be stated in whole and tenth percent to the nearest tenth percent.

Date: November 29, 1988.

W. Kirk Miller,

Administrator.

[FR Doc. 88–29030 Filed 12–16–88; 8:45 am]

BILLING CODE 3410–EN–M

[1] The authority to exercise the functions of the Secretary of Agriculture contained in the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627), concerning inspection and standardization activities related to grain and similar commodities and products thereof has been delegated to the Administrator, Federal Grain Inspection Service (7 U.S.C. 75a; 7 CFR 68.5).

Agricultural Marketing Service

7 CFR Part 906

[Docket No. FV–88–131]

Oranges and Grapefruit Grown in the Lower Rio Grande Valley in Texas; Establishment of Identifying Marks and Terms and Conditions of Use in Connection With Promotion and Advertising Activities

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting without modification as a final rule an interim final rule which authorized handlers of Texas oranges and grapefruit to use two additional identifying marks, "Texas Choice" and "Texas Fancy," utilized by the Texas Valley Citrus Committee (committee) in promotional and advertising projects. Use of identifying marks by handlers is voluntary, but if these marks are used the fruit must meet certain minimum quality requirements. This action is designed to assist in the development and expansion of markets for Texas oranges and grapefruit.

EFFECTIVE DATE: December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 475–3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under the Marketing Agreement and Marketing Order No.

906, as amended [7 CFR Part 906], regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 78 handlers of Texas oranges and grapefruit subject to regulation under the Texas citrus marketing order and approximately 2,500 orange and grapefruit producers in Texas. The number of handlers has been changed to 78 from 22 and the number of producers to 2,500 from 3,000 in this final rule, from that in the interim final rule, reflecting analysis of pertinent statistical data. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

An interim final rule amending §§ 906.137 and 906.340 was issued October 12, 1988, and published in the **Federal Register** [53 FR 40397, October 17, 1988]. The interim final rule provided that interested persons could file comments through November 16, 1988. No comments were received.

Currently, § 906.137 allows handlers to use the identifying marks "Texasweet" and "Sweeter by Nature" under certain conditions in connection with committee promotional and advertising projects undertaken to increase shipments of Texas oranges and grapefruit. Paragraph (a)(1) of § 906.137 allows handlers to affix these marks severally or jointly to containers of grapefruit or to individual grapefruit comprising a lot only if the grapefruit grades at least U.S. No. 1. Paragraph (a)(2) of that section prescribes specifications for oranges. Handlers can only affix these marks on containers of oranges or to individual oranges if the oranges grade at least U.S. Combination, with not less than 60 percent, by count, of the oranges in each container grading at least U.S. No. 1 and the remainder, U.S. No. 2. Section 906.137 is established pursuant to § 906.37 of the order.

The interim final rule revised paragraph (a) of § 906.137 to establish a new identification mark "Texas Choice" for oranges and grapefruit and the mark "Texas Fancy" for grapefruit, to be used by handlers in connection with committee promotional and advertising projects. The use of these marks is limited to high quality, attractive looking fruit. This is intended to enhance the image of Texas oranges and grapefruit, and to augment the committee's promotional and advertising efforts to expand sales of Texas citrus. This action is based on a unanimous recommendation of the committee, which works with the Department in administering the marketing order.

The identifying mark "Texas Choice" established for oranges may only be affixed to containers of oranges or to individual oranges comprising a lot, if the oranges at least meet U.S. No. 2 requirements, and the oranges possess more yellow surface color than specified for U.S. No. 2 grade fruit. Also, the yellow or orange color must predominate over the green color on at least 75 percent (instead of the currently prescribed two-thirds for U.S. No. 2) of the fruit surface in the aggregate which is not discolored.

The use of "Texas Choice" for grapefruit is limited to U.S. No. 2 or better fruit, but less color discoloration is allowed than is allowed for U.S. No. 2. To use the identifying mark "Texas Choice", no more than 60 percent of the surface may be affected by discoloration. Under U.S. No. 2 specifications, not more than two-thirds of the surface of the grapefruit in the aggregate may be affected by discoloration. "Texas Fancy" is authorized for containers of grapefruit or individual grapefruit if the fruit meets U.S. No. 1 or better grade requirements, with less color discoloration than allowed for U.S. No. 1. Also, only 40 percent of the surface may be affected by discoloration instead of the current maximum of 50 percent for U.S. No. 1.

The terms relating to the U.S. grades have the same meaning as those specified in the U.S. Standards for Grapefruit (Texas and States other than Florida, California, and Arizona) [7 CFR 51.620 through 51.653] and in the U.S. Standards for Oranges (Texas and States other than Florida, California, and Arizona) [7 CFR 51.680 through 51.714].

The interim final rule also made a conforming change in paragraph (a)(3) of § 906.340 so that handlers do not have to affix container grade markings if the handlers properly utilize the identifying marks "Texas Choice" and "Texas Fancy" pursuant to § 906.137. The committee indicated that the use of grade markings like "U.S. No. 2", together with the identifying marks "Texas Choice" or "Texas Fancy", would cause confusion in the marketplace. In addition, an obsolete proviso currently in paragraph (a)(3) was deleted.

The industry is gradually recovering from the devastating freezes of the early 1980's. Total Texas orange production increased 61 percent from 38,000 tons (875,000 boxes) in 1986–87 to 61,000 tons (1,430,000 boxes) in 1987–88. Based on production trends since the 1983 freeze, it is expected that production for the 1988–89 season will show a relatively large increase over the previous season due to an increase in yields and bearing acreage. Shipments of fresh Texas oranges increased by 34 percent from 33,363 tons (785,000 boxes) in 1986–87 to 44,800 tons (1,054,000 boxes) in 1987–88. Total Texas grapefruit production increased by 97 percent from 77,000 tons (1,925,000 boxes) in 1986–87 to 152,000 tons (3,800,000 boxes) in 1987–88. The positive trend in production since the 1984–85 season is expected to continue into the 1988–89 season. Fresh shipments increased by 57 percent, from 62,000 tons in 1986–87 to 97,160 tons in 1987–88.

As supplies return to normal, strong efforts will be needed by the Texas citrus industry to regain its markets. The use of these new identifying marks in conjunction with the committee's efforts to promote and expand markets is designed to improve the image of Texas oranges and grapefruit in the marketplace and help regain markets.

Therefore, the Department's view is that the changes implemented by the interim final rule should be finalized and that the impact of this action will be beneficial to producers and handlers because it continues to provide handlers additional marketing flexibility by allowing them to conduct their marketing operations more closely in line with the committee's promotion and advertising activities. This should result in the more successful use of the

VOL 53 ISS 243 DEC 19 1988 UMI

committee's promotion funds and help handlers sell more fruit.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that the final rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) Handlers of Texas oranges and grapefruit are aware of this action, which is based on a unanimous recommendation of the committee made at a public meeting, and they are prepared to continue operating in accordance with the requirements; (2) this use of these identifying marks is voluntary, not mandatory; (3) the shipment of the 1988–89 season Texas orange and grapefruit crops is currently underway; (4) handlers should be able to continue to utilize the additional marketing tools provided by the interim final rule; (5) the interim final rule provided a 30-day comment period, and no comments were received; and (6) no useful purpose would be served by delaying the effective date of this action until 30 days after publication.

List of Subjects in 7 CFR Part 906

Marketing agreements and orders, Texas grapefruit, oranges.

For the reasons set forth in the preamble, the following action pertaining to 7 CFR Part 906 is taken:

PART 906—ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

1. The authority citation for 7 CFR Part 906 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Accordingly, the interim final rule amending §§ 906.137 and 906.340, which was published in the **Federal Register** [53 FR 40398, October 17, 1988], is adopted as a final rule without change.

[**Note:** This section will appear in the Code of Federal Regulations]

Dated: December 14, 1988.

Robert C. Kenney,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 88–29112 Filed 12–16–88; 8:45 am]

BILLING CODE 3410–02–M

7 CFR Part 1004

[DA–89–004]

Milk in the Middle Atlantic Marketing Area; Order Terminating Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Termination of rules.

SUMMARY: This action terminates the advertising and promotion program of the Middle Atlantic milk marketing order. Termination of the program was requested by the individual members of the Pennmarva Dairymen's Federation, Inc., an organization of cooperative associations representing more than 90 percent of the dairy farmers who are producers under the order. Since a majority of the producers on the market request the removal of the advertising and promotion provisions from the order, the program should be terminated.

EFFECTIVE DATE: Effective February 1, 1989—Amendments to § 1004.61(b) (3) and (7) with respect to milk marketing on and after January 1, 1989. Effective March 31, 1989—Remove §§ 1004.105, 1004.106 and 1004.110 through 1004.122 and the centerheading preceding them.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, USDA/AMS/Dairy Divison, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7311.

SUPPLEMENTARY INFORMATION:

Determinations

It is hereby determined that termination of the advertising and promotion program of the Middle Atlantic order is favored by a majority of the producers engaged in the production of milk for sale in the marketing area in the representative period, determined to be September 1988, and that such producers produced more than 50 percent of the milk produced for sale in the Middle Atlantic marketing area during such representative period.

It is also determined that notice of proposed rulemaking and public procedure thereon is impractical and unnecessary. Section 608c(16)(B) of the Agricultural Marketing Agreement Act of 1937, as amended, requires that if a majority of the producers engaged in the production of milk for sale in the marketing area in a representative period determined by the Secretary favor termination of an order and such producers produced more than 50 percent of the milk produced for sale in the marketing area during the representative period, such order shall be terminated. Section 608c(5)(I) of the Act authorizing advertising and promotion provisions in Federal milk orders also provides that the order provisions of the advertising and promotion program may be terminated separately from the other terms of the order regulating the handling of milk whenever the Secretary makes a determination with respect to such provisions as is provided for the termination of an order in section 603c(16)(B).

Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), it is hereby ordered that the funding provisions of the advertising and promotion program of the Middle Atlantic order (in § 1004.61(b) (3) and (7), the sentence "Subtract the withholding rate for the advertising and promotion program as computed in § 1004.121(e).") be terminated February 1, 1989, with respect to milk marketed on and after January 1, 1989. The remaining provisions of the advertising and promotion program (§§ 1004.105, 1004.106, and 1004.110 through 1004.122 and the centerheading preceding them) are hereby terminated effective March 31, 1989.

List of Subjects in 7 CFR Part 1004

Milk marketing order, Milk, Dairy products.

Therefore, 7 CFR Part 1004 is amended as follows:

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

1. The authority citation for 7 CFR Part 1004 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1004.61 [Amended]

2. In § 1004.61, paragraphs (b) (3) and (7) are amended by removing the sentence which reads, "Subtract the withholding rate for the advertising and promotion program as computed in § 1004.121(e)."

§§ 1004.105, 1004.106 and 1004.110 through 1004.122 [Removed]

3. Sections 1004.105, 1004.106 and 1004.110 through 1004.122 and the centerheading preceding them are removed.

Signed at Washington, DC, on: December 9, 1988.

Kenneth A. Gilles,

Assistant Secretary for Marketing and Inspection Services.

7 CFR Part 1135

[DA-89-003]

Milk in the Southwestern Idaho-Eastern Oregon Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends portions of the Southwestern Idaho-Eastern Oregon Federal milk order for the months of December 1988 through May 1989. The suspended provisions relate to the limits on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The action was requested by a cooperative association that represents a majority of the producers supplying the market to prevent uneconomic movements of milk.

EFFECTIVE DATE: December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-7183.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued November 15, 1988; published November 21, 1988 (53 FR 46875).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on November 21, 1988 (53 FR 46875) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views and arguments thereon. no comments opposing the suspension were received.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of December 1988 through May 1989 the following provisions of the order to not tend to effectuate the declared policy of the Act:

In § 1135.13, paragraphs (f) (3), (4), (5) and (6).

Statement of Consideration

This action removes for the months of December 1988 through May 1989 the limit on the amount of producer milk that a cooperative association or other handler may divert from pool plants to nonpool plants. The provisions suspended provide that a cooperative association may divert up to 80 percent of its total member milk received at all pool plants or diverted therefrom during any month. Similarly, the operator of a pool plant may divert up to 80 percent of its receipts of producer milk (for which the operator of such plant is the handler during the month) during any month.

Dairymen's Creamery Association, Inc. (DCA), an association of producers that supplies much of the market's fluid milk needs and handles much of the market's reserve milk supplies, requested the suspension. DCA indicated that operation of the 80-percent diversion limit would mean that over 2,000,000 pounds of milk must be unloaded and re-loaded each month at the Meridian, Idaho, pool supply plant to be transferred to nonpool manufacturing plants. According to the cooperative such unnecessary handling would be undertaken for the sole purpose of meeting the delivery requirements of the order. The cooperative stated that such unnecessary unloading and re-loading would take employees' time and require additional cleaning of lines and tanks.

Western Dairymen Cooperative, Inc., (WDCI) filed comments supporting the requested suspension. WDCI stated that the suspension would greatly reduce hauling costs, as well as reducing the cost of operating the supply plant.

For the first nine months of 1988, daily receipts of producer milk pooled under the Southwestern Idaho-Eastern Oregon order have increased nearly 28 percent over the same period of the previous year. At the same time, producer milk used in Class I has increased less than 6 percent.

Given the marked increase in the volume of producer milk pooled under the order, the requested suspension will allow the pooling of producers who stand ready to supply the fluid milk requirements of the marketing area to be handled without undue expense. There is no indication that the suspension would encourage association with the order of the milk of producers who are not bona fide suppliers of the bottling needs of the market.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing in the marketing area in that without extensive unnecessary and expensive hauling and handling, substantial quantities of milk from producers who regularly supply the market would be excluded from the marketwide pool, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1135

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, that the following provisions in § 1135.13 of the Southwestern Idaho-Eastern Oregon order are hereby suspended for the months of December 1988 through May 1989:

PART 1135—MILK IN THE SOUTHWESTERN IDAHO-EASTERN OREGON MARKETING AREA

1. The authority citation for 7 CFR Part 1135 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674

§ 1135.13 [Suspended in Part]

2. In § 1135.13, paragraphs (f) (3), (4), (5) and (6) are suspended.

Signed at Washington, DC, on: December 14, 1988.

Robert Melland,

Deputy Assistant Secretary of Agriculture, Marketing and Inspection Services.

[FR Doc. 88-29111 Filed 12-16-88; 8:45 am]

BILLING CODE 3410-02-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 701 and 741

Nonmember and Public Unit Accounts

AGENCY: National Credit Union Administration.

ACTION: Interim Final Rule.

SUMMARY: This amendment adds a new provision to Part 701 limiting the amount of public unit and nonmember accounts that may be maintained by Federal credit unions to 20 percent of total shares. To the extent that federally-insured state-chartered credit unions are authorized to accept such accounts, a new amendment to Part 741 would provide the same limitation. Exceptions to the limitation may be obtained from the appropriate NCUA Regional Director when warranted.

The NCUA has determined that the accumulation of large amounts of public unit and nonmember funds, amounts far in excess of that needed to provide services to a credit union's members, results in an unsafe and unsound condition, poses substantial risks to the credit union system and the National Credit Union Share Insurance Fund, and has already cause significant losses to both the Fund and credit unions.

In addition, although no specific language is included in this document, the NCUA Board is considering a proposal to require any federally-insured credit union that accepts nonmember accounts to obtain an annual CPA audit and disclose the audit to its nonmember accountholders. The Board requests comments on this issue as well as the interim final amendment.

DATES: Effective December 19, 1988. Comments must be received on or before February 20, 1989.

ADDRESS: Send comments to Becky Baker, Secretary of the Board, National Credit Union Administration, 1776 G Street, NW, Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: D. Michael Riley, Director, Office of Examination and Insurance, or James J. Engel, Deputy General Counsel, at the above address or telephone: (202) 682-9640 (Mr. Riley) or 682-9630 (Mr. Engel).

SUPPLEMENTARY INFORMATION:

Scope

The limitation contained in this amendment applies to all Federal credit unions that accept accounts of public units and nonmembers, including nonmember credit unions. Generally, public unit accounts will be nonmember accounts. (For purposes of this discussion the term "account" means a share, share certificate, or share draft account.) It also applies to those Federal credit unions that, having been designated low-income credit unions by NCUA, maintain accounts for other nonmembers in addition to credit union and public unit accounts. To the extent any federally-insured state-chartered credit unit is authorized to accept public unit and nonmember accounts, the limitation is applicable to them as well.

Although corporate credit unions are subject to the 20% limitation, due to the fact that the majority of their accounts are from member credit unions, this amendment should have little effect on their operations.

Federally-insured credit unions are also authorized to act as depositories and fiscal agents of the U.S. Treasury and maintain special accounts on its behalf. *See* 12 U.S.C. 1767 and 1789a; 12 CFR 701.37-1 and 701.37-2. This amendment does not apply to or affect those accounts.

Background

All Federal credit unions are authorized to accept and maintain certain types of nonmember accounts. Section 101(5) of the Federal Credit Union Act ("the Act"), 12 U.S.C. 1752(5), defines "member account" to include, *inter alia*, the accounts of nonmember credit unions and the accounts of nonmember units of Federal, state, or local governments and the political subdivisions of such units. The term also includes—*but only* in the case of a credit union that serves predominantly low-income members *and* that has received a low-income designation from NCUA—accounts of any nonmember. The terms "predominantly" and "low-income members" are defined in Part 700 of NCUA's regulations. Thus, NCUA designated "low-income" Federal credit unions can accept accounts from any nonmember, whereas other Federal credit unions can only accept nonmember accounts from other credit unions or public units.

Discussion

It is important to realize that the authority to accept nonmember accounts does not include the authority to provide credit union services to nonmembers. The funds maintained in nonmember accounts are to be used only for the purpose of serving the credit union's membership. Nonmember accounts are not designed to merely expand a credit union's share base or to simply provide another investment medium for large accountholders. They are to be used to fund the basic purpose of credit unions: *promoting thrift and creating a source of credit for the members*, whether in the form of loanable funds or through increased earnings on investments that in turn are paid out to members in the form of dividends.

The NCUA's concern with nonmember accounts stems from the fact that such accounts tend to represent large sums of money, often in excess of the $100,000 insurance limit, invested by both public units and institutional investors. In most credit unions, it is only the public unit accounts that come into play. In low-income credit unions, however, both public units and institutional investors can establish accounts. These large accounts have traditionally been sensitive to interest rate fluctuations. In order to keep these accounts, some credit unions have had to pay higher than market dividend rates. Large influxes of funds into credit unions cause asset/liability management problems that are often not within management's expertise to control. In some cases, the total amount of such accounts is far in excess of the amount necessary to meet the legitimate needs of members and is used to fund high risk loans—often to insiders—and questionable investments. As in the problem case credit unions identified below, we have seen management aggressively pursuing these types of accounts.

These practices have a direct bottom line effect on all federally-insured credit unions. Money from the National Credit Union Share Insurance Fund ("Fund") that would otherwise be used to build Fund equity or pay dividends to credit unions on their 1% Fund deposit is used to cover losses sustained due to liquidations and mergers. The credit union system also suffers when large accountholders, primarily public units, sustain losses on accounts in excess of the insurance limit. The public units suffer the monetary loss; credit unions suffer from a loss in confidence. The investment managers of these public units don't make distinctions between credit unions. Their future investments will go to a different market.

Past experience—problem cases.

Franklin Community FCU—Losses to the Fund may exceed $40 million. We extimate that accountholders will lose between $2.5 and $3 million because of amounts in excess of the $100,000 insurance limit.

Zionic FCU—Cost the Fund $4.5 million to liquidate. Nonmember accounts totalled $18 million as compared to $250,000 in member accounts.

American Free Enterprise FCU—Merged with another credit union at a cost of $898,000.

New American FCU—Liquidated at a cost of $3.1 million.

United Methodist FCU—Liquidated at a cost, to date, of $2.3 million.

Financial Services CU—Cost to liquidate in excess of $1 million.

Center Place Savings CU—A purchase and asssumption cost the Fund $150,000.

While the total of the above losses may, at first glance, appear to be within acceptable limits when considering the overall size of the Fund and the insured credit union system, it is not. These are losses resulting solely from the utilization of a legitimate authority in an unsafe and unsound manner for purpose beyond the authority's design and intent. Credit unions expect their Fund to be used to cover legitimate insurance risks, e.g., losses caused by economic conditions. They should find losses such as those caused by mismanagement and misuse of authority, particularly when it places the system in a bad light, to be intolerable. The Fund has a statutory duty to protect members, but it also has responsibility to the credit unions it insures to take steps to reduce losses when there are means within its control. This amendment is such a step.

The purpose of the 20% limitation contained in this amendment is to control the amount of these nonmember funds that flow into credit unions. For the most part, there should be no real affect on the majority of credit unions. The amendment recognizes that a credit union may have the ability to manage funds in excess of that proposed and may have a legitimate need for exceeding the limit. Some military credit unions, for example, act as the local base depository and may exceed the 20% cap in performing that function. A credit union can seek an exemption from the appropriate NCUA Regional Director. It will have to provide an explanation of a need for the exemption and provide the Region with a copy of its loan and investment policies.

In selecting the 20% figure, NCUA looked to past practice. From May 1975, through April 1982, Federal credit unions were permitted to accept up to a total of 20% of assets in public unit accounts; no more than 5% from any one public unit. The NCUA Board proposed expanding the limits in November 1981. The issue generated only eight comments, all in favor of the proposal but none of them indicating that the limits then in effect were burdensome or otherwise causing any problems for credit unions. The Board decided to eliminate the limits altogether but cautioned, "* * * volatile share capital such as public unit funds should be balanced with short-term assets in which the credit union earns a positive return." 47 FR 17979 (April 27, 1981).

Although the 20% limit in this amendment is based on shares as opposed to total assets, the Agency does not believe that this represents a material difference. The previous asset-based limitation imposed no hardship on credit unions. Individual situations will be addressed by the Regional Directors upon application of the affected credit unions.

Effective Date; Interim Rule; Comment Period

Although this amendment is being issued as an interim final rule and is effective immediately, the NCUA Board encourages credit unions to submit comments. Comments may be submitted on or before February 20, 1989.

The Board finds it necessary and appropriate to act quickly in this matter in order to limit further losses and reduce additional risk. Such losses affect all federally-insured credit unions due to their interest in the Fund and the need to maintain confidence in the system. Any delay in the effective date of this rule is contrary to the best interests of federally-insured credit unions. It is expected, however, that this rule will have no restraining effect on the operations of the vast majority of credit unions. Those credit unions that currently exceed the 20% limit need only notify their NCUA Regional Director and then, within 60 days, either request an exemption or provide a statement that they are in compliance.

State Regulators

As previously mentioned, this interim amendment applies to those federally-insured state chartered credit unions that accept public unit and nonmember accounts. Therefore, during the 60 day comment period, the Board intends to work with the State credit union regulators to obtain their guidance regarding their participation in the administration of the rule. The NCUA Board specifically requests their comments and recommendations on this rule and on the proposal set forth below.

Request for Comments

The NCUA Board is also requesting comments on a related issue currently being considered. The issue is whether or not all federally-insured credit unions that accept nonmember accounts should be required to obtain annual CPA audits and disclose the audits to the nonmember accountholders. In choosing to accept such accounts, a credit union opens itself as an investment medium to a broader constituency and may be assuming an obligation beyond that owed to its members. Such a requirement not only benefits the nonmember accountholders but also, and more importantly, it will, in the long run, benefit the entire credit union system.

As previously mentioned, the largest nonmember accounts are rate sensitive. Frequently, those nonmembers do not analyze the institutions into which they place their funds as long as it is federally insured and is paying the highest available rate. Although this may be their own shortcoming, when they suffer losses they tend to look to other industries or markets for fund placement. This removes those credit unions that can adequately manage these funds, and may well need them to meet their own member's needs, from being considered as a viable investment option. Disintermediation occurs and the credit union system is the loser.

If credit unions wish to compete for these funds, they must be willing to accept additional responsibilities. The fact that CPA audits are required and available can only help to bolster confidence in what credit unions already know is a sound system.

While any new requirement is viewed with skepticism and as additional paperwork, the acceptance of nonmember accounts is not mandatory. Only those credit unions that opt to deal with such accounts would be affected. Many credit unions already utilize CPA audits. Designated low-income credit unions, those that might view the requirement as burdensome since they are more likely to rely on nonmember accounts than do other types of credit unions, will benefit the most. It is their reliance that subjects them to the closest scrutiny. Fiduciaries of public units and charitable or community development groups will have more confidence in providing funds to these credit unions when independent audits are available.

Comments on this proposal must be received on or before February 20, 1989.

VOL 53 ISS 243 DE 19 1988 UMI

Regulatory Procedures

Regulatory Flexibility Act

This interim final rule imposes a limitation on the amount of funds that a federally-insured credit union may accept in the form of public unit and nonmember accounts. However, the rule also provides a method for obtaining an exemption from the limitation upon a showing of need and ability to manage the funds in these accounts. For that reason, the NCUA Board certifies that this interim final rule will not have a significant economic impact on a substantial number of small credit unions. Therefore, a regulatory flexibility analysis is not required pursuant to 5 U.S.C. 605(b).

Paperwork Reduction Act

This interim final rule contains one paperwork requirement: any credit union requesting an exemption from the 20% limitation must submit an explanation of the need to raise the limit and must provide copies of its lending and investment policies. This requirement will be submitted to the Office of Management and Budget for review under the Paperwork Reduction Act. Written comments on this rule should be forwarded directly to the OMB Desk Officer indicated below at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20530, ATTN: Jerry Waxman.

Executive Order 12612

The NCUA Board has considered the fact that this interim final rule will affect federally-insured state-chartered credit unions (FISCU's) that accept public unit and nonmember accounts. It does not impose any additional costs or burdens on the states, nor does it affect the states' ability to discharge traditional state government functions. The benefits provided and protection afforded by the NCUSIF is the same for FISCU's as it is for Federal credit unions. It is protection afforded through a Federal system and the responsibility for administering that system lies with the NCUA Board. All federally-insured credit unions, whether Federal or state chartered, will be subject to the same requirement. To the extent that the practices of all credit unions are the same, i.e., acceptance of public unit and nonmember accounts, and have the same effect on their insuring fund, those practices must be subject to the same requirements. The acts and practices subject to this interim final rule have implications for the entire federally-insured credit union system and its insurer and are not unique to only one type of charter.

List of Subjects

12 CFR Part 701

Credit unions, Public units, Nonmember accounts.

12 CFR Part 741

Credit unions, Public units, Nonmember accounts.

By the National Credit Union Administration Board on December 14, 1989.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA amends its regulations as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

1. The authority citation for Part 701 continues to read as follows:

Authority: 12 U.S.C. 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787, and 1789.

2. By adding a new § 701.32 to read as follows:

§ 701.32 Payments on shares by public units and nonmembers.

(a) A federal credit union may, to the extent permitted under section 107(6) of the Act, receive payments on shares, (regular shares, share certificates, and share draft accounts) from public units and political subdivisions thereof (as those terms are defined in § 745.1) and nonmembers, including nonmember credit unions.

(b) Unless a greater amount has been approved by the Regional Director, the maximum amount of all such accounts shall not, at any given time, exceed 20% of the total shares of the Federal credit union. A Federal credit union seeking an exemption from the 20% limit must present, at a minimum, an explanation of the need to raise the limit and copies of its lending and investment policies.

(c) The limitations herein do not apply to accounts maintained in accordance with §§ 701.37–1 (Treasury Tax and Loan accounts) and 701.37–2 (Treasury Depository or Financial Agent accounts.)

PART 741—REQUIREMENTS FOR INSURANCE

3. The authority citation for Part 741 continues to read as follows:

Authority: 12 U.S.C. 1766, 1781, and 1789.

§§ 741.5 through 741.10 [Redesignated as § 741.6 through 741.11]

4. By redesignating §§ 741.5 through 741.10 as §§ 741.6 through 741.11.

5. By adding a new § 741.5 to read as follows:

§ 741.5 Maximum public unit and nonmember accounts.

Any credit union that is insured, or that makes application for insurance, pursuant to Title II of the Act, must adhere to the requirements of § 701.32 regarding public unit and nonmember accounts, provided it has the authority to accept such accounts.

[FR Doc. 88–29079 Filed 12–16–88; 8:45 am]

BILLING CODE 7535–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88–ASW–2; Amdt. 39–6058]

Airworthiness Directives; Bell Helicopter Textron, Inc. (BHTI), Model 206L and 206L–1 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires the installation of more reliable fuel system flow switches and the relocation of the in-line fuel filters on Bell Model 206L and 206L–1 helicopters. The AD is needed to prevent failures in the fuel system which could result in an engine flameout and subsequent loss of the helicopter.

DATE: *Effective Date:* January 18, 1989.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 18, 1989.

Compliance: Required within the next 250 hours' time in service after the effective date of this AD, unless already accomplished.

ADDRESSES: The applicable Alert Service Bulletin, No. 206L–88–52, dated June 10, 1988, may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, Texas 76101, Attention: Customer Support, or may be examined at the Regional Rules Docket, Office of the Regional Counsel, FAA Southwest Region, 4400 Blue Mound Road, Forth Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Tyrone D. Millard, Helicopter Certification Branch, ASW–170, Federal Aviation Administration, Fort Worth, Texas 76193–0170, telephone (817) 624–5177.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring the installation of more reliable fuel system flow switches and the relocation of the in-line fuel filters on Bell Model 206L and 206L–1 helicopters was published on May 25, 1988, in the **Federal Register** (53 FR 18854).

The proposal was prompted by reports of certain part number fuel system flow switches installed on Bell Model 206L and 206L–1 helicopters malfunctioning due to small particulate matter which is typically found in the fuel system. The malfunctions, in some cases, were found to have caused failures in the fuel system which subsequently resulted in engine flameout. Consequently, the proposal called for the installation of more reliable fuel system flow switches and the relocation of the in-line fuel filters on the Bell Model 206L and 206L–1 helicopters.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received. Accordingly, the proposal is adopted without change.

The regulations adopted herein will not have substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation only involves 200 helicopters, and the approximate cost to each helicopter is $2,200 which would result in a total cost of $440,000. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a); 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Bell Helicopter Textron, Inc. (BHTI): Applies to Model 206L helicopters, S/N's 45001 through 45153 and S/N's 46601 through 46617, and to Bell Model 206L–1 helicopters, S/N's 45154 through 45840, certificated in any category, with fuel system flow switches, P/N's 206–063–635–001, 206–064–601–001, –003, –101, or –103 installed. (Airworthiness Docket No. 88–ASW–2).

Compliance is required as indicated, unless already accomplished.

To prevent a possible fuel system failure due to the malfunction of the fuel system flow switches which could result in an engine flameout and subsequent loss of the helicopter accomplish the following:

(a) Within the next 250 hours' time in service after the effective date of this AD, remove and replace the fuel system flow switches, P/N's 206–063–635–001, 206–064,601–001, –003, –101, or –103, whichever is installed, with fuel system flow switch retrofit kit, P/N 206–703–004–101 and relocate the in-line fuel filters, P/N 206–063–693–001, in accordance with Bell Helicopter Textron, Inc., Alert Service Bulletin No. 206L–88–52, dated June 10, 1988.

(b) An alternate method of compliance which provides an equivalent level of safety with this AD may be used when approved by the manager, Helicopter Certification Branch, Federal Aviation Administration, Fort Worth, Texas 76193–0170.

The procedure shall be done in accordance with Bell Helicopter Textron, Inc., Alert Service Bulletin No. 206L–88–52, dated June 10, 1988. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a)(1) and 1 CFR Part 51. Copies may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, Texas 76101, Attention: Customer Support. Copies may be inspected at the Office of the Regional Counsel, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, or at the Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC.

This amendment becomes effective January 18, 1989.

Issued in Fort Worth, Texas, on October 21, 1988.

L.B. Andriesen,

Manager, Rotocraft Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

14 CFR Part 75

[Airspace Docket No. 88–ACE–10]

Establishment of Jet Route J–233; Iowa

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes new Jet Route J–233 located in the vicinity of Waterloo, IA. This route will bypass the arrival/departure routes in the Chicago terminal area. This action improves the traffic flow in the Chicago area, aids flight planning and reduces delays.

EFFECTIVE DATE: 0901 u.t.c., February 9, 1989.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9250.

SUPPLEMENTARY INFORMATION:

History

On October 31, 1988, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to establish Jet Route J–233 located in the vicinity of Waterloo, IA (53 FR 43898). The route establishes a routing to/from Minneapolis, MN, through the Chicago area that will provide a safe, orderly and expeditious flow of traffic. This action saves fuel, aids flight planning, and controller coordination. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The Rule

This amendment to Part 75 of the Federal Aviation Regulations establishes new Jet Route J–233 located in the vicinity of Waterloo, IA. The route establishes a routing to/from Minneapolis, MN, through the Chicago area that will provide a safe, orderly and expeditious flow of traffic. This action saves fuel, aids flight planning, and controller coordination.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is note a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 75 of the Federal Aviation Regulations (14 CFR Part 75) is amended, as follows:

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

1. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

2. Section 75.100 is amended as follows:

J–233 [New]

From Waterloo, IA; INT Waterloo 184° and St. Louis, MO, 318° radials; to St. Louis.

Issued in Washington, DC, on December 13, 1988.

Harold W. Becker,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

[FR Doc. 88–29071 Filed 12–16–88; 8:45 am]

BILLING CODE 4910–13–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 15

Reports; General Provisions

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has amended § 15.03(a), 17 CFR 150.3(a) (1987), of its regulations which affects reports filed by contract markets, futures commission merchants ("FCMs"), foreign brokers and traders ("large-trader data"). A Commission review of the reporting levels set forth in § 15.03(a) of the regulations indicates that the reporting levels in futures traded on feeder cattle, long-term (6½–10 year) U.S. Treasury notes, cocoa and crude oil can be raised from their current levels and that the reporting levels in futures traded on copper, the New York Stock Exchange Composite Index and the Value Line Average Index should be lowered from the current levels.

EFFECTIVE DATE: January 18, 1989.

FOR FURTHER INFORMATION CONTACT: Lamont L. Reese, Division of Economic Analysis, 2033 K Street, NW., Washington, DC, Telephone (202) 254–3310.

SUPPLEMENTARY INFORMATION: While the Commission has determined that this final rule does not affect the existing paperwork burden previously approved by OMB the public reporting burden for this collection of information is estimated to average .1492 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Joseph G. Salazar, CFTC Clearance Officer, 2033 K Street NW., Washington, DC 20581; and Gary Waxman, Office of Management and Budget, Paperwork Reduction Project (3038–0009), Washington, DC 20503.

Reporting levels are set in commodities to ensure that the Commission receives adequate information to carry out its market surveillance programs that include detection and prevention of market congestion and price manipulation and enforcement of speculative limits. In addition, the information serves as a basis to gauge overall hedging and speculative uses of the futures markets, used of the markets by foreign participants and other matters of public and/or Congressional concern.

Generally, Parts 17 and 18 of the regulations require reports from members of contract markets, FCMs or foreign brokers and traders, respectively, when a trader holds a "reportable position," *i.e.*, any open position held or controlled by a trader at the close of business in any one future of a commodity traded on any one contract market that is equal to or in excess of the quantities fixed by the Commission in § 15.03 of the regulations. See, § 15.00(b), 17 CFR 15.00(b) (1988).

Members of contract markets, FCMs and foreign brokers who carry accounts in which there are "reportable positions" of traders are required to identify such accounts on a Form 102 and report on the series '01 forms any reportable positions in the account, the delivery notices issued or stopped by the account and any exchanges of futures for physicals. Traders who own or control reportable positions are required to file annually a CFTC Form 40 giving certain background information concerning their trading in commodity futures and, on call by the Commission, must submit a Form 103 showing positions and transactions in the commodity specified in the call.

The Commission reviews information concerning trading volume, open interest and the number and position sizes of individual traders relative to the reporting levels for each market to determine if coverage is adequate for effective market surveillance. In cases where coverage appears more than required, the Commission may propose to raise reporting levels as part of its ongoing effort to reduce the reporting burden. In other cases, where the current reporting level appears too high for adequate coverage, the Commission may proposed to lower the reporting level.

On the basis of its most recent review of reporting levels, the Commission proposed to change the reporting levels in certain commodities as follows: [1] in Feeder Cattle, and increase from 25 contracts to 50 contracts; in Long-term Treasury Notes, an increased from 200 contracts to 300 contracts; in Cocoa, an increase from 25 to 50 contracts; in Crude Oil, an increase from 200 to 250 contracts; in copper, a decrease from 200 contracts to 100 contracts; in the Value Line Average Index and in the New York Stock Exchange Index, a decrease from 100 contracts to 50 contracts.

Two futures exchanges commented on the Commission's proposal. The Coffee, Sugar and Cocoa Exchange supported the Commission's efforts to reduce reporting burden on industry members and stated that the 50-contract level for futures traded on cocoa would be adequate for Market Surveillance. The New York Mercantile Exchange (NYMEX), however, opposed the Commission's proposal to raise reporting level in crude oil futures from 200 contracts to 250 contracts.

[1] See 53 FR 39103 (October 5, 1988).

NYMEX rules stipulate that reporting levels set by the exchange for its own reporting system are adjusted in tandem with changes in the Commission's reporting levels unless the President of the exchange determines otherwise.[2] The exchange stated that the current 200 contract level for crude oil futures was an appropriate level to support the exchange's surveillance activities, in particular for financial surveillance, and to monitor the delivery process. In view of this, NYMEX indicated that it would exercise its discretion to maintain the 200 contract level in crude oil futures for its reporting system if the Commission adopted as final the proposed amendments to Rule 15.03. NYMEX further opined that adoption of the proposed amendments by the Commission may require persons to complete duel sets of records for reporting.

Commodity exchanges which maintain futures large trader systems similar to the Commission's sometimes exercise independent discretion in setting reporting levels that appear tailored to their individual market surveillance programs. Certain exchanges also use their large-trader reports for other purposes, such as financial surveillance. At present, one exchange has set reporting levels in certain markets lower than the Commission's levels, while another exchange has set some reporting levels higher than the Commission's. Exchanges' individual determinations to collect more, or in some cases fewer, reports than the Commission appears reasonable in light of differences in the characteristics of some contract markets and different purposes underlying the data collection efforts. Moreover, FCMs and firms which are members of these exchanges have not expressed any compelling reasons to require that exchange and Commission reporting levels be set at the same levels in all cases. Given these current practices, the Commission believes that when it has identified circumstances such as those that exist in crude oil futures, where the Commission can accomplish its purposes with fewer reports from the industry, it is obliged to raise the reporting level. In view of this, the Commission has determined to adopt its rule amendments as proposed.

The Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA")[3] requires that agencies, in proposing rules, consider the impact of those rules on small businesses. These amendments affect large traders, futures commission merchants and other similar entities such as foreign brokers and foreign traders. The Commission has defined "small entities" as used by the Commission in evaluating the impact of its rule in accordance with the RFA. 47 FR 18618 through 18621 (April 30, 1982).

In that statement, the Commission concluded that large traders and futures commission merchants are not considered to be small entities for purposes of the RFA. Similarly, foreign brokers and foreign traders report only if carrying or holding reportable, *i.e.*, large positions. Nonetheless, the Commission invited comments from any firm which believed that these rules would have a significant economic impact upon its operations. No comments were received concerning this matter.

Paperwork Reduction Act

The Paperwork Reduction Act of 1980 (Act), 44 U.S.C. 3501 *et. seq.*, imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the Paperwork Reduction Act. In compliance with the Act the Commission previously submitted rules associated with this information collection requirement to the Office of Management and Budget. The Office of Management and Budget approved the collection of information associated with this rule on September 14, 1988 and assigned OMB control number 3038–0009 to the collection. The Commission has determined that this final rule does not affect the burden approved by OMB at that time. The OMB approved burden is as follows:

Average burden hours per response	.1492
Number of Respondents	4,133
Frequency of response	[1]

[1] Daily and weekly.

Copies of the OMB approved information collection package associated with this rule may be obtained from Gary Waxman, Office of Management and Budget, Paperwork Reduction Project (3038–0009), Washington, DC 20503, (202) 395–7340.

List of Subjects in 17 CFR Part 15

Brokers and large traders, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission is amending Part 15 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 15—REPORTS—GENERAL PROVISIONS

3. The authority citation for Part 15 continues to read as follows:

Authority: 7 U.S.C. 2, 4, 6, 6a (a)–(d), 6f, 6g, 6i, 6k, 6m, 6n, 7, 9, 12a, 19 and 21; 5 U.S.C 552. and 552(b), unless otherwise noted.

4. Section 15.03 is revised to read as follows:

§ 15.03 Quantities fixed for reporting.

The quantities for the purpose of reports filed with Parts 17 and 18 of this chapter are as follows:

Commodity	Quantity
Wheat (bushels)	500,000
Corn (bushels)	500,000
Soybeans (bushels)	500,000
Oats (bushels)	300,000
Cotton (bales)	5,000
Soybean oil (contracts)	150
Soybean meal (contracts)	150
Live cattle (contracts)	100
Feeder cattle (contracts)	50
Hogs (contracts)	50
Sugar No. 11 (contracts)	200
Sugar No. 14 (contracts)	100
Cocoa (contracts)	50
Copper (contracts)	100
Gold (contracts)	200
Silver bullion (contracts)	150
Platinum (contracts)	50
No. 2 Heating oil (contracts)	150
Crude oil (contracts)	250
Unleaded gasoline (contracts)	100
Long-term U.S. Treasury bonds (contracts)	500
GNMA (contracts)	100
Three-month (13-week) U.S. Treasury bills (contracts)	100
Long-term U.S. Treasury notes (contracts)	300
Three-month Eurodollar time deposit rates (contracts)	400
Foreign currencies (contracts)	200
Standard and Poor's 500 stock price index (contracts)	300
New York Stock Exchange composite index (contracts)	50
Amex Major Market Index—maxi (contracts)	50
Municipal bonds (contracts)	50
Value Line Average Index (contracts)	50
All other commodities (contracts)	25

Issued in Washington, DC on December 13, 1988, by the Commission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 2

[Docket No. RM87-34-000; Order No. 500-F]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Order Extending Date for Filing Final Tariff Sheets Under Alternative Passthrough Mechanism

Issued December 13, 1988.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Statement of Policy; Order Extending Date for Filing Final Tariff Sheets under Alternative Passthrough Mechanism.

SUMMARY: In Order No. 500 (52 FR 30,334 (Aug. 14, 1987)), the Federal Energy Regulatory Commission (Commission) set a deadline of December 31, 1988, for the filing of tariff sheets to recover take-or-pay buyout and buydown costs under the alternative passthrough mechanism described in that order. In this order, the Commission is extending the deadline to March 31, 1989. The Commission believes the short extension is necessary and reasonable to permit pipelines and producers to bring their settlement negotiations to an orderly conclusion.

DATES: This order is effective December 9, 1988. (5 U.S.C. 553(d)(2) (1982)). An extension of time for filing tariff sheets is granted to and including March 31, 1989.

FOR FURTHER INFORMATION CONTACT: Richard O. Howe, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, Phone: (202) 357-8274.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357-8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this order will be available on CIPS for 10 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

Order Extending Date for Filing Final Tariff Sheets Under Alternative Passthrough Mechanism

In Order No. 500, 52 FR 30,334 (Aug. 14, 1987), the Commission set a deadline of December 31, 1988, for the filing of final tariff sheets including all take-or-pay buyout and buydown costs eligible for recovery under the alternative passthrough mechanism described therein. Several pipelines in various rate case dockets, as well as the Interstate Natural Gas Association of America (INGAA), have requested extensions of the December 31, 1988 deadline.

The pipelines assert that an extension is necessary to provide them a reasonable opportunity to complete negotiations with natural gas producers and to prevent forced settlements detrimental to themselves and consumers.

The Natural Gas Supply Association, an organization of producers, supports an extension of the deadline date. Amoco Production Company, United Distribution Companies, and, jointly, the Process Gas Consumers Group, the American Iron and Steel Institute, and the Association of Businesses Advocating Tariff Equity have filed opposing the extension on the ground that an extension would delay the prompt resolution of the take-or-pay problem to the detriment of the entire industry.

While the Commission continues to believe that the take-or-pay deterrent to competitive natural gas markets must be eliminated as quickly as possible, the Commission has concluded that, on balance, a short extension of the deadline date is necessary and reasonable to permit pipelines and producers to bring to an orderly conclusion their settlement negotiations. The Commission does not believe that such an extension will prejudice the interests of any segment of the industry. Accordingly, the Commission will extend the deadline date to March 31, 1989.

In addition, for contracts that are in litigation on March 31, 1989, the Commission will permit a pipeline to file by that date to include in its tariffs language permitting the pipeline to pursue the litigation to its natural end (of judgment and final appeal or settlement) and then to file to recover eligible costs resulting from these contracts under the equitable sharing mechanism.[1] The eligible costs do not include punitive damages or penalties.

List of Subjects in 18 CFR Part 2

Administrative practice and procedure, Electric power, Environmental impact statements, Natural gas, Pipelines, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Part 2, Chapter I, Title 18, Code of Federal Regulations as set forth below.

By the Commission.

Lois D. Cashell,

Secretary.

PART 2—GENERAL POLICY AND INTERPRETATIONS

1. The authority citation for Part 2 continues to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101-7352 (1982); E.O. [Docket Nos. RM88-14-001 and RM88-15-000; Order No. 509]

Interpretation of, and Regulations Under, Section 5 of the Outer Continental Shelf Lands Act (OCSLA) Governing Transportation of Natural Gas by Interstate Natural Gas Pipelines on the Outer Continental Shelf

Issued December 9, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is amending its regulations to implement section 5 of the Outer Continental Shelf Lands Act (OCSLA) (43 U.S.C. 1334 (1982). In addition, the Commission also revises its interpretative rule on section 5 of the OCSLA (Interpretation of section 5 of the Outer Continental Shelf Lands Act, Order No. 491, 53 FR 14922 (Apr. 26, 1988), 43 FERC Reports ¶ 61,006 (Apr. 1, 1988). The final rule provides every jurisdictional interstate natural gas pipeline that transports gas on or across the Outer Continental Shelf (OCS) with a blanket certificate authorizing and requiring nondiscriminatory transportation of national gas on behalf of others, and requires every OCS pipeline to file tariffs to implement that blanket certificate authorization. The service performed under the blanket certificate includes both firm and interruptible transportation service and OCS pipelines must, pursuant to the blanket certificate and section 5 of the OCSLA, provide open and nondiscriminatory access for both owner and nonowner shippers. The final rule requires all OCS pipelines to file new rates, but maintains their current rates in effect until the new rates (and, at the same time, the blanket certificates) become effective.

EFFECTIVE DATE: This rule will become effective February 17, 1989.

FOR FURTHER INFORMATION CONTACT: Roger E. Smith, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357-8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this final rule will be available on CIPS for 10 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is amending its regulations to implement section 5 of the Outer Continental Shelf Lands Act (OCSLA).[1] In addition, the Commission also revises its interpretative rule on section 5 of the OCSLA.[2] The final rule provides every jurisdictional interstate natural gas pipeline that transports gas on or across the Outer Continental Shelf (OCS) with a blanket certificate authorizing and requiring nondiscriminatory transportation of natural gas on behalf of others, and requires every OCS pipeline to file tariffs to implement that blanket certificate authorization. The service performed under the blanket certificate includes both firm and interruptible transportation service and OCS pipelines must, pursuant to the blanket certificate and section 5 of the OCSLA, provide open and nondiscriminatory access for both owner and nonowner shippers. The final rule requires all OCS pipelines to file new rates, but maintains their current rates in effect until new rates (and, at the same time, the blanket certificates) become effective.

II. Background

On April 1, 1988, the Commission issued two orders concerning the OCSLA. The first order (Order No. 491) contained the Commission's interpretation of section 5 of the OCSLA.[3] The second order was a notice of proposed rulemaking (NOPR) that proposed regulations to implement section 5 of the OCSLA.[4]

Section 5(e) of the OCSLA authorizes the Secretary of the Interior to grant rights-of-way through the submerged lands of the Outer Continental Shelf (OCS) for pipelines to transport oil, natural gas, sulphur, or other minerals prescribed by the Secretary. Section 5(e) also gives the Commission certain responsibilities on the OCS by providing that every right-of-way on the OCS be granted:

> upon the express condition that oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas, produced from submerged lands or Outer Continental Shelf lands in the vicinity of the pipelines in such proportionate amounts as the Federal Energy Regulatory Commission, in consultation with the Secretary of Energy, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste.[5]

In addition, section 5(f)(1) of the OCSLA provides that every permit, license, easement, right-of-way or other grant of authority for the transportation by pipeline on or across the OCS of oil or natural gas must require that the pipeline be operated in accordance with certain competitive principles. Section 5(f)(1) provides that:

> Except as provided in paragraph (2) every permit, license, easement, right-of-way or other grant of authority for the transportation by pipeline on or across the Outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:
>
> (A) The pipeline must provide open and nondiscriminatory access to both owner and nonowner shippers.
>
> (B) Upon the specific request of one or more owner or non-owner shippers able to provide a guaranteed level of throughput, and on the condition that the shipper or shippers requesting such expansion shall be responsible for bearing their proportionate share of the costs and risks related thereto, the Federal Energy Regulatory Commission may, upon finding, after a full hearing with due notice thereof to the interested parties, that such expansion is within technological limits and economic feasibility, order a subsequent expansion of throughput capacity of any pipeline for which the permit, license, easement, right-of-way, or other grant of

authority is approved or issued after the date of enactment of this subparagraph. This subparagraph shall not apply to any such grant of authority approved or issued for the Gulf of Mexico or the Santa Barbara Channel.

Section 5(f)(1) was added to the OCSLA in 1978 as part of the Outer Continental Shelf Lands Act Amendments of 1978 (OCSLAA).[6] The Conference Report on the OCSLAA states that:

> The agreed-to subsection (f) provides for open and non-discriminatory access to apply to all pipelines and is a reaffirmation and strengthening of subsection 5(e) which provides for the transport or purchase of all OCS oil and gas "without discrimination".[7]

Section 5(f)(1)(A) provides that an OCS pipeline must provide open and nondiscriminatory access to both owner and nonowner shippers. This requirement is in addition to the express condition in section 5(e) of the OCSLA that OCS pipelines must transport or purchase OCS gas "without discrimination."

Section 5(f)(1)(B) of the OCSLA provides, under very narrow circumstances, for the expansion of pipeline capacity on the OCS upon the specific request of one or more owner or nonowner shippers. Before the Commission can order an expansion of throughput capacity the requesting shipper must agree to be responsible for bearing a proportionate share of the costs and risks related to the expansion and the Commission must, after a full hearing with due notice to the interested parties, find that the expansion is within technological limits and economic feasibility. Moreover, the last sentence of section 5(f)(1)(B) exempts the vast majority of OCS pipelines from the requirement by providing that the subparagraph does not apply to any grant of authority in the Gulf of Mexico or the Santa Barbara Channel.

Section 5(f)(2) of the OCSLA gives the Commission the authority to exempt a pipeline or class of pipelines from any of the requirements in section 5(f)(1) if the pipeline feeds into a facility where oil and gas are first collected or a facility where oil and gas are first separated, dehydrated or otherwise processed. Section 5(f)(3) requires the Secretary of Energy and the Commission to consult with, and give due consideration to the views of, the Attorney General on specific conditions to be included in permit, license, easement, right-of-way, or grant of authority in order to ensure that the pipelines operate in accordance with the competitive principles in section 5(f)(1). In preparing such views, the Attorney General is also required to consult with the Federal Trade Commission. Finally, section 5(f)(4) of the OCSLA provides that nothing in subsection (f) shall be deemed to limit, abridge, or modify any authority of the United States under any other provision of law with respect to pipelines operating on the OCS.

In Order No. 491 the Commission indicated that the statutory requirements of the OCSLA were similar to the statutory requirements of the Natural Gas Act (NGA) and concluded that the condition of nondiscriminatory access (open access) placed on the transportation program established in Order Nos. 436 and 500 [8] satisfied, in substantial measure, the nondiscriminatory access requirements in sections 5(e) and 5(f)(1)(A) of the OCSLA.[9] However, in Order No. 491 the Commission viewed the enactment of the specific open access requirement in section 5(f)(1)(A) to require something more than the open access conditions established in Order Nos. 436 and 500 under the Natural Gas Act (NGA).[10] Consequently, the Commission proposed to implement sections 5(e) and 5(f)(1)(A) of the OCSLA by requiring OCS pipelines to offer transportation to all who seek it on a pro rata basis.

On the same day the Commission issued Order No. 491, it also issued the NOPR that proposed regulations to implement its interpretation of sections 5(e) and 5(f) of the OCSLA.[11] The NOPR proposed to require that all jurisdictional interstate natural gas pipelines transporting gas on or across the OCS obtain a blanket certificate under Part 284 of the Commission's regulations authorizing the transportation of natural gas on behalf of others on an open and nondiscriminatory basis. The transportation service was to include firm and interruptible transportation on behalf of owner and nonowner shippers of OCS gas. The Commission also proposed to grant an OCS pipeline a temporary blanket certificate pending the pipeline's application for a permanent blanket certificate. In addition, the Commission proposed regulations that would allow OCS pipelines to establish interim rates for transportation services pending the issuance of the permanent blanket certificate.

The Commission received 13 requests for rehearing of Order No. 491.[12] On June 1, 1988, the Commission issued an order which granted the rehearing requests solely for the purpose of further consideration.[13] The Commission indicated that it would address the issues raised in the rehearing requests on Order No. 491 when it reviewed the comments received on the NOPR.

The Commission received comments from 41 commenters on the NOPR. Commenters included several pipeline companies, producers, distributors, trade associations and industrial end users, as well as the U.S. Departments of Justice, Energy and the Interior.[14] In addition, Indicated Producers filed supplemental comments on Order No. 491 when they filed their comments on the NOPR. Two commenters filed reply comments in response to Indicated Producers' supplemental comments.[15] The Commission has considered all of these comments in issuing the final rule.

III. Discussion

A. Public Reporting Burden

Except for the specific information collection burdens discussed below, this rule does not change existing Commission regulations governing interstate pipelines that provide transportation services under Part 284, Subpart G of the Commission's regulations. The rule does, however, extend the requirements of Part 284, Subpart G to a new set of interstate pipelines (*i.e.*, OCS pipelines) in the sense that every OCS pipeline is issued a blanket transportation certificate under Part 284, Subpart G of the Commission's regulations. In addition, every OCS pipeline must have a transportation rate schedule on file that conforms to § 284.7 and to § 284.8(d) for firm service and to § 284.9(d) for interruptible service. These requirements are necessary for the Commission to implement sections (5)(e) and (5)(f) of the OCSLA.

The information collection burden of filing appropriate rates schedules is estimated to be 240 hours per response. The frequency of response is one response per year for the first year, and less frequently thereafter. The number of respondents is estimated to be 43.[16] All respondents will be interstate natural gas pipelines that hold a certificate under section 7 of the NGA authorizing the construction and operation of facilities on the OCS.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 (Attention: Mike Miller (202) 357–9205); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. (Attention: Desk Officer for the Federal Energy Regulatory Commission).

B. Pro Rata Allocation of Capacity

Virtually all of the comments received by the Commission concern the Commission's proposal to implement section 5 of the OCSLA by requiring pro rata allocation of capacity on the OCS. In general, pro rata allocation of capacity is favored by producers and is opposed by pipelines and distributors. Most of the commenters who oppose pro rata allocation of capacity have two central arguments. First, they assert that mandatory pro rata allocation of capacity would make all OCS pipelines common carriers and that the legislative history of the OCSLA conclusively demonstrates that Congress did not intend that OCS pipelines be common carriers. Second, commenters specified several technical and operational problems in imposing a mandatory pro rata allocation scheme on all OCS pipelines.

The Commission believes that it has the legal authority under the OCSLA to require pro rata allocation of capacity. However, the commenters have identified many significant technical and operational problems associated with generically requiring pro rata allocation for all OCS pipelines. A generic pro rata allocation scheme could result in pro rata reductions of committed capacity that would disrupt a variety of existing transportation arrangements. Many of these arrangements are of long standing; various producers, pipelines, and ultimate customers rely on them. The Commission, as a matter of policy, is reluctant to disrupt ongoing transportation arrangements. Rather, our purpose is to remove impediments to access.

Accordingly, based on the record before us, the Commission has concluded that it can and should implement the nondiscriminatory access mandate in section 5 of the OCSLA without generically imposing, by rule, a pro rata allocation scheme on all OCS pipelines. We believe that it may well be possible to remedy the problems of access on the OCS through less sweeping regulatory actions, as discussed below. If, however, access problems on the OCS continue to exist as OCS pipelines implement the requirements of this rule, the Commission will not hesitate to consider pro rata allocation of capacity on a case-specific basis, taking into account the specific factual context in which such problems arise.

C. OSCLA Open Access Requirements

In this final rule, the Commission implements sections 5(e) and 5(f) of the OSCLA by issuing to every OCS pipeline an NGA section 7 blanket transportation certificate under Subpart G of Part 284 of the Commission's regulations.[17] Moreover, the Commission is requiring, pursuant to section 5 of the NGA, every OCS pipeline to file tariffs implementing their blanket certificates. The OCS pipelines to whom blanket certificates are issued by this order, and who are required to file implementing tariffs, are listed in Appendix B.[18]

Under the NGA and Order Nos. 436 and 500, onshore pipelines are not required to become "open access" transporters of gas. If, however, an onshore pipeline performs self-implementing transportation service under section 311 of the Natural Gas Policy Act (NGPA) or blanket certificate service under section 7 of the NGA, it must offer such service on a nondiscriminatory basis. Under Order Nos. 436 and 500, the option of offering self-implementing transportation service under NGPA section 311 or blanket certificate service under NGA section 7 is voluntary with the pipeline.

In contrast, section 5(f)(1)(A) of the OCSLA contains a specific statutory mandate that all pipelines that transport gas on or across the OCS must provide open and nondiscriminatory access to both owner and nonowner shippers. This requirement is in addition to the requirement in section 5(e) of the OCSLA that OCS pipelines must transport or purchase OCS gas "without discrimination."[19] While the

---

[16] Some off-shore systems are not certificated as single entities but are jointly owned by several pipelines, each with their own certificates. Consequently, some pipeline companies that own discrete portions of several offshore systems have been counted more than once in computing the total number of likely respondents. *See infra* note 26 and accompanying text; *see also* Appendix B and OCS pipel ne systems numbered 22–28.

[17] Subpart G of Part 284 was adopted in Order Nos. 436 and 500. Order Nos. 436 and 500 established a blanket certificate and abandonment program which permits interstate pipelines to obtain a one-time certificate of public convenience and necessity that authorizes certain transportation of natural gas in interstate commerce and permission and approval to abandon such service, which would otherwise require separate certificate or abandonment authority in each instance. Under the authorizations issued herein, OCS pipelines are authorized to transport natural gas and abandon certain service on a self-implementing basis without further authorization by the Commission. *See* 18 CFR 284.223(a) (1988). For other service, which may potentially require more scrutiny and opportunity for public participation, this authorization is subject to the notice procedure specified in § 157.205 of the Commission's regulations. *See* 18 CFR 284.223(b). Persons having a potential interest in such transactions are on notice to monitor the **Federal Register**. Once a deadline established under § 157.205(d) passes without a protest being filed, the proposed activity is authorized under this order without further action by the Commission.

[18] The Commission recognizes that a number of the OCS pipelines listed in Appendix B already hold Part 284, Subpart G blanket certificates. Such certificates are nevertheless issued to those pipelines by this final rule because, *inter alia*, of the additional certificate and abandonment authority (with respect to reallocation of firm capacity) conferred in the blanket certificates issued to OCS pipelines.

[19] Aside from arguing pro rata allocation, the commenters do not focus on what the open access requirement in section 5(f)(1)(A) of the OCSLA added to the preexisting requirement in section 5(e) of the OCSLA to transport gas without discrimination. Several commenters alleged various infirmities with respect to the Commission's

Continued

VOL 53 ISS 243 DEC 19 1988 UMI

Commission has decided against generically imposing pro rata allocation of capacity on OCS pipelines, it cannot implement section 5 of the OCSLA as if the adoption of section 5(f)(1)(A) in 1978 added nothing to the general nondiscrimination provision in section 5(e).

As stated in both Order No. 491 and the NOPR, the Commission believes the condition of nondiscriminatory access placed on the transportation program established in Order No. 436 and 500 satisfies, in large measure, the open access requirement in section 5(f)(1)(A) of the OCSLA. However, unlike onshore pipelines, OCS pipelines cannot voluntarily choose to not participate in the open access program; Congress, through the OCSLA, has made open access a prerequisite to doing business on the OCS. Consequently, the Commission implements the open access mandate of the OCSLA by finding, pursuant to section 7 of the NGA, that the public convenience and necessity require issuing every OCS pipeline a blanket transportation certificate under Subpart G of Part 284 of its regulations, and by issuing such certificates.

Accordingly, § 157.20(a) of the Commission's regulations will not be applied to OCS pipelines. Section 157.20(a) contains conditions regarding the acceptance of certificates by interstate pipelines. An opportunity for OCS pipelines to decline to accept blanket transportation certificates would be inconsistent with the open access provision in section 5(f)(1)(A) of the OCSLA and would defeat the purpose of the final rule. The certificates are effective on the date upon which their implementing rates become effective (discussed below), and can be abandoned only after explicit Commission approval is sought and is granted under section 7(b) of the NGA.

As a general rule, the Commission's policy is not to issue new individual transportation certificates if the transportation in question can be performed under the blanket certificate. In most cases, the authority conferred by the blanket certificate makes certificates for individual transactions unnecessary.[20] The Commission also emphasizes that this rule does not modify or revoke any existing certificates of public convenience and necessity that were issued prior to the effective date of this rule; such certificates remain in effect, and service under them cannot be abandoned except pursuant to the terms of those certificates, pursuant to applicable Commission regulations, or pursuant to specific applications for abandonement.[21]

In addition to issuing every OCS pipeline a blanket transportation certificate under Part 284, Subpart G of the Commission's regulations, the Commission is requiring all OCS pipelines to take the following steps in order to implement an OCS open access program. First, all OCS pipelines are required to conduct an open season for firm transportation capacity with respect to (1) presently uncommitted firm capacity, if any, and (2) firm capacity that existing shippers may be willing to relinquish (to the extent that another shipper is willing to assume the obligations of firm service). Second, OCS pipelines who do not currently hold blanket certificates must also conduct an open season for interruptible capacity. Finally, thereafter, all OCS pipelines must provide a mechanism through which existing shippers can voluntarily relinquish all or a part of their firm transportation capacity rights if present or potential shippers want to use that capacity. Each of these requirements is discussed more fully below.

1. Open Season For Firm Transportation

An OCS pipeline must conduct an open season to facilitate the voluntary reallocation of firm transportation capacity. The only firm capacity that is subject to the open season is uncommitted firm capacity and voluntarily relinquished firm capacity. Prior to conducting its open season, the pipeline must poll its existing firm shippers to determine whether any existing shipper wants to voluntarily relinquish all or part of its firm capacity entitlements. If any existing firm shipper voluntarily requests that part or all of its firm capacity be reallocated, or if an OCS pipeline has any uncommitted firm capacity, then the OCS pipeline must invite existing and potential shippers to submit requests for the available firm capacity.

The open season for firm capacity must be commenced no later than March 1, 1989. The pipeline must provide reasonable notice of the open season and the open season must be for a time period of no less than 10 days and no more than 30 days. If the requests for firm capacity exceed the firm capacity available for reallocation, the OCS pipeline will allocate to each requesting shipper a pro rata share of the available capacity. If the available firm capacity exceeds the request and if part of the available firm capacity is capacity that one or more existing shippers wants to relinquish, each shipper wanting to relinquish firm capacity will be allowed to satisfy the requests on a pro rata basis. In other words, the only portion of an existing firm shipper's capacity that will be released is that portion for which another shipper is prepared to take on the obligations of the firm service agreement.

The Commission recognizes that some OCS pipelines may be configured in such a manner that problems may arise if firm capacity is reallocated exactly according to the particular requests of the shippers concerned without regard to the particular points of entry and exit of their respective quantities of gas. Therefore, in making all of the above determinations, the OCS pipeline shall take into account the capacity available at particular receipt and delivery points specified by the requesting and relinquishing shippers. There is no requirement under this rule for the OCS pipeline to disrupt ongoing transportation for existing shippers using firm capacity.

Finally, in the event that an OCS pipeline has uncommitted firm capacity available, it may, if it so chooses, assign part or all of that capacity to shippers requesting capacity before it reallocates the capacity of shippers who seek to relinquish capacity.

2. Open Season for Interruptible Transportation

Concurrent with the open season for firm capacity (and if it does not currently hold a blanket certificate), an OCS pipeline must conduct an open season for interruptible capacity. Prior to conducting its open season, the pipeline may poll its existing interruptible shippers to determine their existing interruptible transportation requirements. The pipeline must provide for reasonable notice of the open season, and the open season must be for a time period of no less than 10 days

implementation of the language in section 5(e) of the OCSLA. In addition, several commenters made arguments with respect to section 5(f)(1)(B) of the OCSLA, which deals with expansion of pipeline capacity (*e.g.*, that Congress could not have intended pro rata allocation of existing capacity because it created a section for expansion of offshore capacity, or that the exemption in section 5(f)(1)(B) for pipelines in the Gulf of Mexico and the Santa Barbara Channel demonstrates that Congress did not intend to make OCS pipelines common carriers).

[20] *See* Tennessee Gas Transmission Co., 43 FERC ¶ 61,042 (1988), *reh'g denied*, 44 FERC ¶ 61,094 (1988).

[21] The one exception is the provision for abandonment of firm service pursuant to the reallocation of firm service discussed below, when existing shippers voluntarily agree to relinquish capacity to new shippers who desire it. *See* discussion, *infra*, in sections III.C.1 and III.C.3 of this preamble.

and no more than 30 days. We omit the requirement of an interruptible open season for OCS pipelines that currently hold blanket certificates because such pipelines are already providing nondiscriminatory interruptible transportation.

After the open season has been conducted, the OCS pipeline may allocate interruptible capacity using any nondiscriminatory means that is acceptable for on-shore blanket certificate transportation. In making that allocation, the OCS pipeline must give priority to interruptible transportation authorized under existing [22] individual certificates (provided that the transportation rates paid by the shippers receiving such service are no lower than the rates paid or to be paid by other interruptible shippers),[23] so as to avoid disrupting on-going certificated service.[24] The mechanism for allocating and scheduling capacity would be specified in the pipeline's tariffs, in the same manner as all other Part 284 blanket transportation certificates.[25]

3. Voluntary Reallocation of Firm Transportation Capacity

At any time after an OCS pipeline has conducted the open season for firm transportation capacity, if a potential firm shipper requests firm transportation service from the OCS pipeline, or if an existing firm shipper requests additional firm capacity, the pipeline must, within 10 days, provide the shipper with a list of all persons who hold firm capacity rights on the pipeline and the capacity they hold. The requesting shipper may then contact the existing shippers to ascertain whether any of them want to relinquish any firm capacity. If a requesting shipper finds an existing shipper who is willing to relinquish some portion of its firm capacity, the OCS pipeline must implement that reallocation.[26]

The blanket certificates issued to OCS pipelines under this rule provide both the authority under section 7(b) of the NGA to abandon service to the existing firm shipper and the certificate authority under section 7(c) of the NGA to provide service for the new firm shipper.[27] Thus, an OCS blanket transportation certificate differs from a typical Part 284 blanket certificate in that it contains additional abandonment authority. Typically, Part 284 blanket certificates provide abandonment authority only for those services that are performed under the blanket certificate itself. This means that pipelines must still seek individual abandonment authority for services authorized prior to the issuance of the blanket certificate. However, with respect to the voluntary reallocation of firm capacity, the Commission is providing OCS pipelines with the authority to abandon services not performed under the blanket certificate. Therefore, if an existing shipper wishes to relinquish a portion of its firm capacity rights as part of a reallocation of capacity to another shipper, the blanket certificate provides the OCS pipeline with the authority to abandon that service even though the service was performed under an individual certificate.

After an OCS pipeline has conducted the open seasons discussed above and has established a mechanism for the ongoing, voluntary reallocation of firm capacity, it may allocate interruptible transportation capacity pursuant to the same Part 284 requirements as apply on-shore. With respect to firm capacity, an OCS pipeline is required to reallocate firm capacity to shippers who desire it, but only to the extent that existing shippers desire to relinquish such capacity. Shippers who wish to relinquish firm capacity have a right to do so, to the extent that other shippers or potential shippers want to obtain that capacity. As noted above, the blanket certificates provide full certificate and abandonment authority to implement such reallocations of firm service without need for further case-specific Commission approval.

While the final rule does not mandate pro rata allocation, OCS pipelines may adopt a pro rata allocation scheme in their tariffs for either firm or interruptible transportation, or both, if they so desire. Any such pro rata allocation scheme must be consistent with the standards and considerations set forth in the OCSLA (*e.g.*, with respect to conservation). Absent such a tariff provision, the final rule adopted herein does not require any firm shipper to relinquish any firm capacity.

In this regard, the OCS pipeline must specify in its transportation rate schedule what method it will use to reallocate firm capacity in the future, after the open season for firm capacity has been concluded. Any nondiscriminatory method may be used. For example, the OCS pipeline may wish to maintain a list of shippers requesting firm capacity, and reallocate firm capacity on a first-come, first-served basis as it becomes available. Or, an OCS pipeline may prefer to reallocate such capacity on a pro rata basis, if and when two or more shippers seek to obtain such capacity at the time that it becomes available.

OCS pipelines are defined as all interstate natural gas pipelines that hold NGA section 7(c) certificates that authorize the construction and operation of facilities on the OCS. Defining an OCS pipeline in this manner assures that this rule will apply to all NGA jurisdictional pipelines that operate on the OCS. If the existing certificate that triggers the application of this rule is held by more than one pipeline company, each pipeline company is provided with a Part 284 blanket transportation certificate.

In this regard, we note that some OCS pipelines are structured in such a manner that several interstate pipelines own undivided shares of the OCS pipeline. In those instances, the blanket certificate is issued to the OCS pipeline, and the open season and reallocation schemes would be conducted by the OCS pipeline itself, as a single entity with a single open season conducted in its own name. On the other hand, some OCS pipelines are structured in such a

---

[22] Certificates that are in effect on the date that the final rule becomes effective.

[23] Existing interruptible shippers who are paying a lower rate must be afforded an opportunity to continue receiving service by agreeing to pay a matching rate.

[24] The Commission perceives no justification for disparities in the rates paid for interruptible transportation service (even if, as discussed below, there may be a historical justification for such disparity in rates for firm service). Hence, the Commission perceives no justification for according priority of interruptible capacity allocation for ongoing interruptible service unless that service is being performed at rates no lower than the rates paid by other interruptible shippers.

[25] *See, e.g., Colorado Interstate Gas Company*, 42 FERC ¶ 61,380 at 62,124–62,125 (1988); *Northern Border Pipeline Company*, 39 FERC ¶ 61,104 at 61,346, 61,349–61,350 (1987); *Natural Gas Pipeline Company of America*, 39 FERC ¶ 61,153, at 61,595 (1987); and Order No. 436–A, FERC Stats. & Regs. [Regulations Preambles 1982–1985] at 31,685–686. As with the allocation of interruptible capacity, an OCS pipeline may use any curtailment scheme that is acceptable for Part 284 blanket transportation service.

[26] The OCS pipeline itself should be indifferent to the substitution because its total contract demand will remain unchanged. Again, if the OCS pipeline has uncommitted firm capacity available, it may, if it so chooses, assign part or all of that uncommitted capacity to the shipper or shippers who desire such capacity before it reallocates the firm capacity of existing shippers. Presumably, such assignment of the OCS pipeline's own uncommitted firm capacity would occur as soon as a new shipper inquired about obtaining new capacity, and before it had occasion to contact existing shippers. Indeed, the blanket certificate itself requires the OCS pipeline to provide transportation on a nondiscriminatory basis to all who request it to the full extent of its available capacity (including firm capacity).

[27] In this regard, we note that both the abandonment of the old firm service obligation and the certificate authority for the new firm service obligation are "permanent", *i.e.*, for an unlimited term. The firm capacity could, of course, be reallocated again in a future transaction pursuant to the regulations. But the relinquishing shipper retains no claim on the capacity, nor does he have any continuing obligations to the pipeline.

manner that the interstate pipeline owners of the OCS pipeline own, control and utilize defined finite portions of the OCS pipeline's capacity. In those instances, separate blanket certificates are issued to each individual interstate pipeline owner of the OCS pipeline, and each of those interstate pipeline owners of the OCS pipeline may wish to conduct separate open seasons (and subsequent reallocations) with respect to that portion of the OCS pipeline's capacity that each owner controls and utilizes.[28]

D. Rate Requirements

Under this final rule, all OCS pipelines are subject to Subpart G of Part 284 of the Commission's regulations. This means OCS pipelines are also subject to Subpart A of Part 284.[29] Under Subpart A, a pipeline must have rates that comply with §§ 284.7, 284.8(d) and 284.9(d) of the Commission's regulations.

If an OCS pipeline does not have a transportation rate schedule on file with the Commission that conforms to § 284.7, to § 284.8(d) for firm service and to § 284.9(d) for interruptible service, new § 284.305(b) requires the pipeline to file conforming rate schedules by March 1, 1989, to be effective no later than April 1, 1989. The Commission recognizes, however, that it may wish to suspend those rates for more than a nominal period. If the Commission does not permit those rates to become effective on or before April 1, 1989, the OCS pipeline is required to use its existing rates until the Commission permits the § 284.305(b) rates to become effective. In that event, the blanket certificate would become effective on the date on which the § 284.305(b) rates would be have gone into effect if they had not been suspended.

Every OCS pipeline filing rates under § 284.305(b) is required to file rates supported by an annual cost and revenue study. An OCS pipeline does not have to file a cost and revenue study if it has a pending rate proceeding under § 154.63, 154.38 or 154.303(e) of the Commission's regulations.[30] If the OCS pipeline has a pending rate proceeding, the pipeline may use the base period data from the pending proceeding, so long as the base period ends within 12 months from the date the rates were filed under § 284.305(b).

In its comments, ANR Pipeline Company (ANR) argues that to require transportation rates that conform to § 284.7, to § 284.8(d) for firm service and to § 284.9(d) for interruptible service is illegal because the requirement sets aside existing, approved transportation rates without a hearing or the necessary findings under the NGA. We disagree. As discussed above, in order to implement the open and nondiscriminatory access requirement of the OCSLA the Commission is requiring that all OCS pipelines have a Part 284, Subpart G blanket certificate. All Part 284, Subpart G blanket certificates must be implemented by rates that conform to the general conditions and the rate designs authorized in Subpart A of Part 284.

In addition, as discussed in the NOPR, the rate provisions of this rule are established in accordance with section 5 of the NGA. Section 5 of the NGA requires that if, after a hearing, the Commission finds a rate unjust and unreasonable it shall determine the just and reasonable rate. For the reasons discussed above, the Commission finds that if an OCS pipeline's current rates do not conform to the requirements of §§ 284.7, 284.8(d) and 284.9(d) of the Commission's regulations as well as the regulations in new § 284.305, such rates are unjust and unreasonable. This finding is based, first, on our determination herein that Part 284, Subpart G blanket certificates are required to satisfy the equal access requirements of the OCSLA; and, secondly, on our determinations in Order Nos. 436 and 500 that rates inconsistent with §§ 284.7, 284.8(d) and 284.9(d) are unjust and unreasonable in the context of transportation performed pursuant to such blanket certificates. As discussed in the NOPR, the notice and comment procedures of this rulemaking satisfy the hearing requirement in section 5 of the NGA.[31]

The Commission also finds that it is unduly discriminatory to subject existing shippers on OCS pipelines to a different transportation rate than the rate charged to new shippers on the same pipeline. Such a circumstance could arise in the context of the voluntary reallocation requirements of this rule if the firm transportation rights relinquished by an existing shipper were authorized under a presently existing individual certificate. The new shipper would be subject to Part 284 rates while existing shippers would be subject to Part 154 rates.[32] In order to remedy this inconsistency in rate treatment for comparable service, the rule adopted herein requires that once an OCS pipeline has filed rates that conform to Part 284 of the Commission's regulations and the Commission has made those rates effective, these rates will apply to *all* transportation service performed by the OCS pipeline.[33] The Commission is establishing this requirement under section 5 of the NGA.

The OCSLA obligates OCS pipelines to transport natural gas on an open and nondiscriminatory basis. The blanket certificates issued by this rule are the means the Commission has chosen to implement that requirement and authorize OCS pipelines to provide new open-access transportation service for OCS shippers. Thus, any transportation rate charged by an OCS pipeline that does not reflect this new service will result in different rate treatment for similarly situated customers. Such discriminatory rates are unjust and unreasonable under section 5 of the NGA. This finding with respect to the existing rates of an OCS pipeline becomes effective at the time an OCS pipeline provides the new transportation service required by this rule.

However, the Commission has recognized that individually tailored certificate authority and rate treatment may well be appropriate as a basis for determining the term for depreciation of facilities or for allocating their costs to particular beneficiaries of transportation through such facilities.[34] The Commission recognizes that such factors may pertain to OCS pipelines as well, particularly with respect to historical aspects of the financing, construction and initial operation of certain OCS pipelines. The Commission's purpose is to synchronize the transportation rates of an OCS pipeline under circumstances in which there is no valid basis for charging different rates to similarly situated customers. An OCS pipeline will, however, be permitted to use its current transportation rates for transportation services performed pursuant to existing individually issued certificates if the OCS pipeline demonstrates that such rates are

---

[28] *See* Appendix B, which lists in parenthesis the individual interstate pipeline owners of certain OCS pipelines.

[29] *See* 18 CFR 284.221(c), which provides that any blanket certificate issued under Subpart G is subject to the conditions of Subpart A of Part 284.

[30] *See* new 18 CFR 284.305(c) (1988).

[31] *See* Wisconsin Gas Co. v. FERC, 770 F.2d 1144 (D.C. Cir. 1985), *cert. denied*, 1065 S. Ct. 1969 (1986).

[32] This example assumes that the existing shippers do not relinquish all their firm transportation rights.

[33] *See* new 18 CFR 284.305(e) (1988).

[34] *See, e.g.*, Tennessee Gas Pipeline Company, 40 FERC ¶ 61,088 (1987); Tennessee Gas Pipeline Company, 41 FERC ¶ 61,375 (1987); *cf.* Transcontinental Gas Pipe Line Corporation, 40 FERC ¶ 61,185 (1987); Transcontinental Gas Pipe Line Corporation, 41 FERC ¶ 61,031 (1987), *reh'g denied*, 42 FERC ¶ 61,279 (1988).

necessary and the maintenance of different rates would not be unduly discriminatory. Under these circumstances, the current rates are just and reasonable.

OCS pipelines who want to continue to charge their current rates for existing individually certificated service should refile those rates, and the justification for them, at the same time that they file their Part 284 rates to implement the service to be provided under the blanket certificates issued herein. The current rates for service under existing individual certificates will remain in effect until they are superseded. This procedure will enable OCS pipelines to continue to provide transportation under their existing cetificates, pursuant to their current rates, without interruption, from the date of issuance of this rule until such time as the current rates have been superseded. In the event that an OCS pipeline refiles its current rates, the current rates will remain in effect (for transportation authorized under existing individual certificates) until such time as the Commission has determined the justness and reasonableness of those rates on a case specific basis.

In this regard, the final rule deletes the provision in the NOPR for interim rates. Interim rates are unnecessary because: (1) The blanket certificates issued herein do not become effective until the date on which Part 284 rates to implement those certificates have become effective (or would have become effective if they had not been suspended); and (2) the current rates for existing individually certificated service remain in effect without interruption until the date on which they are superseded by the effectiveness of new rates for that service.

E. Comment Analysis

The overwhelming percentage of the comments filed in this rulemaking center on the effects of generically requiring pro rata allocation of capacity for all OCS pipelines. By not requiring pro rata allocation of capacity, the Commission has responded to, or rendered moot, the vast majority of the comments it received. While OCS pipelines are free to establish a pro rata scheme in their tariffs, subject to the Commission's right to determine proportionate amounts under section 5(e) of the OCSLA, they are not required to do so. OCS pipelines may allocate capacity using any means that the Commission has determined to be acceptable on-shore.

As noted above, the Commission may well require pro rata allocation of capacity on a case-specific basis if and when such regulatory action is necessary and appropriate. However, in light of our determination not to mandate pro rata allocation in the final rule adopted herein, we will not address in this order the extensive comments on the Commission's legal authority to do so. Such analysis would serve no useful purpose in the context of the final rule adopted herein, and would be premature in the context of any future actions the Commission may take. Resolution of these legal issues is best deferred to a future proceeding, involving a specific proposal (if one occurs) to impose a pro rata allocation scheme on a specific pipeline, when the legal issues are framed in the context of a factual record on the nature of the problems identified and the remedies proposed to cure those problems.

1. On-shore/Off-shore Allocation Schemes

Commenters raised several questions concerning how an off-shore pro rata allocation scheme would operate if on-shore capacity was allocated using a first-come, first-served method. As noted above, the Commission is not requiring pro rata allocation to capacity; this eliminates the issues raised regarding the interface between on-shore and off-shore allocation methods.[35]

To the extent that this rule requires open seasons for firm and interruptible transportation on the OCS, these open seasons may result in an allocation of capacity that is different from the allocation of capacity of an on-shore pipeline that connects with the OCS pipeline. However, this is no different from the situation of shippers who must arrange to move gas through several on-shore pipelines; there is no guarantee that sufficient capacity will be available on each pipeline. Off-shore shippers, like on-shore shippers, are responsible for making their own arrangements to obtain transportation capacity from the wellhead to the burner tip. Furthermore, the Commission has not approved tariffs that tie the availability of upstream pipeline capacity to transportation on a downstream system.

2. OCSLA Jurisdiction

Commenters also questioned the extent of the Commission's jurisdiction under the OCSLA. As the Commission stated in the NOPR, the OCS does not include lands covered by nontidal waters within the boundaries of each of the respective states and lands covered by tidal waters up to three miles off the coast line of each state.[36] The Commission also noted in its interpretation of the OCSLA, that it was only implementing the OCSLA with respect to jurisdictional pipelines under the NGA. The Commission believes that allowing OCS pipelines to allocate capacity using any method that is acceptable on-shore will reduce the chance for jurisdictional problems to arise that can frustrate the Commission's implementation of the OCSLA. If problems do arise with respect to either the movement of OCS gas (1) through state waters, or (2) through gathering or producer-owned facilities on the OCS, the Commission possesses ample ancillary authority under the OCSLA to ensure that the statutory requirements of the OCSLA are not thwarted.

3. Definition of an OCS Pipeline

In the NOPR, the Commission proposed to define an OCS pipeline to include facilities from any point on the OCS to the first delivery point on-shore where alternate transportation is, or could be, available.[37]

Several commenters are concerned about the proposed definition.[38] For example, Tennessee Gas Pipeline Company (Tennessee) contends that the proposed definition could result in an unwarranted extension of pro rata transportation well into the on-shore facilities of a pipeline that owns OCS facilities. National Fuel Gas Supply Corporation (National) and Sun Exploration and Production Company (Sun) read the proposed definition as potentially embracing all the on-shore facilities of a pipeline that owns both on-shore and off-shore facilities. This is not the Commission's intent and it has amended the definition of an OCS pipeline in this final rule.

---

[35] In this regard, with respect to a single pipeline that extends from the OCS to numerous points on-shore, we note that the final rule adopted herein does not apply to the on-shore portion of the pipeline (*i.e.*, the portion of an off-shore pipeline that extends beyond the on-shore interconnection, as defined in § 284.302(b)).

[36] Section 2(a) of the OCSLA defines the Outer Continental Shelf to mean "all submerged lands lying seaward and outside of the area of lands beneath navigable waters as defined in section 1301 of this title and of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control." 43 U.S.C. 1301(a) (1982); *See also* 43 U.S.C. 1301(a) (1982), which defines the term "lands beneath navigable waters."

[37] *See* proposed § 284.302(b), IV FERC Stats. & Regs. ¶ 32,459 at 32,210.

[38] *See, e.g.*, comments of Tennessee Gas Pipeline Company on the NOPR at 16–17; joint comments of Stingray Pipeline Company and Trunkline Gas Company at 9–10; comments of ANR at 5; comments of Texas Gas Transmission Corporation on the NOPR at 6, 21–22; comments of National Fuel Gas Supply Corportion at 6; comments of Sun Exploration and Production Company at 4–5; comments of Indicated Producers at 34–36; and comments of Pelto Oil Company at 10–11.

New § 284.302(b) defines "OCS pipeline" in such a manner as to include within its scope all of the OCS pipeline's facilities that are used or necessary to transport OCS gas from the OCS to the first point of interconnection on the shoreward side of the OCS. The first point of interconnection may be with a gas conditioning or processing plant, another pipeline,[39] a distributor, or an end user. In other words, "OCS pipeline" is defined to include all of the OCS pipeline's facilities that fall within the scope of the Commission's jurisdiction under section 7 of the NGA, and that are used or necessary to transport OCS gas off of the OCS to the first point of interconnection with some other entity that receives the gas from the OCS pipeline.[40]

This definition is necessary to ensure that the gas will be transported on an open access basis, not only across the OCS *per se*, but from the OCS to at least some point off the OCS where the gas is capable of exiting from the OCS pipeline. Any narrower definition would nullify the rule (and the OCSLA open access provisions it is designed to implement), because the fundamental purpose of both the OCSLA and this rule is to ensure open access transportation of OCS gas to someplace other than another part of the OCS.

It follows from this definition that the requirements of the rule adopted herein do *not* apply to the facilities of jurisdictional interstate pipelines beyond the first point of interconnection after the pipeline leaves the OCS. Thus, a single interstate pipeline may well have some jurisdictional facilities that fall within the scope of this rule and other jurisdictional facilities that do not.

We recognize that the first point of interconnection may have insufficient capacity to receive all of the gas transported by the OCS pipeline on the OCS. Indeed, the capacity at interconnection points may vary on a seasonal basis. This, however, is the same problem that can occur at the interconnection points of two on-shore pipelines. We do not construe the OCSLA as mandating open access transportation to any and all destinations on-shore (however distant they may be from the OCS); rather, we construe the OCSLA to require only open access transportation to at least some point on-shore.

[39] Such other pipeline may be either jurisdictional or non-jurisdictional (including, *e.g.*, a Hinshaw pipeline or an intrastate pipeline).

[40] Appendix B identifies the shoreward terminus of all currently certificated OCS pipelines.

4. Consultation with and Consideration of the Views of the Attorney General

To ensure that OCS pipelines comply with the competitive principles in sections 5(f)(1) and 5(f)(3) of the OCSLA requires the Commission (and the Secretary of Energy) to consult with the Attorney General on the specific conditions to be included in any permit, license, easement, right-of-way or grant of authority on the OCS.[41] Section 5(f)(3) also requires that the Attorney General consult with the Federal Trade Commission (FTC) in preparing his views.

The Commission requested the views of both the Secretary of Energy and the Attorney General on its interpretative rule (Order No. 491) and the NOPR. The Commission also sent copies of Order No. 491 and the NOPR to the Secretary of the Interior and the FTC.[42] The Secretary of Energy and the Attorney General responded to the request and the Commission has considered their comments in issuing this final rule. The approach taken by the Commission in this final rule is fully consistent with the views of both the Secretary of Energy and the Attorney General. The Secretary of Energy states that:

> While the OCSLA certainly permits the adoption of a reasonable "pro-rata" allocation system, we see no requirement in the statute for any particular form of capacity allocation. In fact, the conference report indicates a reasonable allocation system should consider a variety of things, including conservation, prevention of waste, and competition. There is no mandatory system prescribed, however, to achieve these objectives. (Citations omitted.) As a policy matter, allocation by the market place is preferable to a regulatorily imposed rationing scheme.

The Attorney General's comments are to the same effect:

> The Department supports the FERC's proposal to require OCS pipelines to obtain blanket certificates with an open access requirement.
>
> The open access requirement will ensure nondiscriminatory access as required by the OCSLA, 43 U.S.C. 1334(f)(1)(A), and the blanket certificate, which will enable the pipelines to provide transportation without having to obtain the FERC's approval for individual transactions, will give offshore gas producers flexible access to transportation to onshore purchasers.
>
> * * * * *
>
> While the FERC's authority to determine what "proportionate amounts" of gas must be transported is broad enough to allow the FERC to require proration, it does not necessarily mean that proration is required by section 5(e) in all cases. To the contrary, the debate on section 5(f), which was added in 1978, indicates that both proration and first-come, first-served were considered to be possible means of allocation under the statute. *See, e.g.*, 123 Cong. Rec. S. 23,257 (July 15, 1977) (statements of Sen. McClure and Sen. Johnston). The Department thus believes the FERC's authority is broad enough to require proration of capacity on OCS pipelines, but such an allocation system is not compelled by the statute.

The Attorney General maintains that the Commission may consider various capacity allocation methods, including the first-come, first-served method used by many on-shore pipelines. The Attorney General believes that the Commission should take into account both the costs of shutting in OCS gas production and the costs of altering contracts between OCS pipelines and current shippers. In addition, the Attorney General states that the Commission may find that proration is necessary to ensure the transportation of casinghead gas that is produced along with oil. The Attorney General concludes that "the Department believes that in most cases blanket certification and the first-come, first-served allocation method currently used by other open access pipelines (or other efficient methods of allocation that may be developed for open access pipelines in the future) will adequately fulfill the requirements of the OCSLA."

The final rule adopted by the Commission herein is fully consistent with the suggestions of the Attorney General and the Secretary of Energy. The Commission is providing every OCS pipeline with a Part 284 blanket certificate and is allowing any allocation scheme that is acceptable for open access transportation on-shore to be used on the OCS. In addition, the Commission agrees with the Secretary of Energy and the Attorney General that it has the authority to require prorationing under the OCSLA, and the Commission is reserving its right to do so on a case-specific basis.

5. Requests for Rehearing of the Interpretative Rule

In this order, upon consideration of the requests for rehearing of Order No. 491, the Commission has revised its interpretation of section 5 of the OCSLA.

[41] 43 U.S.C. 1334(f)(3) (1982).

[42] The Commission received responses to its request from the Secretary of Energy, the Attorney General and the Secretary of the Interior. The Commission also received a copy of the letter the FTC sent to the Attorney General. Copies of all these letters are attached as Appendix C of this rule. Appendix C is not being published in the **Federal Register**, but is contained in copies of the order available through the Commission Public Reference Room (Room 1000).

VOL 53 ISS 243 DE 19 1988 UMI

The Commission noted in Order No. 491 that section 5(e) of the OCSLA requires OCS pipelines to transport gas "without discrimination" and that section 5(f)(1)(A) requires OCS pipelines to "provide open and nondiscriminatory access" to both owner and nonowner shippers of OCS gas. The Commission stated that the conditions of nondiscriminatory access in the transportation program established in Order Nos. 436 and 500 satisfy the nondiscriminatory access requirements in both sections 5(e) and 5(f)(1)(A) of the OCSLA. As discussed above, the Commission reaffirms that determination here.

In Order No. 491, however, the Commission went beyond this interpretation by also interpreting the statutory language in section 5(e) of the OCSLA to require generic pro rata allocation of capacity by all OCS pipelines. Several commenters objected to Order No. 491 on the basis that section 5(e) of the OCSLA does not mandate any particular proportionate allocation of capacity, such as a pro rata allocation. In addition, several commenters argued that the Commission failed to consider the hearing requirement in section 5(e) and that any determination of "proportionate amounts" must take into account the statutory goals of conservation and the prevention of waste.[43]

In proposing a general requirement of pro rata allocation, the Commission also stated in both Order No. 491 and the NOPR that the first-come, first-served method of allocating capacity was not sufficient to implement the OCSLA's open access requirement. Several commenters questioned how a pro rata scheme on the OCS would be reconciled with first-come, first-served allocation onshore.

These concerns have all been rendered moot. The final rule does not require pro rata allocation of capacity and allows OCS pipelines to allocate capacity using any nondiscriminatory means that is acceptable for on-shore blanket certificate transportation, including first-come, first-served allocation. Also, by deferring determinations of pro rata allocation to case-specific inquiries (if and when such inquiries are warranted), the Commission will be able to take into account the statutory goals of conservation and the prevention of waste within the context of a particular set of facts analyzed in a hearing under section 5(e) of the OCSLA. As noted above, discussion of the Commission's legal authority to impose pro rata allocation of capacity on a case-specific basis would be premature in the context of the rule adopted herein, because the rule itself does not impose such allocation. Nevertheless, to the extent that the Commission's discussion and determinations herein are inconsistent with the interpretation of the OCSLA set forth in Order No. 491, the interpretative rule issued therein is revised accordingly, to be consistent with this order.

6. Response to Specific Comments

In issuing this final rule, the Commission has adopted a number of commenters' suggestions. For example, Tennessee Gas Pipeline Company (Tennessee) maintains that any capacity constraints on the OCS, if they exist, do not necessitate pro rata transportation. Tennessee than states that

> assuming *arguendo* that the Commission has the power to require transportation it should consider mandatory open-access transportation by OCS pipelines on a first-come, first-serve basis or other procedure that *preserves the rights of existing customers.*
>
> Once OCS pipelines are open for first-come, first-serve transportation, there should be ample space available to transport gas from all connectable sources without any special pro rata transportation requirements for the OCS.[44]

The Commission's final rule is consistent with Tennessee's suggestions.

Peoples Gas Light Coke Company and North Shore Gas Company (Peoples Gas) support the Commission's efforts to ensure open and nondiscriminatory access to all persons requesting offshore transportation.[45] However, Peoples Gas opposes a generic requirement of pro rata allocation because it would jeopardize the reliability of existing firm pipeline sales service. Under a generic pro rata scheme, pipelines could lose portions of their OCS supply at any time, which could lead to curtailments of existing pipeline customers. Peoples Gas also maintains that despite having to curtail its customers, a purchasing pipeline could become subject to increased take-or-pay liability for failing to take OCS supplies that could be reduced under a general pro rata scheme. In addition, Peoples Gas alleges that as a result of such a scheme local distribution companies (LDCs) would not be able to rely on OCS gas to serve their peak day needs.

Peoples Gas recommends that the Commission not require pro rata allocation for firm capacity, but adopt instead provisions under which existing customers are periodically polled for the purpose of identifying unused capacity. Peoples Gas suggests that customers with unutilized capacity could be offered contract demand reductions and could voluntarily give up capacity to accommodate new firm service. The Commission agrees with Peoples Gas and has adopted a similar approach.

Enron suggests that nondiscriminatory self-implementing transportation on OCS facilities can be achieved through a more narrowly drawn alternative than one proposed in the NOPR. Enron submits that any final rule,

> could instead require OCS pipelines to apply for a blanket transportation certificate under proposed Subpart K itself which would be applicable only to the OCS pipeline's OCS facilities as defined in Subpart K. A pipeline holding a Subpart K blanket transportation certificate could be made subject to the relevant provisions of Subpart A with regard to open, nondiscriminatory firm and interruptible transportation and unbundled rates on the pipeline's OCS facilities only.[46]

While Enron goes on to suggest that the contract demand conversion provisions of Part 284, Subpart A are not relevant to OCS transportation and that a pipeline's acceptance of the blanket certificate should remain a voluntary choice, the Commission's final rule adopts a central element of Enron's suggestion, *i.e.*, that the Commission could require every OCS pipeline to obtain a blanket transportation certificate that applies only to the pipeline's OCS facilities.

Enron also suggests that currently contracted-for and utilized capacity on OCS facilities be left undisturbed and that the Commission could provide for a pro rata allocation scheme for: (1) Currently available, unutilized capacity on existing OCS facilities; (2) released capacity which becomes available in the future on existing OCS facilities; (3) new capacity on existing OCS facilities that becomes available through system expansion; and (4) newly constructed

---

[43] Section 5(e) of the OCSLA provides, pertinent part: Rights-of-way through submerged lands of the Outer Continental Shelf, whether or not such lands are included in a lease maintained or issues pursuant to this Act, may be granted by the Secretary * * * upon the express condition that oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas produced from the submerged lands or Outer Continental Shelf lands in the vicinity of the pipelines in such proportionate amounts as the Federal Energy Regulatory Commission, in consultation with the Secretary of Energy, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste.

[44] *See* Comments of Tennessee on the NOPR at 9–10.

[45] *See* comments of Peoples Gas on the NOPR at 30.

[46] *See* comments of Enron on the NOPR at 28.

OCS facilities. The final rule is consistent with Enron's suggestions in that contracted-for capacity on the OCS is left undisturbed. In addition, the required open seasons and the voluntary reallocation provisions of the rule provide for allocation of currently available capacity and of capacity released in the future.

The Indicated Producers recommend that the Commission generically grant blanket certificates for the transportation of OCS gas without requiring pipeline-specific certificate applications and approvals.[47] The Indicated Producers urge the Commission to

> grant OCS pipelines whatever blanket transportation authority they need to fulfill their obligations under the OCSLA on a generic basis in this rulemaking. The Commissioin may issue blanket transportation authority under section 7 of the Natural Gas Act in a generic rulemaking proceeding.[48]

The Joint Producers make a similar recommendation that the Commission grant uniform blanket certificates for the transportation of OCS gas without case-by-case application requirements.[49] The Commission has adopted these suggestions in the final rule.

Indiana Public Service Company (Northern Indiana) indicates that its primary concern with Order No. 491 and the NOPR is the generic pro rata allocation requirement for firm and interruptible transportation service. With regard to the requirement that OCS pipelines provide open access transportation under blanket certificates, Northern Indiana states,

> Northern Indiana does not oppose this remedy, and, in fact, considers this an appropriate and measured response to the problem, so long as it is imposed in the same manner on the OCS as onshore. The availability of open access transportation would ensure that uncontracted for capacity would be available on a firm basis and that unused firm capacity could be used for interruptible transportation on a first-come, first-served basis.[50]

Northern Indiana concludes,

> Because of the problems attendant with the Commission's pro rata allocation plan, it should limit its rulemaking to requiring OCS pipelines to obtain blanket certificates. That act alone should be sufficient to prevent the shutting-in of OCS supplies. To the extent that solution ultimately proves inadequate, the Commission can then seek to impose further remedies which are within its legal authority under section 5 of the Outer Continental Shelf Lands Act.[51]

The Commission has adopted Northern Indiana's suggested approach in this final rule.

Columbia Gas Transmission Corporation and Columbia Gulf Transmission Company (Columbia) suggest that a mechanism be employed whereby existing capacity holders are given an opportunity to reduce their capacity entitlements (together with pregranted abandonment authority) before capacity is prorationed.[52] The Commission has adopted Columbia's suggestions. The final rule does not mandate pro rata allocation; provides for the voluntary reallocation of firm capacity by existing shippers if there is another shipper that desires that capacity; and provides that the blanket certificates issued by the rule include the abandonment authority necessary to implement reallocation of firm capacity among shippers.

Texas Eastern Transmission Corporation (Texas Eastern) suggests that the Commission clarify that the blanket certificates only apply to service performed through OCS facilities.[53] The Commission agrees with Texas Eastern and has done so.[54]

a. *Certificate issues.* Texas Eastern contends that the requirement in the NOPR that an OCS pipeline must have a blanket transportation certificate under Part 284, Subpart G is beyond the scope of the Commission's authority under the NGA. ANR Pipeline Company (ANR) argues that the Commission is illegally, retroactively conditioning existing certificates that authorize the construction and operation of facilities on the OCS to require a blanket transportation certificate. For the reasons discussed above, the Commission disagrees. The Commission has determined that, in order to implement the nondiscriminatory access requirement of section 5 of the OCSLA, OCS pipelines must hold blanket transportation certificates. The Commission is implementing that OCSLA mandate through issuance of blanket certificates under the NGA.

Numerous commenters objected to the Commission's determination to prohibit OCS pipelines from applying for and receiving individual certificates under section 7(c) of the NGA.[55] Tennessee contends that the constantly changing terms and conditions of service under a blanket certificate provide no substitute for the security of long-term service under section 7(c) of the NGA. Enron Interstate Pipelines (Enron) assert that prohibiting an OCS pipeline from applying for an individual section 7(c) certificate for any transaction that could be performed under the Subpart G blanket certificate will result in interstate pipelines' being unwilling to invest in the construction or expansion of OCS facilities. Enron states that pipelines historically have entered into long-term firm transportation arrangements under section 7(c) to guarantee an opportunity to earn a return on the pipeline's investment in OCS facilities. Enron maintains that blanket transportation service without regard to the term of service requested means that an OCS pipeline cannot be assured of the revenues to justify its investment in OCS facilities.

As adopted, the final rule does not prohibit applications for individual certificates, especially for the construction and operation of new facilities.[56] We also note that the final rule does not require a generic pro rata allocation scheme. Thus, the final rule does not preclude or inhibit present or future long term contracts for firm capacity. With respect to applications for certificate authority to construct and operate new pipeline facilities on the OCS, applicants may propose whatever financial and operational arrangements they wish; such applications will be considered on their merits, on a case-by-case basis, recognizing that whatever certificate authority is issued will necessarily involve the blanket certificate adopted by this rule.

Enron also contends that the individual section 7(c) application process was envisioned by the drafters of the OCSLA amendments. Section 603 of the OCSLAA[57] directed the

[56] If applicants seek individual certificates for OCS transportation based on a particular rate treatment they allege to be more appropriate under the peculiar circumstances of the transportation proposed to be performed, the Commission will consider the applications on a case-by-case basis in the same manner as the Commission has done for on-shore service proposed by blanket certificate holders. *See, e.g.*, Overthrust Pipeline Company, 44 FERC ¶ 61,077 (1988); Trailblazer Pipeline Company, 39 FERC ¶ 61,103 (1987), *reh'g denied and certificate vacated*, 43 FERC ¶ 61,103 (1988); and Northern Border Pipeline Company, 39 FERC 61,104 (1987). *See also supra* note 33 and accompanying text.

[57] *Supra* note 6 and accompanying text.

Commission to promulgate a statement of general policy concerning the transportation of natural gas owned by an LDC from an OCS lease to the service area of the LDC. The purpose of section 603 is to encourage interstate transportation of OCS gas "produced from a lease * * * owned, in whole or in part, by a local distribution company, from such lease to the service area of such local distribution company." [58] Enron views section 603 of the OCSLA as evidence that the OCSLA amendments could not have intended that a blanket certificate would be the only way to achieve nondiscriminatory transportation.

In 1980, the Commission issued Order No. 92,[59] which implemented section 603 of the OCSLAA. By that order, the Commission stated its policy regarding access to OCS pipelines by LDCs holding OCS leases.[60] The policy established a framework for pipelines to acquire transportation authorization. Although the blanket transportation certificates issued to OCS pipelines by this rule were not in existence at the time the Commission issued Order No. 92, the goals of that order and OCSLAA section 603 are furthered by the requirements of this rule in that the open access requirements of the blanket certificates issued under the rule will afford distributors significant opportunities to obtain transportation of their gas.

Natural Gas Pipeline Company (Natural) requests clarification on the following points. First, would an on-shore pipeline that already has a Subpart G blanket certificate and that has OCS facilities be required to file for another Subpart G blanket certificate? Second, would a pipeline with both on-shore and off-shore facilities be able to file for a Subpart G blanket certificate that is only applicable off-shore? As discussed above, the Commission's final rule issues Subpart G blanket certificates to all OCS pipelines, including pipelines that currently hold blanket certificates (because the certificates issued herein contain abandonment authority, and open season and reallocation provisions, not contained in the other Part 284, Subpart G blanket certificates). The blanket certificates issued by this rule only apply to a pipeline's facilities on the OCS (to the first interconnection point off the OCS).

Natural asks whether this policy (of according separate treatment of OCS facilities) is inconsistent with previous Commission holdings, citing *Natural Gas Pipeline Company of America-Texoma.*[61] In that order, Natural asked the Commission for a waiver of Order No. 436 so that it could provide transportation services under Order No. 436 on a discrete segment of its system without subjecting the rest of its system to the requirements of Order No. 436. The Commission denied Natural's petition, stating that in issuing Order No. 436 it had contemplated that pipelines would file blanket certificate applications for their entire systems. The Commission's OCSLA Policy is not inconsistent with its prior holding. If a pipeline holds a Part 284 blanket certificate issued pursuant to an application, that authorization applies to its entire system, including any OCS facilities that the pipeline may have. The blanket certificates issued by this rule, however, only govern pipeline facilities on the OCS, and are mandated by the OCSLA. The OCSLA mandate does not apply on-shore.

The Interstate Natural Gas Association of America (INGAA) alleges that by limiting the right of pipelines to choose whether to apply for certificate authority (and once having received such authority, whether to accept it) the Commission violates section 5(f)(4) of the OCSLA.[62] Section 5(f) (4) states that "[n]othing in this subsection shall be deemed to limit, abridge, or modify any authority of the United States under any other provision of law with respect to pipelines on or across the outer Continental Shelf." While the Commission is eliminating, for OCS pipelines, the choice that interstate pipelines have on-shore whether to accept a blanket certificate, such a provision does not limit the authority of the United States under the NGA or any other provision of law.

b. *Rate issues.* Texas Gas Transmission Corporation (Texas Gas) states that it includes all offshore capital costs and operation and maintenance expenses in its systemwide rate base and cost of service and, therefore, these costs are considered in the design of system transportation rates.[63] Texas Gas points out that others (HIOS, ANR, etc.) segment these costs and develop separate rates based on each segment. Texas Gas questions whether there will be "mini rate cases" for each transportation segment and wonders whether it will be required to remove costs from its systemwide rate structure and develop separate rates. The Commission believes that these questions are best addressed on a case-by-case basis in the context of specific facts. The Commission will make these determinations based on the supporting data for the OCS pipeline's proposed rates.

Tarpon Transmission Company (Tarpon) indicates that the requirement that a pipeline submit an annual cost and revenue study is not explicitly limited to those pipelines filling new rate schedules under new § 284.305(b).[64] The Commission agrees with Tarpon that this limitation was intended and therefore the Commission adopts Tarpon's suggested language change. New § 284.305(c) requires the study only if a rate schedule is required to be filed by § 284.305(b).

c. *CD conversion requirements.* Enron contends that subjecting OCS pipelines to Subpart A of Part 284 makes an OCS pipeline's entire system, not just the pipeline's OCS facilities, subject to open access under Order No. 500.[65] In addition, Enron states that under § 284.10 of the Commission's regulations, any interstate pipeline that accepts a Subpart G blanket transportation certificate is deemed to have a agreed to offer its firm sales customers the option to convert their firm sales entitlements under any eligible firm sales service agreement to an equal amount of firm transportation service. Enron argues that the Commission has continually justified the contract demand (CD) conversion provisions of § 284.10 based on the voluntary nature of the Order Nos. 436 and 500 transportation program. Enron concludes that ownership of an OCS facility by an interstate pipeline would negate the fundamental characteristic of the Order Nos. 436 and 500 (*i.e.*, that the program is voluntary) and therefore would negate the Commission's justification for the CD conversion provision.

As discussed above, the blanket transportation certificates issued by this rule only apply to an OCS pipeline's OCS facilities (to the first point of interconnection off the OCS). The CD conversion provisions of § 284.10 apply to OCS pipelines in the same manner as they apply to pipelines on-shore. The

[65] *See* comments of Enron on the NOPR at 5 and 24–28.

purpose of those provisions, as explained in Order No. 436, is to ensure that firm sales customers have equal access to transportation capacity.[66] We construe such access to be part of the OCSLA mandate implemented herein. Thus, OCS pipelines are required to comply with § 284.10. That requirement, however, extends only to the OCS portion of a pipeline. If a pipeline operates only on the OCS, then § 284.10 clearly applies. If a pipeline operates facilities both off-shore and on-shore, and if the only Part 284, Subpart G certificate it holds is the one issued by this rule,[67] then § 284.10 applies only with respect to sales of gas that occur off-shore, and not to sales of gas on-shore; in other words, § 284.10 would not apply to sales from the on-shore facilities.

As a practical matter, only one OCS pipeline, Sea Robin Pipeline Co., makes sales of gas from off-shore facilities. (While there are other pipelines who have OCS facilities and who also sell gas, those pipelines also have facilities on-shore, and all of the sales are made on-shore; as explained above, such sales fall outside the scope of the rule adopted herein.) Sea Robin recently accepted a Part 284 blanket certificate. Thus, the issue of the relationship between voluntary acceptance of a blanket certificate and CD conversion rights is effectively moot.

d. *Definitions.* National Fuel Gas Supply Corporation (National) and Sun Exploration and Production Company (Sun) read the definition of an OCS pipeline proposed in the NOPR as potentially embracing all the on-shore facilities of a pipeline that owns both on-shore and off-shore facilities. This is not the Commission's intent and, as discussed above, it has amended the definition of an OCS pipeline in this final rule.

The Indicated Producers ask the Commission to include in its definition of an OCS pipeline all transmission facilities downstream from any point on the OCS to the on-shore point where a shipper has access to facilities that are subject to Order No. 436. The Indicated Producers also request that the definition include the first point on-shore where transportation is genuinely available.[68] The Commission declines to adopt the Indicated Producers' suggestions because they could result in the open access provisions of this rule extending far beyond the first interconnection point off the OCS.

Pelto Oil Company (Pelto) asks the Commission to clarify the phrase "in the vicinity" of the pipeline used in section 5(e) of the OCSLA.[69] That matter, however, is beyond the scope of this rulemaking, and is best addressed on a case-specific basis if and when the question arises.

e. *Scope of OCSLA jurisdiction.* Some producers express concern that the Commission's rule will apply to nonjurisdictional facilities under the NGA. For example, McMoran Oil & Gas Company (McMoran) and Ensearch Exploration, Inc. (Ensearch) both express concern over gathering facilities on the OCS.[70] McMoran is concerned that an OCS pipeline's control of nonjurisdictional gathering facilities could be used to block access to its jurisdictional facilities and thereby evade the open access mandate of the OCSLA. McMoran believes that the enforcement of the open access requirements of the OCSLA should not turn on the classification of a particular segment of an OCS pipeline's transportation system. McMoran wants the Commission to reaffirm that the obligation to provide open access transportation is not limited to jurisdictional facilities but extends to nonjurisdictional gathering lines that operate as an integral part of the OCS pipeline's system.

Ensearch requests that, if the Commission extends the obligation to provide open access transportation to nonjurisdictional gathering lines operated as an integral part of an OCS pipeline's system, the Commission not apply the same open access requirements through a rulemaking to producer-operated gathering facilities. Ensearch believes that application of the open access requirement to producer-operated gathering facilities is best handled on a case-by-case basis.[71]

The Commission stated in Order No. 491 that its interpretation of the OCSLA only extended to interstate natural gas pipelines subject to the NGA; the same is true of this final rule. The Commission agrees with McMoran that all pipelines on the OCS have a duty to provide open and nondiscriminatory access to transportation services. If the Commission receives complaints regarding gathering facilities it will, on a case-specific basis, use its ancillary authority, its authority under sections 4 and 5 of the NGA,[72] and its authority under section 5 of the OCSLA, as appropriate under the circumstances presented.

f. *Order No. 500 crediting mechanism.* Several producer groups urge the Commission not to apply the Order No. 500 take-or-pay crediting mechanism to open access transportation of OCS gas.[73] The Joint Producers state that by requiring OCS pipelines to provide transportation service under a Part 284 blanket certificate the Commission, at least implicitly, proposes to require producers to offer Order No. 500 take-or-pay credits to the OCS pipelines in order to obtain open access transportation rights under section 5 of the OCSLA.[74] The Joint Producers allege that such a requirement is inconsistent with sections 5(e) and 5(f) of the OCSLA because it would force producers to give the OCS pipelines significant economic concessions to obtain their statutorily-mandated OCSLA transportation rights. The Joint Producers note that the Commission, in Order No. 500–C, recognized the unique production requirements for casinghead gas and took steps to prevent the reduction of casinghead production (*i.e.*, the Commission refused to extend take-or-pay credits to include casinghead gas). The Joint Producers maintain that similar action is justified for all natural gas produced on the OCS.[75]

McMoran Oil & Gas Company (McMoran) states that the blanket certificate would be subject to the conditions of Subpart A of Part 284, and that § 284.8(f) and § 284.9(f) authorize pipelines to condition eligibility for

[74] The crediting mechanism is discussed in Order No. 500, III FERC Stats. & Regs. ¶ 30,761 at 30,779–30,792 (1987). The crediting mechanism was modified in Order No. 500–B, III FERC Stats. & Regs. ¶ 30,772.

[75] Several other commenters discussed the appropriateness of a priority for casinghead gas in any allocation scheme. *See, e.g.*, comments of Sun Exploration and Production Company (Sun) at 4 and comments of the Joint Producers at 3, 21–27.

transportation service on the producer's offering the pipeline credits against its take-or-pay liability to the producer. McMoran also states that the Order No. 500 crediting mechanism was established in response to the remand by the U.S. Court of Appeals in *Associated Gas Distributors v. FERC, supra*, and that in Order No. 436 the Commission was acting in the context of a voluntary regulatory program adopted pursuant to the Commission's discretionary authority under the NGA and the NGPA. McMoran asserts that open access transportation under the OCSLA is different in that it is mandated by statute and that shippers' rights to open access transportation exist independently of any Commission interpretation of the Act.

The Indicated Producers contend that the Order No. 500 crediting mechanism would result in conditional access to OCSLA section 5 transportation. The Indicated Producers assert that there is no statutory basis for such a condition and that Congress never intended for open access transportation on the OCS to be conditioned on a producer's willingness to relinquish certain rights. In addition, the Indicated Producers argue that application of the Order No. 500 crediting mechanism would conflict with the open and nondiscriminatory access condition contained in pipeline right-of-way permits issued by the Department of the Interior. The Indicated Producers allege that to allow OCS pipelines to refuse transportation service to producers unwilling to offer take-or-pay credits would violate the right-of-way permits.

Natural Gas Supply Association (NGSA) agrees with the Indicated Producers and states that if the Order No. 500 crediting mechanism was applied under the OCSLA, it would violate the anti-discrimination provisions in sections 5(e) and 5(f) and would create an irreconcilable conflict with the terms and conditions in the right-of-way permits and easements issued to OCS pipelines by the Department of the Interior.

In Order Nos. 436 and 500, the Commission fully considered both casinghead gas and the producer crediting mechanism. Furthermore, blanket certificates issued under those orders already apply to off-shore gas to the extent that the certificate holder has off-shore pipeline facilities. We perceive no reason to reconsider here the carefully balanced mechanisms adopted in those orders. Thus, casinghead gas will be treated in the same manner under the rule adopted herein as it is treated in the regulations adopted by Order Nos. 436 and 500, for the reasons stated in those orders.[76] There is no priority of capacity allocation for casinghead gas off-shore, just as there is no priority of capacity for such gas on-shore. The treatment of casinghead gas for crediting purposes, as set forth in Order No. 500, continues to apply. In the event that application of those rules raises an issue of potential damage to off-shore wells, the Commission will consider the matter on a case-by-case basis, in the context of the specific facts alleged, pursuant to the standards set forth in section 5 of the OCSLA.

g. *Rationale for rules.* Several commenters assert that the Commission's rationale for implementing the OCSLA was flawed.[77] These commenters contend that the complaints the Commission received about access to available capacity on the OCS were directed to the Commission's policy against capacity brokering on the OCS and that the Commission's proposed rule in Docket No. RM88–13–000 is the appropriate forum in which to address these complaints. We need not discuss here whether those complaints might be appropriately considered in Docket No. RM88–13–000. The Commission has the authority to adopt regulations to implement the OCSLA, and for the reasons discussed above it has determined that there is a need to do so by adopting the final rule.

IV. Environmental Review

This rule proposes regulations to implement the Commission's responsibilities under section 5 of the OCSLA. The Commission is providing interstate pipelines operating on the OCS with blanket certificates under section 7(c) of the NGA. These certificates involve the transportation of gas and do not authorize the construction of any facilities. The Commission has already determined that actions involving the transportation of natural gas under NGA section 7(c) are not actions that have significant environmental effect.[78] The Commission, therefore, is not preparing an environmental impact statement for this rule.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act (PFA) [79] requires a rule to contain an analysis of the impact the rulemaking would have on small entities.[80] The RFA is intended to ensure careful and informed agency consideration of the rules that significantly affect small entities and to encourage consideration of alternative approaches to minimize harm to, or burdens on, small entities. This rule applies to jurisdictional natural gas companies whose services or facilities are regulated under NGA or the NGPA. Most of these companies are too large to fall within RFA's definition of a small entity and therefore this rule will not have a "significant economic impact on a substantial number of small entities."

The rule may have a significant impact on those entities who are not providing transportation services on the OCS but who are either producing or shipping OCS gas. Even if these entities may be considered small entities under the RFA, the impact the rule would have would be a beneficial one. Producers or shippers of OCS gas would be given better access to transportation service on the OCS. The Commission does not believe the term "significant economic impact on a substantial number of small entities" as used in the RFA was intended to include regulations that have a beneficial, rather than a negative, impact on small entities.

VI. Paperwork Reduction Act

The Paperwork Reduction Act (PFA) [81] and the Office of Management and Budget's (OMB) regulations [82] require that OMB approve certain information collection requirements imposed by agency rule. The information collection provisions in this final rule will be submitted to OMB for its approval.

The Commission promulgated the information collection provisions of this rule in order to comply with its statutory responsibilities under sections 5(e) and 5(f) of the OCSLA. Under section 5(e) of the OCSLA, the Commission has the responsibility to ensure that oil and gas pipelines transport and purchase gas produced on the OCS in such proportionate amounts as the Commission determines to be reasonable. Section 5(f) of the OCSLA requires OCS pipelines to provide open and nondiscriminatory access to both owner and nonowner shippers. In order

[82] 5 CFR 1320–13 (1988).

to implement sections 5(e) and 5(f) of the OCSLA, the Commission is issuing every OCS pipeline a blanket transportation certificate under Part 284, Subpart G of its regulations. In addition, OCS pipelines must have a transportation rate schedule on file that conforms to § 284.7, and to § 284.8(d) for firm service and to § 284.9(b) for interruptible service.

The information collection burden imposed on an OCS pipeline of filing an appropriate rate schedule is estimated to be 240 hours per response. The frequency of response is estimated to be one per year for the first year; thereafter, filing are discretionary on the part of the pipeline. The number of likely respondents is 43.[83] Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 [Attention: Mike Miller, Office of Information Resources Management (202) 357–9205]. Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulation Commission).

VII. Effective Date

This rule will become effective February 17, 1989.

List of Subjects in 18 CFR Part 284

Continental shelf, Natural gas, Reporting and recording requirements.

In consideration of the foregoing, the Commission amends Part 284, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission. Commissioner Trabandt concurred with a separate statement attached.

Lois D. Cashell,

Secretary.

PART 284—CERTAIN SALES AND TRANSPORTATION OF NATURAL GAS UNDER THE NATURAL GAS POLICY ACT OF 1987 AND RELATED AUTHORITIES

1. The authority citation for Part 284 is revised to read as follows:

Authority: Natural Gas Act, U.S.C. 717–717w (1982), as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Outer Continental Shelf Lands Act of 1953, 43 U.S.C. 1331–1356 (1982) as amended; Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142.

[83] *See supra* note 16 and accompanying text.

2. In Part 284, a new Subpart K consisting of §§ 284.301 through 284. 306 is added to read as follows:

Subpart K—Transportation of Natural Gas on the Outer Continental Shelf by Interstate Natural Gas Pipelines on Behalf of Others

Sec.
284.301 Applicability.
284.302 Definitions.
284.303 OCS blanket certificates.
284.304 Allocation of firm and interruptible capacity on the OCS.
284.305 Transportation rates.

Subpart K—Transportation of Natural Gas on the Outer Continental Shelf by Interstate Natural Gas Pipelines on Behalf of Others

§ 284.301 Applicability.

This subpart implements section 5 of the Outer Continental Shelf Land Act (OCSLA) and applies to any jurisdictional interstate natural gas pipeline that holds a certificate under section 7 of the Natural Gas Act (NGA) authorizing the construction and operation of facilities on the Outer Continental Shelf (OCS).

§ 284.302 Definitions.

For the purposes of this subpart, the term:

(a) "Outer Continental Shelf" (OCS) has the same meaning as found in section 2(a) of the OCSLA (43 U.S.C. 1331(a)); and

(b) "OCS pipeline" means an interstate natural gas pipeline that holds a certificate under section 7 of the NGA authorizing the construction and operation of facilities on the OCS, and includes all of the OCS pipeline's facilities that fall within the scope of the Commission's jurisdiction under section 7 of the NGA to the full extent that such facilities are used or necessary to transport natural gas from the OCS to the first point of interconnection on the shoreward side of the OCS where it delivers natural gas to either:

(1) A natural gas conditioning or processing facility, or

(2) Another pipeline, or

(3) A distributor or end user of natural gas.

§ 284.303 OCS blanket certificates.

(a) Every OCS pipeline (as that term is defined in § 284.302(b)) is issued a blanket certificate authorizing the transportation of natural gas on or across the OCS on behalf of others under Subpart G of this Part. This certificate becomes effective on the date that the OCS pipeline's rates under § 284.305 become effective. However, if the Commission does not permit rates filed pursuant to § 284.305(b) to become effective on or before April 1, 1989, the certificate becomes effective on the date on which the rates filed pursuant to § 284.305(b) would have gone into effect if they had not been suspended.

(b) OCS pipelines must provide open and nondiscriminatory access to the transportation service provided under paragraph (a) of this section.

(c) The certificate issued under paragraph (a) of this section provides an OCS pipeline with the authorization to:

(1) Transport natural gas under section 7(c) of the NGA,

(2) Abandon transportation services that are performed under the blanket certificate, and

(3) Abandon firm transportation services to implement a reallocation of firm capacity under §§ 284.304(a) and 284.304(c) of this part.

(d) The certificate and abandonment authority conferred by this section is conditioned upon the OCS pipeline's compliance with § 157.20(e) of this chapter.

(e) A blanket certificate issued under this section does not authorize the construction of new facilities on the OCS.

§ 284.304 Allocation of firm and interruptible capacity on the OCS.

(a) *Open season for firm transportation.* Not later than March 1, 1989, all OCS pipeline must poll all of their existing firm shippers to ascertain whether any of them want to relinquish any or all of their firm transportation capacity.

(1) If an OCS pipeline has either uncommitted firm transportation capacity or firm transportation capacity that an existing shipper wants to relinquish, it must afford all existing and potential shippers an opportunity to request the available firm capacity.

(2) The OCS pipeline must provide reasonable notice of the open season.

(3) The open season can be for no less than 10 days and no more than 30 days.

(4)(i) If the requests for firm capacity exceed the firm capacity that is available, the OCS pipeline must allocate to each requesting shipper a pro rata share of the available firm capacity.

(ii) If the available firm capacity exceeds the requests for such capacity, and if the available firm capacity includes capacity that one or more existing shippers wants to relinquish, each shipper relinquishing capacity must be allowed to satisfy the requests for firm capacity on a pro rata basis. To the extent that the OCS pipeline itself has uncommitted firm capacity available, it may assign that

uncommitted capacity to the new shipper(s) before reallocating the capacity of existing shippers.

(iii) In reallocating firm capacity under paragraph (a)(4)(i) or (a)(4)(ii) of this section, the OCS pipeline must take into account the capacity available at the particular receipt and delivery points specified by both the shippers requesting firm capacity and the shippers voluntarily relinquishing firm capacity.

(b) *Open season for interruptible capacity.* (1) No later than March 1, 1989, all OCS pipelines must commence an open season for interruptible transportation.

(2) The OCS pipeline must provide reasonable notice of the open season.

(3) The open season can be for no less than 10 days and no more than 30 days.

(4) The requirements of paragraph (b) of this section do not apply to any OCS pipeline that has accepted a blanket transportation certificate under Subpart G of this part prior to February 17, 1989.

(5) In establishing an initial priority for interruptible transportation, OCS pipelines shall give priority to transportation currently (as of February 17, 1989) authorized under existing individual certificates (provided that such transportation will be performed at transportation rates no lower than the transportation rates paid or to be paid by other interruptible shippers).

(c) *Voluntary reallocation of firm capacity.* (1) If an OCS pipeline receives a request for firm transportation at any time after it has conducted the open season described in paragraph (a) of this section, it must, within 10 days of receiving the request, provide the requesting shipper with a list of all firm shippers under contract with the pipeline.

(2) If the requesting shipper finds an existing firm shipper that wants to voluntarily relinquish all or a portion of its firm capacity, the OCS pipeline must reallocate that firm capacity. In the event that more than one shipper wants to acquire that firm capacity, the reallocation may be conducted on either a first-come, first-served basis, a pro rata basis, or any other nondiscriminatory method that is consistent with the OCS pipeline's transportation rate schedule on file with the Commission. If the OCS pipeline has uncommitted firm capacity available, it may assign part or all of that capacity before reallocating the capacity of existing shippers.

(3) The blanket certificate issued under § 284.303(a) provides an OCS pipeline with the authority under section 7(b) of the NGA to abandon service with respect to the shipper voluntarily relinquishing firm capacity, even if the service was authorized prior to the issuance of the blanket certificate under § 284.303(a).

§ 284.305 Transportation rates.

(a) Except to the extent explicitly authorized by the Commission on a case-by-case basis pursuant to § 284.305(d)(2), the transportation rate for transportation of gas on the OCS by an OCS pipeline must be the rate in a transportation rate schedule on file with the Commission that conforms to § 284.7, and to either § 284.8(d) for firm service or to § 284.9(d) for interruptible service.

(b) If an OCS pipeline does not have a transportation rate schedule on file with the Commission that conforms to § 284.7, to § 284.8(d) for firm service and to § 284.9(d) for interruptible service, the OCS pipeline must file conforming rate schedules by March 1, 1989, to be effective no later than April 1, 1989. The OCS pipeline must use it current rates until the Commission permits the rates filed pursuant to this paragraph to become effective.

(c) The rate schedules filed by a pipeline under paragraph (b) of this section must be supported by an annual cost and revenue study in the form required by § 154.303(e) of this chapter. If a pipeline has a pending rate proceeding under § 154.63, 154.38 or 154.303(e) of this chapter, it does not have to submit an annual cost and revenue study and may use the base period data from the proceeding so long as the base period ended within 12 months of the filing of the rates required in paragraph (b) of this section.

(d)(1) Except as provided in paragraph (d)(2) of this section, the rates filed under paragraph (b) of this section apply to all transportation services offered by an OCS pipeline.

(2) With respect to transportation performed pursuant to certificates other than Part 284 blanket transportation certificates, an OCS pipeline may restate its current rates for those transactions if it demonstrates to the Commission that such rates are not unjust, unreasonable, or unduly discriminatory. If an OCS pipeline wants to use its current rates for transportation, it should refile those rates by March 1, 1989, to be effective no later than April 1, 1989.

(e) By March 1, 1989, to be effective no later than April 1, 1989, all OCS pipelines must file tariff provisions setting forth the method by which firm transportation capacity will be reallocated under § 284.304(c) in the event that two or more shippers seek to obtain the firm capacity that one or more shippers offer to relinquish.

(f) All rates for transportation on or across the OCS that are in effect prior to February 17, 1989 remain in effect until the date upon which the rates filed pursuant to §§ 284.305 (b) and/or (d) (whichever supersede the existing rates) become effective.

Appendix B—OCS Pipelines to Whom Part 284 Blanket Transportation Certificates are Issued by this Order

Note: This appendix will not be published in the Code of Federal Regulations.

OCS Pipeline and Shoreward Terminus

1. Blue Dolphin Pipeline Co.
   Onshore terminus at Dow Chemical Co., Freeport, Texas
2. Columbia Gulf Transmission Co.
   Offshore termini of numerous segments, Offshore, Louisiana. *See also* Nos. 23, 25 and 27, below

3. Sabine Pipe Line Co.
   Offshore termini at West Cameron 547 South Addition, West Cameron 529 South Addition, and South Timbalier 147, Offshore, Louisiana
4. Seagull Interstate Corp.
   Offshore termini at Galveston 213 and Matagorda 526, Offshore, Texas
5. Superior Offshore Pipeline Co.
   Offshore terminus at Lowry Gas Plant, Cameron Parish, Louisiana
6. Tarpon Transmission Co.
   Offshore terminus at Shipshoal 274, Offshore, Louisiana
7. Sea Robin Pipeline Co.
   Onshore terminus at Erath, Louisiana
8. Stingray Pipeline Co.
   Offshore terminus at West Cameron 148, Offshore, Louisiana
9. Texas Sea Rim Pipe Line, Inc.
   Onshore terminus at Texas Sea Rim Sabine Pass, Separation Plant, Jefferson County, Texas
10. Bayou Interstate Pipeline System
   Offshore terminus at West Cameron 289, Offshore, Louisiana
11. Black Marlin Pipeline Co.
   Onshore terminus at Union Carbide plant, Texas City, Texas
12. Chandeleur Pipe Line Co.
   Onshore terminus at Pascagoula, Mississippi
13. Florida Gas Transmission Co. (FGT)
   Interconnection with FGT Kain Lateral, Matagorda County, Texas. *See also* Nos. 24, 26, and 28, below
14. Freeport Interstate Pipeline Co.
   Onshore terminus at interconnection with Freeport Intrastate Pipeline on Grand Isle, Jefferson Parish, Louisiana
15. Gasdel Pipeline System, Inc. (Gasdel)
   Offshore termini of 11 small offshore pipelines, Offshore, Louisiana and Texas. *See also* No. 22, below
16. High Island Offshore System
   Offshore terminus at interconnection with UTOS, West Cameron 167, Offshore, Louisiana
17. Pacific Interstate Offshore Co.
   Onshore terminus at metering station at interconnection with Pacific Lighting Service Co. pipeline, Ventura County, California
18. Pacific Offshore Pipeline Co.
   Onshore terminus at gas treating plant, Santa Barbara County, California
19. Pelican Interstate Gas System
   Onshore terminus at Mobil plant, Cameron Parish, Louisiana
20. Point Arguello Natural Gas Line Co.
   Onshore terminus at Chevron Hermosa plant, Santa Barbara County, California
21. U-T Offshore System (UTOS)
   Onshore terminus at Johnson's Bayou/ Cameron Meadows plant complex, Cameron Parish, Louisiana
22. Padre Island Pipeline System (Transcontinental Gas Pipe Line Co. [Transco]; and Gasdel) [1]
   Onshore terminus at dehydration plant near interconnection with Transco's main line, Brooks County, Texas
23. Central Texas Gathering System (Transco; Northern Natural Gas Co. [Northern]; Southern Natural Gas Co. [Southern]; ANR Pipeline Co. [ANR]; Columbia Gulf Transmission Co. [Columbia Gulf]; and Tennessee Gas Pipeline Co. [Tennessee]) [1]
   Onshore terminus at Markham plant, Matagorda County, Texas
24. Matagorda Offshore Pipeline System (Northern; Southern; and FGT) [1]
   Onshore terminus at liquid separation facility and interconnection with Houston Power and Light Co. pipeline, Tivoli, Refugio County, Texas
25. East Cameron 23 Lateral (Columbia Gulf; and Southern) [1]
   Onshore terminus at Amoco South Pecan Lake plant, Cameron Parish, Louisiana
26. Sabine Pass Lateral (Tennessee; and FGT) [1]
   Onshore terminus at Johnson's Bayou, Cameron Parish, Louisiana
27. Blue Water System (Tennessee; and Columbia Gulf) [1]
   Onshore termini at Pecan Island plant, Vermilion Parish, Louisiana (West leg), and Tenneco Oil Cocodrie plant, Terrebonne Parish, Louisiana (East leg)
28. Southern Pass Cognac Line (Southern; Northern; FGT; ANR; and Transco) [1]
   Onshore terminus at interconnection with Southern's Romere Pass pipeline, Plaquemines Parish, Louisiana

[1] The blanket certificates are issued to the individual interstate pipeline owners listed in parentheses.

Trabandt, Commissioner, *Concurring*

I concur in this Final Rule with several observations and reservations for further review on rehearing.

Background

In my concurring opinion to the Notice of Proposed Rulemaking (NOPR) in this docket, I expressed serious concern that, among other things, the proposed rule was not an effective solution to the real world problem at that time of some shut-in OCS gas resulting from Commission decisions in certain Order No. 436 blanket certificate cases, as documented in correspondence from the Natural Gas Supply Association (NGSA) and Interstate Natural Gas Association of America (INGAA) attached to my concurring opinion. The NGSA and INGAA letters focused on the problem then occurring on joint venture pipelines such as HIOS, U-TOS, Stingray, Trailblazer, Tarpon and others, and was commonly referred to as "third party transportation." According to the letters, the so-called third party transportation problem occurred when a pipeline participating in one of those joint venture pipelines sought to utilize its unused firm capacity in the joint venture pipeline to transport gas for third parties, but was prevented from doing so by the Commission because the activity would be inconsistent with then-current Commission policy prohibiting the brokering of capacity under Part 284 blanket certificate authority.

The prohibited third party transportation would have provided a means for producers to get gas to market that otherwise might, and, in some cases involving Sun and Chevron, for example, already was, shut-in for lack of other available transportation, because the demand for system supply of the interstate pipeline had declined dramatically. Such third party transportation also would provide pipelines with a means to transport released gas for take-or-pay credits and would provide customer access to additional supplies, thus maximizing the efficient use of the joint venture pipelines and reducing transportation costs on a per Mcf basis. Consequently, NGSA and INGAA urged the Commission to act immediately and simply to permit interstate pipelines to allocate capacity controlled on joint venture pipelines to shippers under existing 7(c) certificates and applicable contracts. My tentative conclusion was that the NOPR would not solve immediately or effectively that problem.

Conversely, there did not appear to be any documented real world problem for which the proposed rule was necessary or appropriate as a solution. The NOPR referred briefly and rather obliquely to the shutting-in of gas discussed above (which was the direct result of the Commission action to prohibit generally third party transportation in the Order No. 436 cases) and cited a 1985 request for an OCS rulemaking by the Chemical Manufacturers Association. That petition preceded the issuance of Order No. 436 and the emergence of non-discriminatory open access transportation under Part No. 284 and resulting blanket certificates. Rather than that stated, obscure justification and rationale, there was a strong undercurrent that the real motivation for the Order No. 436/500 blanket certificate approach in the OCS NOPR last spring was the desire to use the OCS problem/issue as a "target of opportunity" or excuse to impose on a mandatory basis the blanket certificate requirement, using the OCSLA as a springboard to reach that result. This attempt occurred at a time when interstate pipelines were still strongly resisting blanket certificates, rather than as a completely good faith effort by the Commission to solve the real world, "third party transportation" capacity reallocation problem.

Mandatory imposition of blanket certificates on the OCS would be a precedent of sorts and would demonstrate the disposition of the Commission to impose blanket certificates under any other nondiscriminatory theory. Also, there was the distinct suggestion that the solution to that real world problem was being held "hostage" as the pretext for such mandatory imposition of the blanket certificates on the OCS. The motivation for the NOPR last March is not the issue at this point, but I would hope that the Commission today will give all due consideration to what is the policy direction and regulatory objective for this Final Rule.

More generally, as I understand the current state of affairs on the OCS today, there is virtually no significant transportation access problem and there is no current threat of shut-in gas. In short, gas is moving as necessary from the OCS ashore without any substantial difficulty under the existing arrangements. Also, eight of the OCS

VOL 53 ISS 243 DE 19 1988 UMI

pipelines already have blanket certificates and almost all the interstate pipelines with firm capacity allocations on the joint venture pipelines have blanket certificates. Therefore, the current mix of transportation services under blanket certificates and section 7(c) certificates appears to be adequate, even if not optimal under a uniform OCS-wide blanket certificate program.

At the same time, there is some continued enthusiasm on the part of producers and shippers for moving carefully toward a more uniform, non-discriminatory access program, provided that there is no interruption of existing transportation arrangements. That is of considerable importance to many producers, because a large majority of OCS gas purchase contracts have been renegotiated as part of take-or-pay settlements. Interstate pipelines obtained more market responsive prices and take-or-pay relief in exchange for resolution of Order No. 500 credit mechanism requirements, more assured transportation access and services for producers, in addition to other features of the settlements. This Final Rule should not be allowed to have the effect of disrupting those settlement transportation arrangements, denying producers the benefits of the transportation and crediting benefits, or precipitating the necessity of a new round of "conditioned access" negotiations. I am not persuaded that the Final Rule would satisfy that test.

After review of the public comments and requests for rehearing filed in these dockets, and the current state of affairs on the OCS today, I am not completely persuaded that there is a satisfactory rationale and justification to support mandatory imposition of an Order No. 436/500 blanket certificate on all OCS pipelines. I also continue to believe that there is serious potential for uncertainty and disruption with regard to OCS pipeline services, as well as an endless line of clarification and waiver requests, under the Final Rule as adopted. Consequently, I have identified two options: one substantive and one procedural, for our further consideration in these dockets.

Substantive Option

As I discussed above, I believe the threshold issue in this rulemaking is the nature of the problem we are trying to solve and the resulting regulatory objective. There is absolutely no doubt that the problem or "crisis" which spurred the initial action in these dockets was the shut-in of OCS gas resulting directly from the Commission's rejection in Order No. 436 cases of requests to authorize downstream onshore pipelines holding firm capacity on upstream OCS pipelines to reallocate capacity. A more detailed explanation is set forth in my concurring opinion to the NOPR and the attached letters from NGSA and INGAA.

The Natural Gas Pipeline of America Order No. 436 case is a primary example of the problem. There the Commission rejected proposals for reallocation authority because of concerns related to capacity brokering and the capacity brokering NOPR then under discussion. Some pipelines, such as Natural, claimed authority for reallocation under their separate certificate authority and proceeded to reallocate despite the rejection of specific authority in the Order No. 436 case. The Commission did not challenge such legal claims, or the associated reallocations, which have apparently proceeded apace since last spring. To that extent, there is a serious question today if, in fact, there is a remaining reallocation problem in the real world that needs to be fixed. In any event, I believe it is quite clear in the record of comments on the NOPR and rehearing petitions for the interpretive rule that mandatory imposition of Order No. 436/500 blanket certificates is not justified to address the initial reallocation problem. The Final Rule totally ignores this threshold issue, largely because there is no persuasive response. (See page 60 of the Slip Opinion.)

If, however, the Commission is persuaded that action must be taken to address the reallocation problem at this point in time, there is a much more narrow and focused approach of providing authority for reallocation of firm capacity on OCS pipelines. A simplified and streamlined mechanism will accomplish that regulatory objective without all of the potential legal, policy and operational problems of the mandatory blanket approach.

Chairman Hesse has already agreed in the *Texas Eastern* Order No. 436 case in September to develop quickly just such a mechanism for nondiscriminatory reallocation onshore of firm capacity on an upstream pipeline held by a downstream pipeline. Her commitment is memorialized in the text of that case, and the Commission made clear its intention to grant such authority, while we develop experience in the generic capacity brokering area with an experiment (possibly United's proposal). Here, the reallocation mechanism need only provide for nondiscriminatory reallocation of firm capacity on an upstream OCS pipeline voluntarily relinquished by a downstream onshore pipeline.

For example, the Commission could simply authorize, but not mandate, OCS pipelines to conduct an open season for any excess and voluntarily-relinquished firm capacity on a one time or periodic basis, with a first-come first-serve mechanism for any subsequent reallocation. The rates for firm transportation services would be those established under existing tariffs approved by the Commission. There would be no need to modify, interfere with, or abrogate any existing arrangements. There also would be no need to address interruptible transportation, which is not the problem in any event.

The Order No. 436/500 blanket certificate program would remain voluntary for OCS pipelines under current regulations and the Commission would process OCS pipeline applications for an Order No. 436/500 blanket certificates under current practice in individual certificate and rate cases. There would be no need for any complicated transitional/grandfather mechanism and there would be absolutely zero possibility of disruption of OCS operations or transactions at any time.

Procedural Option

I supported the proposal for delayed effectiveness of the Final Rule, as adopted in the current form, to avoid regulatory-induced disruption during the winter hearing season. Nevertheless, the substantive features of the Final Rule have been adopted and the rehearing process does not generally provide the best vehicle for wholesale reconsideration of a major rule. Also, rehearings can be delayed for extended periods of time with little or no practical recourse for the Full Commission, such that the Final Rule could be in effect and implemented without any prior modifications on rehearing, irrespective of the persuasiveness of the rehearing petitions. As a practical matter, the scheduling of rehearing orders remains a prerogative of the Chairman. Consequently, it is most prudent and responsible that a Final Rule be "our best shot", as it were, at a rule which conceivably will be effective for some extended period; *e.g.*, Order No. 500 Interim Rule.

Given the concerns expressed by Members of the Commission about the potential disruption on the OCS caused by the rule, and also the decidedly fundamental change from the proposed rule (*e.g.*, immediate mandatory imposition of blanket certificates on OCS pipelines), it would be quite appropriate to renotice the NOPR with the new proposal for a short 30-day comment period. Comments could be received early next year, and we could make a final decision to be effective in the same general April/May time frame after the winter heating season. The renoticed NOPR could also seek comment on the substantive option described above for purposes of comparison. In any event, the Final Rule next year resulting from a renoticed NOPR would be "our best shot" at solving the real world problem(s), which ostensibly precipitated this exercise in the first instance, on a "fail-sale" basis.

The Final Rule

The majority has decided to proceed with the Final Rule in this order, but also to provide sufficient opportunity to get rehearing comments and act on them before the Rule is implemented. Members of the Commission also stated their intention to ensure that there is no interruption of existing transportation services on the OCS, no disruption of current transportation arrangements, and no shut-in of OCS gas. I am reluctantly prepared to concur in that result, but with several concerns about the Final Rule.

First, I seriously doubt whether the Commission will have adequate time to consider rehearing petitions and adopt an order on rehearing prior to the effective date of the rule (February 1, 1989) or the deadline for tariff filings and open season activities (March 1, 1989), and possibly even the latest effective date for tariffs and latest date for service to begin (April 1, 1989). Assuming that an order on rehearing could be developed and scheduled at the earliest possible date, which is subject to the prerogative of the Chairman and beyond the control of the Full Commission, it probably is simply unrealistic to expect action on rehearing by mid-February. Consequently, if reviewing parties conclude that the Commission should adopt

the substantive or procedural option, or amend significantly the Final Rule before implementation, a delay in effectiveness and implementation would be necessary and appropriate. Thus, parties filing rehearing petitions may want to request a further delay in the current schedule to prevent premature implementation of this Rule.

The open season for interruptible transportation potentially may create significant problems (Slip Opinion at page 18 of the preamble text and page 69 of the regulatory text (§ 284.304(b)). First, the OCS pipeline is granted complete discretion to use "any non-discriminatory means that is acceptable for onshore blanket certificate transportation" to allocate interruptible capacity (page 18). That could include, among other options, the lottery method approved for the PGT pipeline. In my judgment, the Commission should not allow that discretion, because it is virtually guaranteed to disrupt existing transportation arrangements.

Second, the Commission does not provide unconstrained grandfather treatment for existing interrruptible transportation arrangements under section 7(c) authorizations. That is a significant and unprecedented departure from Order No. 436 and past practice in the voluntary blanket certificate program. Rather, the Final Rule requires the OCS pipeline to give a priority only where there is interruptible transportation that satisfies two criterion. First, the interruptible transportation must be affirmatively authorized under an existing certificate effective on February 1, 1989. Second, the interruptible transportation shippers must pay transportation rates for such service which are "no lower than the rates paid or to be paid by other interruptible shippers." (parenthetical proviso at page 19 and in § 284.304(b) at page 69).

There is no explanation defining what "other interruptible shippers" must be compared, as between shippers on a single pipeline versus all shippers on the OCS. There also is no explanation of what "rates paid or to be paid" must be considered and how they would be identified. Additionally, this is the first time under the Part 284 program that the Commission has sanctioned the consideration of *price* as a factor in the initial allocation of capacity for non-discriminatory access.

The Commission, by comparison, has approved a form of "bump" rule, whereby a shipper *already having capacity allocated to it* can be bumped if it has a discounted rate, another shipper is willing to pay a higher rate up to the maximum, and the original shipper within five days fails to agree to pay that higher rate. (*See*, e.g. *Natural Gas Pipeline of America*, 39 FERC ¶ 61,153 at 61,595 (1987).) But, prior to this order, the Commission has wisely refused to allow price to be the determining factor. Here, the clearly ambiguous proviso will create a *de facto* conditioned access capability in the OCS pipeline, will probably frustrate any orderly and systematic grandfather treatment of existing interruptible transportation arrangements of various types, and undoubtedly will create a precedent for allocation determined largely or solely by price, such as the auctioning proposal.

The rationale for adoption of this disruptive and potentially punitive proviso provided in Footnote 24, at page 19, falls of its own weight in the face of these countervailing considerations. In my judgment, there is every justification for an unconstrained priority for pre-existing interruptible transportation arrangements, independent of the prevailing rates or subsequent rate requirements. The interruptible transportation open season should have been modeled on the open season for firm transportation (see p. 16 *et seq.*), without any introduction of the unprecedented and unjustified price factor. The analytical bottom line is that the Commission, with the price proviso, has gutted the grandfather protection for existing interruptible transportation as a practical matter.

I also am concerned that the process and procedures for contemporaneous consideration of all the March 1 rate filings by all OCS pipelines for new Part 284 rates or, in the alternative, their existing rates with a justification for waiver of the Part 284 requirements, will create for the Commission, pipelines, and shippers an administrative nightmare. In addition the massive number of filings also will complicate the open season for interruptible transportation under the price proviso discussed above. Certainly, the Commission will be confronted with an OCS tidal wave of Part 284 rates, terms and conditions. Further, I believe thought should be given to the process and procedures for these filings from the perspective of an orderly and non-disruptive transition to blanket certificate operations.

The Commission rejected a number of modifications to the proposed rule requested by producer commenters. Several of these modifications, in my judgment, should have been adopted. First, the Order No. 500 crediting mechanism should not be applied to open access transportation of OCS pipelines for the reasons stated in the producer comments. I find particularly persuasive arguments setting forth the distinction between OCS transportation under the OCSLA and the voluntary transportation program under Order No. 500. (See discussion at page 57 *et seq.*) I agree that applying the crediting mechanism creates conditioned access in violation of the OCSLA, particularly as the Commission has just interpreted that law in these dockets.

Second, the Commission also should have provided a separate priority in some fashion for casinghead gas as sought by several producer commenters. (See discussion at page 57 *et seq.*) According to the comments, casinghead gas constitutes about eleven percent of total OCS gas production in the Gulf of Mexico. The Final Rule, at page 60, concludes that the Commission will consider on a case-by-case basis any issues of potential damage to off-shore wells that may be raised by these rules. In light of the difficulties already obvious in the open season for interruptible transportation, the case-by-case approach in all likelihood will be too little and too late to prevent such potential damage. The better and more responsible approach is to recognize now the particular sensitivity of the OCS wells and to provide an affirmative priority for casinghead gas. The Commission should not provide the *de facto* conditioned access result and case-by-case hollow gesture adopted in the Final Rule.

Next, the Final Rule, at page 34 and at page 67 (section 284.302(b)) addresses the issue raised by producer commenters about the shoreward delivery interconnection. The specific concern about a potential bottleneck control problem remains unresolved, since the new definition addresses physical interconnection, but not assured regulatory access to transportation services. Notwithstanding the legal technicalities of OCSLA jurisdiction proferred as an apologetic excuse by the Commission for not addressing assured regulatory access, the Commission has created a legal conundrum of some consequence. If Congress can be deemed to have enacted the requirement for open access transportation on the OCS with such forcefulness in the 1978 Amendments to justify mandatory imposition of Part 284 blanket certificates under the Natural Gas Act on unwilling OCS pipelines, how perforce could Congress not have intended that the Commission use its NGA authority to ensure that the OCS gas could be delivered to a customer for sale beyond the first shoreward bottleneck controlled by a pipeline unwilling to provide voluntarily the necessary transportation service, assuming capacity is available.

The Commission confronted an analogous problem in Order No. 451 with regard to natural gas released under the Good Faith Negotiation procedures for sale to a new customer and concluded, correctly in my judgment, that assured transportation as provided there was an absolutely essential feature. I fail to see why the Commission could not fashion a similar provision for OCS gas using its NGA authorities in response to the Congressional mandate in the 1978 amendments. Put another way, if that mandate is legally satisfactory to justify mandatory imposition of Part 284 blanket certificates, it also should suffice for assured onshore delivery of OCSA gas transported ashore under those blanket certificates.

The Final Rule, at page 20, indicates that generally the Commission will no longer issue section 7(c) certificates to authorize transportation services that otherwise could be performed under the blanket certificates imposed here on OCS pipelines. That portion of the Rule would codify the more general practice for processing of section 7(c) applications, which has evolved over the past year in the voluntary Part 284 program. At the same time, however, the Commission staff apparently has refused to process new section 7(c) applications for OCS gas since the issuance of the NOPR in these dockets. As a result, there are pending today a limited number of such applications which are deemed critical by various producers to provide needed transportation ashore for OCS gas. This inaction results in possibly shutting-in the gas while the implementation of the Final Rule is awaited. The Commission should issue at least limited-term certificates for the transport of that gas during this winter and the pendency of operational blanket

VOL 53 ISS 243 DE 19 1988 UMI

certificates. There is no justification for further delay.

Some producer commenters recommended that the Commission adopt special balancing and penalty provisions that would better reflect the technical and operational situation on the OCS pipelines, rather than those approved for onshore pipelines. The Final Rule does not address this recommendation directly, but does indicate more generally in several places that the terms and conditions approved in other onshore blanket certificates will be acceptable under the mandatory OCS blanket certificates. The Commission should consider these concerns and recommendations with regard to balancing and penalties, in order to ensure that the mandatory blanket certificates have terms and conditions which are not discriminatory nor unfair to offshore producers.

The Final Rule, at page 23, provides that, where interstate pipeline owners of the OCS pipeline own, control and utilize defined finite portions of the OCS pipelines capacity, separate blanket certificates are issued to each individual interstate pipeline owner. And, each of those interstate owners may conduct separate open seasons and subsequent reallocations for that portion of the OCS pipeline. I am concerned about the impact of separate rates, terms, conditions, and allocation methodologies on portions of a single OCS pipeline, in terms of operations, balancing, penalties, accounting and non-discriminatory access. Such OCS pipelines, and shippers on them, should carefully consider the practical ramifications of such separate, but potentially different, blanket certificates on the same pipeline. For example, should there be a requirement for uniformity, in whole or in part as to certain aspects, as between separate blanket certificates on the same OCS pipeline?

Finally the rate requirements of the Final Rule are established in accordance with section 5 of the NGA and impose an obligation that the rates for all new *and* existing transportation services must conform to the requirements of Part 284, effective at the time an OCS pipeline provides the new transportation service required by this rule. (Pages 25 and 26.) This general requirement is subject to an exception where an individual OCS pipeline can demonstrate that its current transportation rates are necessary, because of the historical factors associated with project financing and other features, and the maintenance of different rates would not be unduly discriminatory. These rate requirements, and the implementation process for them, could potentially present the Commission and interested parties with a complicated and difficult administrative process across the spectrum of OCS pipelines required on March 1, 1989, to make tariff filings for the mandatory blanket certificates. Also, I am not persuaded that the Commission should mandate Part 248 rates on all existing transportation services, subject to the stated case-by-case exception. Interested parties should consider carefully the impact of the Part 284 rates, in terms of both pricing and access impact, and particularly with regard to the interruptible transportation price factor in the mandatory open season for existing interruptible transportation.

Conclusion

I am convinced that the substantive option described above will solve any real world OCS problem that may remain today, independent of any gamesmanship associated more generally with broader acceptance of Order No. 436/500 blanket certificates by interstate pipelines, onshore or on the OCS. The procedural option described above would provide a quick opportunity to get additional and current comments on the fundamentally changed proposal in the draft order and also would provide some needed calibration today of the rationale and justification for any action, as well as the substantive option. If, in the end, this turns out to be an exercise largely intended to establish a precedent for mandatory imposition of blanket certificates on interstate pipelines or to simply impose blanket certificates under the rubric of the OCSLA, rather than solve an OCS problem after all, I only hope the Commission Members will acknowledge that result. Finally, if the Commission decides to proceed with implementing the Final Rule, I would recommend strongly that the order be reviewed further and modified as discussed above to minimize the potential confusion and disruption resulting from the wholesale OCS-wide imposition of blanket certificates effective on a date certain *and* the processing at the same time of all resulting OCS pipeline rate cases.

I look forward to discussion of these recommendations, the procedural option, and the substantive option during the rehearing process.

For these reasons, I concur.

Charles A. Trabandt,

Commissioner.

[FR Doc. 88-29034 Filed 12-16-88; 8:45 am]

BILLING CODE 6717-01-M

---

18 CFR Part 385

[Docket No. RM87-24-001; Order No. 502-A]

Procedures for the Assessment of Civil Penalties; Order on Rehearing

Issued: December 13, 1988.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final Rule; Order on Rehearing.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is denying rehearing of Order No. 502, a final rule establishing procedures for the assessment of civil penalties under section 31 of the Federal Power Act. (53 FR 32,035, Aug. 23, 1988.) Four petitions for rehearing were filed in this rulemaking docket. Applicants have failed to raise any new material issues of fact.

EFFECTIVE DATE: This order is effective December 13, 1988.

FOR FURTHER INFORMATION CONTACT: Julia Lake White, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested person an opportunity to inspect or copy the contents of this document during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electric bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357-8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this final rule will be available on CIPS for 10 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

Order on Rehearing

The Federal Energy Regulatory Commission (Commission) is denying rehearing of Order No. 502, a final rule establishing procedures for the assessment of civil penalties under section 31 of the Federal Power Act (Act), enacted by section 12 of the Electric Consumers Protection Act of 1986 (ECPA).[1]

The Commission issued Order No. 502 on August 17, 1988.[2] Four petitions for rehearing of Order No. 502 were filed, on September 15 and 16, 1988.[3] For the

reasons discussed below, the Commission denies rehearing of Order No. 502.

Scope of the Rule

Order No. 502 concluded that the civil penalty provisions of section 31, which literally apply to "licensees, permittees, and exemptees," likewise apply to those who operate as licensees or exemptees without bothering to obtain the necessary authority from the Commission. The Commission emphasized that a contrary interpretation would impute to Congress the irrational intent of favoring those who completely disregard the law over those who are at least in partial compliance. It would mean that a project owner who went through the process of obtaining a license but violated the terms and conditions of the license or a Commission rule or order would be subject to civil penalties, but one who operated in exactly the same way without a license (or with an expired or revoked license) would be immune from civil penalties even if the project endangered public health, safety or the environment.

The Commission found that the statutory language does not compel such a result and, indeed, that the legislative history shows Congress was concerned about unlicensed operations, expected the Commission to assure compliance with the licensing structure, and gave it enhanced authority, in the form of civil penalty powers, to enforce the law.

All four applicants for rehearing argue that section 31 of the Federal Power Act authorizes civil penalties only against holders of a license, permit or exemption. They maintain that Order No. 502 ignores the plain meaning of section 31(c) and misinterprets the legislative history. [4] They contend that Congress specified the class of entities against whom penalties are available under section 31(c) and that Congress' use of broader language elsewhere in the Federal Power Act and in other civil penalty legislation compels a narrower reading of section 31(c).[5]

While the commenters focus on the use of the phrase "licensees, permittees, and exemptees" in section 31(c), they ignore language in the enforcement provision indicating that those words should be construed broadly. Apart from the duty to "monitor and investigate compliance with each license and permit," section 31(a) provides separately that "[t]he Commission shall conduct such investigations as may be necessary and proper in accordance with this Act." This responsibility is broad, encompassing the "Act" as a whole and, fairly read, extends to investigations not only of licensed but unlicensed jurisdictional operations as well.

Given the broad authority to investigate, the Commission's authority to issue compliance orders cannot reasonably be restricted to enforcing only the terms of particular licenses, permits or exemptions that have already been issued. Under section 31(a), "[a]fter notice and opportunity for public hearing," the Commission may issue such orders as necessary to require compliance with the "terms and conditions of licenses and permits issued under this Part and with the terms and conditions of exemptions granted from any requirement of this Part." This language is broad and logically encompasses actions necessary to require compliance not only with particular existing licenses but with the licensing structure that is at the heart of the Act and through which the Commission exercises its regulatory responsibilities to protect public health, safety and the environment.

Section 31(c) provides for the civil penalty remedy against those who violate or fail to comply with Commission orders under subsection (a). Given the broad language of section 31(a), however, section 31(c) cannot be read narrowly as petitioners claim, but must be understood as encompassing Commission orders intended to bring unlicensed operators into compliance.[6]

Moreover, the language of section 31(c) itself provides further indication that the words "licensee, permittee, or exemptee" were not meant to be construed narrowly and literally.

While section 31(c) mentions civil penalties against a licensee, permittee or exemptee, it instructs the Commission in determining the amount of any penalty to consider remedial "efforts of the licensee" but fails to mention remedial efforts by exemptees or permittees. Since there is no rational basis for considering remedial efforts by the one but not by the others, Congress plainly intended no distinctions between them. No commenter has suggested the Commission should follow the literal language and therefore recognize remedial efforts by licensees but not by exemptees and permittees. Congress was using the word "licensee" in a broad and not a literal sense to include all jurisdictional operators. Similarly, the phrase "licensee, permittee or exemptee" may be read to encompass anyone engaged in conduct requiring a license or exemption.

At the very least, the language of sections 31(a) and 31(c), read together, reveals an ambiguity about the intent of Congress that justifies recourse to legislative history as an aid to construction. The Commission therefore has the latitude and the responsibility to look behind the words of section 31 to determine and implement the intent of Congress. Moreover, the commenters' arguments about "plain meaning" ignore the Supreme Court's pronouncement in *American Trucking* and other judicial decisions cited by Order No. 502.[7] As *American Trucking* holds, where the literal words of a statute lead to "absurd or futile" results, the courts look "beyond the words to the purpose of the act," and even when the language does not "produce absurd results but merely an unreasonable one 'plainly at variance with the policy of the legislation as a whole,'" the courts follow "the purpose rather than the literal words."[8] When aid to construction of the meaning of statutory words is available "there certainly can be no 'rule of law' which forbids its use, however clear the words may appear on 'superficial examination.'" [9]

This approach is likewise reflected in *Commodity Futures Trading Commission v. Savage*, where the U.S. Court of Appeals ruled that certain trading violations under the Commodity Exchange Act, applicable by statute to persons "registered under this Act," also covered trading advisors who should have registered but had failed to do so. "It would be anomalous, indeed," said the Court, "if an advisor could escape the fiduciary duties of [the statute] by avoiding required registration." [10]

[5] *See, e.g.* EEI and Orange & Rockland.

[6] The legislative history confirms that Congress intended the civil penalty remedy to be available for any problem covered by subsection (a) of section 31. According to the House Committee, civil penalties could be applied "for failure or refusal to comply with a subsection (a) order or any matter referenced in subsection (a) or for violations of such matters or orders." H.R. Rep. No. 99–507; 99th Congress, 2nd Sess. at 40.

Continued

Likewise, the Commission believes it would be anomalous if the operator of a jurisdictional project could escape civil penalties even in the most egregious circumstances by avoiding required licensing.

Petitioners' reading leads to the result that while the Commission's authority to investigate is broad, its authority to enforce its investigations is narrow. This reading of the statute leads to absurd results and is contrary to the legislative history. As order No. 502 found, the legislative history of section 31 indicates that Congress intended civil penalties to apply not only to holders of licenses or exemptions but also to those who are required to have a license but have failed to secure one. The civil penalties section originated in the House. When the divergent views of the House and Senate were reconciled in conference, the resulting conference report had no specific discussion of civil penalties. Rather, that conference report addressed "the principal differences between the Senate bill, the House amendment and the substitute agreement." [11] Consequently, the House Committee Report is the most authoritative legislative history as to the civil penalties provisions. The House Committee explained that the purpose of the enforcement section was to buttress and improve the Commission's capability in dealing with certain concerns. The very first concern highlighted by the House Committee Report was the problem of unlicensed hydroelectric projects, a problem the Committee described by quoting from certain testimony by Edward G. Horn, chief ecologist for the New York State Department of Environmental Conservation.

EEI argues the Commission misconstrued the legislative history. On the basis of a single reference to "grandfathered" projects near the end of a 20-line quotation that otherwise deals exclusively with unlicensed operations, EEI claims Mr. Horn's testimony was really a plea not for more enforcement remedies against unlicensed projects but for an amendment of the Act to require licenses for grandfathered projects. EEI's contention is inaccurate and also beside the point. Mr. Horn's full testimony [12] on this issue indicates he was concerned both about unlicensed projects and grandfathered projects and recommended additional enforcement powers for the Commission to deal with unlicensed operations as well as new legislation to subject grandfathered projects to Commission regulation. In terms of the legislative history of section 31, however, what is significant is not Mr. Horn's testimony, per se, but the point the Committee was making by quoting from it. The Committee italicized the portion of the quote it found most significant as follows:

> *At the present time, numerous hydroelectric stations throughout the country, particularly in the Northeast, are being operated without licenses or exemptions from licensing.* [13]

It is obvious that the Committee was using the Horn quotation to explain its concern about unlicensed jurisdictional projects, not grandfathered projects which require no license. Congress was not proposing to change the status of grandfathered projects and can hardly have intended a lawful activity to be the focus of greater enforcement effort.

EEI next argues that when the House Committee said it expected the Commission "to locate projects that are being operated without legal authority and to enforce the law" [14] it was merely exhorting the Commission to use its preexisting powers to seek compliance with the Act. Order No. 502 reads the language to imply that the new enforcement authority (*i.e.*, civil penalties) could be used to bring unlicensed jurisdictional projects into compliance. EEI's contrary contention ignores the context of the Committee's statement.

The Committee first quoted a number of concerns about enforcement that had been mentioned by Mr. Horn in his testimony (including the problem of unlicensed projects), and then concluded:

> *These concerns* * * * indicate that FERC enforcement efforts need buttressing and improvement. *That is the purpose of this section.* [15]

Therefore, the Committee clearly contemplated that the new enforcement tools of section 31 of the Act would be used to improve the Commission's enforcement efforts in dealing with the concerns that had already been identified, including the problem of unlicensed operations.

Finally, EEI advances policy arguments against imposing civil penalties on unlicensed operators. It argues that the failure to seek Commission authority may result from a good faith disagreement over difficult jurisdictional issues, and that the threat of civil penalties may unfairly prompt unlicensed operators to submit to Commission jurisdiction despite having serious doubts about that jurisdiction.

The Commission is not persuaded by EEI's policy arguments. There may indeed be circumstances in which it will be inappropriate to impose civil penalties on unlicensed operators just as there will be situations when it may be unfair to impose penalties in connection with violations by holders of a license, permit or exemption. However, the fact that civil penalties may sometimes be inappropriate is not a valid argument for exempting unlicensed operators from civil penalties in all circumstances—even, for example, where a jurisdictional determination has been made by the Commission and the project is harmful to public health, safety or the environment. This rule does not purport to decide the precise circumstances in which civil penalties will be imposed or the amount of those penalties. Such determinations will be made by the Commission in particular factual contexts and on the basis of numerous considerations, including the broad factors listed in § 385.1505 of the Commission's regulations.[16] The Commission retains ample discretion to assure fair treatment while also meeting its responsibility to protect public health, safety and the environment.

Moreover, the argument that civil penalties should never apply to unlicensed operators because their failure to seek a license may result from a disagreement with the Commission on intricate questions of jurisdiction ignores the fact that disputes about difficult legal or factual issues are hardly unqiue to unlicensed operators.[17] Allegations that a license holder has violated the terms or conditions of its license or a Commission rule or order

---

violations, the Commodity Act made it unlawful for a trading advisor "registered under this Act" to employ various fraudulent devices. Subsequently, the phrase "registered under this Act" was removed from the statute to make clear that persons required to register but failing to do so were covered. Savage argued that because he was not registered at the time of the alleged violations and because Congress had not yet changed the law, the provision did not apply to him. The court acknowledged that the subsequent deletion of the troublesome phrase might suggest that a gap existed prior to the amendment. It concluded, however, that the statute should always have been interpreted to apply to persons *required* to register and that the amendment merely clarified that interpretation.

may also give rise to difficult legal and factual questions and to assertions by the licensee that it simply has a good faith disagreement with the Commission or its staff. The Commission's experience with civil penalties under the Natural Gas Policy Act of 1978 indicates that arguments of this kind are frequently made by natural gas companies as well. Such arguments, however, do not support blanket immunity from civil penalties. A civil penalty will not be imposed until after a final determination by the Commission that the project in question is jurisdictional [18] and is being operated without legal authority, but may be assessed back to the effective date of ECPA. Unlicensed operators are provided with ample procedural opportunities to challenge any element of the alleged violation including the issue of jurisdiction.

EEI's concern that the threat of civil penalties may persuade an unlicensed operator to submit to Commission jurisdiction is really a general objection to civil penalties as a remedy, especially where, as here, Congress has fixed a maximum penalty for each day the violation continues.[19] The classic purpose of civil penalties is to encourage compliance with the law. It is therefore not surprising that civil penalties do give the Commission greater enforcement authority which should encourage greater compliance both by license holders and by those who operate as licensees. This is what Congress intended. As the Commission observed in Order No. 502, because "the stakes are now higher," persons should be more inclined to request a jurisdictional determination from the Commission before embarking on the construction or operation of a hydropower project that may be jurisdictional.

Similarly, the Commission rejects EEI's argument that while civil penalties may be imposed for violations of any rule or regulation under Part I of the Act, violations of the terms or conditions of licensees, permits and exemptions under Part I or violations of a compliance order, section 31 bars the Commission from assessing penalties for violations of Part I itself. We do not accept the artificial distinction EEI attempts to draw between the statute and regulations and licenses under the statute of orders designed to assure compliance with the statute. Violations of Part I of the Act are already embraced in the other actions specified as subjecting persons to civil penalties, and Commission rules, regulations and compliance orders cover not only the holders of a license but those who are required to have a license. In other words, any person who violates a rule or regulation issued under Part I, who violates the terms and conditions of a license, permit or exemption under Part I, or who violates an order requiring compliance with Part I, is violating Part I. The artificial character of EEI's argument is underscored by the fact that the Commission can at any time formally incorporate the statutory standards into its own regulations. Whether or not civil penalties are available as a remedy does not turn on such arid formalism.

Assessment of Civil Penalties From ECPA's Enactment Date

EEI and Georgia Power contend that the Commission should revise the civil penalties rule so that it applies only to prospective violations. They claim that they should not face penalties under a new set of rules for violations that may have occurred before the rule issued. They argue that although ECPA provided a framework within which civil penalties would be assessed, many aspects of the civil penalties rule could not be foreseen based on a reading of ECPA, and that, therefore, retroactive application of the civil penalties rule would be unjust.

ECPA provides the Commission the authority to assess civil penalties as a means to enforce the Act. Project owners were on notice from the enactment of ECPA that they might be subject to civil penalties for violations of the Act. The Commission's regulations simply established the procedures for assessing these civil penalties. The Commission explained in its notice of proposed rulemaking (NOPR) in this docket that section 31(c) is silent as to whether Congress intended to give the Commission authority to assess a civil penalty for violations of the Act occurring prior to the enactment of ECPA.[20] The Commission, therefore, proposed in § 385.1503 to apply the civil penalty provisions of section 31 of the Act prospectively, and declared that the rules would apply to conduct occurring only on or after enactment of ECPA, even if that conduct began before that date.

It is disingenuous for those subject to the requirements of the Act to claim that prior to adoption of our regulations here, they had no notice that violations of the Act could subject them to assessment of civil penalties. ECPA clearly places violators of the Act at risk for assessment of civil penalties, and those operating under the Act should have known upon its enactment that as of that date they ran the risk of being assessed civil penalties for improper conduct. Accordingly, we affirm that licensees, permittees, or exemptees are subject to assessment of civil penalties for improper conduct occurring on or after the date of enactment of ECPA. Regarding projects that should have a license or exemption but do not, civil penalties will be assessed in these situations after issuance of an order establishing Commission jurisdiction, but the liability for civil penalties will extend to improper conduct occurring on or after the date of enactment of ECPA.

Section 31(a) Compliance Order Procedures

Section 31 of the Act has four subsections. Subsection (a) affirms the Commission's authority to monitor and investigate compliance with licenses, permits and exemptions issued for hydroelectric projects. This subsection also provides the Commission authority to issue compliance orders which, if violated, provide the basis for enforcement action under subsections (b) or (c). Subsection (b) states the conditions under which the Commission may issue an order revoking a license or exemption. Subsection (c) sets forth the persons subject to a civil penalty, the conduct which may subject those persons to a civil penalty, and factors which the Commission will take into account in determining the amount of the proposed penalty. Subsection (c) also provides that no civil penalty will be assessed where revocation is ordered. Subsection (d) establishes alternative civil penalty assessment procedures.

EEI argues that the Commission should provide guidelines and procedural protections for the issuance of compliance orders pursuant to section 31(a) of the Act. It is concerned

[18] For the purposes of discussion in this order, "jurisdictional" means required to be licensed pursuant to section 23(b)(1) of the FPA, 16 U.S.C. 817(1). *See* Cooley v. FERC, 843 F.2d 1464 (D.C. Cir. 1988).

[19] Georgia Power also argues that the Commission should not assess civil penalties until there has been a final, nonappealable determination that a project is subject to the Act. Order No. 502 already concluded that the Commission would not stay its penalty orders on a generic basis, but would exercise its administrative discretion on a case-by-case basis. Order No. 502 also stated, at p. 31,221, that "the mere filing of an appeal does not free any person from liability for engaging in unlawful conduct that is subject to civil penalty."

[20] *See* Procedures for the Assessment of Civil Penalties under section 31 of the Federal Power Act, Notice of Proposed Rulemaking, 52 FR 29,216 (Aug. 6, 1987), FERC Stats. & Regs. [Proposed Regulations 1982–1987] ¶ 32,450 (Aug. 3, 1987).

BEST COPY AVAILABLE

particularly with those situations where the owner or an unlicensed project is faced with the assessment of civil penalties for not having a license, and the question of whether penalties should be assessed is one of Commission jurisdiction over the project. EEI requests the Commission to identify: (1) the factors or circumstances that may lead the Commission to issue a compliance order; (2) the Commission staff member or members with authority to issue the orders; and (3) the procedural protections that will be afforded project owners before any order is issued.

Additionally, EEI argues that if a compliance order must issue, it should be under sufficient guidelines, and with sufficient procedural protections, to ensure that the project owner gets a fair result. According to EEI, at a minimum project owners must be notified of an impending compliance order and given an opportunity to respond in writing. The Commission should also provide that it will consider the project owner's response before issuing a compliance order and that it will base its decision on the entire public record before it, including the owner's response. Upper Peninsula argues further that section 31 of the Act and its legislative history require a formal evidentiary hearing prior to issuance of a compliance order pursuant to section 31(a) of the Act.

It is unnecessary to establish regulations for issuing compliance orders pursuant to section 31(a).[21] Presently, the Office of Hydropower Licensing (OHL) initiates a compliance order proceeding by sending the project owner a letter indicating that the owner may be subject to action pursuant to section 31 of the Act. The letter identifies the problems the project owner must address and indicates that the owner must respond within a specified period of time. The owner then has the opportunity to respond to the letter in writing, setting forth reasons why the proposed action, including assertion of Commission jurisdiction over a project, should not be taken. The Director of OHL then either terminates the action or issues a compliance order pursuant to § 375.314 of the Commission's regulations. An owner's failure to comply with the compliance order will subject the owner to civil penalties under Subpart O of Part 385 of the Commission's regulations. The Commission believes these procedures will give project owners ample notice and opportunities to respond in writing prior to triggering the procedures for assessment of civil penalties.[22]

Consideration of Additional Factors

EEI argues that the Commission should revise the list of factors in § 385.1505 that it will consider when determining the amount of a proposed penalty to: (1) exclude consideration of a project owner's history of past violations, (2) exclude consideration of unknowing violations and (3) indicate that the economic benefits factor will only be considered if a project owner knowingly engaged in a violation with the goal of economic gain. EEI argues further that, at the very least, the Commission should consider only those past violations that occurred on the project owner's watch at the project in question and relevant to the violation in question. EEI contends that to consider alleged violations at projects other than the one under consideration would unfairly prejudice multiple project owners, for whom the risk of past violations is higher in proportion to the number and size of their projects.

The Commission assesses civil penalties based on a careful weighing of the seriousness of the violation and any mitigating factors that may be present. The Commission explained in Order No. 502 that in considering the nature of a present violation it will take into account the violator's compliance history. An increased penalty is necessary for a repeat violator in order to encourage compliance and to protect the environment and provide greater public safety. In contrast, a first time violator should not be penalized as severely as a repeat violator.

Next, the Commission will not adopt by generic regulation a knowing violation standard that Congress did not impose. There is no statutory requirement that a violation be a knowing one before being subject to civil penalties.

The Commission is sensitive to the fact that its enforcement actions must be fair as well as effective. Whether a violation is knowing will therefore be an important consideration in the individual proceedings that will determine what civil penalties, if any, are applied in specific factual circumstances. However, in the absence of more extensive experience with civil penalties, the Commission is not prepared to adopt on its own as a universal requirement a particular legal standard that carries with it an extensive judicial gloss and has the potential to encourage prolonged disputes that a concern for fairness may not require.

By the Commission. Commissioner Trabandt dissented with a separate statement attached.

Lois D. Cashell,

Secretary.

Trabandt, Commissioner, *Dissenting*

The majority has largely ignored the legal arguments I presented in my August 17, 1988 dissent in this proceeding as well as several persuasive legal and policy concerns contained in the petitions for rehearing, and for this reason I must again dissent.

The first six pages in my August 17th dissent discuss *current* standards of statutory construction. "Plain meaning" principles of statutory construction were also discussed in the joint petition for rehearing filed by the Edison Electric Institute, the National Hydropower Association, the American Paper Institute, and the National Rural Electric Cooperative Association (EEI Petition) at pages 7–10, as well as in the petition for rehearing filed by Orange & Rockland (O&R) at pages 6–12. Both petitions highlight the conclusion contained in my dissent that recent case law establishes current standards for statutory interpretation.

However, the majority insists on *U.S. v. American Trucking Ass'n, Inc.*, 310 U.S. 534, 543 (1940) as dispositive precedent for statutory interpretation (slip op. at 5–7) and ignores the 48 years of Supreme Court cases since *American Trucking* which have sharpened the focus on the plain meaning of the statute, in order to fulfill what the majority has determined to be one of the "purposes" of the Electric Consumers

---

[21] *See* Regulations Delegating Authority, 53 FR 16,058 at (May 5, 1988); III FERC Stats. & Regs. ¶ 30,814 at 31,119 (1988), where the Commission stated:

> The Commission is delegating to the Director [of Hydropower Licensing] the authority to require a licensee or an applicant to take actions necessary to comply with the Commission's dam safety regulations or actions that are otherwise necessary to protect human life, health, property, or the environment. This delegation would make enforcement action by the Commission more rapid and effective. (citations omitted)

Specifically, § 375.314(h) of the Commission's regulations authorizes the Director to:

> For any unlicensed or unexempted hydropower project, take the following actions.
>
> (1) Conduct investigations to ascertain the Commission's jurisdiction,
>
> (2) Make preliminary jurisdictional determinations, and
>
> (3) If a project has been preliminarily determined to require a license, issue notification of the Commission's jurisdiction; require the filing of a license application; and require that actions necessary to comply with Part 12 of this chapter or otherwise protect human life, health, property, or the environment are taken.

[22] Georgia Power complains that certain self-reporting requirements regarding license violations recently imposed in a Commission compliance letter to it are inconsistent with the notice and hearing requirements in section 31(a), with language in the preamble to the Commission's final rule and with section 6 of the Federal Power Act, which requires agreement of the licensee prior to any alteration of the license. Georgia Power mischaracterizes the letter as one requiring compliance. In fact, the letter represents only a contact with Georgia Power regarding violations of the terms of a project license that had no adverse consequences and about which no further action was deemed necessary.

VOL 53 ISS 243 DE 19 1988 UMI

Protection Act of 1986 (ECPA). In so doing, the majority is usurping the role of Congress. As O&R pointed out in its Petition at page 22, the Supreme Court cautioned that the "broad purposes" of legislation must not be invoked at the expense of the actual terms of the statute. In *Board of Governors of Federal Reserve System v. Dimension Financial Corporation*, 474 U.S. 361 (1986), the Court reasoned:

Application of 'broad purposes' of legislation at the expense of specific provisions ignores the complexity of the problems Congress is called upon to address and the dynamics of legislative action. Congress may be unanimous in its intent to stamp out some vague social or economic evil; however, because its Members may differ sharply on the means for effectuating that intent, the final language of the legislation may reflect hard fought compromises. Invocation of the 'plain purpose' of legislation at the expense of the terms of the statute itself takes no account of processes of compromise and, in the end, prevents the effectuation of congressional intent. *Id.* at 373. *See also* EEI Petition at page 15 and cases cited therein.

In addition to the legal flaws contained in the majority's order, there are factual ones as well. As discussed in my August 17th dissent (slip op. at 8–11) and in EEI's Petition (at 7–9), the majority misuses the Congressional testimony of Edward G. Horn, chief ecologist for New York State Department of Environmental Conservation, which was contained in the House Report on ECPA. As EEI's Petition points out, all of Mr. Horn's concerns apply equally to lawfully unlicensed projects and unlawfully unlicensed projects. In the instant order, the majority once again distorts the legislative history by using Mr. Horn's remarks for the proposition that Congress intended section 31(c) penalties to apply to unlicensed owners. Moreover, delving into the legislative history at the expense of the plain words of the statute treads dangerous ground as the D.C. Circuit Court recently opined in *Abourezk v. Reagan*, 785 F.2d 1043 (D.C. Cir. 1986):

[W]e think it plainly wrong as a general matter * * * to regard committee reports as drafted more meticulously and as reflecting the congressional will more accurately than the statutory text itself. Committee reports, we remind, do not embody the law. Congress, as Judge Scalia recently noted, votes on the statutory words, not on different expressions packaged in committee reports. *Hirschey v. FERC*, 777 F.2d 1, 7–8 & n.1 (D.C. Cir. 1985) (Scalia, J., concurring).

EEI's Petition also highlights other administrative civil penalty statutes and pointed out that these enactments including section 31(c), are similar in form and, because they address the same subject matter—administrative enforcement by civil penalty—should be read together to ascertain the meaning of any one (EEI Petition at 10–15). Examples cited are section 234(a) of the Atomic Energy Act of 1954, and section 11901 of the Interstate Commerce Act as extensively amended in 1978. EEI argues that there is no reason to suggest that Congress meant anything other than what it said in section 31(c) inasmuch as Congress has in other enactments taken care precisely to delimit the scope of civil penalty liabilities in terms of the entities against which penalties may be assessed. The instant rehearing order fails to address this important point.

I do not wish to diminish the genuine concern with which my colleagues view the unlicensed projects issue, though in my view at least this should not concern us as much as my colleagues seem to think. However, notwithstanding our disagreement on the gravity of the problem, it is important to note that the Commission for many years has had procedures in place to effectively deal with unlicensed projects without the use of civil penalties, another fact the majority completely ignores.

For example, in the so-called *Androscoggin* decision, *Public Service Co. of New Hampshire*, 27 F.P.C. 830 (1962), the Commission identified three principal factors to be taken into account when considering cases involving the unlicensed project issue: (1) to the extent feasible, it is the burden of a sound licensing policy to minimize the inequity of an unlicensed project owner reaping a windfall from a delay in filing for a required license; (2) the Commission's past failure, for want of funds or manpower, to enforce general compliance and the large number of projects that had operated without a license since 1935 indicated the need for a discriminating approach in order to effectively address the unlicensed project issue; and (3) in regard to termination date of a license, it was reasonable to shorten the license term to take account of significant 1943 decisions holding navigable a stream usable for log transport, and thus giving notice of the perils of further unlicensed operation to the owner of a project in such a stream. So the Commission fixed December 3, 1993—fifty years after that 1943 notice—as the termination date of the Androscoggin license.

Moreover, several years after *Androscoggin*, the D.C. Circuit Court enhanced the Commission's ability to deal effectively with the unlicensed project issue by citing with approval the *Androscoggin* decision and by expressly holding that the Commission has statutory authority to assign an effective date for licenses issued to a project owner earlier than the date of issuance of license when the project involved was one constructed or maintained without a license in violation of law. *See Niagara Mohawk Power Corporation v. FPC*, 379 F.2d 153 (D.C. Cir. 1967). This procedure could include in appropriate cases the assessment of substantial back payments of annual charges. In addition, if unlawful construction of projects is the majority's concern, the Commission has ample authority to enjoin such violation of the Act under section 314(a) of the Federal Power Act of which the Commission's enforcement staff has availed itself in recent years. Clearly, the Commission is not defenseless and instead has developed a formidable arsenal of procedural weaponry to encourage unlicensed project owners to file for licenses if required by law.

In any event, the 1986 amendments to the Federal Power Act made by the Electric Consumers Protection Act (ECPA) *do not* in any substantive way address unlicensed hydroelectric operation. Indeed, the House Report which is so enthusiastically embraced as justification for the majority's decision, refers to unlicensed operation as an "alleged problem." The House Committee Report *does not* recommend or even suggest that the Commission must or should apply civil penalties to unlicensed hydroelectric projects. Instead the House Report merely opines that it expects the Commission to locate projects that are being operated without legal authority and to enforce the law, and directs the Commission to make a "report to the Committee within six months about this *alleged problem*." (Emphasis added.) It is hard to fathom that Congress would have prescribed such a punitive measure without some specific discussion as to why it is necessary, particularly in light of the House Committee's request to obtain further information in the form of a Commission Report on the "alleged problem." I for one have never seen the report, and in any event, if Staff did send such a report, Congress has not seen fit to act or acknowledge a need for the Commission to act.

At the November 16, 1988, Commission Meeting, all of my colleagues agreed that the imposition of civil penalties of $10,000 a day with possibly retroactive effect to October 16, 1986, the date ECPA became law, is an extraordinary measure with serious due process implications. Yet, without any hard evidence that extraordinary measures are needed, the majority has adopted a flawed interpretation of section 31 of the FPA that will have the effect of chilling efforts to legitimately offer counter arguments to Commission determinations of jurisdiction. I submit that such an effect is clearly not in the public interest.

This persuades me that the more rational approach is to continue with the procedures already in place for dealing with unlicensed projects which have been effectively implemented for many years. By staying this course, we will be able to perform our responsibilities and, at the same time, abandon the strained interpretation of section 31 that will unnecessarily and illegally permit the Commission to use civil penalties as a cudgel to coerce unlicensed projects to accept Commission determinations of jurisdiction.

Charles A. Trabandt,

Commissioner.

[FR Doc. 88–29108 Filed 12–16–88; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 14

Advisory Committees

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its advisory committee regulations to provide that, when a member of the uniformed services, including a member of the Commissioned Corps of the Public Health Service, is appointed to serve on an advisory committee, he or she is not appointed as a special Government employee. Rather, the person's advisory committee duties would be regarded as part of the person's assigned functions as a member of the Commissioned Corps or other service.

EFFECTIVE DATE: December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Richard L. Schmidt, Committee Management Office (HFA–306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2765.

SUPPLEMENTARY INFORMATION: With some exceptions, existing regulations provide that persons selected to serve on FDA's advisory committees are appointed as special Government employees. In staffing its advisory committees, FDA sometimes wishes to select appropriately qualified persons who are members of the uniformed services, including the Commissioned Corps of the Public Health Service. However, an obstacle to this course of action is that members of the uniformed services may not hold dual Government appointments. Accordingly, FDA is amending its regulations to provide that, when members of the Commissioned Corp or other uniformed services serve on FDA's advisory committees, they do so as part of their assigned functions in the Federal Government or the Commissioned Corps or other service, without appointment as special Government employees.

Because this rule relates to agency management and personnel, it is exempt from the usual requirements of notice, public procedure, and delayed effective date. (See 5 U.S.C. 553(a)(2).)

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR Part 14 continues to read as follows:

Authority: 5 U.S.C. 5332 note; 15 U.S.C. 1451 et seq.; 21 U.S.C. 41 et. seq.; 141 et seq., 321–371, 467f(b), 679(b), 821, 1031 et seq.; 42 U.S.C. 201 et seq.; 257a; 21 CFR 5.10.

2. Section 14.80 is amended by revising paragraphs (a)(2) and (b)(l)(ii) to read as follows:

§ 14.80 Qualification for members of standing policy and technical advisory committees.

(a) * * *

(2) Are subject to the conflict of interest laws and regulations either as special Government employees or as members of the uniformed services, including the Commissioned Corps of the Public Health Service (the Commissioner has determined that, because members representing particular interests, e.g., a representative of labor, industry, consumers, or agriculture, are included on advisory committees specifically for the purpose of representing these interests, any financial interest covered by 18 U.S.C. 208(a) in the class which the member represents is irrelevant to the services which the Government expects from them and thus is hereby exempted under 18 U.S.C. 208(b) as too remote and inconsequential to affect the integrity of their services); and

* * * * *

(b) * * *

(l) * * *

(ii) Except for members of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC), are subject to the conflict of interest laws and regulations either as special Government employees or as members of the uniformed services, including the Commissioned Corps of the Public Health Service.

* * * * *

3. Section 14.95 is amended by revising paragraph (a) to read as follows:

§ 14.95 Compensation of advisory committee members.

(a) (1) Except as provided in paragraphs (a) (2) and (3) of this section, all voting advisory committee members shall, and nonvoting members may, be appointed as special Government employees and receive a consultant fee and be reimbursed for travel expenses, including per diem in lieu of subsistence, unless such compensation and reimbursement are waived.

(2) Members of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC) are not appointed as special Government employees. Any member of TEPRSSC who is not a Federal employee or member of the uniformed services, including the Commissioned Corps of the Public Health Service, shall receive a consultant fee and be reimbursed for travel expenses, including per diem in lieu of subsistence, unless such compensation and reimbursement are waived.

(3) Voting and nonvoting advisory committee members who are members of the uniformed services, including the Commissioned Corps of the Public Health Service, provide service on Food and Drug Administration advisory committees as part of their assigned functions, are not appointed as special government employees, but are reimbursed by the Food and Drug Administration for travel expenses.

* * * * *

Dated: December 12, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–29029 Filed 12–16–88; 8:45 am]

BILLING CODE 4160–01–M

---

21 CFR Part 14

Advisory Committees; Establishment and Termination

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is announcing the establishment of the Dental Products Panel and the termination of the Dental Devices Panel. This document revises the agency's list of standing advisory committees to show these actions.

EFFECTIVE DATE: December 19, 1988.

Authority for the Panel will remain in effect until amended or terminated by the Commissioner of Food and Drugs.

FOR FURTHER INFORMATION CONTACT: Richard L. Schmidt, Committee Management Office (HFA–306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2765.

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463 and 21 CFR 14.40(b)), FDA announces the establishment of the Dental Products Panel (the Panel). The Panel will review and evaluate available data concerning the safety and effectiveness of dental devices currently in use and advise the Commissioner of Food and Drugs (the Commissioner) regarding recommended classification of these devices into one of three regulatory categories: Class I (general controls), class II (performance standards), or class III (premarket approval); recommend the assignment of a priority for the application of

regulatory requirements for devices classified in the standards or premarket approval category, advise on any possible risks to health associated with the use of devices; advise on formulation of product development protocols and review premarket approval applications for those devices classified in the premarket approval category; review classification as appropriate; recommend exemptions to certain devices from the application of portions of the Federal Food, Drug, and Cosmetic Act; advise on the necessity to ban a device; and respond to requests from the agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices.

The Panel also will function at times as an over-the-counter (OTC) drug advisory panel. As such, the Panel will review and evaluate data concerning the safety and effectiveness of active ingredients, and combinations thereof, of various currently marketed nonprescription drug products for human use and the adequacy of their labeling, and will advise the Commissioner on the promulgation of monographs establishing conditions under which these drugs are generally recognized as safe and effective and not misbranded. The Panel will evaluate data and make recommendations concerning the approval of new drug products for human use and whether various prescription drug products should be changed to OTC status.

Because this is a technical amendment to Part 14, the Commissioner finds under 21 CFR 10.40(c), (d), and (e) that notice, public procedure, and delayed effective date are unnecessary and contrary to the public interest.

Concurrently with the establishment of this Panel, the Commissioner terminated the Dental Devices Panel.

List of Subjects in 21 CFR Part 14

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 14 is amended as follows:

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

1. The authority citation for 21 CFR Part 14 continues to read as follows:

Authority: 5 U.S.C. 5332 note; 15 U.S.C. 1451 et seq.; 21 U.S.C. 41 et. seq.; 141 et seq., 321–371, 467f(b), 679(b), 821, 1031 et seq.; 42 U.S.C. 201 et seq.; 257a; 21 CFR 5.10.

2. Section 14.100 is amended by revising paragraph (d)(1)(iv) to read as follows:

§ 14.100 List of standing advisory committees.

* * * * *

(d) * * *

(1) * * *

(iv) *Dental Products Panel.* (*a*) Established March 5, 1988.

(*b*) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation. Reviews and evaluates data concerning the safety and effectiveness of over-the-counter (OTC) drug products for human use and makes appropriate recommendations to the Commissioner.

* * * * *

Dated: December 13, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

21 CFR Part 176

[Docket No. 85F–0427]

Indirect Food Additives: Paper and Paperboard Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of the copolymer of acrylic acid and 2-acrylamido-2-Methylpropanesulfonic acid, including its ammonium/alkali metal mixed salts, as a scale inhibitor in the manufacture of paper and paperboard intended for use in contact with food. This action responds to a petition filed by Calgon Corp.

DATES: Effective December 19, 1988; written objections and requests for a hearing by January 18, 1989.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of October 17, 1985 (50 FR 42095), FDA announced that a petition (FAP 5B3886) had been filed by Calgon Corp., Pittsburgh, PA 15230, proposing that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended to provide for the safe use of the copolymer of acrylic acid and 2-acrylamido-2-methylpropanesulfonic acid as a scale inhibitor in the manufacture of paper and paperboard in contact with food. Subsequently, in a notice published in the **Federal Register** of August 19, 1986 (51 FR 29612), FDA announced that the filing of the petition by Calgon Corp. had been amended to include the use of ammonium/alkali metal mixed salts of the copolymer in addition to the acid form of the copolymer.

FDA has reviewed the safety of both the additive and the starting materials used to manufacture the additive as well as the byproducts associated with the manufacturing process. Although the additive itself has not been found to cause cancer, it has been found to contain minute amounts of unreacted acrylonitrile monomer (a carcinogenic reactant used in the manufacture of the additive). Residual amounts of reactants and manufacturing aids, such as acrylonitrile monomer, are commonly found as contaminants in chemical products including food additives.

I. Determination of Safety

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless a fair evaluation of the data available to FDA establishes that the additive is safe for that use. The concept of safety embodied in the Food Additives Amendment of 1958 is explained in the legislative history of the provision: "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstance." (H. Rept. 2284, 85th Cong., 2d Sess. 4 (1958).) This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The anticancer or Delaney clause of the Food Additives Amendment (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A)) provides further that no food additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to approve a use of an additive that contained or was suspected of

containing even minor amounts of a carcinogenic chemical, even though the additive as a whole had not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of additives that contain carcinogenic chemicals but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the **Federal Register** of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though it contains a carcinogenic impurity. Since that decision, FDA has approved the use of other color additives and food additives on the same basis.

An additive that has not been shown to cause cancer, but that contains a carcinogenic impurity, may properly be evaluated under the general safety clause of the statute using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott* v. *FDA*, 728 F.2d 322 (6th Cir. 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which contains a carcinogenic chemical but has itself not been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the U.S. Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

II. Safety of Petitioned Use

The agency calculated the estimated daily intake of the copolymer of acrylic acid and 2-acrylamido-2-methyl-propanesulfonic acid, including its ammonium/alkali metal mixed salts, based on several factors, including the migration of the additive under the most severe intended use conditions and the probable concentration of the additive in the daily diet from food-contact articles. The agency estimated the daily intake of the additive to be less than 15 micrograms per person per day.

FDA does not ordinarily consider chronic testing to be necessary to determine the safety of an additive whose use will result in such low exposure levels (Refs. 1 and 2), and the agency has not required such testing in this case. However, the agency has reviewed available data from acute toxicity studies on the additive. No adverse effects were reported in these studies.

Because the additive, which may contain acrylonitrile monomer, has not been shown to cause cancer, the anticancer clause does not apply to it. However, FDA has evaluated the safety of this additive under the general safety clause, considering all available data and using risk assessment procedures to estimate the upper bound limit of risk presented by the carcinogenic chemical that may be present as an impurity in the additive. Based on this evaluation, the agency has concluded that the additive is safe under the proposed conditions of use.

The risk assessment procedures that FDA used in this evaluation are similar to the methods that the agency has used to examine the risk associated with the presence of minor carcinogenic impurities in various other food and color additives that contain carcinogenic impurities (49 FR 13018; April 2, 1984). The risk evaluation of the carcinogenic impurities has two aspects: (1) Assessment of the worst case exposure to the impurity from the proposed use of the additive, and (2) extrapolation of the risk observed in the animal bioassays to the conditions of probable exposure to humans.

A. Acrylonitrile Monomer

Based on the fraction of the daily diet that may be in contact with surfaces containing the copolymer of acrylic acid and 2-acrylamido-2-methyl-propanesulfonic acid, including its ammonium/alkali metal mixed salts, and on the level of acrylonitrile monomer that may be present in the additive, FDA estimated the hypothetical worst case exposure to acrylonitrile monomer from this use of the additive as a scale inhibitor in the manufacture of paper and paperboard to be 15 nanograms per person per day (Ref. 3). The agency used data from two carcinogenicity studies on acrylonitrile monomer fed to rats to estimate the upper bound limit of lifetime human risk from this chemical stemming from the proposed use of the additive (Ref. 4). The results of the bioassays on acrylonitrile monomer showed that the material was carcinogenic for rats under the conditions of the studies. The test material caused significantly increased incidence of carcinogenic tumors at many tissue sites.

The Center for Food Safety and Applied Nutrition's Cancer Assessment Committee reviewed these bioassays and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on acrylonitrile monomer. The committee further concluded that an estimate of the upper bound level of human risk from potential exposure to acrylonitrile monomer stemming from the proposed use of the additive could be calculated from the bioassays.

The agency used a quantitative risk assessment procedure (linear proportional model) to extrapolate from the dose used in the animal experiments to the very low doses encountered under the proposed conditions of use. This procedure is not likely to underestimate the actual risk from very low doses and may, in fact, exaggerate it because the extrapolation models used are designed to estimate the maximum risk consistent with the data. For this reason, the estimate can be used with confidence to determine to a reasonable certainty whether any harm will result from the proposed conditions and levels of use of the food additive.

Based on a worst case exposure of 15 nanograms per person per day, FDA estimates that the upper bound limit of individual lifetime risk from the potential exposure to acrylonitrile monomer from the use of the subject additive is 3×10^{-8} or less than 3 in one hundred million (Ref. 5). Because of numerous conservatisms in the exposure estimate, lifetime averaged individual exposure to this impurity is expected to be substantially less than the estimated daily intake, and, therefore, the calculated upper bound limit of risk would be less. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to acrylonitrile monomer that might result from the proposed use of the additive.

B. Need for Specifications

The agency has also considered whether specifications are necessary to control the amount of acrylonitrile monomer that may be present in the additive. The agency finds that a specification is not necessary for the following reasons: (1) Because of the low level at which acrylonitrile monomer may be expected to remain as an impurity following production of the additive, the agency would not expect the impurity to become a component of food at other than an extremely low level, and (2) the upper bound limit of lifetime risk from exposure to acrylonitrile monomer, even under worst

case assumptions, is very low, less than 3 in 100 million.

C. Conclusion on Safety

FDA has evaluated the data in the petition and other relevant material and concludes that the proposed food additive use is safe and effective, and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

III. References

The following references have been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

IV. Objections

Any person who will be adversely affected by this regulation may at any time on or before January 18, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulations to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 176.170 is amended in paragraph (a)(5) by alphabetically adding a new entry in the table to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

BILLING CODE 4160–01–M

NEIGHBORHOOD REINVESTMENT CORPORATION

24 CFR Part 4100

Organization and Channeling of Functions

AGENCY: Neighborhood Reinvestment Corporation.

ACTION: Final rule.

SUMMARY: Pursuant to the Freedom of Information Act (FOIA), the Corporation may impose search and duplication fees in response to FOIA requests. This final rule amends the Corporation's rules on fees and fee waivers so that (1) the fees will reflect more accurately the Corporation's direct (actual) costs of providing the services and (2) the fees will conform with the Freedom of Information Act of 1986.

DATE: January 18, 1989.

FOR FURTHER INFORMATION CONTACT: Bonnie Nance Frazier, Director of Communications, Neighborhood Reinvestment Corporation, 1325 G Street, NW., Suite 800, Washington, DC 20005, telephone (202) 376–3224.

SUPPLEMENTARY INFORMATION:

A. Background

The Corporation's existing Freedom of Information Act fee regulations appear at 24 CFR 4100.4(d). They provide in essence, that fees will be charged for

FOIA services at a rate of $10.00 per hour for searching and $.10 per page for copying. The regulations also provide that such fees may be waived or reduced when the Executive Director determines such a waiver or reduction "is in the public interest because furnishing the information can be considered as primarily benefiting the general public." When the charge will total less than $3.00, the fee may be waived.

The Corporation now wishes to amend its FOIA fee regulations pursuant to the Freedom of Information Reform Act.

B. Discussion

The Corporation received one public comment on its proposed FOIA fee amendments. This comment, from The Reporters Committee for Freedom of the Press, raised four issues.

First, the commentator questioned the appropriateness of the definition of "news" contained in § 4100.4(d)(1)(iii) of the proposed regulations, suggesting that it would require the Corporation to determine what information is "about current events" or is "of current interest to the public." This was not the intention of the Corporation and it therefore amends the definition of representative of the news media to refer to any person actively gathering "information for an entity that is organized and operated to publish or broadcast news to the public" and deletes the definition of "news" from the regulation.

Second, the commentator objected to the factors that may be considered by the Corporation when reviewing requests for fee waivers or reduction of fees outlined in § 4100.4(d)(8) of the proposed regulations, commenting that these factors reflect the guidance of the Department of Justice and are in conflict with the legislative history of the Reform Act. In this instance, the Corporation believes that the factors listed are not necessary and therefore deletes them.

Third, the commentator objected to the provision permitting the Corporation to require advance payment of estimated charges in certain situations, suggesting that this will interfere with the Corporation's prompt provision of information and the media's timely dissemination of information. In response, the Corporation has further limited the instances in which an advance payment may be required.

Finally, in response to the commentator's objection to the proposed duplication charge of $.30 per page for paper photocopies of existing paper records, the Corporation has reviewed its direct cost calculations and amends § 4100.4(d)(9)(iv)(A) to reflect a new figure of $.10 per page.

List of Subjects in 24 CFR Part 4100

Organization and channeling of functions, Freedom of Information.

Carol J. McCabe,

Secretary.

The Neighborhood Reinvestment Corporation hereby amends Part 4100, Chapter 25 of Title 24, Code of Federal Regulations, as set forth below:

PART 4100—ORGANIZATION AND CHANNELING OF FUNCTIONS

1. The authority citation for Part 4100 is revised to read as follows:

Authority: Title VI, Pub. L. 95–557, 92 Stat. 2115 (42 U.S.C. 8101 *et seq.*); as amended by sec. 315, Pub. L. 96–399, 94 Stat. 1645; sec. 710, Pub. L. 97–320, 96 Stat. 1544; and sec. 520, Pub. L. 100–242, 101 Stat. 1815.

§ 4100.4 Inquiries.

2. In § 4100.4, paragraph (a) is amended to change the Corporation's address from "1850 K Street NW., Suite 400, Washington, DC 20006" to "1325 G Street NW., Suite 800, Washington, DC 20005".

3. In § 4100.4, paragraph (c)(1) is amended to remove the last sentence.

4. In § 4100.4, paragraph (d) is revised to read as follows:

(d) *Fees for providing copies for records.* Fees shall be assessed pursuant to the Freedom of Information Act (5 U.S.C. 552) in order to recover the full allowable direct costs of providing copies of records. For purposes of this section, the term "direct costs" means those expenditures which the Corporation actually incurs in searching for and duplicating (and in the case of commercial use requesters, reviewing) documents to respond to a Freedom of Information Act ("FOIA") request. Direct costs include, for example, the salaries of the employees performing the work (the basic rate of pay plus 16 percent of that rate to cover benefits) and the cost of operating duplicating equipment. The term "search" includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches may be done manually or by computer using existing programming. The term "duplication" refers to the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of paper copy, microfilm, audiovisual materials, or machine readable documentation (e.g., magnetic tape or disk), among others. The term "review" refers to the process of examining documents located in response to a commercial use request to determine whether any portion of any document is permitted to be withheld. It also includes processing any documents for disclosure, e.g., doing all that is necessary to exise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions. A schedule based on these principles is set forth in paragraph (d)(9) of this section.

(1) *Categories of requesters.* Fees will be assessed according to the category of the requester. There are four categories:

(i) *Commercial use requesters.* For purposes of this section, the term "commercial use request" refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, the Corporation will look to the use to which the requester will put the documents requested. If the use is not clear from the request itself, or if there is reasonable cause to doubt the requester's stated use, the Corporation shall seek additional clarification before assigning the request to a specific category.

(ii) *Educational and noncommercial scientific institution requesters.* For purposes of this section, the term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education, which operates a program or programs of scholarly research. The term "noncommercial scientific institution" refers to an institution that is not operated on a "commercial" basis, as that term is used in paragraph (d)(1)(i) of this section, and which is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. To be eligible for inclusion in this category, requesters must show that the request is made as authorized by and under the auspices of a qualifying institution, and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a noncommercial scientific institution) research.

(iii) *Requesters who are representatives of the news media.* For purposes of this section, the term

"representative of the news media" refers to any person actively gathering information for an entity that is organized and operated to publish or broadcast news to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. In the case of "freelance" journalists, they may be regarded as working for a news organization if they demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but the Corporation may also look at the past publication record of a requester in making this determination. To be eligible for inclusion in this category, a requester must meet the criteria above, and his or her request must not be made for a commerical use. In reference to this class of requester, a request for records supporting the news dissemination function of the requester shall not be considered to be a request that is for a commercial use.

(iv) *All other requesters.*

(2) *Limitations on fees to be charged*— (i) *Commercial use requesters.* Commercial use requesters shall be assessed the full direct costs for searching for, reviewing, and duplicating records, in accordance with the fee schedule at paragraph (d)(9) of this section. Commercial use requesters are not entitled to the free search time or free pages of duplication provided to other categories of requesters.

(ii) *Educational and noncommercial scientific institution requesters.* Requesters in this category may be assessed fees only for duplication of records in excess of the first 100 pages. Requesters in this category may not be assessed fees for search or review.

(iii) *Requesters who are representatives of the news media.* Requesters in this category may be assessed fees only for duplication of records in excess of the first 100 pages. Requesters in this category may not be assessed fees for research or review.

(iv) *All other requesters.* Requesters who do not fit into any of the categories above shall be assessed fees only for searching and duplicating records, except that the first 100 pages of duplication and the first two hours of search time shall be furnished without charge. Requesters in this category may not be assessed fees for review.

(v) *Review of records.* Charges will be assessed only for the initial review of the located documents and not for time spent at the administrative appeal level on an exemption applied at the initial determination level. However, where records or portions of records are withheld in full under an exemption which is subsequently determined not to apply, and these records are reviewed again to determine the applicability of other exemptions not previously considered, charges for review are properly assessable.

(vi) *Additional Copies.* The Corporation will normally furnish only one copy of any record. The allowance of 100 free pages of duplication under paragraphs (d)(2) (ii), (iii), and (iv) of this section shall not apply to additional copies furnished at the request of the record requester. Full duplication fees shall be assessed for each page of each such additional copy.

(3) *Charges for unsuccessful search.* Where applicable under paragraph (d)(2) of this section search fees may be assessed for time spent searching, even if the Corporation fails to locate the records or if records located are determined to be exempt from disclosure.

(4) *Notice of anticipated fees in excess of $25.00.* Unless the person making the request states in his or her initial request that he or she will pay all costs regardless of amount, the Corporation will notify him or her as soon as possible if there is reason to believe that the cost for obtaining access to and/or copies of such records will exceed $25. If such notice is given, the time limitations contained in the Freedom of Information Act shall not commence until the person making the intitial request agrees in writing to pay such cost.

(5) *Advance Payments.* The Communications Director is authorized to require an advance payment of an amount up to the full estimated charges whenever he or she determines that:

(i) The allowable charges that a requester may be required to pay are likely to exceed $250 and the requester has no history of payment and cannot provide satisfactory assurance that payment will be made; or

(ii) A requester has previously failed to pay a fee charged in a timely manner.

If such a payment is required, the time limitations contained in the Freedom of Information Act shall not commence until payment is made.

(6) *Charging Interest.* The Corporation will assess interest charges on any unpaid fees starting on the 31st day following the day on which the billing for fees was sent to the requester. Interest will be at the rate prescribed in 31 U.S.C. 3717 and will accrue from the date of the billing. Receipt of the fee by the Corporation, even if not processed, will stay the accrual of interest. Interest is not chargeable for unpaid advance payments under paragraph (d)(5) of this section.

(7) *Aggregating requests.* A requester may not file multiple requests at the same time, each seeking portions of the document or documents, solely in order to avoid payment of fees. When the Corporation reasonably believes that a requester, or a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, the Corporation may aggregate any such requests and charge accordingly.

(8) *Waiver or reduction of fee.* The Corporation will furnish documents without charge or at a reduced charge when it is determined that disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Corporation and is not primarily in the commercial interest of the requester. In making a request for a waiver or reduction of fees, a requester should include a clear statement of his or her interest in the requested documents: The proposed use for the documents and whether the requester will derive income or other benefit from such use; and a statement of how the public will benefit from such use. Determinations concerning waiver or reduction of fees shall be made by the Executive Director, or his or her designee.

(9) *Schedule of fees.* Fees for searching for, reviewing, duplicating, and providing records and information of the Corporation under this section will be assessed in accordance with the following schedule:

(i) *Manual search.* For each quarter hour or fraction thereof: $3.37.

(ii) *Computer search.* For each quarter hour or fraction thereof: $3.37.

(iii) *Review.* For each quarter hour or fraction thereof: $4.87.

(iv) *Duplication.*

(A) For a paper photocopy of an existing paper record, $.10 per page.

(B) For duplication of records other than existing paper records (such as computer-stored information, audio or video tapes, microfiche or microfilm), the fee shall equal the actual direct cost of production and duplication of the records or information in a form that is reasonably usable by the requester.

(10) *Processing Costs.* The Communications Director will waive payment in instances in which the costs of routine collection and processing of the fee are likely to equal or exceed the amount of the fee.

BILLING CODE 7570–01–M

VETERANS ADMINISTRATION

38 CFR Part 4

Addition of Metric Measurements to the Table of Ratings of Central Visual Acuity Impairment

AGENCY: Veterans Administration.

ACTION: Technical amendment.

SUMMARY: On October 2, 1978, the Veterans Administration (VA) published a final rule in the **Federal Register** on pages 45348 through 45362. Part of the rule added metric measurements to the Table for Ratings of Central Visual Acuity Impairment. In Table V, the VA neglected to include the percentage "30" in the block in which vision measured as 20/70 (6/21) in each eye intersects. That error is hereby corrected.

EFFECTIVE DATE: September 22, 1978.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233–3005.

SUPPLEMENTARY INFORMATION:

38 CFR Part 4 is amended as set forth below:

PART 4—[AMENDED]

1. The authority citation for Part 4 continues to read as follows:

Authority: 72 Stat. 1125; 38 U.S.C. 355.

§ 4.84a [Amended]

2. Table V of § 4.84a is amended by adding the percentage "30" in the block in which vision measured as 20/70 (6/21) in each eye intersects.

Dated: December 12, 1988.

C.G. Verenes,

Acting Chief, Directives Management Division.

BILLING CODE 8320–01–M

38 CFR Part 21

Extension of Independent Living Services Program

AGENCY: Veterans Administration.

ACTION: Final regulatory amendments.

SUMMARY: These final amendments change vocational rehabilitation regulations governing the provision of programs of independent living services. The Omnibus Veterans' Benefits Improvement and Health Care Authorization Act of 1986 extended the period during which programs of independent living services may be furnished eligible veterans under the vocational rehabilitation program through September 30, 1989. The final regulatory amendments implement the changes contained in the law and make other related changes designed to improve administration of these services.

EFFECTIVE DATES: These amendments are effective October 28, 1986, except for the changes contained in §§ 21.162(c) and 21.294(b). Those changes are effective December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Morris Triestman, Rehabilitation Consultant, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–2886.

SUPPLEMENTARY INFORMATION: At pages 9125 through 9128 of the **Federal Register** of March 21, 1988, the Veterans Administration (VA) published proposed regulations implementing provisions of the Omnibus Veterans' Improvement and Health Care Authorization Act of 1986 and to make related changes in rules governing the program of independent living services. Interested persons were given 30 days in which to submit their comments, suggestions, or objections to the proposed regulatory amendments. We received one comment. The commenter suggested that the program could be improved if the law (38 U.S.C. 1520) was amended to allow utilization of for-profit facilities to provide the entire program of independent living services to veterans the VA had determined to be in need of such a program.

Under the law, programs of independent living services may only be furnished by public or private not-for-profit agencies. The commenter indicated he realized that his suggestion was probably beyond the scope of suggestions which could be considered, but he wished to draw attention to the issue. The commenter is correct in his assumption that recommendations for changes in these statutory provisions cannot be made within the context of considering suggestions or objections to these regulations. Several editorial and technical changes were made to the text. Neither of the changes made are of such a nature as to significantly amend the substance of the original proposal and republication of the final regulations for comment is not necessary. Therefore, these rules are adopted.

The regulations contained herein will better acquaint eligible veterans, vocational training and rehabilitation facilities, and the public at large with the way these provisions will be implemented.

These final regulatory amendments are retroactively effective, except for §§ 21.162(c) and 21.294(b), which are effective upon the date of publication. These are interpretative rules which, with the exception of §§ 21.162(c) and 21.294(b), implement certain provisions of Pub. L. 99–576. Moreover, the VA finds that good cause exists for making these rules, like the sections of law which they implement, retroactively effective to the date of enactment. A delayed effective date would be contrary to statutory design; would complicate implementation of these provisions of law; and might result in denial of a benefit to a veteran who is entitled by law to that benefit.

These final amendments do not meet the criteria for major rules as contained in Executive Order 12291, Federal Regulation. The final amendments will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have any other significant effects on the economy. The final regulatory amendments which enable the VA to utilize private, for-profit agencies to provide independent living services as a part of a vocational rehabilitation program will only affect the few agencies providing these services and will not have any significant effect on small businesses. Other changes only concern the eligibility and participation of individual veterans in this program.

The Administrator certifies that these final amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these final rules are therefore exempt from the initial and final regulatory analyses requirements of sections 603 and 604.

The Catalog of Federal Domestic Assistance Number is 64.116.

VOL 53 ISS 243 DE 19 1988 UMI

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs, Loan program, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: November 25, 1988.

Thomas K. Turnage,

Administrator.

38 CFR Part 21, VOCATIONAL REHABILITATION AND EDUCATION, is proposed to be amended as follows:

PART 21—[AMENDED]

1. In § 21.35, paragraphs (f)(2), (h), (i)(1)(i), and the authority citation following paragraph (i) are revised to read as follows:

§ 21.35 Definitions.

* * * * *

(f) * * *

(2) A program of independent living services and assistance (see paragraph (d) of this section) for a veteran for whom a vocational goal has been determined not to be currently reasonably feasible; or

(Authority: 38 U.S.C. 1501(6); Pub. L. 99–576)

* * * * *

(h) *Vocational goal.* (1) The term "vocational goal" means a gainful employment status consistent with a veteran's abilities, aptitudes, and interests;

(2) The term "achievement of a vocational goal is reasonably feasible" means the effects of the veteran's disability (service and nonservice-connected), when considered in relation to the veteran's circumstances does not prevent the veteran from successfully pursuing a vocational rehabilitation program and becoming gainfully employed in an occupation consistent with the veteran's abilities, aptitudes, and interests;

(3) The term "achievement of a vocational goal is not currently reasonably feasible" means the effects of the veteran's disability (service and nonservice-connected), when considered in relation to the veteran's circumstances at the time of the determination:

(i) Prevent the veteran from successfully achieving a vocational goal at that time; or

(ii) Are expected to worsen within the period needed to achieve a vocational goal and which would, therefore, make achievement not reasonably feasible.

(Authority: 38 U.S.C. 1501(8), 1501(9)(A)(i), Pub. L. 99–576)

(i) * * *

(1) * * *

(i) In the case of a veteran for whom the achievement of a vocational goal has not been found to be currently infeasible, such services include:

* * * * *

(Authority: 38 U.S.C. 1501(9); Pub. L. 99–576)

2. In § 21.45 paragraph (a) and the authority citation for the section are revised to read as follows:

§ 21.45 Extension beyond basic period of eligibility for a program of independent living services.

* * * * *

(a) The veteran's medical condition (service and non-service-connected disabilities) is so severe that achievement of a vocational goal is not currently reasonably feasible, or

* * * * *

(Authority: 38 U.S.C. 1503(d); Pub. L. (99–576)

3. In § 21.50 paragraph (b)(5) and the authority citation which follows paragraph (b)(9) are revised to read as follows:

§ 21.50 Initial evaluation.

* * * * *

(b) * * *

(5) Determine as expeditiously as possible, without extended evaluation, whether achievement of a vocational goal is currently reasonably feasible.

* * * * *

(9) * * *

(Authority: 38 U.S.C. 220, 1506(d), 1516; Pub. L. 99–576)

* * * * *

4. In § 21.53 paragraphs (e) and (f) are revised to read as follows:

§ 21.53 Reasonable feasibility of achieving a vocational goal.

* * * * *

(e) *Criteria for reasonable feasibility not met.* (1) When the VA finds that the provisions of paragraph (d) of this section are not met, but the VA has not determined that achievement of a vocational goal is not currently reasonably feasible, the VA shall provide the rehabilitation services contained in § 21.35(i)(1)(i) of this Part as appropriate;

(2) A finding that achievement of a vocational goal is not currently reasonably feasible without providing the services contained in § 21.35(i)(1)(i) of this Part requires:

(i) Consultation with the Vocational Rehabilitation Panel; and

(ii) Compelling evidence which establishes that achievement of a vocational goal is not currently reasonably feasible beyond any reasonable doubt.

(Authority: 38 U.S.C. 1506(b), Pub. L. 99–576)

(f) *Responsible staff.* A counseling psychologist in the Vocational Rehabilitation and Counseling Division shall determine whether achievement of a vocational goal is:

(1) Reasonably feasible; or

(2) Not currently reasonably feasible under the provisions of paragraph (e) of this section for the purpose of determining present eligibility to receive a program of independent living services.

(Authority: 38 U.S.C. 1506(b), Pub. L. 99–576)

5. In § 21.57 paragraphs (a) and (c) are revised to read as follows:

§ 21.57 Extended evaluation.

(a) *Purpose.* The purpose of an extended evaluation for a veteran with a serious employment handicap is to determine the current feasibility of the veteran achieving a vocational goal, when this decision reasonably cannot be made on the basis of information developed during the initial evaluation.

(Authority: 38 U.S.C. 1506(c), Pub. L. 99–576)

* * * * *

(c) *Determination.* The determination of the current reasonable feasibility of a vocational goal will be made at the earliest time possible during an extended evaluation, but no later than the end of the period of evaluation or an extension of that period. Any reasonable doubt as to feasibility will be resolved in the veteran's favor.

(1) When a vocational goal is currently reasonably feasible, an Individualized Written Rehabilitation Plan (IWRP) will be developed as indicated in § 21.84 of this Part.

(2) When a vocational goal is not currently reasonably feasible, information developed in the evaluation will be the basis for recommendations and referral to the Vocational Rehabilitation Panel. The panel will consider the case under provisions of § 21.62(b) of this Part.

(Authority: 38 U.S.C. 1506(d), Pub. L. 99–576)

6. In § 21.62 paragraph (b)(3) and the authority citation following it are revised to read as follows:

§ 21.62 Duties of the Vocational Rehabilitation Panel.

* * * * *

(b) * * *

(3) *Rehabilitation not currently reasonably feasible.* The panel will review each finding by VR&C staff that a rehabilitation program is not currently reasonably feasible, if the panel has not previously participated in consideration of the case. This includes:

(i) A finding that vocational rehabilitation is not currently reasonably feasible; or

(ii) A finding that a program of independent living services is not currently reasonably feasible because:

(A) The veteran's level of independence cannot be measurably improved; or

(B) Such a program is medically contraindicated at this time.

(Authority: 38 U.S.C. 1506(a), Pub. L. 99–576)

* * * * *

7. In § 21.70 paragraph (b)(1)(i) and the authority citation at the end of paragraph (b) are revised to read as follows:

§ 21.70 Vocational rehabilitation.

* * * * *

(b) * * *

(1) * * *

(i) In the case of a veteran for whom the achievement of a vocational goal has not been found to be currently infeasible such needed services include:

* * * * *

(Authority: 38 U.S.C. 1501(9); Pub. L. 99–576)

* * * * *

8. In § 21.74 paragraphs (a), (c)(2), (c)(3) and the authority citation at the end of paragraph (c) are revised to read as follows:

§ 21.74 Extended evaluation.

(a) *General.* An extended evaluation may be authorized for the period necessary to determine whether the attainment of a vocational goal is currently reasonably feasible for the veteran. The services which may be provided during the period of extended evaluation are listed in § 21.57(b) of this part.

(Authority: 38 U.S.C. 1506(a); Pub. L. 99–576)

* * * * *

(c) * * *

(2) An additional period of extended evaluation of up to 6 months may be approved by the counseling psychologist, if there is a reasonable certainty that the current feasibility of achieving a vocational goal can be determined during the additional period. The counseling psychologist will obtain technical assistance from the Vocational Rehabilitation Panel in each veteran's case before granting an extension of a period of extended evaluation.

(3) An extension beyond a total period of 18 months for additional periods of up to 6 months each may only be approved by the counseling psychologist if there is a substantial certainty that a determination of current feasibility may be made within this extended period. The concurrence of the Director, Vocational Rehabilitation and Education Service is also required for this extension.

(Authority: 38 U.S.C. 1505(a), 1506(b); Pub. L. 99–576)

9. Section 21.86 is revised to read as follows:

§ 21.86 Individualized extended evaluation plan.

(a) *Purpose.* The purpose of an IEEP is to identify the services needed for the VA to determine the veteran's current ability to achieve a vocational goal when this cannot reasonably be determined during the initial evaluation.

(Authority: 38 U.S.C. 1507; Pub. L. 99–576)

(b) *Elements of the plan.* An IEEP shall include the same elements as an IWRP except that:

(1) The long range goal shall be to determine achievement of a vocational goal is currently reasonably feasible;

(2) The intermediate objectives relate to problems of questions which must be resolved for the VA to determine the current reasonable feasibility of achieving a vocational goal.

(Authority: 38 U.S.C. 1507(a); Pub. L. 99–576)

10. In § 21.90 paragraph (a) is revised to read as follows:

§ 21.90 Individualized independent living plan.

(a) *Purpose.* The purpose of the IILP is to identify the steps through which a veteran, whose disabilities are so severe that a vocational goal is not currently reasonably feasible, can become more independent in daily living within the family and community.

(Authority: 38 U.S.C. 1509; Pub. L. 99–576)

* * * * *

11. In § 21.160 paragraphs (c)(2) and (c)(4) and the authority citation following paragraph (c) are revised to read as follows:

§ 21.160 Independent living services.

* * * * *

(c) * * *

(2) As part of an extended evaluation to determine the current reasonable feasibility of achieving a vocational goal;

* * * * *

(4) As a program of rehabilitation services for eligible veterans for whom achievement of a vocational goal is not currently reasonably feasible. This program of rehabilitation services may be furnished to help the veteran:

(i) Function more independently in the family and community without the assistance of others or a reduced level of the assistance of others;

(ii) Become reasonably feasible for a vocational rehabilitation program; or

(iii) Become reasonably feasible for extended evaluation.

(Authority: 38 U.S.C. 1504(a)(15); Pub. L. 99–576)

* * * * *

12. In § 21.162, paragraph (b)(1) is removed and paragraphs (b)(2), (b)(3), (b)(4), and (b)(5) are redesignated paragraphs (b)(1), (b)(2), (b)(3) and (b)(4) respectively; paragraph (a), the heading and introductory text of paragraph (b), paragraphs (b)(2), and paragraph (c) are revised to read as follows:

§ 21.162 Participation in a program of independent living services.

(a) *Approval of a program of independent living services.* A program of independent living services and assistance is approved when:

(1) The VA determines that achievement of a vocational goal is not currently reasonably feasible;

(2) The VA determines that the veteran's independence in daily living can be improved, and the gains made can reasonably be expected to continue following completion of the program;

(3) All steps required by §§ 21.90 and 21.92 of this Part for the development and preparation of an Individualized Independent Living Plan (IILP) have been completed; and

(4) The Vocational Rehabilitation and Counseling Officer concurs in the IILP.

(Authority: 38 U.S.C. 1509, 1520, Pub. L. 99–576)

(b) *Special considerations affecting the Director, Vocational Rehabilitation and Education Service.* The Director, Vocational Rehabilitation and Education Service, shall consider the following factors in administering the program of independent living services:

* * * * *

(2) To the maximum extent feasible, a substantial portion of veterans provided with programs of independent living services and assistance shall be receiving long-term care in VA medical centers and nursing homes;

* * * * *

(c) *Limitations.* (1) A program of independent living services and assistance may not be approved after September 30, 1989. Programs authorized prior to that date may be continued until completion or other termination;

(2) Any contract for services initiated before September 30, 1989, may be continued in effect for the purpose of providing necessary services and assistance;

(3) The limitations on provision of independent living services by for-profit agencies and facilities to veterans for whom such services constitute the

whole of a program are not applicable to veterans being provided independent living services as a part of a rehabilitation program during periods identified in § 21.160 (c)(1), (c)(2), and (c)(3) of this Part. For-profit agencies and facilities may be used to provide specific independent living services as a part of a rehabilitation program during the periods described above under the following conditions:

(i) Necessary services are not reasonably available through public or private nonprofit agencies; and

(ii) The facility meets the criteria contained in § 21.294(c) of this Part.

(Authority: 38 U.S.C. 1504(a)(15), Pub. L. 99-576)

13. In § 21.294 paragraph (b)(2) is revised and paragraph (b)(3) is added to read as follows:

§ 21.294 Selecting the training or rehabilitation facility.

* * * * *

(b) * * *

(2) The VA will only utilize public and nonprofit agencies to furnish independent living services, when such services constitute the whole of a rehabilitation program. These facilities must be:

(i) VA medical centers which provide independent living services;

(ii) Facilities which meet standards established by the State rehabilitation agency for rehabilitation facilities or for providers of independent living services; or

(iii) Facilities which are neither approved nor disapproved by the State rehabilitation agency, but are determined by the VA to be able to provide necessary services in an individual veteran's case.

(3) The VA may utilize for-profit facilities and agencies to provide specific independent living services as a part of a rehabilitation program under the conditions specified in § 21.162(c) of this part. These agencies and facilities must meet the standards established by local, state (including the State rehabilitation agency), and federal agencies which are applicable to for-profit facilities and agencies offering independent living services.

(Authority: 38 U.S.C. 1515, 1520(a), Pub. L. 99-576)

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3494-6]

Approval and Promulgation of Air Quality Implementation Plans; Louisiana; Visibility Protection; Long-Term Strategy and Implementation Control Strategies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This notice approves the general plan provisions and long-term strategy for visibility in a revision to the Louisiana State Implementation Plan (SIP). This action is a result of rulemaking on November 24, 1987 (52 FR 45132), in which EPA disapproved SIPs of States which failed to comply with the provisions of 40 CFR 51.302 (visibility implementation control strategies) and 51.306 (visibility long-term strategy). Additional details are discussed in the proposed rulemaking on March 12, 1987 (52 FR 7802).

The Governor of Louisiana submitted a SIP Revision for Protection of Visibility on October 26, 1987. Supplemental information was submitted on June 16, 1988. Review of the SIP revision indicated that Louisiana has met the criteria of 40 CFR 51.302 and 51.306. Consequently, this notice also revokes the November 24, 1987, Federally promulgated plan for Louisiana.

DATES: This action will become effective on February 17, 1989, unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Written comments on this action should be addressed to Tom Diggs, Chief (6T-AN), SIP/NSR Section, Air Programs Branch, U.S. Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202-2733. Copies of the documents relevant to this action are available for public inspection during normal business hours at the following location. Interested persons wanting to examine these documents should make an appointment with the appropriate office at least twenty-four hours before visiting day.

U.S. Environmental Protection Agency, Region 6, Air Programs Branch (6T-AN), 1445 Ross Avenue, Dallas, Texas 75202-2733.

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, DC 20460.

Louisiana Department of Environmental Quality, Air Quality Division, 625 North 4th Street, Baton Rouge, Louisiana 70804.

FOR FURTHER INFORMATION CONTACT: Dr. John Crocker, Air Programs Branch, SIP/NSR Section, Environmental Protection Agency, Region 6, 1445 Ross Avenue, Suite 1200, Dallas, Texas 75202-2733, telephone (214) 655-7214 or (FTS) 255-7214. Reference Docket File Number LA-87-2.

SUPPLEMENTARY INFORMATION:

Background

A. Regulatory Requirements and Litigation Challenges

Section 169A of the Clean Air Act, 42 U.S.C. 7491, sets as a national goal "* * * the prevention of any future, and the remedying of any existing, impairment of visibility in mandatory Class I Federal areas which impairment results from manmade air pollution." Section 169A requires visibility protection for mandatory Class I Federal areas where EPA has determined that visibility is an important value. "Mandatory Class I Federal areas" are certain national parks, wildernesses, and international parks, as described in section 162(a) of the Act, 42 U.S.C. 7472(a), 40 CFR 81.400 through 81.437. Section 169A specifically requires EPA to promulgate regulations requiring certain States to amend their State Implementation Plans (SIPs) to provide for visibility protection.

On December 2, 1980, EPA promulgated the required visibility regulations in 45 FR 80084, codified at 40 CFR 51.300 *et seq.* In broad outline, the visibility regulations require 36 States listed in § 51.300(b) to (1) coordinate SIP development with the appropriate Federal land managers (FLMs), (2) develop a program to assess and remedy visibility impairment from new and existing sources, (3) develop a long-term (10 to 15 years) strategy to assure reasonable progress toward the national goal, (4) develop a visibility monitoring strategy to collect information on visibility conditions, and (5) consider in all aspects of visibility protection any "integral vistas" identified by the end of 1985 by the FLMs as critical to the visitor's enjoyment of the Class I areas. The regulations required the States to submit to EPA their revised SIPs to satisfy those provisions by September 2, 1981. (See 45 FR 80091, codified at 40 CFR 51.302(a)(1).) That rulemaking resulted in numerous parties seeking judicial review of the visibility regulations. In March 1981, the Court stayed the litigation pending EPA action

on related administrative petitions for reconsideration of the visibility regulations filed with the Agency.

In December 1982, the Environmental Defense Fund (EDF) filed suit in the U.S. District Court for the Northern District of California alleging that EPA failed to perform a nondiscretionary duty under Section 110 of the Act to promulgate visibility SIPs.

B. Settlement Agreement

A negotiated settlement agreement between EPA and EDF required EPA to promulgate visibility SIPs on a specific schedule. It required EPA to promulgate Federal Implementation Plans (FIPs) for visibility in States where SIPs are deficient with respect to the 1980 visibility regulations. Specifically, the first part of the agreement required EPA to propose and promulgate FIPs which cover the monitoring and new source review (NSR) provisions under 40 CFR 51.305 and 51.307. The EPA proposed such plan revisions for 34 States on October 23, 1984, at 49 FR 42670. Louisiana submitted its Part I Plan on October 4, 1985, and EPA approved it on June 10, 1986, at 51 FR 20967.

The second part of the settlement agreement required EPA to determine the adequacy of the SIPs to meet the remaining provisions of the visibility regulations. These provisions are the general plan provisions including implementation control strategies (40 CFR 51.302), integral vista protection (§§ 51.302 through 51.307), and long-term strategies (§ 51.306). The settlement agreement required EPA to propose and promulgate FIPs to remedy any deficiencies on a specified schedule.

On January 23, 1986, at 51 FR 3046, EPA preliminarily determined the SIPs of 32 States were deficient with respect to the remaining visibility provisions.

A revised settlement agreement required EPA to propose and promulgate FIPs to address the deficiencies relating to the general plan requirements and long-term strategies and allowed EPA to defer proposing and promulgating FIPs to remedy deficiencies related to impairment which the Federal land managers (FLMs) have certified to EPA. As currently revised, the agreement allows EPA until August 31, 1989, to propose remedies for existing impairment in certain of the affected areas. See 53 FR 35956 (September 15, 1988).

On March 12, 1987, at 52 FR 7802, EPA proposed to disapprove the SIPs of 32 States (including Louisiana) for failing to meet the general plan and long-term strategy requirements of 40 CFR 51.302 and 51.306. There, EPA proposed that control strategies to remedy existing impairment were unnecessary in the SIPs for 28 States (including Louisiana) and deferred a decision on the necessity of best available retrofit technology (BART) in four States (Arizona, Maine, Minnesota, and Utah).

The States were given the opportunity to avoid Federal promulgation of the FIPs if they submitted revisions to EPA by August 31, 1987. Three States (Georgia, Florida, and Kentucky) met this deadline. Several States (including Louisiana) submitted draft or final SIPs after the August 31 date. The settlement agreement required EPA to promulgate FIPs for States which failed to meet the submittal deadline. Therefore, on November 24, 1987, at 52 FR 45132, EPA promulgated FIPs for 29 States (including Louisiana) to meet the general visibility plan requirements and long-term strategies of 40 CFR 51.302 and 51.306.

C. Today's Action

On October 26, 1987, the Governor of Louisiana submitted a Part II SIP Revision for Protection of Visibility to meet the visibility general plan requirements and long-term strategies. Supplemental clarifying information was submitted on June 16, 1988. The SIP revision is entitled "Louisiana State Implementation Plan Revision: Protection of Visibility: Proposed Part II Long Term Strategy, October 26, 1987." EPA has reviewed the State's submittal and developed an evaluation report.[1] The report concludes that the Louisiana SIP revision meets all of the requirements for a Part II Visibility Protection Plan as outlined in 40 CFR 51.302 (visibility implementation control strategies) and 51.306 (visibility long-term strategy). This evaluation report is available for inspection by interested parties during normal business hours at the EPA Region 6 office. Today's action approves the Louisiana SIP revision as meeting the Part II Visibility Protection Plan requirements of 40 CFR 51.302 and 51.306 and the criteria discussed in 52 FR 7802. Today's action also revokes the FIP promulgated for Louisiana on November 24, 1987, at 52 FR 45132.

Louisiana has only one mandatory Class I area which is the Breton National Wildlife Refuge. The refuge consists of a chain of small islands and surrounding water stretching from near the mouth of the Mississippi River to the Mississippi Coast near the City of Gulfport, Mississippi. No other Class I areas currently exist in the State. The SIP commits the State to visibility protection consistent with the Clean Air Act to be afforded within the refuge area boundary. The SIP is to be reviewed every three years and revised as necessary.

[1] Evaluation Report for the Louisiana Part II Visibility Protection Plan in Mandatory Class I Federal Areas, July 1988.

Requirements

A. General Plan Requirements

The visibility regulations provide general plan requirements for the visibility SIPs. Section 51.302 sets specific State (and EPA in lieu of States) and FLM coordination requirements which must occur when developing a SIP. The general plan requirements of § 51.302(c) require that the SIPs include:

1. An assessment of visibility impairment and a discussion of how each element of the plan relates to the national goal;

2. Emission limitations, or other control measures, representing best available retrofit technology (BART) for certain sources;

3. Provisions to protect integral vistas identified pursuant to § 51.304;

4. Provisions to address any existing impairment certified by the FLM; and

5. A long-term (10–15 years) strategy for making reasonable progress toward the national goal.

(See 52 FR 7803 and 52 FR 45133 for further discussion on the general plan requirements and the process for developing control strategies to remedy existing impairment.)

The regulations require the State to adopt control strategies only to remedy impairment which has been reasonably attributed to a specific source or group of sources.

B. Long-Term Strategy

The regulations require that the long-term strategy be a 10 to 15-year plan for making reasonable progress toward the national goal. The long-term strategy must cover any existing impairment that the FLM certified and any integral vista that the FLMs have declared at least 6 months before plan submission. A long-term strategy must be developed which covers each Class I area within the State and each Class I area in another State that may be affected by sources within the State. The strategy must be coordinated with existing plans and goals for a Class I area including those of the FLMs. The strategy must state with reasonable specificity why it is adequate for making reasonable progress toward the national goal. The long-term strategy and SIP must provide for the review of the impact of new sources (see § 51.307). The State must consider as a minimum the following six factors in the long-term strategy:

1. Emission reductions due to ongoing air pollution control programs;
2. Additional emission limitations and schedules for compliance;
3. Measures to mitigate the impacts of construction activities;
4. Source retirement and replacement schedules;
5. Smoke management techniques for agricultural and forestry management purposes including such plans as currently exist within the State for these purposes; and
6. Enforcement of emission limitations and control measures.

The SIP must include a statement as to why these factors were or were not addressed in developing the long-term strategy.

The State must commit to periodic review of the SIP on a schedule not less frequent than every 3 years. A periodic report must be developed in consultation with the FLMs and must contain the following:

1. Progress achieved in remedying existing impairment;
2. The ability of the long-term strategy to achieve reasonable progress toward the national goal;
3. Any change in visibility conditions since the last report or since plan approval;
4. Additional measures, including the need for SIP revisions, that may be necessary to achieve progress toward the national goal;
5. The progress achieved in implementing BART and meeting other schedules laid out in the long-term strategy;
6. The impact of any exemption granted under § 51.303; and
7. The need for BART to remedy existing impairment in an integral vista declared since plan approval.

C. Integral Vistas

Where the FLM has adopted an integral vista under § 51.304, the regulations require the State to (1) analyze for BART any facility where impairment in an integral vista has been reasonably attributed to that facility, (2) consider any integral vistas established 12 months prior to SIP submittal in its long-term strategy, and (3) coordinate with the FLMs on any permit application under the Prevention of Significant Deterioration (PSD) program where the proposed facility or modification may affect visibility in an integral vista. The FLM identified only one integral vista, and that one is located in Maine (see 46 FR 22707). Therefore, EPA proposed to disapprove only the State of Maine's SIP for failing to provide for the protection of these vistas. Thus, the visibility protection plan requirements for integral vistas (§§ 51.302 through 51.307) are applicable only for Maine.

D. Federal Remedy

On November 24, 1987, at 52 FR 45132, EPA disapproved the SIPs of 29 States (including Louisiana) for failing to comply with the provisions in EPA's existing regulations for visibility protection in mandatory Class I Federal areas dealing with impairment which can be reasonably attributed to a source. EPA also incorporated Federal implementation plans into the SIPs of these States to meet the general visibility plan requirements and long-term strategies of 40 CFR 51.302 and 51.306. These actions were proposed on March 12, 1987, at 52 FR 7802 and are in accordance with the settlement agreement with the EDF.

State Submittal

A. General Plan Requirements/FLM Coordination

Under Section 165(d) of the Clean Air Act, the FLM is given an affirmative responsibility to protect air quality related values, including visibility, in lands within a Class I area. The FLM must maintain these areas consistent with congressional land use goals. The visibility regulations (40 CFR 51.302) allow the FLM the opportunity to identify visibility impairment and to recommend elements for inclusion in the long-term strategy.

The State of Louisiana has met the visibility general plan requirements of § 51.302. The State has accorded the FLM opportunities to participate and comment on its visibility SIP revision. The State has committed in the SIP to consult continually with the FLM on the review and implementation of the visibility program.

The Louisiana Part II Visibility Protection Plan incorporated into the SIP revision the following: (1) A determination that there is no existing visibility impairment that is reasonably attributable to specific sources; (2) a discussion of the SIP elements and how each element of the plan relates to the national goal; and (3) a long-term (10–15 years) strategy. Since no existing reasonably attributable impairment has been identified, all elements of the plan are intended to prevent future impairment of visibility. If existing reasonably attributable impairment is later identified, the State will revise its plan to remedy the impairment. Currently, there are no integral vistas in Louisiana.

B. Long-Term Strategy

The Louisiana visibility long-term strategy section included the following: (1) coordination with the FLM; (2) consideration of the six required factors for a long-term strategy; (3) a provision for the review of the impact of new sources; and (4) provisions for periodic review (i.e., every 3 years) of the plan, which review must include consultation with the Federal land manager and a report to the public and to EPA on progress toward the national goal.

C. EPA Evaluation Summary

These provisions meet EPA criteria and EPA is approving this phase of the plan. EPA has reviewed the State's submittal and developed an evaluation report. The report shows that the Louisiana SIP revision meets all of the requirements for a Part II Visibility Protection Plan as specified in 40 CFR 51.302 (visibility implementation control strategies) and 51.306 (visibility long-term strategy).

Final Action

By this notice, EPA is approving the Louisiana SIP revision as meeting the Part II Visibility Protection Plan requirements of 40 CFR 51.302 and 51.306 and the criteria discussed in 52 FR 7802. (One should reference the March 12, 1987, notice for additional information.) The SIP commits to a 3 year periodic review and making any changes deemed necessary. The SIP, therefore, has established the commitment to review the visibility requirements listed in 40 CFR Part 51 Subpart P—Protection of Visibility. This SIP revision remedies the deficiencies for all the remaining visibility requirements of Subpart P (i.e., §§ 51.302 and 51.306) as identified in the November 24, 1987 (52 FR 45132), Federally promulgated plan. Consequently, this notice also revokes that Federal promulgation for Louisiana.

EPA has reviewed these revisions to the Louisiana SIP and is approving them as submitted. This action is taken without prior proposal because the changes are non-controversial and EPA anticipates no adverse comments on them. The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days of publication that someone wishes to submit adverse or critical comments, this action will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will withdraw the final action and will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 17, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by reference, Lead, Nitrogen dioxide, Ozone, Particulate matter, Sulfur oxides.

Note.—Incorporation by reference of the State Implementation Plan for the State of Louisiana was approved by the Director of the Federal Register on July 1, 1982.

Date: December 13, 1988.

Lee M. Thomas,

Administrator.

40 CFR Part 52, Subpart T, is amended as follows:

PART 52—[AMENDED]

Subpart T—Louisiana

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.970 is amended by adding paragraph (c)(47) to read as follows:

§ 52.970 Identification of plan.

* * * * *

(c) * * *

(47) Part II of the Visibility Protection Plan was submitted by the Governor on October 26, 1987.

(i) Incorporation by reference.

(A) Revision entitled, "Louisiana State Implementation Plan Revision: Protection of Visibility: Proposed Part II Long-Term Strategy, October 26, 1987". This submittal includes a visibility long-term strategy and general plan provisions as approved and adopted by the Secretary of the Louisiana Department of Environmental Quality on October 26, 1987.

(B) Letter dated October 26, 1987, from Secretary of Louisiana Department of Environmental Quality (LDEQ), to the Governor approving the SIP revision.

(ii) Additional material.

(A) Letter dated June 16, 1988, from Administrator, Air Quality Division, LDEQ, to Chief, SIP/New Source Section (6T–AN), EPA Region 6, committing to make its three-year periodic review report available to the public as well as to EPA.

§ 52.989 [Removed]

3. Section 52.989, Visibility protection, is removed.

49 CFR Parts 385 and 386

[FHWA Docket No. MC–123]

RIN 2125–AB46

Safety Fitness Procedures

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: Section 215 of the Motor Carrier Safety Act of 1984 directs the Secretary of Transportation, in cooperation with the Interstate Commerce Commission (ICC), to establish a procedure to determine the safety fitness of owners and operators of commercial motor vehicles, including persons seeking new or additional operating authority as motor carriers. The FHWA is reissuing the Safety Fitness Procedures Rule, Part 385. The FHWA is also making a minor amendment to Part 386 (§ 386.72) to clarify existing procedures in the context of this rule. The provisions of this part are applicable to motor carriers conducting operations in interstate or foreign commerce which are subject to the Federal Motor Carrier Safety Regulations. The purpose of this rule is to establish procedures to assign motor carriers safety ratings of "satisfactory," "conditional," or "unsatisfactory."

EFFECTIVE DATE: January 18, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald J. Davis, Office of Motor Carrier Safety Field Operations, (202) 366–2698, or Mr. Paul L. Brennan, Office of the Chief Counsel, (202) 366–0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except for legal holidays.

SUPPLEMENTARY INFORMATION:

Background

The Motor Carrier Safety Act of 1984 (Pub. L. 98–554, 98 Stat. 2829) (the Act) was enacted on October 30, 1984. Section 215 of the Act provides that the Secretary of Transportation, in cooperation with the ICC, shall by rule, after notice and opportunity for comment, establish a procedure to determine the safety fitness of owners and operators of commercial motor vehicles, including persons seeking new or additional operating authority as motor carriers. In response to this mandate, FHWA is adopting regulations applicable to motor carriers conducting operations in interstate or foreign commerce which are subject to the Federal Motor Carrier Safety Regulations.

On June 25, 1986, the FHWA issued a notice of proposed rulemaking (NPRM) (51 FR 23088, Docket No. MC–123; Notice No. 86–6) to request comments regarding the proposed changes. All comments to the docket were to be received on or before August 11, 1986. The comment period was extended to September 12, 1986, in response to a petition from the American Trucking Associations, Inc. (ATA).

Summary of Notice of Proposed Rulemaking

The NPRM established proposed procedures for determining the safety rating of a motor carrier through an on-site visit at the motor carrier's principal place of business. The rating would be based on the findings of a safety compliance review with respect to the carrier's safety procedures and operating results. Consideration would also be given to the carrier's past compliance record including improvement or lack thereof over previous safety audits, its accident record, and violations of state-related statutes or regulations. Safety ratings are assigned on a case-by-case basis.

The NPRM proposed that all unrated motor carriers file a one-time questionnaire with the FHWA. Motor carriers would be classified according to principal cargo transported and assigned a priority basis for receiving the questionnaire. The information collected from the questionnaire would be used to update the motor carrier census and to assist in prioritizing carriers for personal contact by FHWA safety specialists. New entrants into the motor carrier industry would be required to file the questionnaire for the purpose of registering with the FHWA and supplying information for updating the motor carrier census and prioritizing carriers for on-site contacts.

Comments were requested regarding the use of a motor carrier's identification number, which is assigned to the carrier

VOL 53 ISS 243 DE 19 1988 UMI

by FHWA when its identity is entered into the Computerized Management Information System.

The NPRM proposed that a motor carrier that has received an unsatisfactory safety rating could not operate until it has taken action to correct the deficiencies that resulted in such rating.

Further, the proposed rule stated that any motor carrier may petition the FHWA for a review of its safety rating.

Finally, the NPRM contained a penalty provision for failure to make timely filing of the questionnaire, for furnishing misleading information, or for making false statements upon the questionnaire.

Following a review and evaluation of the comments, several proposals in the NPRM were modified, or deleted and replaced.

Final Rule Summary

Section 215 of the Motor Carrier Safety Act of 1984 (the Act) directs the Secretary of Transportation, in cooperation with the Interstate Commerce Commission, to establish a procedure to determine the safety fitness of owners and operators of commercial motor vehicles, including persons seeking new or additional motor carrier operating authority.

The rule establishes a procedure to determine the safety fitness of motor carriers through the assignment of safety ratings. These assigned ratings are either "satisfactory," "conditional," or "unsatisfactory." The rule establishes a "safety fitness standard" which the FHWA shall use as its satisfactory benchmark for assigning safety ratings. All previously assigned safety ratings will remain in effect unless changed in accordance with this rule.

In addition, the rule establishes the "safety rating" procedures. The safety ratings are used to assign motor carriers to three new national safety programs that have been developed by FHWA. These programs are the "Educational and Technical Assistance Program," "Selective Compliance and Enforcement Program," and "Commercial Accident Prevention and Evaluation Program." These programs were developed to: (1) Ensure that motor carriers are meeting the safety fitness standard; (2) provide an enforcement framework to systematically deal with problem carriers including "imminently hazardous" carrier operations that require immediate action by the motor carrier to eliminate serious hazards to the motoring public; (3) identify safety countermeasures relevant to specific causes of accidents; and finally, (4) measure the effectiveness of FHWA's activities and the safety regulations in reducing commerical motor vehicle accidents.

The rule requires all unrated motor carriers conducting operations in interstate or foreign commerce to file a one-time Motor Carrier Identification Report, Form MCS–150. A new motor carrier shall file a Form MCS–150 within 90 days after beginning operations. The purpose of this report is to identify previously unknown carriers, to update the motor carrier census, to require the carrier to certify that it is familiar with the Federal Motor Carrier Safety Regulations and, to assist FHWA in prioritizing motor carriers for safety review contacts.

Finally, the rule provides for safety ratings being made available to the public upon request; to the ICC for consideration of operating authority applications and self insurance; to the Department of Defense in the selection of carriers to transport hazardous materials; to shippers for carrier selection purposes; and to insurance companies to assist in risk determinations.

The following paragraphs discuss:

1. Issues raised in the NPRM
2. FHWA policy considerations regarding new national programs, sanctions, and Safetynet
3. Section-by-section review of the final rule
4. Regulatory impact
5. Economic impact pursuant to the Regulatory Flexibility Act
6. List of subjects in 49 CFR Part 385.

I. Issues Raised in NPRM

A total of 31 responses were received regarding the NPRM published in the June 1986 **Federal Register**, the majority of which were from associations and councils collectively representing several thousand motor carriers of various types. Twenty-two of the respondents expressed support for the NPRM with various modifications from the proposed procedures. Three respondents were opposed to the concept of safety fitness determinations for motor carriers. The remainder of the respondents did not indicate a preference. Discussions follow with respect to the primary issues.

A. Questionnaire

The NPRM proposed that all unrated motor carriers be required to file a questionnaire which would furnish certain historical data on the carrier's operations for the past 3 calendar years. This historical data would include the average number of drivers used, the average number of power units used having a gross vehicle weight rating in excess of 10,000 pounds, the total annual commercial motor vehicle miles, the number of reportable accidents, the number of incidents involving hazardous materials releases required to be reported to the Department of Transportation (DOT). Also included on the questionnaire would be the number of state and local driver traffic violations, the number of times drivers or vehicles were placed out-of-service by Federal, state, or local officials, and pertinent financial responsibility information.

The majority of the comments supported the use of a questionnaire for the collection of historical data on a motor carrier's operation. They believed that most motor carriers could provide the information requested in the questionnaire with accuracy and without excessive burden since this information is already retained for a variety of industry reasons or is required by regulations issued by other governmental agencies.

Several opponents questioned the credibility of self-reported accident and violation data. Some comments pointed out that even if amnesty were granted for failure to report accidents to the FHWA, the same motivation for failing to report the information initially would still exist. It was argued by some that many motor carriers do not retain certain information requested in the proposed questionnaire and it would be burdensome to summarize the data that is available to respond to the questionnaire.

Specific comments of the Petroleum Marketers Association of America, representing 11,000 members, expressed concern that providing "operational data" for 3 preceding years would be an especially burdensome task and would require considerable preparation time.

Finally, the Private Carrier Conference, Inc., stated that the proposed questionnaire will be burdensome to private motor carriers in that those carriers will have to essentially reconstruct their past 3 years of trucking operations. It was noted that, in the past, private motor carriers have not been required to maintain records necessary to answer some of the questions. For instance, unlike for-hire motor carriers, private motor carriers need not report cargo classifications to the Interstate Commerce Commission or to state agencies.

In summary, while there is general support for obtaining historical motor carrier data, comments regarding the contents and use of the questionnaire have caused the FHWA to reevaluate

the merits of the use and contents of the questionnaire.

Therefore, FHWA has eliminated a number of data items and reduced the number of years for which data must be reported from three years to one year. The FHWA believes that the streamlined data set will provide safety information important for the FHWA and for motor carriers. The new form, known as the Motor Carrier Identification Report, Form MCS–150, requires minimum data that will (1) identify previously unknown motor carriers operating in interstate or foreign commerce, (2) update the motor carrier census, (3) require the motor carrier to certify that it is familiar with the Federal Motor Carrier Safety Regulations, and (4) assist the FHWA in prioritizing motor carriers for safety reviews. The Form MCS–150 will replace Form MCS–137, Description of Motor Carrier Operations.

The Motor Carrier Identification Report consists of three parts: (1) Part A: *Filing Entity*—name of motor carrier and trade name, if any; principal office address; telephone number; and ICC MC number, if any; (2) Part B: *Operating Information*—cargo check list; transportation of hazardous materials inquiry; average number of power vehicles and drivers used for the past 12 months; and total vehicle miles traveled; and (3) Part C: *Certification Statement.* By signing and dating the document, the representative of the filing entity certifies that the information given is true and correct, and that he/she is familiar with the Federal Motor Carrier Safety Regulations.

The Motor Carrier Identification Report will be designated Form MCS–150, and will be available from all regional and division motor carrier safety offices nationwide and from the Office of Motor Carrier Information Management and Analysis, Washington, D.C. New motor carriers are required to file the Motor Carrier Identification Report within 90 days after beginning operations. All unrated motor carriers currently conducting operations in interstate or foreign commerce are required to file a one-time Motor Carrier Identification Report within 90 days after the effective date of this rule. This provision does not apply to a motor carrier that has received a safety rating from the FHWA, since similar information on rated carriers is already a matter of record in the FHWA Management Information System. Completed forms are to be filed with the Federal Highway Administration, Office of Motor Carriers, Information Management and Analysis, 400 Seventh Street, SW., Washington, DC 20590. A motor carrier needs to file the Motor Carrier Identification Report only once.

B. Due Process Provision

Another issue raised by some commenters, was that they believed the NPRM did not provide adequate due process safeguards for a motor carrier assigned an unsatisfactory safety rating, because the NPRM automatically prohibited the carrier from operating in interstate or foreign commerce until it has taken, and certified to the FHWA that it has taken remedial action. Thirteen respondents, including the larger motor carrier associations and councils, were adamant in their recommendations that an appropriate due process procedure be written into the final rule. The proposed provision that a motor carrier receiving an unsatisfactory safety rating is automatically prohibited from further operations was deleted from the final rule. Any order issued by the FHWA for a motor carrier to cease all or part of its operations will be processed under the provisions of 49 CFR Part 386, Rules of Practice for Motor Carrier Safety and Hazardous Materials Proceedings, and other applicable regulations.

C. Cease Operations and Certifications

Another issue of major concern generated by the NPRM was whether the FHWA had exceeded its statutory authority by including in the "unsatisfactory" safety rating a provision that a motor carrier must cease operations in interstate or foreign commerce until it has certified that corrective action has been taken. Some respondents contended that this proposal improperly exceeds the power granted to the Secretary by Congress at 49 U.S.C. 521(b)(5)(A). This section gives the Secretary authority to order an employer to cease all or part of its operations for violations that pose an imminent hazard.

The FHWA agrees that all or part of a motor carrier's operations may only be shutdown by the Secretary when such operation poses an imminent hazard. The automatic shutdown provision for an "unsatisfactory" safety rating, contained in the NPRM in § 385.3, is thus not included in the final rule.

A motor carrier receiving a "conditional" or "unsatisfactory" rating will be required to certify to the FHWA, within 30 days, that corrective action has been taken to meet the safety fitness standard. Failure to make the required certification, or filing a false certification, will subject a motor carrier to civil or criminal prosecution.

A motor carrier with an unsatisfactory safety rating is considered to have a high risk for accidents and the FHWA will make strong efforts to reduce that risk. The carrier is given a list of items requiring corrective action and is required to certify within 30 days that corrective actions have been taken. A motor carrier certification is a statement by the carrier stating whether all corrective actions identified by the FHWA have been taken. The carrier will be placed in the Selective Compliance and Enforcement Program, under which problem areas will be identified and discussed with carrier management, and suggestions made for procedures to help achieve compliance with applicable regulations. A carrier failing to complete corrective actions and to make the required certification will be subject to formal enforcement action resulting in monetary fine or other sanctions.

It is the FHWA intention that an unsatisfactory or conditional safety rating will be a temporary condition. A carrier will either take corrective actions or will be subject to increasingly severe enforcement actions and sanctions that can result in the carrier being required to cease all or part of its commercial motor carrier operations.

D. Reason for Adverse Rating and Corrective Action To Be Taken

Twelve respondents stated that a motor carrier receiving an adverse rating should be summarily advised of the reasons for such a rating. Several further advised that this information must be provided by the individual who assigns the safety rating.

A copy of the safety or compliance review, containing a summary of the deficiencies and violations discovered, is given to the motor carrier upon conclusion of the examination. The Final Rule provides that the motor carrier will later be advised by letter of its safety rating and of those areas of noncompliance that were considered in the assignment of the safety rating.

In response to consideration of the merits of this recommendation, the notice (letter) advising a motor carrier of its safety rating will set forth those parts of the Federal Motor Carrier Safety Regulations (FMCSR's) or Hazardous Materials Regulations (HMR) of which the carrier was found to be in violation. Corrective actions with respect to violations and deficiencies and continued compliance with applicable regulations are a prerequisite to obtaining a "satisfactory" safety rating.

E. Unique Identification Number

The NPRM mentioned the feasibility of the use of a unique identification number to identify a motor carrier, and the comments varied according to the respondent's type of motor carrier operation. The use of a unique identification number was addressed as part of a final rule issued on May 19, 1988 (53 FR 18042) to revise 49 CFR Part 390, Federal Motor Carrier Safety Regulations. Under this rule a motor carrier must mark its vehicles with the name or trade name of the motor carrier, its address (city and State), and the identification number issued by the FHWA preceded by the letters USDOT.

II. Policy Considerations

The mission of the FHWA Office of Motor Carriers is to reduce commercial vehicle accidents and the related societal costs. The FHWA has established an enhanced framework within which it may carry out this mission. The safety rating procedure and its relationship with new national motor carrier safety programs is an integral part of the motor carrier safety effort.

It shall be the policy of the FHWA to monitor and inspect periodically new and "satisfactory" rated motor carriers operating in interstate and foreign commerce to ensure that motor carriers are meeting the safety fitness standard, minimize the inherent risks in the transportation of passengers and property by heavy commercial vehicles; and reduce highway accidents resulting in fatalities, injuries, and property damage.

Further, motor carriers that do not meet the safety fitness standards shall be placed in remedial programs designed to identify safety problems and assist motor carriers in meeting the safety fitness standard. When the compliance by a motor carrier rated less than satisfactory fails to improve, the FHWA will take appropriate action to eliminate the safety hazard including, but not limited to, initiating civil and criminal enforcement actions with progressively higher monetary fines, where appropriate.

The ATA succinctly commented that the "rating program should be remedial first and punitive second." This statement generally reflects FHWA policy. This policy is addressed through a number of measures, activities, and sanctions included in the Educational and Technical Assistance (ETA), the Selective Compliance and Enforcement (SCE), and the Commercial Accident Prevention and Evaluation (CAPE) Programs.

A. National Motor Carrier Safety Program

The primary purpose of the National Motor Carrier Safety Program and the mission of the Office of Motor Carriers is to help reduce death, injury, and economic loss due to all types of commercial motor vehicle accidents. Therefore, the FHWA has, among other things, developed new programs to enhance its motor carrier safety efforts.

Specifically, three new national safety programs have been developed: (1) to ensure that motor carriers are meeting the safety fitness standard; (2) to provide an enforcement framework to systematically deal with problem carriers; and finally, (3) to measure and improve the effectiveness of FHWA's activities and the safety regulations in reducing commercial motor vehicle accidents. The new safety programs and the "safety rating" relationship are described in the following paragraphs.

(1) *Educational and Technical Assistance Program.* A primary tool of the Educational and Technical Assistance Program is an on-site assessment, called a safety review, to determine whether a motor carrier has adequate safety management controls in place to meet the safety fitness standard.

During the initial contact with a motor carrier at the carrier's principal place of business, a motor carrier safety specialist will determine whether the company is meeting the safety fitness standard. The safety specialist will identify safety problem areas and offer educational and technical assistance to the company for correcting the identified safety problems. The safety specialist may suggest methods and procedures for improving safety management controls and operations; offer recommendations to achieve compliance with applicable regulations; discuss positive accident prevention activities that have been effective for similar carrier operations; and, where appropriate, furnish an information packet to the carrier to enhance regulatory compliance and improve motor carrier safety.

A motor carrier assigned a "satisfactory" safety rating is entered into the Educational and Technical Assistance Program and continues to receive selected safety information from the Office of Motor Carriers. Additionally, carriers rated "satisfactory" will be monitored through a national motor carrier safety data system that compiles state enforcement data and will be contacted or visited periodically to ensure that these carriers are continuing to meet the safety fitness standard.

The technical and educational assistance provided by the FHWA to individual motor carriers, the continual monitoring of actual motor carrier safety records through Safetynet, and informational safety contacts (i.e., perodic news releases, technological transfer, informational updates, and newly identified safety countermeasures) should help improve the safety posture of the motor carrier industry.

(2) *Selective Compliance and Enforcement Program.* A carrier with inadequate safety management controls, that is in noncompliance with the safety regulations, and/or is experiencing a significant number of highway accidents is placed in the Selective Compliance and Enforcement Program.

Carriers placed in the Selective Compliance and Enforcement Program will be sorted by types of operations posing the greatest risks to highway safety and scheduled for contact accordingly. The contact will be through a compliance review, which consists of an on-site investigation of a motor carrier's operations. This investigation could cover factors such as drivers' hours of service, driver qualifications, commercial license requirements; vehicle inspection, maintenance and repair; financial responsibility; and accident and other business records to determine whether a motor carrier meets the safety fitness standard.

The findings of a compliance review may result in the following: (1) If the carrier's rating is upgraded to "satisfactory" and its preventable accident rate is at or below the average determined by valid statistical sampling methods, it is removed from the Selective Compliance and Enforcement Program and placed in the Educational and Technical Assistance Program for continued monitoring, (2) If the carrier's rating is upgraded to "satisfactory" but its preventable accident rate is high, it is placed in the Commercial Accident Prevention and Evaluation Program, (3) If the carrier continues to be "unsatisfactory," or is rated "conditional" following a compliance review, the carrier remains in the Selective Compliance and Enforcement Program until the motor carrier meets the safety fitness standard.

The motor carrier will be encouraged to contact the safety specialist to discuss any safety issues and problems that have prevented the motor carrier from meeting the safety fitness standard. These carriers are subject to another safety review after sufficient time has elapsed to allow the carriers to initiate safety countermeasures to meet the

safety fitness standard. If the motor carrier is meeting the safety fitness standard, the follow-up compliance review may be used to upgrade a "conditional" safety fitness rating to "satisfactory."

Examples of Selective Compliance and Enforcement Program actions include, but are not limited to, the following:

- Initiating additional educational and technical assistance.
- Requiring the carrier to develop a safety plan and implement safety management controls to meet the safety fitness standard.
- Initiating combined Federal and state compliance and enforcement activities with state counterparts participating in the Federal Motor Carrier Safety Assistance Program (MCSAP).
- Intervening for safety reasons in ICC actions pertaining to operational authority.
- Disqualifying all or some of the drivers used by a motor carrier.
- Issuing a written order to cease certain operations.
- Initiating successive civil or criminal actions with increasingly higher fines for continued noncompliance.

(3) *Commercial Accident Prevention and Evaluation Program.* Carriers that meet the safety fitness standard, but still have too many preventable accidents, are put into the Commercial Accident Prevention and Evaluation Program.

The purpose of the Commercial Accident Prevention and Evaluation Program contact is to analyze preventable accident data specific to the individual carrier, identify safety problem areas, and initiate countermeasures to reduce the risks of preventable accidents.

To help in this activity, the FHWA Motor Carrier Safety Management Information System will provide preventable accident profiles for the individual company and aggregate national/regional/state accident information for analysis and comparisons. The FHWA motor carrier safety specialist will ask the carrier to verify and analyze the accident statistics from its own accident records and work with the motor carrier to develop and initiate specific countermeasures to reduce the risks of recurring accidents.

The Commercial Accident Prevention and Evaluation Program contacts are not structured, but are situational depending on the problem areas unique to the individual carriers. Successful countermeasures related to specific types of preventable accidents will be documented and passed on to other carriers and the industry through other Commercial Accident Prevention and Evaluation Program contacts and the Educational and Technical Assistance Program.

Finally, another mechanism for accident prevention is the special accident and hazardous materials incident investigations conducted by FHWA on a selected basis to identify "cause and effect" accident patterns.

B. Sanctions

The Motor Carrier Safety Act of 1984 (Pub. L. 98–554, 98 Stat. 2832, 49 U.S.C. app. 2501 et seq.) prescribes a wide range of penalties to which a motor carrier or employee may be subject. These include a provision that the Attorney General, upon request of the Department of Transportation, may bring an action in an appropriate United States District Court for equitable relief to redress violations of the safety regulations. The district court may grant such relief as is necessary or appropriate, including mandatory or prohibitive relief, interim equitable relief, and punitive damages.

The Motor Carrier Safety Act of 1984 provides authority to require safety records and provides sanctions for the willful failure to prepare, use, and retain such records that can be audited by state and Federal authorities. The Act also provides criminal and civil penalties for certain substantial vehicle and equipment violations where a carrier or driver is operating a vehicle knowing the defects existed, and therefore choosing to disregard public safety.

Further, there is a middle range of violations between those of recordkeeping noncompliance and willful negligence. Examples of these types of violations are those in which a carrier or driver simply fails to maintain equipment or disregards hours-of-service limitations because it is inconvenient or because it is profitable not to comply. These types of violations are not isolated human errors, but rather patterns of equipment violations or operating conduct that any responsible business entity could detect and correct if it wanted to meet its full safety responsibility to the public. The Act provides for sanctions for those "serious patterns of safety violations" that individually may not have a high probability of causing an immediate accident, but collectively could lead to accidents.

The Act provides for a civil penalty of up to $500 for a recordkeeping violation. Each day of a violation constitutes a separate offense. However, the total civil penalty assessed a violator for all recordkeeping offenses relating to a single violation cannot exceed $2,500. If a serious pattern of safety violations, other than recordkeeping violations, exists or has occurred, a civil penalty of up to $1,000 for each violation may be assessed, to a maximum of $10,000 for each such pattern of violations. If a substantial health or safety violation exists or has occurred which could reasonably lead to or has resulted in serious personal injury or death, a civil penalty of up to $10,000 may be assessed for each violation. No civil penalty, except recordkeeping penalties, may be assessed against an employee unless it is determined that the employee's action constituted gross negligence or reckless disregard for safety, in which case the civil penalty may not exceed a total of $1,000 for each violation. A conviction of driving a commercial motor vehicle while under the influence of drugs or intoxicating beverages is an example of the latter category.

Provision is also made for criminal penalties for employers and employees operating a commercial motor vehicle who knowingly and willfully violate the safety regulations. Penalties for an employer are a fine of up to $25,000 and/or imprisonment not to exceed one year. An employee is subject to a fine not to exceed $2,500 if while operating a commerical motor vehicle the employee's activities led or could have led to serious injury or death.

Finally, the purpose of these criminal and civil penalties is to induce further compliance and effect a positive change in motor carrier safety management behavior. In assessing civil penalties, or, when appropriate, in recommending criminal penalties, the Federal Highway Administration's Office of Motor Carriers intends to aggressively pursue these penalties to the fullest. At the same time, the office of Motor Carriers will take into account the nature, circumstances, extent, and gravity of the violations; also considered will be the degree of culpability, history of prior offenses, ability to pay, the effect on the ability of the violator to continue to do business, and such other matters as justice and public safety may require. The structured programs discussed in Section "A" will provide the FHWA with the means to make more effective use of authorized sanctions, and improve the rationale for resorting to this type of enforcement. However, sanctions will be applied when appropriate, even for carriers whose overall safety rating is or has been satisfactory.

Title 49 CFR 386.72(b), which was added on June 1, 1987 (52 FR 20587),

BEST COPY AVAILABLE

implements the procedure as to motor carrier safety imminent hazards. This section gives the Associate Administrator for Motor Carriers, or his or her delegate, authority to order a vehicle or employee out of service or order an employer to cease all or part of the employer's commercial motor vehicle opeations. In this context, "imminent hazard" means any condition of the carrier's commercial motor vehicle operations which is likely to result in serious injury or death if not discontinued immediately. Section 386.72(b) is being amended to make it clear that immediate compliance is required.

FHWA's existing authority to place vehicles (§ 396.9) and drivers (§ 395.13) out-of-service on the highway remains unchanged.

C. Safetynet

In order to support the three programs previously described, the FHWA has established an information exchange system called Safetynet.

Safetynet is an automated system of microcomputers and programs that collects safety information from states participating in the Motor Carrier Safety Assistance Program (MCSAP). It will integrate the state vehicle inspection systems with the Federal databases which contain inspection, accident, and safety audit information. There will be a full interchange of data between the states and the Federal computer systems.

Safetynet will support the mission of the FHWA's Office of Motor Carriers by identifying problem carriers through uniform data collected on a nationwide basis by all participating states. The performance of problem carriers will be tracked and follow-up actions initiated.

When Safetynet is fully developed as a system, the motor carrier safety profile will contain information from the following sources:

- Roadside driver and vehicle inspections,
- Safety and compliance reviews,
- Vehicle accident information, and
- Enforcement information, sanctions, etc.

Safetynet will enhance decisionmaking and assist FHWA in tracking and monitoring carriers in the National Education and Technical Assistance, Commercial Accident Prevention and Evaluation, and Selective Compliance and Enforcement Programs. The information system will help target carriers for safety and compliance reviews, determine which carriers require further review, or indicate other appropriate action.

III. Section-by-Section Discussion

Section 385.1 Purpose and Scope

A purpose and scope section specifies that this rule establishes procedures to determine the safety fitness of and assign safety ratings to all motor carriers subject to the jurisdiction of the FHWA, including applicants to the ICC for motor carrier operating authority.

Section 385.3 Definitions

The definition section defines the meaning of three safety ratings: "Satisfactory," "conditional," and "unsatisfactory." Unrated is not considered a safety rating. Additional definitions define the two types of reviews conducted at a motor carrier's principal place of business which will result in the assignment of a safety rating or a change in a safety rating. The two types of examinations are "compliance" and "safety" reviews. Definitions have also been included for the terms "applicable safety regulations or requirements," "preventable accident," and "safety management controls."

Section 385.5 Safety Fintness Standard

The safety fitness standard was developed as a satisfactory benchmark against which a motor carrier may measure its safety posture. Also, FHWA in determining the safety fitness of a motor carrier, shall use the safety fitness standard for assigning safety ratings.

Section 385.7 Factors to be Considered

This section discusses the factors considered in determining the safety fitness of a motor carrier and assigning a safety rating. The factors considered indicate whether or not a motor carrier has adequate safety management controls in place to ensure compliance with applicable regulatory standards, and whether these controls are functioning effectively. The safety and compliance reviews are the primary tools for gathering information for the assessment of a carrier's safety fitness. The factors considered include the following:

- Adequacy of safety management controls.
- Frequency and severity of regulatory violations.
- Frequency and severity of driver/vehicle roadside inspection regulatory violations.
- Number of out-of-service driver/vehicle violations.
- Increase or decrease in identical regulatory violations discovered in safety and compliance reviews.
- Frequency of accidents, hazardous materials incidents, reportable accident rate per million miles, reportable preventable accident rate per million miles and whether these accident and incident indicators have improved or deteriorated over time.
- Violations of state safety rules, regulations, standards, and orders applicable to commercial motor vehicles and motor carrier safety when compatible with Federal rules, regulations, standards, and orders.

The number of violations and vehicle accidents will be weighted to reflect the size of the carrier's operations before assigning a safety rating.

Section 385.9 Determination of a Safety Rating

The determination of safety fitness and the assignment of safety ratings will be made by FHWA following the assessment of the rating factors prescribed in § 385.7. The safety fitness determination involves comparing the current safety fitness posture to the safety fitness standard and assigning a safety rating which best describes the current safety fitness posture of the evaluated motor carrier.

Section 385.11 Notification of Safety Ratings

The section for notification of safety ratings stipulates that the FHWA shall notify a motor carrier in writing of the safety rating assigned.

Notification of a "conditional" or "unsatisfactory" rating will include a list of those items for which immediate corrective action must be taken to improve the carrier's overall safety performance.

Section 385.13 Motor Carrier Certification

A motor carrier receiving a safety rating of less than satisfactory (adverse rating) will be advised of those specific items for which immediate corrective action must be taken.

A motor carrier receiving a rating of "conditional" or "unsatisfactory" shall certify to the FHWA, within 30 days after receipt of the safety rating, that corrective action has been taken on all items requiring corrective action.

While a motor carrier has 30 days to certify to FHWA that corrective action has been taken, the FHWA is *not* establishing for a motor carrier a 30 day grace period or 30 days of relief from full compliance with applicable Federal safety and hazardous materials regulations. Failure to certify or falsely certifying under this section, moreover, will subject a carrier to additional penalties under 49 U.S.C. 522(b).

VOL 53 ISS 243 DE 19 1988 UMI

BEST COPY AVAILABLE

A motor carrier receiving a conditional or unsatisfactory safety rating will be entered into the Selective Compliance and Enforcement Program, which is one of the national motor carrier safety programs designed to assist the carrier in meeting the safety fitness standard. These carriers will be scheduled for follow-up compliance reviews as appropriate to determine if the safety rating should be changed to satisfactory or if other educational, remedial or punitive measures are necessary.

Finally, a carrier may be required to furnish additional documentation to substantiate any certification, or a carrier may be visited for an on-site review to verify that corrective actions were taken and to determine if the carrier meets the safety fitness standard.

Section 385.15 Review of a Safety Rating

The opportunity to submit a formal petition for review of a safety rating is provided for nonroutine cases such as those where the carrier disputes the findings of an on-site safety or compliance review underlying the rating. The section pertaining to review of safety ratings establishes the procedure for filing a petition for such review and indicates the basis for consideration of a change in a safety rating.

Section 385.17 Request for a Change in a Safety Rating

This section establishes the procedure for a motor carrier to request a change in a safety rating where there are no disputes and the basis for the change of the rating is evidence that corrective action has been taken and that operations are currently being conducted pursuant to the safety fitness standard.

Section 385.19 Safety Fitness Information

The safety rating assigned to a motor carrier is considered to be a factor that affects highway safety and, therefore, will be made available to the public upon request.

The FHWA when considering requests for safety fitness information, will make available information regarding the specific rating classification of a motor carrier. These rating classifications are: "unsatisfactory," "conditional," and "satisfactory," and are defined in 49 CFR 385.3, Definitions. Further, when reporting on unrated carriers, FHWA will distinguish between those carriers which have or have not filed Form MCS–150.

The FHWA believes that making safety ratings public will have a positive economic impact on the industry and enhance highway safety. Given a choice, a shipper will prefer using a company that meets the safety fitness standard since the shipper's economic well-being depends upon moving the product safely and efficiently through the transportation system. Insurance companies may also evaluate this information and through setting premiums that consider this rating, provide an economic incentive to help maintain safety. Safety ratings will be made available to the Interstate Commerce Commission and the Department of Defense by remote computer terminals to further enhance motor carrier safety.

Written or oral requests for safety ratings must identify the motor carrier by name, principal office address, and, if known, the docket number assigned by the Interstate Commerce Commission.

Written requests must be addressed to the Office of Motor Carrier Information Management and Analysis, HIA–1, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590.

Oral requests will be given an oral response by telephone. The FHWA will make available, through the communications media, a telephone number for interested persons who wish to obtain the safety rating of a motor carrier.

Section 385.21 Motor Carrier Identification Report

This section requires all unrated motor carriers to file a one-time short Motor Carrier Identification Report designated Form MCS–150. The purpose of the report is to identify previously unknown motor carriers operating in interstate or foreign commerce, to update the motor carrier census, to require the carrier to certify that it is familiar with the Federal Motor Carrier Safety Regulations, and to assist FHWA in prioritizing motor carriers for safety review contacts. A motor carrier that has received written notification of a safety rating by FHWA is not required to file the Motor Carrier Identification Report.

The ICC Register is published each working day, Monday through Friday, except for legal holidays. It contains a daily summary of motor carrier applications, decisions, and notices issued by the ICC. A copy of the ICC Register is furnished to the FHWA. The FHWA monitors this Register and, when an unrated motor carrier makes application to the ICC for motor carrier operating authority, the FHWA will attempt to contact the applicant personally for the purpose of initiating a safety fitness review. However, it is the carrier's responsibility to obtain and file the Form MCS–150. FHWA will attempt to conduct an on-site review and assign the carrier a safety rating prior to the date the ICC issues a final decision on the motor carrier's application for permanent operating authority. Such a safety rating will be available to the ICC by remote computer terminals. The rated entity will be advised of its safety rating in writing.

Section 385.23 Failure to Report

All unrated motor carriers currently conducting operations in interstate or foreign commerce are required to file a one-time Motor Carrier Identification Report within 90 days after the effective date of this rule. A motor carrier beginning operations after the effective date of this rule is required to file the form within 90 days after beginning operations. Failing to report, making false statements, or furnishing misleading information shall subject the motor carrier to civil or criminal penalties.

IV. Regulatory Impact

The FHWA has determined that this document does not contain a major rule under Executive Order 12291. However, this rulemaking action has been placed on DOT's Regulatory Program for significant rulemaking. It is anticipated that the direct cost of this rulemaking to the individual applicant will be minimal since it imposes little regulatory obligation upon the motor carrier. The benefits provided by this rule would be a decrease in accidents and consequently a decrease in economic and societal costs. The economic and safety impacts of this rule are further discussed and analyzed in a Regulatory Evaluation and Regulatory Flexibility Analysis which has been prepared and is available for inspection in the public docket and may be obtained from the FHWA at the address provided under the heading "For Further Information Contact."

V. Regulatory Flexibility Act/Paper Reduction

With regard to the assessment of the impact this rule will have on small entities pursuant to the Regulatory Flexibility Act (Pub. L. 96–354), the reasons for, objectives, and legal basis of this action have been previously explained in this notice. In consideration of the potential benefits, the FHWA hereby certifies that this action will not

VOL
53
ISS
243
DE
19
1988
UMI

have a significant economic impact on a substantial number of small entities.

The collection of information requirements contained in this rule are being submitted to the Office of Management and Budget for review under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Federalism Assessment

This final regulation revises Part 385 of the FMCSRs and addresses the issue of safety fitness procedures as it pertains to motor carriers of property and passengers engaged in interstate or foreign commerce. Nothing in this document directly preempts any State law or regulation. Accordingly, it is certified that the policies contained in this document have been assessed in light of the principles, criteria, and requirements of Executive Order 12612 and it is determined that there is no federalism impact.

List of Subjects

49 CFR Part 385

Highways and roads, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

49 CFR Part 386

Administrative practice and procedure.

(Catalog of Federal Domestic Assistance Program Number 20.217 Motor Carrier Safety).

Issued on December 12, 1988.

Robert E. Farris,

Federal Highway Administrator.

In consideration of the foregoing, the FHWA is amending Title 49, Code of Federal Regulations, Subtitle B, Chapter IIII as follows:

1. Part 385 is revised to read as follows:

PART 385—SAFETY FITNESS PROCEDURES

Sec.

385.1 Purpose and scope.
385.3 Definitions.
385.5 Safety fitness standard.
385.7 Factors to be considered in determining a safety rating.
385.9 Determination of a safety rating.
385.11 Notification of a safety rating.
385.13 Motor carrier certification.
385.15 Review of a safety rating.
385.17 Request for a change in a safety rating.
385.19 Safety fitness information.
385.21 Motor carrier identification report.
385.23 Failure to report.
Appendix—Form MCS–150, Motor Carrier Identification Report

Authority: 49 U.S.C. app. 2512; 49 U.S.C. 104, 504, 521(b)(5)(A), and 3102; 49 CFR 1.48.

§ 385.1 Purpose and scope.

(a) This part establishes procedures to determine the safety fitness of motor carriers, to assign safety ratings, and to take remedial action when required.

(b) The provisions of this part apply to all motor carriers subject to the jurisdiction of the FHWA.

§ 385.3 Definitions.

Applicable safety regulations or requirements means 49 CFR Subtitle B, Chapter III, Subchapter B—Federal Motor Carrier Safety Regulations; and 49 CFR Subtitle B, Chapter I, Subchapter C—Hazardous Materials Regulations.

Preventable accident on the part of a motor carrier means an accident (1) that involved a commercial motor vehicle, and (2) that could have been averted but for an act, or failure to act, by the motor carrier or the driver.

Reviews. For the purposes of this part:

(1) *Compliance review* means an on-site investigation of motor carrier operations, such as drivers' hours of service, maintenance and inspection, driver qualification, commercial drivers license requirements, financial responsibility, accidents, and other safety and business records to determine whether a motor carrier meets the safety fitness standard. A compliance review may be conducted to review a motor carrier's operation in response to a request to change a safety rating, to investigate a complaint, or to investigate the operations of an unsatisfactory or conditionally rated motor carrier identified by a safety review, or as part of a routine periodic inspection of a carrier that has been rated satisfactory. The compliance review may result in the initiation of an enforcement action.

(2) *Safety review* means an on-site assessment to determine if a motor carrier has adequate safety management controls in place and functioning to meet the safety fitness standard. The safety review includes a review of selected carrier records and operations. It is used to gather information for assigning ratings to unrated carriers and may also be used to change safety ratings. The safety review will not ordinarily result in the institution of an enforcement action, but may if circumstances warrant.

(3) *Safety management controls* means the systems, programs, practices, and procedures used by a motor carrier to ensure compliance with applicable safety and hazardous materials regulations, to ensure the safe movement of products and passengers through the transportation system, and to reduce the risk of highway accidents and hazardous materials incidents resulting in fatalities, injuries, and property damage.

Safety ratings: (1) *Satisfactory safety rating* means that a motor carrier has in place and functioning adequate safety management controls to meet the safety fitness standard prescribed in § 385.5. Safety management controls are adequate if they are appropriate for the size and type of operation of the particular motor carrier.

(2) *Conditional safety rating* means a motor carrier does not have adequate safety management controls in place to ensure compliance with the safety fitness standard that could result in the occurrences listed in § 385.5(a) through (h).

(3) *Unsatisfactory safety rating* means a motor carrier does not have adequate safety management controls in place to ensure compliance with the safety fitness standard which has resulted in occurrences listed in § 385.5(a) through (h).

(4) *Unrated carrier* means that a safety rating has not been assigned to the motor carrier by the FHWA.

§ 385.5 Safety fitness standard.

The satisfactory safety rating is based on the degree of compliance with the safety fitness standard for motor carriers. To meet the safety fitness standard, the motor carrier shall demonstrate that it has adequate safety management controls in place, which function effectively to ensure acceptable compliance with applicable safety requirements to reduce the risk associated with:

(a) Commercial driver's license standard violations (Part 383),

(b) Inadequate levels of financial responsibility (Part 387),

(c) The use of unqualified drivers (Part 391),

(d) Improper use and driving of motor vehicles (Part 392),

(e) Unsafe vehicles operating on the highways (Part 393),

(f) Nonreporting of accidents (Part 394),

(g) The use of fatigued drivers (Part 395),

(h) Inadequate inspection, repair, and maintenance of vehicles (Part 396),

(i) Transportation of hazardous materials, driving and parking rule violations (Part 397),

(j) Violation of hazardous materials regulations (Parts 170 through 177), and

(k) Motor vehicle accidents and hazardous materials incidents.

§ 385.7 Factors to be considered in determining a safety rating.

The factors to be considered in determining the safety fitness and assigning a safety rating include information from safety reviews, compliance reviews and any other data. The factors may include all or some of the following:

(a) Adequacy of safety management controls. The adequacy of controls may be questioned if their degree of formalization, automation, etc., is found to be substantially below the norm for similar carriers. Violations, accidents or incidents substantially above the norm for similar carriers will be strong evidence that management controls are either inadequate or not functioning properly.

(b) Frequency and severity of regulatory violations.

(c) Frequency and severity of driver/vehicle regulatory violations identified in roadside inspections.

(d) Number and frequency of out-of-service driver/vehicle violations.

(e) Increase or decrease in similar types of regulatory violations discovered during safety or compliance reviews.

(f) Frequency of accidents; hazardous materials incidents; reportable accident rate per million miles; reportable preventable accident rate per million miles; and other accident indicators; and whether these accident and incident indicators have improved or deteriorated over time.

(g) The number and severity of violations of state safety rules, regulations, standards, and orders applicable to commercial motor vehicles and motor carrier safety that are compatible with Federal rules, regulations, standards, and orders.

§ 385.9 Determination of a safety rating.

Following a safety or compliance review of a motor carrier operation, the FHWA, using the factors prescribed in § 385.7, shall determine whether the present operations of the motor carrier are consistent with the safety fitness standard set forth in § 385.5, and assign a safety rating accordingly.

§ 385.11 Notification of a safety rating.

(a) Following a safety or compliance review, the FHWA shall determine the safety fitness of a motor carrier and notify the motor carrier in writing of the assigned safety rating.

(b) Notification of a "conditional" or "unsatisfactory" rating will include a list of those items for which immediate corrective action must be taken.

§ 385.13 Motor carrier certification.

(a) Upon notification of a conditional or unsatisfactory safety rating, a motor carrier shall certify to the FHWA, within 30 days, whether all corrective actions identified by FHWA have been taken.

(b) Certification required by this section must be made to the Regional Director, Office of Motor Carrier Safety, as listed at 49 CFR 390.40, for the FHWA region in which the carrier maintains its principal place of business for safety.

(c) Failure to certify or falsely certifying under this section will be considered a reporting violation under 49 U.S.C. 522(b).

§ 385.15 Review of a safety rating.

(a) A petition for review of a safety rating, where there are factual disputes, must list all factual issues disputed and be accompanied by any information or documents the motor carrier is relying upon as the basis for its petition for a change in its assigned safety rating.

(b) The petition must be submitted to the Director, Office of Motor Carrier Safety Field Operations, within 90 days of the date of notification of the assignment, or change, of a safety rating.

(c) Following the review of a petition, the Director, Office of Motor Carrier Safety Field Operations, may request the motor carrier to submit additional data and attend a conference to discuss the safety rating. Failure to provide information in response to any reasonable or lawful request, or failure to attend the conference may result in dismissal of the petition.

(d) The Director, Office of Motor Carrier Safety Field Operations, shall notify the motor carrier in writing of a decision on a petition for review of a safety rating.

§ 385.17 Request for a change in a safety rating.

(a) A request for a change in a safety rating, where there are no disputes, and when the basis for the change is evidence that corrective action has been taken and that operations are currently being conducted pursuant to the safety fitness standard specified in § 385.5, shall be directed in writing to the Regional Director of Motor Carrier Safety for the FHWA Region in which the motor carrier maintains its principal place of business. The Regional Office addresses are listed in 49 CFR 390.40.

(b) Appropriate Federal Highway Administration personnel will contact the motor carrier relative to scheduling a compliance review.

§ 385.19 Safety fitness information.

(a) Ratings will be made available to the Interstate Commerce Commission and the Department of Defense telephonically or by remote computer terminals.

(b) The safety rating assigned to a motor carrier will be made available to the public upon request. Any person requesting the assigned rating of a motor carrier shall provide the FHWA with the motor carrier name, principal office address, and, if known, the ICC assigned docket number, if any.

(c) Requests shall be addressed to the Office of Motor Carrier Information Management and Analysis, HIA–1, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590.

(d) Oral requests by telephone will be given an oral response.

§ 385.21 Motor carrier identification report.

(a) All motor carriers currently conducting operations in interstate or foreign commerce shall file a Motor Carrier Identification Report, Form MCS–150, within 90 days after the effective date of this rule. Exception: The provisions of this section do not apply to a motor carrier that has received written notification of a safety rating from the FHWA.

(b) All motor carriers beginning operation after the effective date of this rule shall file the Motor Carrier Identification Report, Form MCS–150, within 90 days after beginning operations.

(c) The Motor Carrier Identification Report, Form MCS–150, is available from all FHWA region and division motor carrier safety offices nationwide and from FHWA Office of Motor Carrier Information Management and Analysis, 400 Seventh Street, SW., Washington, DC 20590.

(d) The completed Motor Carrier Identification Report, Form MCS–150, shall be filed with the FHWA, Office of Motor Carrier Information Management and Analysis, 400 Seventh Street, SW., Washington, DC 20590.

§ 385.23 Failure to report.

Failure by a motor carrier to file a

Motor Carrier Identification Report, Form MCS–150, pursuant to the provisions of § 385.23, or furnishing misleading information or making false statements upon the MCS–150 shall subject the offender to the penalties prescribed in Title 49, United States Code, 522(b).

Appendix—Form MCS–150; Motor Carrier Identification Report

Federal Highway Administration, Office of Motor Carriers, Information Management and Analysis, HIA–10, 400 Seventh Street, SW., Washington, DC 20590

Motor Carrier Identification Report

Pursuant to 49 U.S.C. 504 (1982 & Supp. III 1985), and the regulations codified in 49 CFR Part 385, a motor carrier conducting operations in interstate or foreign commerce shall file a one-time Motor Carrier Identification Report, Form MCS–150, within 90 days after the effective date of this rule. A new motor carrier shall file a Form MCS–150 within 90 days after beginning operations. This provision does not apply to a motor carrier that has received written notification of a safety rating from the Federal Highway Administration. The completed MCS–150 shall be filed with the Federal Highway Administration, at the above address.

A. Motor Carrier Identification

Legal Motor Carrier Name _____
Trade Name (if any) _____
Headquarters Address _____
(Physical address, *not* mailing address)

_____
(Number and Street/Route No.)

_____
City State Zip Code
Headquarters Telephone Number (include area code) _____
Interstate Commerce Commission Docket Number (if any) MC– _____

B. Operating Information

1. Circle letter of alphabet preceding each type of cargo you transport.

A. General freight
B. Household goods
C. Metal: sheets, coils, rolls
D. Motor vehicles
E. Driveaway/towaway
F. Logs, poles, beams, lumber
G. Building materials
H. Mobile homes
I. Machinery, large objects
J. Fresh produce
K. Liquids or gases
L. Intermodal containers
M. Passengers
N. Oil-field equipment
O. Livestock
P. Grain, feed, hay
Q. Coal/coke
R. Meat
S. New furniture/fixtures
T. U.S. mail
U. Chemicals
V. Commodities in dry bulk
W. Refrigerated food
X. Beverages
Y. Paper products
Z. Other _____

2. Do you transport hazardous materials in quantities that require placarding? _____ (Yes) _____ (No)

3. Average number of power vehicles operated per month during past 12* months _____

4. Average number of drivers used per month during past 12* months _____

5. Number of vehicle miles traveled during past 12* months _____

* If the information above represents a period of less than 12 months, state the number of months _____

C. Certification Statement

(to be completed by authorized official)

I, _____
(please print name),
certify I am familiar with the Federal Motor Carrier Safety Regulations. Under penalties of perjury, I declare that the information entered on this report is, to the best of my knowledge and belief, true, correct and complete.

Signature _____
Title _____
Date _____

PART 386—[AMENDED]

2. The authority citation for Part 386 continues to read as follows:

Authority: Commercial Motor Vehicle Safety Act of 1986, Title XII of Pub. L. 99–570, 100 Stat. 3207–170 (49 U.S.C. 2701 *et seq.*); Motor Carrier Safety Act of 1984, Pub. L. 98–554, 98 Stat. 2829 (49 U.S.C. 2501 *et seq.*); recodification of Title 49, United States Code, Transportation, Pub. L. 97–449, 96 Stat. 2413 (49 U.S.C. 104(c)(2), 501 *et seq.*, 3101 *et seq.*); Hazardous Materials Transportation Act, Pub. L. 93–633, 88 Stat. 2156 (49 U.S.C. 1801 *et seq.*); Bus Regulatory Reform Act of 1982, Pub. L. 97–261, 96 Stat. 1121 (49 U.S.C. 10927, note); Motor Carrier Act of 1980, Pub. L. 96–296, 94 Stat. 820 (49 U.S.C. 10927, note); 49 CFR 1.45, 1.48.

3. In § 386.72, paragraph (b)(2) is revised to read as follows:

§ 386.72 Imminent hazard.

* * * * *

(b) * * *

(2) Upon the issuance of an order under paragraph (b)(1) of this section, the motor carrier employer or driver employee shall comply immediately with such order. Opportunity for review shall be provided in accordance with 5 U.S.C. 554, except that such review shall occur not later than 10 days after issuance of such order, as provided by section 213(b) of the Motor Carrier Safety Act of 1984 (49 U.S.C. 521(b)(5)).

BILLING CODE 4910–22–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 652

[Docket No. 70617–7148]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of allowable surf clam fishing time.

SUMMARY: NOAA issues this notice to establish allowable fishing time at 36 hours for each quarter of 1989 for vessels harvesting surf clams in the Mid-Atlantic Area of the exclusive economic zone. This action will provide flexibility and predictability to operators in the use of fishing time during the period. The intended effect is to match fishing effort to the available quota for the area.

EFFECTIVE DATE: January 1 through December 30, 1989.

FOR FURTHER INFORMATION CONTACT: Jack Terrill, 508–281–3600 ext. 252.

SUPPLEMENTARY INFORMATION: Regulations implementing the Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fisheries contain at 50 CFR 652.22(a)(3) a provision allowing the Regional Director to revise allowable fishing times to promote fishing for surf clams throughout the year with a minimum of changes. The Regional Director during the first quarter of 1987 decided, with the unanimous support of the Mid-Atlantic Fishery Management Council (Council), to exercise his authority under 50 CFR 652.22(a)(3) to allocate fishing time by quarter and allow each operator the maximum flexibility possible to schedule that time to his/her best advantage. That program was continued for the remainder of 1987 and into 1988 with some modifications required to facilitate enforcement.

For 1988, the Regional Director initially allocated 36 hours of fishing time for each quarter (52 FR 49019, December 29, 1987). Based upon the catch rates for the year, it was necessary to increase the number of trips from six to eight for the last quarter, giving a total number of 26 trips for the year (53 FR 36462, September 20, 1988). The Council at its November 1988 meeting requested public comment on the flexible scheduling of the past two years versus the fixed scheduling alternative enacted previously. Commenters present at the meeting stated that the flexible scheduling

allowed greater flexibility and safety and they requested that no changes be made.

Based on an analysis of 1988 quarterly fishing effort, projected trends for the upcoming quarter and comments from industry, the Regional Director has decided to again allocate 36 hours of fishing time for each quarter of 1989. That time must be scheduled in the form of six fishing trips of six hours duration each. Adjustments to the number of trips to insure the attainment of the quarterly quota will be made to the quarter immediately following when more complete catch information is available.

The fishing trips must be scheduled with 10 days advance written notice to the Surf Clam Coordinator, NMFS, 2 State Fish Pier, Gloucester, Massachusetts 01930. If this publication appears too late to allow such notice for those wishing to schedule trips during the first week of the first quarter, trips for that week only can be scheduled by calling (508) 281–3600 ext. 252.

Other Matters

This action is taken under the authority of 50 CFR Part 652 and is taken in compliance with Executive Order 12291.

Authority: 16 U.S.C. 1801 *et seq.*

Proposed Rules

Federal Register
Vol. 53, No. 243
Monday, December 19, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Ch. III

[Docket No. 88-200]

Varroa Mite Negotiated Rulemaking Advisory Committee; Meeting

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The purpose of this notice is to announce a meeting of the Varroa Mite Negotiated Rulemaking Advisory Committee.

DATES: January 5 and 6, 1989, from 9 a.m. to 5 p.m. each day.

ADDRESSES: The meeting will be held at the Federal Mediation and Conciliation Service, Room 201, 2100 K Street, NW., Washington, DC 20427.

FOR FURTHER INFORMATION CONTACT: Helene Wright, Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782 (301) 436–8682.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to convene members of the Varroa Mite Negotiated Rulemaking Advisory Committee to reach consensus on terms of a proposed rule to prevent the interstate spread of the Varroa mite.

The meeting will be open to the public. Public participation will be limited to written statements. Anyone who wants to file a written statement with the Committee about meeting topics may do so either at the time of the meeting or before the meeting, by sending the statement to Helene Wright, Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

This notice is given in compliance with the Federal Advisory Committee Act (Pub. L. 92–463).

Done in Washington, DC, this 14th day of December, 1988.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–M

Farmers Home Administration

7 CFR Part 1951

Loan and Grant Programs; Servicing and Collections

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its Community Facilities loan and grant servicing regulations. This action is being taken to clarify the regulation. The intended effect is to provide more comprehensive and straightforward guidance to FmHA staff and recipients of assistance relating to the servicing of the affected loans.

DATE: Comments must be received on or before January 18, 1989.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives and Forms Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Public reporting burden for this collection of information is estimated to vary from one-half to 1 hour per response, with an average of 52 minutes per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, Room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paparwork Reduction Project (OMB# 0575–0103), Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: T.W. Davis, Loan Specialist, Water and Waste Disposal Division, Farmers Home Administration, USDA, South Agriculture Building, Room 6334, Washington, DC 20250, telephone: (202) 382–9586 or Bonnie Justice, Loan Specialist, Community Facilities Division, Farmers Home Administration, USDA, South Agriculture Building, Room 6314, Washington, DC 20250, telephone: (202) 382–1490.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and has been determined to be "nonmajor" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or prices for consumers; individual industries; Federal, State, or Local government agencies; or geographic regions. It has been determined that this action will not have a significant economic inpact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal reporting requirements. Furthermore, there will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This action is not expected to substantially affect budget outlay, to affect more than one agency or to be controversial. The net result is expected to provide better service to rural communities.

These programs/activities are listed in the Catalog of Federal Domestic Assistance under Nos. 10.418, Water and Waste Disposal Systems for Rural Communities, and 10.423, Community Facilities Loans, and are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and Local officials. (7 CFR Part 3015, Subpart V, 48 FR 29112, June 24, 1983, and 7 CFR Part 1940, Subpart J, "Intergovernmental Review of Farmers Home Administration Programs and Activities").

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Programs." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Background: This action is primarily to change regulations concerning the servicing of unauthorized assistance in the form of interest subsidies for which a recipient is not eligible and to provide for recovery of the unauthorized assistance. The alternatives are to do nothing or to proceed with revision of the regulation. FmHA believes that rewriting the regulation while incorporating the changes will result in the most efficient conduct of internal Agency administrative activities and provision of service to the public.

The primary changes include the following:

1. When the recipient of a loan should have been charged a higher interest rate than that in the debt instrument which resulted in the receipt of unauthorized subsidy benefits, the interest rate will be adjusted to the appropriate rate in effect for which the recipient was eligible at the time of loan approval or closing whichever is lower.
